

PUBLIC TRANSPARENCY REPORT

2024

Développement international Desjardins

Generated 25-11-2024

About this report

PRI reporting is the largest global reporting project on responsible investment. It was developed with investors, for investors.

PRI signatories are required to report publicly on their responsible investment activities each year. In turn, they receive a number of outputs, including a public and private Transparency Report.

The public Transparency Reports, which are produced using signatories' reported information, provide accountability and support signatories to have internal discussions about their practices and to discuss these with their clients, beneficiaries, and other stakeholders.

This public Transparency Report is an export of the signatory's responses to the PRI Reporting Framework during the 2024 reporting period. It includes the signatory's responses to core indicators, as well as responses to plus indicators that the signatory has agreed to make public.

In response to signatory feedback, the PRI has not summarised signatories' responses – the information in this document is presented exactly as it was reported.

For each of the indicators in this document, all options selected by the signatory are presented, including links and qualitative responses. In some indicators, all applicable options are included for additional context.

Disclaimers

Legal Context

PRI recognises that the laws and regulations to which signatories are subject differ by jurisdiction. We do not seek or require any signatory to take an action that is not in compliance with applicable laws. All signatory responses should therefore be understood to be subject to and informed by the legal and regulatory context in which the signatory operates.

Responsible investment definitions

Within the PRI Reporting Framework Glossary, we provide definitions for key terms to guide reporting on responsible investment practices in the Reporting Framework. These definitions may differ from those used or proposed by other authorities and regulatory bodies due to evolving industry perspectives and changing legislative landscapes. Users of this report should be aware of these variations, as they may impact interpretations of the information provided.

Data accuracy

This document presents information reported directly by signatories in the 2024 reporting cycle. This information has not been audited by the PRI or any other party acting on its behalf. While this information is believed to be reliable, no representations or warranties are made as to the accuracy of the information presented. The PRI has taken reasonable action to ensure that data submitted by signatories in the reporting tool is reflected in their official PRI reports accurately. However, it is possible that small data inaccuracies and/or gaps remain, and the PRI shall not be responsible or liable for such inaccuracies and gaps.

SENIOR LEADERSHIP STATEMENT

SENIOR LEADERSHIP STATEMENT

SLS 1	CORE	N/A	N/A	PUBLIC	Senior Leadership Statement	GENERAL

Section 1. Our commitment

- Why does your organisation engage in responsible investment?
- What is your organisation's overall approach to responsible investment, and what major responsible investment commitment(s) have you made?

Our mission is to empower disadvantaged populations by providing them access to diversified and secure financial services, such as savings and credit. We also aim to contribute to the economic and social development of developing and emerging countries. Consequently, our investment approach must follow that same mission and drive impact in a responsible and sustainable fashion. Consequently, our responsible investment approach integrates similar ESG criteria across all asset classes.

Section 2. Annual overview

- Discuss your organisation's progress during the reporting year on the responsible investment issue you consider most relevant or material to your organisation or its assets.
- Reflect on your performance with respect to your organisation's responsible investment objectives and targets during the reporting year. Details might include, for example, outlining your single most important achievement or describing your general progress on topics such as the following (where applicable):
 - refinement of ESG analysis and incorporation
 - stewardship activities with investees and/or with policymakers
 - collaborative engagements
 - attainment of responsible investment certifications and/or awards

DID established a new investment fund during the reporting year and the development of this fund enabled us to further improve our investment analysis practices in incorporating ESG factors. We incorporated an ESG and gender lens across the entire investment process including the analysis and exit stages. We also improved our reporting framework, adding multiple KPIs which will help us track and measure our investments progress towards achieving our planned ESG objectives. While stewardship and engagement with policy makers has always made a part of our involvement in our private equity investments, we formalized those activities into internal guidelines.

Section 3. Next steps

- What specific steps has your organisation outlined to advance your commitment to responsible investment in the next two years?

Specifically, DID wishes to further align itself with key global ESG initiatives and put forward our work in responsible investment by beginning to publicly share results and experiences.

Section 4. Endorsement

'The Senior Leadership Statement has been prepared and/or reviewed by the undersigned and reflects our organisation-wide commitment and approach to responsible investment'.

How are your organisation's stewardship activities linked to your investment decision making, and vice versa?

Our approach to active ownership and engagement will vary depending on the nature of its investment:

- For debt investments, we will both monitor aggregate and individual investment financial and ESG data and open a dialogue with its Portfolio Companies to improve practices.
- For equity investments, we will be an active and engaged shareholder. Exercising its voting rights, maintaining an active dialogue with management teams and actively engaging in shareholder proposals are the three main levers it will use to influence and improve ESG practices and disclosures
