Ad hoc announcement dated 24 February 2023 pursuant to art. 53 of the Swiss listing rules

Fédération des caisses Desjardins du Québec

CHF 325,000,000 1.735% Covered Bonds 2023 – 2028

(the "Covered Bonds")

Programme for the issuance of Covered Bonds:	The Covered Bonds are issued under the C$26,000,000,000 Global Covered Bond Programme (the "**Programme**") of Fédération des caisses Desjardins du Québec.
Issuer's Name and registered office:	Fédération des caisses Desjardins du Québec, 100, avenue des Commandeurs, Lévis, Québec, Canada G6V 7N5 (the "**Issuer**" or the "**Federation**", the Issuer and its subsidiaries, the member caisses in Québec, the Fonds de sécurité Desjardins and the Caisse Desjardins Ontario Credit Union Inc. the "**Desjardins Group**").
Covered Bond Guarantor's Name and registered office:	CCDQ Covered Bond (Legislative) Guarantor Limited Partnership, 66 Wellington Street West, Suite 5300, TD Bank Tower, Toronto, Ontario, Canada M5K 1E6 (the "**Covered Bond Guarantor**").
Security Number/ ISIN/Common Code:	124.230.130 / CH1242301302 / 257777936

Desjardins Group Management's Discussion and Analysis

Desjardins Group (hereinafter also referred to as Desjardins) comprises the Desjardins caisses in Québec and Caisse Desjardins Ontario Credit Union Inc. (the caisses), the Fédération des caisses Desjardins du Québec (the Federation) and its subsidiaries, and the Fonds de sécurité Desjardins.

The Management's Discussion and Analysis (MD&A) dated February 22, 2023, presents the analysis of the results of and main changes to Desjardins Group's balance sheet for the year ended December 31, 2022, in comparison to previous fiscal years. Desjardins Group reports financial information in compliance with Regulation 52-109 respecting Certification of Disclosure in Issuers' Annual and Interim Filings ("Regulation 52-109") prescribed by the Canadian Securities Administrators (CSA). Unlike the Federation, Desjardins Group is not a reporting issuer, on a combined basis, under this or any other applicable securities regulations. Pursuant to Decision No. 2021-FS-0091 of the Autorité des marchés financiers (AMF) dated April 23, 2021, the Combined Financial Statements and MD&As of Desjardins Group are to be filed by the Federation instead of the Consolidated Financial Statements and MD&As of the Federation, in order to meet its financial disclosure obligations as a reporting issuer under Regulation 51-102 respecting Continuous Disclosure Obligations of the CSA, and the Federation is to maintain controls and procedures with respect to the Combined Financial Statements and MD&As of Desjardins Group in compliance with Regulation 52-109. Since April 23, 2021, and pursuant to the AMF and CSA decision, the Federation has used the financial statements and MD&As of Desjardins Group for all relevant purposes under the applicable securities regulations. Information on the controls and procedures with respect to the Combined Financial Statements and MD&As of Desjardins Group may be found in Section 5.0, "Additional information", of this MD&A.

The MD&A should be read in conjunction with Desjardins Group's Combined Financial Statements, including the Notes thereto, as at December 31, 2022.

Additional information about Desjardins Group is available on the SEDAR website at www.sedar.com (under the Desjardins Capital Inc. profile for the years ended prior to December 31, 2021 and, since first quarter of 2021, under the Fédération des caisses Desjardins du Québec profile). The Annual Information Form of the Federation (under the Fédération des caisses Desjardins du Québec profile) can be found on SEDAR as well. More information is available on the Desjardins website at www.desjardins.com/ca/about-us/investor-relations. None of the information presented on these sites is incorporated by reference into this MD&A.

The Combined Financial Statements have been prepared by Desjardins Group's management in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), and the accounting requirements of the AMF in Québec, which do not differ from IFRS. IFRS represent Canadian generally accepted accounting principles (GAAP). The accounting policies used are the same as those in 2021. For more information about the accounting policies used, see Note 2, "Significant accounting policies", to the Combined Financial Statements.

This MD&A was prepared in accordance with the regulations in force on continuous disclosure obligations issued by the CSA. Unless otherwise indicated, all amounts are presented in Canadian dollars ($) and are primarily from Desjardins Group's Combined Financial Statements.

Glossary 113

CAUTION CONCERNING FORWARD-LOOKING STATEMENTS

Desjardins Group's public communications often include oral or written forward-looking statements, within the meaning of applicable securities legislation, particularly in Québec, Canada and the United States. Such forward-looking statements are contained in this MD&A and may be incorporated in other filings with Canadian regulators or in any other communications.

The forward-looking statements include, but are not limited to, comments about Desjardins Group's objectives regarding financial performance, priorities, operations, the review of economic conditions and financial markets, as well as the outlook for the Québec, Canadian, U.S. and global economies, and the impact of the COVID-19 pandemic on its operations, its results and its financial position, as well as on economic conditions and financial markets. Such forward-looking statements are typically identified by words or phrases such as "target", "objective", "believe", "expect", "count on", "anticipate", "intend", "estimate", "plan", "forecast", "aim", "propose", "should" and "may", words and expressions of similar import, and future and conditional verbs.

By their very nature, such statements involve assumptions, uncertainties and inherent risks, both general and specific. Desjardins Group cautions readers against placing undue reliance on forward-looking statements since a number of factors, many of which are beyond Desjardins Group's control and the effects of which can be difficult to predict, could influence, individually or collectively, the accuracy of the assumptions, predictions, forecasts or other forward-looking statements in this MD&A. It is also possible that these assumptions, predictions, forecasts or other forward-looking statements, as well as Desjardins Group's objectives and priorities, may not materialize or may prove to be inaccurate and that actual results differ significantly. Furthermore, the uncertainty created by the COVID-19 pandemic has greatly increased this risk by adding to the difficulty of making assumptions, predictions, forecasts or other forward-looking statements compared to previous periods.

The factors that may affect the accuracy of the forward-looking statements in the MD&A include those discussed in Section 4.0, "Risk management", of this MD&A and, in particular, credit, market, liquidity, operational, insurance, strategic and reputation risk, as well as environmental or social risk, and regulatory risk.

Such factors also include those related to security breaches, corporate and household indebtedness, technological advancement and regulatory developments, interest rate fluctuations, climate change, biodiversity loss and geopolitical uncertainty. Furthermore, there are factors related to general economic and business conditions in regions in which Desjardins Group operates; monetary policies; the critical accounting estimates and accounting standards applied by Desjardins Group; new products and services to maintain or increase Desjardins Group's market share; geographic concentration; acquisitions and joint arrangements; credit ratings; reliance on third parties; the ability to recruit and retain talent; tax risk and the COVID-19 pandemic. Other factors include interest rate benchmark reform, unexpected changes in consumer spending and saving habits, the potential impact of international conflicts on operations, public health crises, such as pandemics and epidemics, or any other similar disease affecting the local, national or global economy, as well as Desjardins Group's ability to anticipate and properly manage the risks associated with these factors despite a disciplined risk management environment. Additional information about these factors is found in Section 4.0, "Risk management", of this MD&A.

It is important to note that the above list of factors that could influence future results is not exhaustive. Other factors could have an effect on Desjardins Group's results. Additional information about these and other factors is found in Section 4.0, "Risk management", of this MD&A.

Although Desjardins Group believes that the expectations expressed in these forward-looking statements are reasonable and founded on valid bases, it cannot guarantee that these expectations will materialize or prove to be accurate. Desjardins Group cautions readers against placing undue reliance on these forward-looking statements when making decisions, given that actual results, conditions, actions or future events could differ significantly from the targets, expectations, estimates or intentions advanced in them, explicitly or implicitly. Readers who rely on these forward-looking statements must carefully consider these risk factors and other uncertainties and potential events, including the uncertainty inherent in forward-looking statements.

The significant economic assumptions underlying the forward-looking statements in this MD&A are described in Section 1.5, "Economic environment and outlook" of this MD&A. These assumptions may also be updated in the "Economic environment and outlook" section of the quarterly MD&As. Readers are cautioned to consider the foregoing factors when reading this section. When relying on forward-looking statements to make decisions about Desjardins Group, they should carefully consider these factors, as well as other uncertainties and contingencies. To determine our economic growth forecasts, in general, and for the financial services sector, in particular, we mainly use historical economic data provided by recognized and reliable organizations, empirical and theoretical relationships between economic and financial variables, expert judgment and identified upside and downside risks for the domestic and global economies. Given the evolution of the COVID-19 pandemic and the Ukraine war, and the impact of these events on the global economy and on financial market conditions, as well as on the business operations, financial results and financial position of Desjardins Group, there is greater uncertainty associated with our economic assumptions compared with periods prior to the onset of these events as these assumptions are based on uncertain future developments and it is difficult to predict the extent of the long-term effects of these events.

