

# Sustainable bonds start here

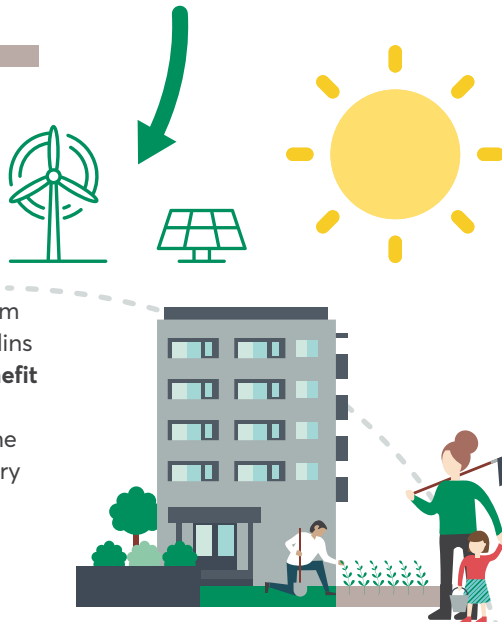

## Issue

Desjardins issues **sustainable bonds** to **raise capital** that will help finance projects with a positive impact.

## Project financing

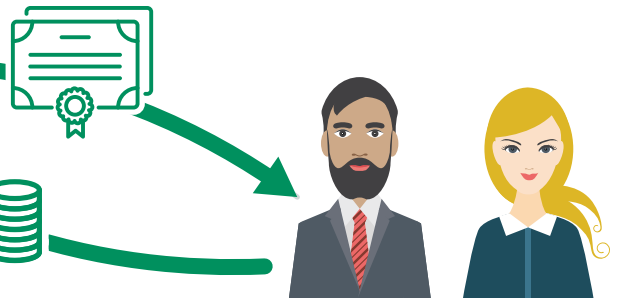

With the money raised from sustainable bonds, Desjardins **finances projects that benefit communities and the environment**. We select the projects carefully, using very strict criteria approved by a recognized external assessment firm.

## Double the positive impact

Communities benefit thanks to **projects that help people and the planet**.

Members and clients earn **returns** on their savings while supporting projects that match their **values**.

## Purchase

**Institutional investors** (e.g. pension funds, asset managers) buy Desjardins's sustainable bonds—a **guaranteed investment** with regular returns.

## Investment products

Institutional investors include sustainable bonds in the **responsible investment and savings products** they offer members and clients (like SocieTerra Funds).