Any forward-looking statements contained in this MD&A represent the views of management only as at the date hereof, and are presented for the purpose of assisting readers in understanding and interpreting Desjardins Group's financial position as at the dates indicated or its results for the periods then ended, as well as its strategic priorities and objectives as considered as at the date hereof. These forward-looking statements may not be appropriate for other purposes. Desjardins Group does not undertake to update any oral or written forward-looking statements that could be made from time to time by or on behalf of Desjardins Group, except as required under applicable securities legislation.

NON-GAAP AND OTHER FINANCIAL MEASURES

To measure its performance, Desjardins Group uses different GAAP (IFRS) financial measures and various other financial measures, some of which are Non-GAAP financial measures. *Regulation 52-112 respecting Non-GAAP and Other Financial Measures Disclosure* (Regulation 52-112) provides guidance to issuers disclosing specified financial measures, including those used by Desjardins Group below:

- Non-GAAP financial measures;
- Non-GAAP ratios;
- Supplementary financial measures.

Non-GAAP financial measures

Non-GAAP financial measures used by Desjardins Group, and which do not have a standardized definition, are not directly comparable to similar measures used by other companies, and may not be directly comparable to any GAAP measures. Investors, among others, may find these non-GAAP financial measures useful in analyzing Desjardins Group's overall performance or financial position. They are defined as follows:

Giving back to members and the community

By its very nature as a cooperative financial group, Desjardins Group's mission is to improve the economic and social well-being of people and communities. The amounts returned to members and the community are in the form of member dividends, sponsorships, donations and scholarships.

More detailed information about the amount returned to members and the community may be found in Table 5, "Financial highlights", in this MD&A.

Income

Operating income

The concept of operating income is used to analyze financial results. This concept allows for better structuring of financial data and makes it easier to compare operating activities from one period to the next by excluding the volatility of results specific to investments, particularly regarding the extent of life and health insurance and property and casualty insurance operations, for which a very large proportion of investments are recognized at fair value through profit or loss. The analysis therefore breaks down Desjardins Group's income into two parts, namely operating income and investment income, which make up total income. This measure is not directly comparable to similar measures used by other companies.

Operating income includes net interest income, generated mainly by the Personal and Business Services segment and the Other category, net premiums and other operating income such as deposit and payment service charges, lending fees and credit card service revenues, income from brokerage and investment fund services, management and custodial service fees, foreign exchange income as well as other income. These items, taken individually, correspond to those presented in the Combined Financial Statements.

Investment income

Investment income comprises net investment income on securities classified and designated as being at fair value through profit or loss, net investment income on securities classified as being at fair value through other comprehensive income, and net investment income on securities measured at amortized cost and other investment income, which are included under "Net investment income (loss)" in the Combined Statements of Income. Investment income also includes the overlay approach adjustment for insurance operations financial assets. The life and health insurance and property and casualty insurance subsidiaries' matching activities, which include changes in fair value, gains and losses on disposals and interest and dividend income on securities, are presented with investment income given that these assets back insurance liabilities, which are recognized under expenses related to claims, benefits, annuities and changes in insurance contract liabilities in the Combined Financial Statements. In addition, this investment income includes changes in the fair value of investments for the Personal and Business Services segment, recognized at fair value through profit or loss.

The following table shows the correspondence of total income between the MD&A and the Combined Financial Statements.

Table 1 – Correspondence of total income between the MD&A and the Combined Financial Statements

For the years ended December 31

(in millions of dollars)	2022	2021	2020
Presentation of income in the Combined Financial Statements			
Net interest income	**$ 6,330**	$ 5,786	$ 5,640
Net premiums	**11,842**	11,278	9,920
Other income			
Deposit and payment service charges	**448**	424	388
Lending fees and credit card service revenues	**991**	735	628
Brokerage and investment fund services	**989**	1,108	954
Management and custodial service fees	**786**	732	617
Net investment income (loss)[1][2]	**(4,505)**	319	3,116
Overlay approach adjustment for insurance operations financial assets	**747**	(404)	(42)
Foreign exchange income	**119**	121	103
Other	**293**	221	149
Total income[2]	**$ 18,040**	$ 20,320	$ 21,473
Presentation of income in the MD&A			
Net interest income	**$ 6,330**	$ 5,786	$ 5,640
Net premiums	**11,842**	11,278	9,920
Other operating income			
Deposit and payment service charges	**448**	424	388
Lending fees and credit card service revenues	**991**	735	628
Brokerage and investment fund services	**989**	1,108	954
Management and custodial service fees	**786**	732	617
Foreign exchange income	**119**	121	103
Other	**293**	221	149
Operating income	**21,798**	20,405	18,399
Investment income (loss)			
Net investment income (loss)[1][2]	**(4,505)**	319	3,116
Overlay approach adjustment for insurance operations financial assets	**747**	(404)	(42)
Investment income (loss)	**(3,758)**	(85)	3,074
Total income[2]	**$ 18,040**	$ 20,320	$ 21,473

(1) The breakdown of this line item is presented in Note 27, “Net interest income and net investment income (loss)”, to the Combined Financial Statements.

(2) In order to take into account the life and health insurance and P&C insurance subsidiaries’ matching activities, the change in this line item must be analyzed together with “Claims, benefits, annuities and changes in insurance contract liabilities” in the Combined Statements of Income.

Non-GAAP ratios

Non-GAAP ratios that are used by Desjardins Group and do not have a standardized definition, are not directly comparable to similar measures used by other companies, and may not be directly comparable to any GAAP measures. Regulation 52-112 states, among other things, that any ratio which has at least one non-GAAP financial measure meets the definition of a non-GAAP ratio. Non-GAAP ratios can be useful to investors in analyzing Desjardins Group’s financial position or performance, and they are defined as follows:

Growth in operating income and growth differential between operating income and non-interest expense

Growth in operating income is used to measure growth in Desjardins Group’s operations.

The growth differential between operating income and non-interest expense is used to measure sustainability and profitability. It is the difference between the growth rate for operating income and the growth rate for non-interest expense.

The following table presents growth in operating income as well as the growth differential between operating income and non-interest expense.

Table 2 – Growth in operating income and growth differential between operating income and non-interest expense

For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Operating income	**$ 21,798**	$ 20,405	$ 18,399
Growth in operating income	**6.8 %**	10.9 %	3.0 %
Non-interest expense	**$ 10,638**	$ 9,566	$ 8,297
Growth in non-interest expense	**11.2 %**	15.3 %	3.3 %
Growth differential between operating income and non-interest expense	**(4.4)%**	(4.4)%	(0.3)%

Productivity index

The productivity index is used to measure efficiency and is equal to the ratio of non-interest expense to total income, net of expenses related to claims, benefits, annuities and changes in insurance contract liabilities, expressed as a percentage. The lower the ratio, the higher the productivity. Total income excluding claims is a non-GAAP financial measure. It is used to exclude volatility from the investment results of life and health insurance and P&C insurance operations where a very large proportion of the investments is recognized at fair value through profit or loss and is reflected by a similar change in actuarial liabilities included in “Claims, benefits, annuities and changes in insurance contract liabilities” in the Combined Statements of Income.

The following table presents the productivity index.

Table 3 – Productivity index

For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Non-interest expense	**$ 10,638**	$ 9,566	$ 8,297
Total income	**18,040**	20,320	21,473
Claims, benefits, annuities and changes in insurance contract liabilities	**(4,500)**	(6,883)	(9,233)
Total income excluding claims	**$ 13,540**	$ 13,437	$ 12,240
Productivity index	**78.6 %**	71.2 %	67.8 %

Net interest margin

Net interest margin is used to measure the profitability of interest-bearing assets, net of financing cost. It is equal to net interest income expressed as a percentage of average interest-bearing assets.

Average interest-bearing assets and average interest-bearing liabilities are non-GAAP financial measures that reflect Desjardins Group’s financial position and are equal to the average of month-end balances for the year. Average interest-bearing assets include securities, cash and deposits with financial institutions, as well as loans. Average interest-bearing liabilities include deposits, subordinated notes and other interest-bearing liabilities. Average interest-bearing assets and liabilities exclude insurance assets and liabilities as well as all other assets and liabilities not generating net interest income.

Table 8, “Net interest income on average assets and liabilities”, of this MD&A provides more detailed information on net interest margin, average interest-bearing assets and average interest-bearing liabilities.

Loss ratio – Expense ratio – Combined ratio

These ratios are used to measure and analyze the performance of the Property and Casualty Insurance segment’s operations, and more specifically:
- Loss ratio: Used as a measure of business quality.
- Expense ratio: Used as a measure of the effectiveness of non-interest expense management.
- Combined ratio: Used as a measure of business profitability, excluding the impact of investment income.

The loss ratio is equal to incurred claims, net of reinsurance, expressed as a percentage of net premiums, excluding the market yield adjustment. Market yield adjustment is defined as the impact of changes in the discount rate on the provisions for claims and adjustment expenses, based on the change in the market-based yield of the underlying assets for these provisions. Claims expenses, net of reinsurance and excluding the market yield adjustment, are a non-GAAP financial measure. This measure is used to eliminate volatility due to economic conditions related to the impact of fluctuations in discount rates on provisions for claims and adjustment expenses, which are partially offset by an investment matching strategy.

The loss ratio is comprised of the following ratios:
- Current year loss ratio, which is the loss ratio excluding catastrophe and major event claims expenses for the current year as well as changes in prior year claims, net of related reinsurance, not including reinstatement premiums, as applicable.
- Loss ratio related to catastrophes and major events, which is the loss ratio including catastrophe and major event claims expenses for the current year, net of reinsurance and including the impact of reinstatement premiums, as applicable.
- Ratio of changes in prior year claims, which is the loss ratio including the effect of changes in prior year claims, net of related reinsurance, not including reinstatement premiums, as applicable.

The expense ratio is equal to non-interest expense excluding certain items, expressed as a percentage of net premiums. Non-interest expense excluding certain items is a non-GAAP financial measure, and is used to eliminate expenses related to the income excluded from the calculation of the ratio.

The combined ratio is equal to the sum of the loss ratio and the expense ratio.

The following table presents the calculation of the loss ratio, the expense ratio and the combined ratio for the Property and Casualty Insurance segment.

Table 4 – Loss ratio - Expense ratio - Combined ratio

For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Net premiums	**$ 6,005**	$ 5,909	$ 5,484
Claims, benefits, annuities, and changes in insurance contract liabilities	**$ 3,911**	$ 2,792	$ 3,689
Market yield adjustment (MYA)	**476**	171	(257)
Claims, benefits, annuities and changes in insurance contract liabilities excluding the MYA	**$ 4,387**	$ 2,963	$ 3,432
Loss ratio	**73.1 %**	50.1 %	62.6 %
Non-interest expense	**$ 1,612**	$ 1,460	$ 1,303
Other expenses excluded from the expense ratio[(1)]	**(17)**	(19)	(9)
Non-interest expense excluding certain items	**$ 1,595**	$ 1,441	$ 1,294
Expense ratio	**26.6 %**	24.4 %	23.6 %
Combined ratio	**99.7 %**	74.5 %	86.2 %

(1) Mainly from investment management expenses.

Supplementary financial measures

In accordance with Regulation 52-112, supplementary financial measures are used to depict historical or expected future financial performance, financial position or cash flow. In addition, these measures are not disclosed in the financial statements. Desjardins Group uses certain supplementary financial measures, and their composition is presented in the Glossary on pages 113 to 120.

REGULATORY ENVIRONMENT

Regulatory environment

The *Act respecting financial services cooperatives* and other applicable legislation

Desjardins Group's operations are governed in particular by the *Act respecting financial services cooperatives* (AFSC) and the *Insurers Act*. The Minister of Finance of Quebec is responsible for the application of the AFSC and the AMF is responsible for its administration. The AMF is the main government agency that oversees and monitors deposit-taking institutions (other than banks) and insurance companies that do business in Québec and are governed by Québec law, including the caisses and the Federation and its insurance subsidiaries. Other federal and provincial regulations, in addition to those of regulators, may also govern some operations of Desjardins Group entities, such as the Office of the Superintendent of Financial Institutions (OSFI) related to property and casualty insurance, and custodial and trust services. The AFSC prescribes, among other things, the rules for organizing a network of financial services cooperatives and a financial group, and the rules for issuing capital shares and investment shares.

The AFSC includes a chapter concerning the *Groupe coopératif Desjardins* (the Cooperative Group), which comprises the Desjardins caisses in Québec, the Federation and the *Fonds de sécurité Desjardins* (FSD) and specifies the financial solidarity mechanisms within the Cooperative Group. Under the AFSC, the Federation's mission includes, in particular, to provide Desjardins Group's risk management and see to the financial health of the Cooperative Group and its sustainability. To this end, the Federation and the FSD have special powers of supervision and intervention regarding the protection of creditors, including depositors. As well, the Federation may, in accordance with its mission and when it considers that the financial position of the Cooperative Group so warrants, give written instructions to any caisse or order it to adopt and apply a recovery plan. Apart from the annual assessments required from the caisses, set by resolution of the Federation's Board of Directors under the AFSC and its internal By-laws, the Federation may set, under the AFSC and by resolution of its Board of Directors, the assessments it considers necessary for the pursuit of its missions.

For its part, the FSD is required, in particular, to ensure the distribution of capital and other assets among the components of the Cooperative Group so that each one can fulfill its obligations to its depositors and other creditors in full, correctly and without delay. Under the AFSC, it is empowered, in particular, to set and collect assessments from the entities of the Cooperative Group. The FSD requests and collects assessments from the Québec caisses every year. It is also required to intervene with a component of the Cooperative Group each time it appears necessary to do so in order to protect the component's creditors. The FSD may, in such circumstances, order the sale of any part of the business of a caisse, order the amalgamation or dissolution of caisses or establish a legal entity to facilitate the liquidation of a caisse's bad assets. Furthermore, the FSD mutualizes the cost of its interventions among the components belonging to the Cooperative Group. In addition, if it considers that its financial resources are inadequate to carry out its mission, it may set a special assessment and require any component of the Cooperative Group to pay it.

The AFSC also provides that all the Québec caisses, the Federation and the FSD may be amalgamated into a single legal entity to be wound up, as these entities cannot be wound up in any other manner. As a result, in the event of liquidation, the Cooperative Group's capital and assets in their entirety (and, indirectly, of Desjardins Group) are available to satisfy all the Cooperative Group's debt.

Under the AFSC, the directors and officers of a financial services cooperative that is part of the Cooperative Group are duty-bound toward these cooperatives and the FSD, in the performance of their functions, to act with prudence and diligence, as well as with honesty and loyalty and in the interest of the Cooperative Group, and not only in the interest of the cooperative. When the cooperative's interest is not that same as that of the Cooperative Group, they must promote the interest of the latter. In determining whether something is in the Cooperative Group's interest, the Cooperative Group must be considered to be a single legal person comprising the cooperatives (including the Federation and the Québec caisses) and the FSD that is included in this group, even though the group is not a legal person.

The assessment and intervention powers of the Federation and the FSD, combined with the primacy of the Cooperative Group's interest and the universal amalgamation/winding-up operation, as described earlier, are the fundamental principles of financial solidarity mechanisms, which constitute one of the key elements of Desjardins Group's and the Cooperative Group's financial structure.

The *Deposit Institutions and Deposit Protection Act* also provides for recovery and resolution mechanisms in the event of failure of deposit-taking institutions that are part of the Cooperative Group. For more details, see "Internal recapitalization (bail-in) regime and total loss absorbing capacity" below.

Regulatory governance requirements

As mentioned on page 1, Desjardins Group reports financial information in compliance with *Regulation 52-109 respecting Certification of Disclosure in Issuers' Annual and Interim Filings*, as prescribed by the CSA. Desjardins Group's financial and corporate governance are discussed on page 99 of this MD&A and in the "Corporate governance" section of the 2022 Desjardins Group Annual Report.

Domestic systemically important financial institution

In June 2013, the AMF determined that Desjardins Group met the criteria to be designated a domestic systemically important financial institution (D-SIFI), which subjects Desjardins Group to higher capital requirements and enhanced disclosure requirements, among other things, as instructed by the AMF. Desjardins Group globally incorporates the recommendations issued by the Enhanced Disclosure Task Force (EDTF) of the Financial Stability Board contained in the document "Enhancing the Risk Disclosures of Banks", into its risk management disclosure framework. Desjardins Group also continues to adapt its disclosure to comply with the principles of risk data aggregation and risk reporting (RDARR), which will strengthen governance as well as risk data aggregation and risk reporting capabilities. Furthermore, Desjardins Group developed a living will, detailing the actions it would take to restore its financial position in the event of a severe crisis.

Internal recapitalization (bail-in) regime and total loss absorbing capacity

The *Deposit Institutions and Deposit Protection Act* and its regulations, as well as certain other laws, regulations and guidelines, collectively provide for a resolution process and internal recapitalization (bail-in) regime for domestic systemically important financial institutions belonging to a Cooperative Group. The objective of resolution operations, including the bail-in regime, is to ensure the sustainability of the operations of deposit-taking institutions belonging to a cooperative group despite their failure, without resorting to public funds, and to have holders of contributed capital securities and creditors absorb losses, thereby minimizing taxpayer exposure to the losses.

Among other resolution operations, the AMF may, in particular, (i) amalgamate the Cooperative Group and have it continued as one Québec savings company, (ii) establish a bridge institution in order to have it assume the liabilities, in relation to deposits of money, of deposit-taking institutions belonging to the Cooperative Group, (iii) establish an asset management company with a view to transferring any part of the assets or liabilities of a legal entity belonging to the Cooperative Group to such asset management company, except liabilities in relation to deposits of money, and/or (iv) transfer the assets and liabilities of a legal entity belonging to the Cooperative Group to any acquirer.

In addition, in the event that any deposit-taking institution belonging to the Cooperative Group becomes non-viable, the AMF may convert any part of the capital shares issued by the deposit-taking institutions belonging to the Cooperative Group (such as Class F capital shares) and/or of certain other debt securities prescribed by regulation issued by the Federation into contributed capital securities of the Federation, of a deposit-taking institution belonging to the Cooperative Group, or of another legal entity constituted for such purpose or resulting from the resolution process of the Cooperative Group. Covered bonds, certain derivatives and structured notes, senior unsubordinated debt instruments that (i) have a maturity of less than 400 days (including explicit or embedded extension options) or (ii) are not assigned an international securities identification number (ISIN) or other similar designation for the purposes of trading and settlement, and subordinated notes that are non-viability contingent capital instruments are all excluded from the application of the bail-in regime. Holders of converted capital shares or debt instruments may be eligible for indemnification, as set forth under applicable regulations.

The AMF released, on March 21, 2019, the *Notice relating to the bail-in power set out in the second paragraph of section 40.50 of the Deposit Insurance Act*, which specifies the AMF's current intention with respect to the application of the bail-in regime. In this context, the AMF plans to propose to the resolution board that it convert negotiable and transferable unsecured debt into capital shares of the Federation in accordance with the conversion measures set out in the regulations. The AMF would then propose to the resolution board that it carry out an amalgamation/continuance operation, the purpose of which would be to amalgamate the entities belonging to the Cooperative Group and have them continued as one Québec savings company. This operation would result in the capital shares issued by the amalgamating entities being converted into common shares of the savings company. In addition, Bill 3, *An Act to amend various legislative provisions mainly with respect to the financial sector*, was assented to on December 8, 2021. It amends, in particular, the *Deposit Institutions and Deposit Protection Act* in order to remove the AMF's write-off and cancellation powers from its bail-in power. As a result, the AMF's power to write off any part of the negotiable and transferable unsecured debts and to cancel any part of the capital shares issued by the Federation has been removed.

The bail-in regime applicable to Desjardins is essentially similar to the Canadian federal regime to which Canadian banks are subject. In addition, the bail-in regime is not retroactive in respect of debt instruments and does not apply to any debt instruments issued prior to March 31, 2019. The bail-in regime could adversely affect the Federation's cost of funding.

Furthermore, the AMF's *Total Loss Absorbing Capacity Guideline* (the TLAC Guideline) applies to and establishes standards for Desjardins Group in this regard. As a result, since April 1, 2022, Desjardins Group has been required to maintain at all times a minimum loss absorbing capacity composed of unsecured external long-term debt that meets the prescribed criteria or regulatory capital instruments to support its recapitalization in the event of a failure. Additional information can be found under “Regulatory framework and internal policies” in Section 3.2, “Capital management”.

U.S. regulations

Desjardins Bank, National Association, a wholly owned subsidiary of Desjardins FSB Holdings, Inc., is authorized to carry on banking operations as a national banking organization under the charter issued to it by the Office of the Comptroller of the Currency of the United States (OCC), an independent office of the United States Department of the Treasury and the regulator that oversees it. Desjardins FSB Holdings, Inc., as a bank holding company and wholly owned subsidiary of the Federation, is subject to the supervisory and regulatory authority of the Federal Reserve Bank of Atlanta. The Federation also operates a branch in Florida, namely Desjardins Florida Branch (DFLB), that has been given the status of a Limited Federal Branch of a Foreign Banking Organization by the OCC. DFLB is subject to regulation by the International Banking Supervision division of the OCC’s Large Banks Supervision department. Desjardins Group is governed by the U.S. *Bank Holding Company Act,* as amended by the *Dodd-Frank Wall Street Reform and Consumer Protection Act of 2010* (Dodd-Frank Act), and the U.S. Federal Reserve regulations. On October 22, 2015, the Board of Governors of the U.S. Federal Reserve System determined that Desjardins Group could be treated as a Financial Holding Company (FHC).

Changes in the regulatory environment

Desjardins Group closely monitors regulations for financial products and services, as well as new developments, particularly in fraud, corruption, tax evasion, privacy protection, money laundering, terrorist financing, and domestic and international economic sanctions in order to mitigate any negative impact on its operations, and aims to comply with best practices in this regard. Further information on regulatory capital developments is provided in Section 3.2, “Capital management”.

The *Proceeds of Crime (Money Laundering) and Terrorist Financing Act* (PCMLTFA)

Amendments were announced to the PCMLTFA and its regulations on July 10, 2019. Most of them came into force on July 10, 2019, June 1, 2020 and June 1, 2021, while those relating to the reporting requirement will come into force in 2023 and 2024. After the publication of these regulatory changes, a project was implemented within Desjardins Group so that its systems, processes and procedures would be amended accordingly. Further regulatory changes came into force between 2020 and 2022, particularly to cover crowdfunding platforms.

Financial reforms in the U.S.

U.S. reform initiatives pertaining to financial regulation affect non-U.S. financial institutions operating in the United States, including Desjardins Group. Since the passage of the *Dodd-Frank Wall Street Reform and Consumer Protection Act* and the finalization of the Volcker rule, Desjardins Group has been able to put in place the necessary elements and interpretations to be applied to its relevant entities. Consequently, the final changes to the Volcker rule, whose objective is to prohibit banking entities from engaging in proprietary trading and to limit their investing in or sponsoring of hedge funds and private equity funds, complete the existing tools and reinforce the work already done. With regard to the final changes to the restrictions on the control framework and the concept of control pursuant to the *Bank Holding Company Act* (BHCA), Desjardins Group has been working on revising the BHCA frameworks, whose adoption by the authorities and implementation by the entities affected by this regulation were completed in 2022.

Protection of data confidentiality and security

Because of rapid changes in information technology, the protection of data confidentiality and data security are highly topical areas. After being passed by the National Assembly and assented to in September 2021, *An Act to modernize legislative provisions as regards the protection of personal information* will come into force by being phased in over a three-year period. Desjardins Group complies fully with the provisions that came into force on September 22, 2022, namely the designation of a person in charge of the protection of personal information, the handling of confidentiality incidents, and the frameworks for releasing personal information for study or research purposes or for the production of statistics, and as part of concluding a commercial transaction. Work is being continued to ensure that Desjardins Group’s operations comply with the new legislative requirements within the prescribed time period. Desjardins Group also continues to be on the lookout for announced regulatory amendments to other Canadian privacy laws and, in particular, it has completed consideration of the provisions of federal Bill C-27, *An Act to enact the Consumer Privacy Protection Act*, *the Personal Information and Data Protection Tribunal Act and the Artificial Intelligence and Data Act and to make consequential and related amendments to other Acts,* which was tabled in June 2022.

Pillar 3 financial disclosure requirements

Desjardins Group continues to monitor changes in financial disclosure requirements under global standards developed by the Basel Committee on Banking Supervision (BCBS). These Pillar 3 requirements aim to enhance comparability with other financial institutions, transparency and disclosure with regard to regulatory capital adequacy and risk exposure. In December 2016, the AMF filed an update of its base capital adequacy guideline for financial services cooperatives (in French only), which includes revised Pillar 3 provisions. Desjardins Group has been issuing a Pillar 3 Report since December 31, 2018 in order to comply with Pillar 3 requirements. On January 1, 2020, the AMF put the Pillar 3 financial disclosure requirements into a separate document entitled *Pillar 3 Disclosure Requirements Guideline*, which features new requirements that deal in particular with liquidity risk, operational risk, interest rate risk in the banking book and credit valuation adjustments. In January 2022, the AMF issued the latest update to the *Pillar 3 Disclosure Requirements Guideline*, which clarifies the implementation of the provisions that will apply by January 1, 2024 and incorporates new requirements that address, in particular, risk-weighted asset modelling, encumbered assets and compensation.

Legislative and regulatory developments in insurance in Ontario

The Financial Services Regulatory Authority of Ontario (FSRA) released its final guidance outlining sound practices for operational risk management in the rating and underwriting of automobile insurance. This information guidance is intended to outline foundational and sound practices for operational risk management in the rating and underwriting of automobile insurance. This guidance is part of FSRA's broader strategy to reform the regulation of rates and underwriting in Ontario's auto insurance sector, which is a priority in FSRA's 2022-2025 Annual Business Plan. In December 2022, FSRA initiated its latest consultations for feedback on rate regulation reform and auto insurance rates in Ontario. Its goal is to achieve significant reforms that protect consumers while promoting a sound market through efficient regulations. A public consultation on FSRA's preliminary recommendations is scheduled for the summer or fall 2023.

Interest rate benchmark reform

Interest rate benchmark reform is a global initiative that includes Canada and is being led by the central banks and regulatory authorities. Its objective is to improve benchmark indices by making sure they comply with robust international standards. The gradual withdrawal of certain interest rate benchmarks began on May 17, 2021, with the discontinuation of the six-month and 12-month Canadian Dollar Offered Rate (CDOR). In addition, on March 5, 2021, rate administrators announced that the publication of the London Interbank Offered Rate (LIBOR) would officially cease after December 31, 2021 for all currencies except certain USD LIBOR settings, which will not cease publication until after June 30, 2023. Subsequently, on July 29, 2021, USD LIBOR rate administrators officially recommended the use of the forward-looking term rates of the Secured Overnight Financing Rate (SOFR) for loans, which concludes the final phase of the transition plan that was initiated to promote the use of SOFRs. On May 16, 2022, Refinitiv Benchmark Services (UK) Limited (RBSL), CDOR's administrator, announced that it would cease publication of all tenors of CDOR after June 28, 2024. This announcement triggered the two-stage transition period recommended by the Canadian Alternative Reference Rate working group (CARR) in its White Paper in December 2021. By the end of the first stage of the transition plan, namely June 30, 2023, CDOR should be replaced by the Canadian Overnight Repo Rate Average or CORRA for new derivatives (except in some specific circumstances) and securities. By the end of the second stage of the transition plan, namely June 28, 2024, CDOR loan agreements should have transitioned to CORRA or any other alternative benchmark rate in effect at the time of the cessation. On January 11, 2023, the CARR's working group confirmed the development of the Term CORRA rate following the strong interest demonstrated by Canadian businesses regarding the need for a forward-looking term. The use of the Term CORRA for certain maturities, which is expected to be available for use by the end of the third quarter of 2023, will be restricted to loans and derivative financial instruments associated to hedging strategies. Desjardins Group has set up an internal task force on interest rate benchmark reform to ensure a seamless transition from benchmark interest rates, including CDOR, to risk-free rates. The discontinuation of CDOR, including the impact on hedging relationships, is also managed by this working group.

An Act respecting French, the official and common language of Québec

An Act respecting French, the official and common language of Québec came into force on June 1, 2022. This Act significantly enhances previous standards in the *Charter of the French Language*. The objectives are, in particular, to strengthen the presence and use of French in Québec, and to affirm that French is the only official language of Québec. The main points addressed include the status of the French language, the language of work, the language of commerce and business, the language of instruction, the francization of enterprises, and penal provisions and other sanctions. The implementation periods for the various provisions of the Act vary from 0 to 12 months. Desjardins Group will comply with the applicable provisions as they come into force.

Regulators' strong interest in environmental, social and governance (ESG) factors

Regulators continued to focus sustained attention on the issue of climate change in 2022, after several consultations and surveys in 2021:

- Consultation process launched by the CSA on its proposed National Instrument 51-107, Climate-related Disclosure Requirements and related Companion Policy closed in January 2022; if passed, NI 51-107 could be applicable to issuers as early as the end of 2023.
- In January 2022, the Bank of Canada and the Office of the Superintendent of Financial Institutions (OSFI) issued the final report on the pilot project to analyze climate change scenarios.
- A bill regarding climate-aligned finance (S-243), tabled in the Senate in March 2022, is currently in second reading, and its aim is to require banks to increase capital risk weights and capital reserve requirements for financing exposed to acute transition risks.
- Internationally, the International Sustainability Standards Board (ISSB), established by the IFRS Foundation, completed a consultation that closed in July 2022 on IFRS S1, Sustainability-related Disclosure Requirements, and IFRS S2, Climate-related Disclosure Requirements. These standards should be issued in 2023.
- The OSFI closed its consultation in September 2022, on Guideline B-15, Climate Risk Management. The Guideline should be issued by early 2023, and phased in starting in 2024 for the fiscal years ending after October 1, 2023.

These points confirm that climate change consideration and disclosure requirements will be strengthened internationally, nationally and provincially in the future. Desjardins Group continues to closely monitor developments in this file and responds, where relevant, to consultations on this subject directly or via industry associations. Desjardins is also ensuring that it follows sound practices in ESG integration, monitoring and disclosure. This disclosure is reflected in the annual Social and Cooperative Responsibility report, which is aligned with the standards of the Global Reporting Initiative (GRI), the Sustainability Accounting Standards Board (SASB) and the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). The key elements of disclosure related to the TCFD recommendations are summarized under "Environmental or social risk" in Section 4.0, "Risk management", and detailed in the "Climate action at Desjardins – 2022 TCFD report on Climate change-related risks and opportunities" report.

Amalgamation of the Investment Industry Regulatory Organization of Canada (IIROC) and the Mutual Fund Dealers Association of Canada (MFDA)

Since January 1, 2023, the CSA has recognized the new self-regulatory organization in Canada (new SRO) and the Canadian Investor Protection Fund (CIPF). The new SRO combines the functions of the IIROC and MFDA. This amalgamation was preceded by an extensive consultation launched in June 2020 by the MFDA concerning the regulatory framework for the operations of self-regulatory organizations. Desjardins Group continues to analyze the potential impact of the new SRO's regulatory framework on its operations.

Economic sanctions – Russia-Ukraine war

Since the beginning of the Russia-Ukraine war on February 24, 2022, international economic sanctions targeting, in particular, designated individuals or entities (such as banks) and industries have been adopted with regard to Belarus, Russia and Ukraine (the Crimean, Donetsk, Louhansk, Kherson and Zaporijjia regions). In order to ensure compliance with this rapidly changing regulatory framework, Desjardins Group monitors the situation on a daily basis and takes the necessary measures in conjunction with the relevant operational teams, particularly with regard to investments and electronic funds transfers (EFTs) in connection with these sanctioned countries. In order to reduce its regulatory risks, Desjardins Group has temporarily stopped sending EFTs to Russia.

Bill C-26, An Act respecting cyber security, amending the Telecommunications Act and making consequential amendments to other Acts

On June 14, 2022, the House of Commons introduced Bill C-26, *An Act respecting cyber security, amending the Telecommunications Act and making consequential amendments to other Acts*. Bill C-26 aims to secure telecommunication systems and strengthen the protection of essential cyber systems (which may include banking systems) in the private sector under federal regulations. Even if Desjardins Group is not directly targeted by this Bill because it is under provincial jurisdiction, it already meets the requirements announced and will carefully monitor the progress of the Bill to learn from best practices, where applicable.

Capital adequacy requirements for insurers

On July 21, 2022, the AMF issued an update to the Guideline on Capital Adequacy Requirements – Life and Health Insurance as well as an update to the Guideline on Capital Adequacy Requirements – Property and Casualty Insurance. On the same date, OSFI released the final version of the Minimum Capital Test guideline for federally-regulated property and casualty insurance companies. The changes made to the various guidelines take the new IFRS 17 into account and came into force on January 1, 2023.

1.0 Desjardins Group

1.1 Profile and structure

WHO WE ARE

Desjardins Group is the largest financial cooperative group in North America, with assets of $407.1 billion. As at December 31, 2022, the organization grouped together 212 caisses in Québec and Caisse Desjardins Ontario Credit Union Inc., the *Fédération des caisses Desjardins du Québec* and its subsidiaries and the *Fonds de sécurité Desjardins*. A number of its subsidiaries and components are active across Canada, and Desjardins Group maintains a presence in the U.S. through Desjardins Bank, National Association, and Desjardins Florida Branch.

Through its Personal and Business Services, Wealth Management and Life and Health Insurance, and Property and Casualty Insurance business segments, Desjardins Group offers a full range of financial services to members and clients designed to meet their needs. As one of the largest employers in the country, Desjardins Group capitalizes on the skills of more than 58,700 employees and the commitment of nearly 2,460 directors in the caisse network.

The Federation is a cooperative entity that is responsible for assuming orientation, framework, coordination, treasury and development activities for Desjardins Group and acts as a financial agent on Canadian and foreign financial markets. It provides its member caisses with a variety of services, including certain technical, financial and administrative services. It acts as a monitoring and control organization for the caisses and its mission includes risk management and capital management for Desjardins Group, as well as ensuring the financial soundness and sustainability of the Desjardins Cooperative Group (comprised of the Desjardins caisse network in Québec, the Federation and the *Fonds de sécurité Desjardins*), pursuant to the AFSC. The Federation is, among other things, the treasurer and official representative of Desjardins Group with the Bank of Canada and the Canadian banking system. The Federation also has the right to participate in the Visa Inc. and MasterCard Inc. payment systems in Canada on behalf of Desjardins Group. In addition, it manages majority interests in joint-stock companies through holding companies.

The AFSC provides that the entities comprising the Desjardins Cooperative Group may be amalgamated into a single legal entity to be wound up, as these entities cannot be wound up in any other manner. It should be mentioned that Caisse Desjardins Ontario Credit Union Inc. is excluded from this amalgamation-liquidation provided for in the Act.

Summary additional information on the entities that are not part of the Desjardins Cooperative Group or the subsidiaries of the entities that comprise it, but are included in Desjardins Group's financial statements, may be found under Section 5.5, "Additional information required pursuant to the AMF's Decision No. 2021-FS-0091".

WHAT MAKES US DIFFERENT

Desjardins Group takes pride in its cooperative nature because it provides the necessary leverage to always work in the interests of members and clients. The resulting mission and values are the driving force for its directors, managers and employees. They are echoed in its orientations, and help Desjardins Group achieve its vision of sustainable prosperity within the communities it serves. Since the first caisse was founded in 1900 in Lévis, Desjardins Group has always been a key player in financial education, and it believes that the cooperative business model is more relevant now than ever in a greatly changing world.

Desjardins Group continues to make progress in acting on its commitments and taking concrete measures to integrate environmental, social and governance (ESG) factors into its business model and in managing its operations, as well as to combat and adapt to climate change and biodiversity loss. It does this, in particular, through financial education and solidarity-based finance, as well as by offering products and services that meet all the financial needs of members and clients.

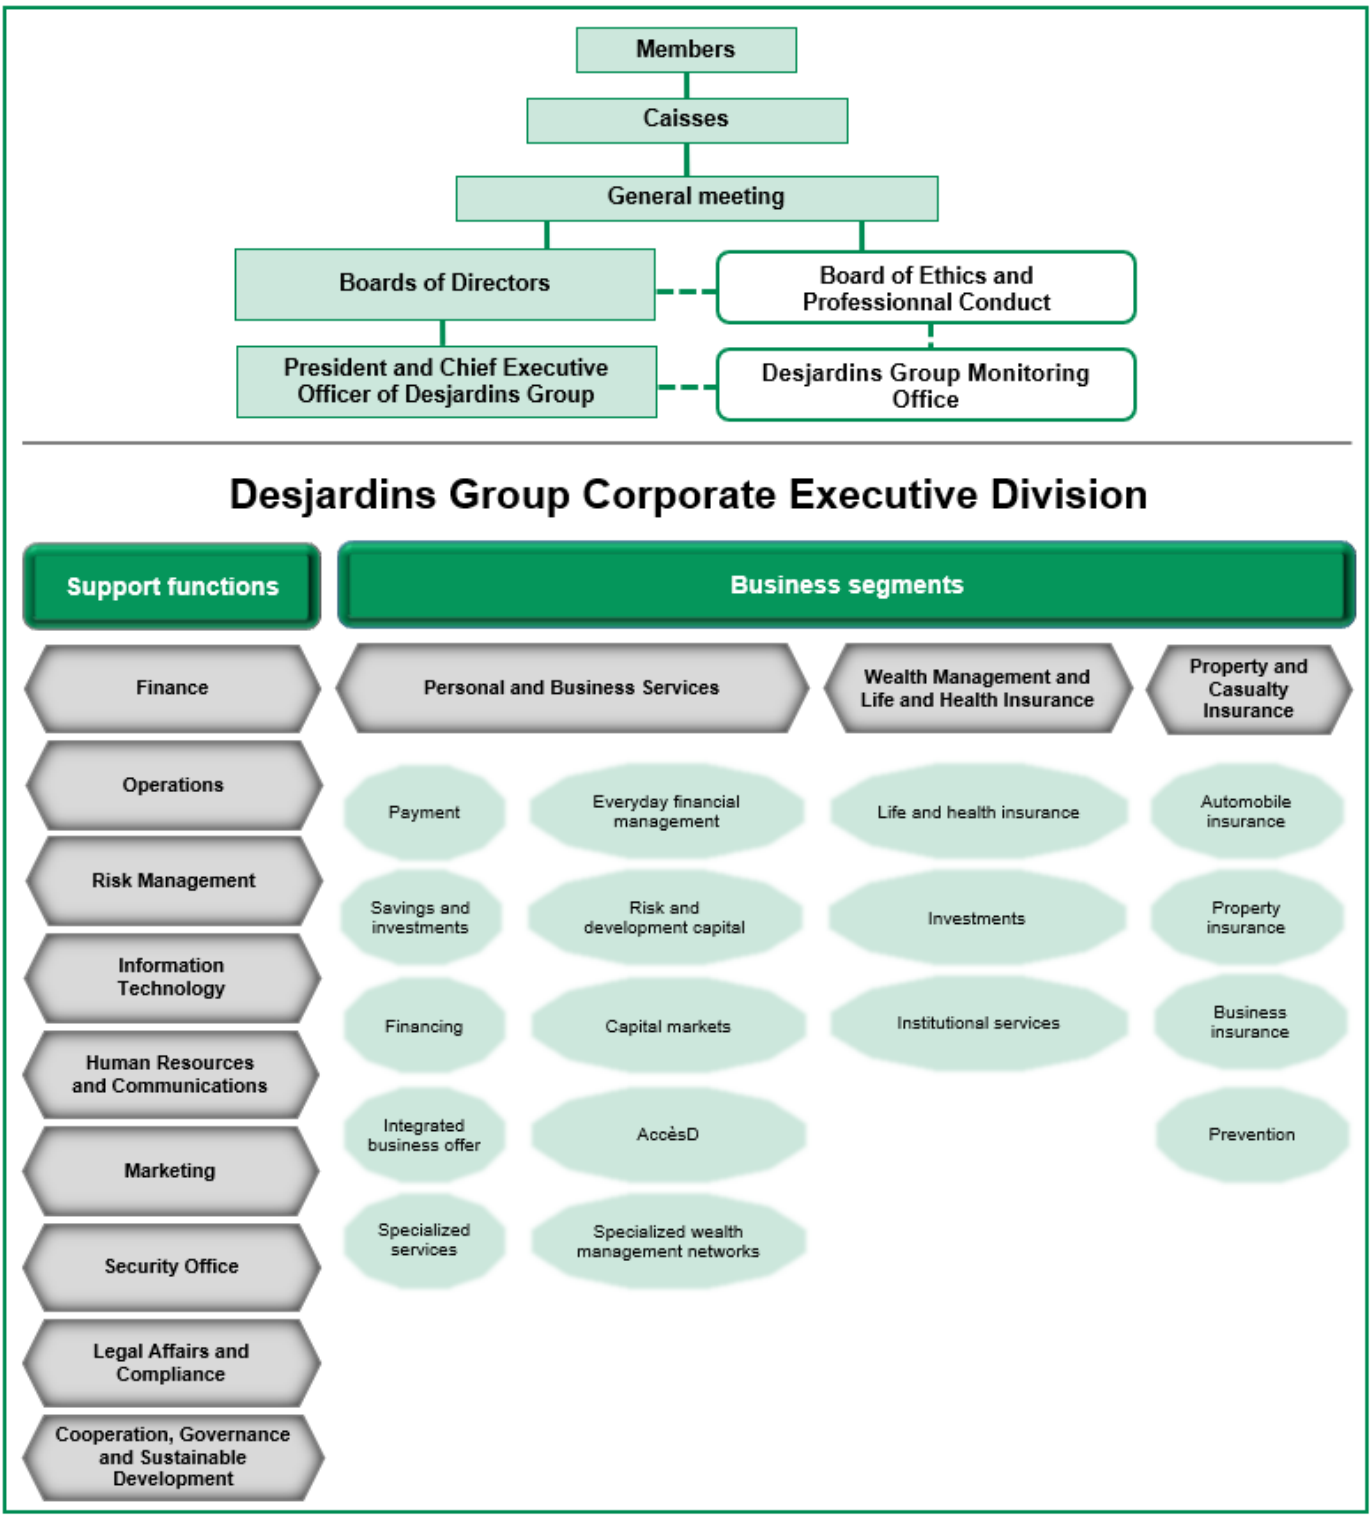

Desjardins Group's goal is to be everyone's #1 choice. Thanks to its varied distribution channels, numerous intermediary networks and personnel who strive to always work in the interests of members and clients, Desjardins Group stays close to its members and their communities. In order to best meet members' increasingly diverse needs, Desjardins Group pays special attention to the caisse network and its range of service delivery methods. This process is also part of Desjardins Group's continued commitment to the vitality of cooperation at the caisse level in terms of democratic life, representation, education and training, cooperation with other cooperatives and support for community development.

Another hallmark of Desjardins Group is its modern, grassroots-level democratic governance, based on the active participation of directors elected by caisse members. This participation is expressed in working together and in terms of governance. Community collaboration groups are active in various areas where the caisses are present, and the Desjardins Collaboration Forum serves a similar purpose at the caisse network level. In terms of governance, the caisses' elected officers participate at the annual general meeting, at orientation congresses and on the Board of Directors of the Federation and its subsidiaries and its various commissions.

STRUCTURE OF DESJARDINS GROUP

Desjardins Group's structure has been designed to take into account the needs of its members and clients, as well as the markets in which it operates. The caisse network in Québec and Caisse Desjardins Ontario Credit Union Inc. have the support of three main business segments (Personal and Business Services, Wealth Management and Life and Health Insurance, and Property and Casualty Insurance), which enhances their ability to build on their products and services.

Additional information on the business segments, particularly their profile, operations, 2022 achievements, the industry in which they operate, and their strategies and priorities for 2023 may be found in Section 2.2, "Analysis of business segment results".

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.
(2) The breakdown by line item is presented in Note 31, “Segmented information”, to the Combined Financial Statements.
(3) Including $46 million in 2022 from the caisses’ Community Development Fund ($41 million in 2021).
(4) For more information about non-GAAP ratios, see “Non-GAAP and other financial measures” on pages 3 to 7.
(5) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.
(6) In accordance with the *Liquidity Adequacy Guideline* issued by the AMF. See Section 4.0, “Risk management”.
(7) In accordance with the base capital adequacy guideline for financial services cooperatives issued by the AMF and taking into account the applicable relief measures introduced by the AMF in response to the COVID-19 pandemic. See Section 3.2 “Capital management”.
(8) In accordance with the Total Loss Absorbing Capacity Guideline (“TLAC Guideline”) issued by the AMF and based on risk-weighted assets and exposures for purposes of the leverage ratio at the level of the resolution group, which is deemed to be Desjardins Group, excluding Caisse Desjardins Ontario Credit Union Inc. See Section 3.2, “Capital management”.

2022 Desjardins Group highlights

Surplus earnings before member dividends	Operating income[1]	Net loans and acceptances outstanding	Gross written premiums[2] - Life and Health Insurance	Gross written premiums[2] - P&C Insurance	Tier 1A capital ratio	Member dividends
$2,050 million	$21,798 million	$249.9 billion	$6.4 billion	$6.1 billion	20.2%	$403 million
- 30.3%	+ 6.8%	+ 8.3%	+ 9.4%	+ 1.5%	- 0.9%	+ 4.1%

Comparison of 2022 to 2021

- Surplus earnings before member dividends of $2,050 million, down $892 million or 30.3%.
- Operating income[1] of $21,798 million, up $1,393 million or 6.8%
  - Net interest income of $6,330 million, up $544 million or 9.4%, partly due to growth in the average return on loans driven by the higher interest rate environment and growth in average residential mortgages and business loans outstanding, partly offset by the increase in the interest expense on deposits.
  - Net premiums of $11,842 million, up $564 million, essentially due to business growth in group annuities.
  - Other operating income[1] of $3,626 million, up $285 million or 8.5%, due to an increase in business volumes from payment activities at Desjardins Card Services.
- A higher cost of claims in the Property and Casualty Insurance segment, reflecting among other things the increased frequency of automobile insurance claims and the impact of inflation. In addition, fiscal 2022 was marked by one catastrophe (a rare weather phenomenon known as a *derecho*) in Ontario and Québec and five major events (flooding, windstorm, heavy rain, Hurricane Fiona and a snowstorm), while 2021 was marked by one catastrophe (a hailstorm in Alberta) and a major event.
- Favourable impact of the following items related to Life and Health Insurance operations:
  - Higher interest rates on actuarial liabilities;
  - Overall more favourable experience, mainly from group insurance;
  - Changes in actuarial assumptions made in the normal course of business, whereas such changes had a negative impact in fiscal 2021.
- Higher provision for credit losses in 2022 compared to 2021, which had reflected the impact of an improved macroeconomic outlook and better borrower credit quality.
- Non-interest expenses of $10,638 million, up $1,072 million:
  - Planned increase in investments to continue strategic projects, especially in relation to security and the digital shift;
  - An increase in spending on personnel, technology and communications to support business growth and enhance the services offered to members and clients.
- $518 million returned to members and the community[1], up $21 million or 4.2% from fiscal 2021.

Other highlights

- Tier 1A capital ratio of 20.2%, compared to 21.1% as at December 31, 2021.
- Total capital ratio of 21.9%, compared to 22.1% as at December 31, 2021.
- Total assets grew 2.5% since December 31, 2021, to $407.1 billion as at December 31, 2022.
- In 2022, the Federation proceeded to make various securities issues on U.S., Canadian and European markets. For more information, see the “Sources of financing” section on pages 90 and 91.

ESG highlights

- In May 2022, Moody’s ESG Solutions[3] upgraded Desjardins Group’s rating, assigning it the highest score in the “Diversified Banks” category in North America for including ESG concerns. In its November 2022 update, Sustainalytics ranked Desjardins 3rd among diversified banks in North America for its ESG risk management.
- In April 2022, Desjardins launched a sustainable development and responsible finance training course for all its employees, and 93% of its employees completed it by the end of 2022.
- In September 2022, Desjardins invested $50 million in the Idealist Climate Impact Fund, a fund providing businesses with growth capital to accelerate the marketing of proven solutions that would have a positive impact on the climate.
- In 2022, Desjardins joined the collaborative initiative *Principles for Responsible Investment - Advance*, where institutional investors undertake to work together in taking action on human rights and social issues.
- In 2022, Desjardins joined ranks with close to 60 signatories of the Action Declaration on Climate Policy Engagement, led by Corporate Knights. The Action Declaration is a clear promise made by the most committed businesses to sustainable development that they will support policy-makers’ implementation of initiatives and standards aligned with the goals of the Paris Agreement.
- At the beginning of December 2022, Desjardins signed the Finance for Biodiversity Pledge through its subsidiaries Desjardins Global Asset Management Inc. and Desjardins Investments Inc. This initiative, which included more than 120 signatories at the end of 2022, aims to protect and restore biodiversity through financial activities.

2022 Segment highlights

Personal and Business Services

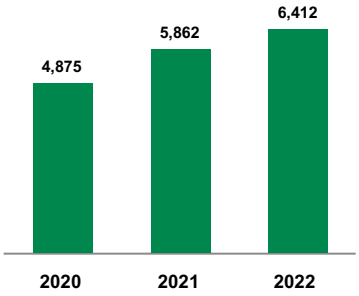

Average gross loans and acceptances and average deposits[1]
(in millions of dollars)

- Québec's leader in residential mortgages and a leading player in consumer loans in Québec, with estimated market shares of 38% and 26%, respectively.
- 4th largest credit card issuer in Canada (based on 2021 outstandings).
- Leader in farm credit in Québec, with a market share of about 42%.
- Major player in Québec in the commercial and industrial niche, with an estimated market share of 22%.
- Leader in personal savings in Québec, particularly in on-balance sheet savings products, with an estimated market share of approximately 41%.
- Surplus earnings before member dividends totalled $1,126 million, down 22.8% compared to 2021, due to the higher non-interest expense, mainly as a result of the larger amounts invested in strategic projects, as expected, and the increase in employee expenses, as well as the higher provision for credit losses, partially offset by the increase in net interest income, less the decline in derivative financial instrument activities, and by the increase in other operating income.[2]
- Growth of $20.6 billion, or 9.4%, compared to 2021, in the average outstandings for the entire loans and acceptances portfolio.

Wealth Management and Life and Health Insurance

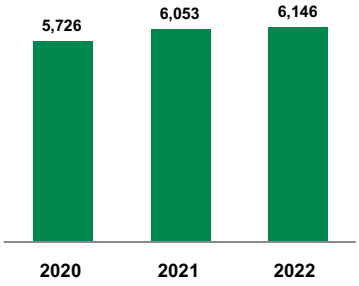

Gross written premiums[1]
(in millions of dollars)

- No. 5 life and health insurer in Canada and No. 4 in Québec (based on gross written premiums in 2021).
- No. 1 in Canada and in Québec for market-linked guaranteed investments (based on 2021 assets under management).
- Award for Excellence - Life & Health Insurer of the Year at the Insurance Business Canada Awards.
- Awarded six 2022 FundGrade A+® Awards by Fundata, which annually recognizes the best of the best investment solutions available in Canada, including two for responsible investment solutions.
- Launch of responsible annuities – A first for Canada.
- Record sales of $1.2 billion in annuities paid.
- Net surplus earnings of $692 million, up 49.5%, compared to 2021, mainly due to the positive effect of higher interest rates on actuarial liabilities, the overall more favourable experience, essentially in mainly group insurance and the positive impact of revisions of actuarial assumptions, as well as higher gains on the disposal of securities and real estate investments, mitigated by the increase in non-interest expense and by the more unfavourable market impact on guaranteed investment funds.
- Gross written premiums of $6.4 billion, for an increase of 9.4% compared to 2021.

Property and Casualty Insurance

Gross written premiums[1]
(in millions of dollars)

- No. 2 property and casualty insurer in Canada and Québec, and No.3 in Ontario (based on gross direct premiums written in 2021).
- Gross written premiums grew by $93 million, or 1.5%, compared to 2021.
- Underwriting profits for the 30th consecutive year.
- Launch of version 2.0 of the Alert prevention program (prevention of damage from water, risk of freezing or break-in risk).
- Loss ratio[3] of 73.1% in 2022, compared to 50.1% in 2021.
- Net surplus earnings of $450 million, down $747 million compared to 2021, due to a higher loss experience in auto and property insurance because fiscal 2022 was marked by a higher frequency of claims, particularly in auto insurance, by the impact of inflation as well as by one catastrophe and five major events compared to one catastrophe and one major event in 2021. This decrease in surplus earnings was mitigated by the higher investment income[2], excluding the change in the fair value of matched bonds.

1.3 Significant events

Guardian Capital Group Limited's independent life insurance and retail investment distribution operations

On November 30, 2022, Desjardins Group, acting through 9479-5176 Quebec Inc., an indirect, wholly-owned subsidiary of the Federation, agreed to acquire the independent life insurance and retail investment distribution operations of Guardian Capital Group Limited, in particular by purchasing all the shares of IDC Worldsource Insurance Network Inc., Worldsource Financial Management Inc. and Worldsource Securities Inc. for a total consideration of $750 million, subject to customary purchase price adjustments.

The transaction is expected to close in the first quarter of 2023, subject to the required regulatory approvals and customary closing conditions. The results of these operations will be accounted for within the Wealth Management and Life and Health Insurance segment.

Interest in The Insurance Company of Prince Edward Island

On December 9, 2022, 1000379969 Ontario Limited, an entity representing a consortium of purchasers comprised of Desjardins General Insurance Group Inc., an indirect subsidiary of the Federation, certain key members of management of The Insurance Company of Prince Edward Island (ICPEI), certain other employees of ICPEI and shareholders of ICPEI Holdings Inc., the parent company of ICPEI (ICPEI Holdings), as well as certain other investors, filed an offer to the shareholders of ICPEI Holdings to acquire the shares thereof in their entirety.

Upon the closing of the transaction, Desjardins Group, through its holding in 1000379969 Ontario Limited, will have a minority interest in ICPEI Holdings in exchange for a cash consideration of $17 million.

The transaction is expected to close in the first quarter of 2023, subject to the closing conditions.

1.4 Strategic orientations and financial objectives

STRATEGIC ORIENTATIONS AND FOUNDATIONS

Fiscal 2022 was the second year of the 2021-2024 Strategic Plan. To achieve Desjardins's goal of being everyone's #1 choice, the organization continues to work on implementing the following seven strategic orientations for the 2023-2024 period:

- Continue implementing the culture change.
- Enhance proficiency in our operations.
- Affirm our commitment to security.
- Make a member-client shift a reality.
- Capitalize more on our integrated offer in Québec.
- Grow beyond our present footprint.
- Modernize our systems.

Three foundations support the strategic orientations to ensure that Desjardins Group has a solid base:

- Ensure human and organizational transformation in the digital age.
- Assume strong socio-economic leadership.
- Anchor our business practices in data and analytics.

These strategic orientations and foundations contribute to depicting Desjardins Group as a simple, human, modern and efficient cooperative for its members and clients, as well as its directors, managers and employees.

FINANCIAL OBJECTIVES

Desjardins Group sets medium-term financial objectives that provide it with the means of realizing its ambitions for members and clients by ensuring a profitability level that allow it to achieve its goals of giving back to the community, ensuring its sustainability and supporting its growth.

This section follows up on the results for the objectives stated for 2022. The organization's performance is measured using key indicators aligned with Desjardins's goals, in accordance with the orientations and foundations of the 2021-2024 Strategic Plan. Desjardins's goal is to be everyone's #1 choice by constantly working in the best interests of members and clients in order to enrich the lives of people and communities. It is therefore essential to focus on achieving the medium-term financial performance objectives as this helps make available the levers needed to achieve this goal.

In recent years, and more specifically in 2021 and 2022, Desjardins Group has invested significantly in initiatives to support its growth, the development of innovative technology platforms, privacy, security and the improvement of business processes. These decisions, which were in line with the 2021-2024 Strategic Plan and backed by excellent capitalization, have nevertheless had an impact on the organization's financial performance in 2022. In this context, efficiency and productivity are still a priority in order to continue to achieve Desjardins Group's strategic goals.

Despite a slowing economy and persistent inflation, the 2022 results are still in line with the financial plan. Rising interest rates have had an overall positive effect on net interest income from banking products and also contributed to the good performance of group and individual insurance. In addition, investment income and the matching strategy in Property and Casualty Insurance have helped to solidify Desjardins Group's results. However, the growth in non-interest expense was as anticipated, and mainly due to the larger amounts invested for the continued implementation of projects related in particular to the digital shift and security, in accordance with the strategic plan. In addition, the higher employee expenses as a result of the additional employees hired to support growth of operations and to enhance the services offered to members and clients can also account for the increase in non-interest expense. Lastly, it should be mentioned that the provision for credit losses increased due to worsening economic conditions.

In relation to its strategic orientations, Desjardins Group expects to stabilize its strategic investments in 2023, although they remain important. As a result, Desjardins aims to enhance the member and client experience, and improve its productivity and efficiency by deploying initiatives to optimize its performance in order to support its goals and ensure that sound information security practices are always in place.

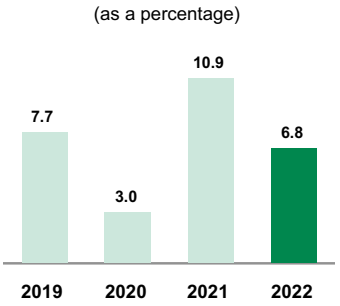

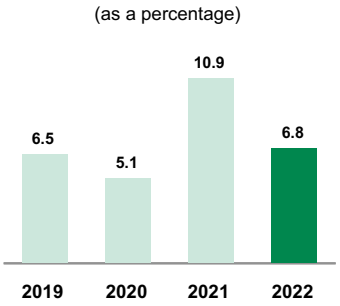

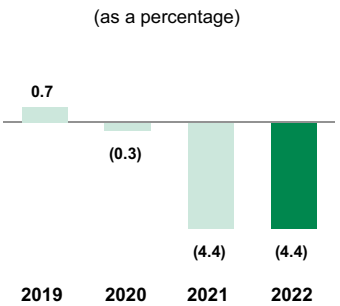

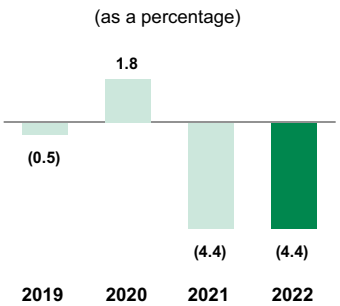

This decision to invest in enhancing security and modernizing its systems and processes is in line with Desjardins's objective to be a leader in information security. In this regard, Desjardins Group's high level of capitalization and its financial performance will enable it to achieve its goals and support its investment projects. The year 2023 will in fact be marked by a stabilization in the investments made in these projects and by more moderate growth in non-interest expense. These investments as well as the uncertainty about current economic conditions will have an impact on Desjardins Group's surplus earnings in 2023, so that they should be relatively similar to those in 2022.

The following table presents the medium-term financial objectives for the 2021-2024 Strategic Plan, as well as the results achieved in 2022 for each of the indicators. It is important to keep in mind that the medium-term key indicators presented below do not factor in the repercussions that extraordinary events could have on Desjardins Group's ability to achieve them.

Key indicators	Medium-term objectives	4-year results[1]	2022 results
Growth in operating income[2]	**5% to 8%**	**7.1%**	**6.8%**
Growth differential between operating income and non-interest expense[1]	**> 0%**	**(2.1)%**	**(4.4)%**
Productivity index[2]	**< 75%**	**71.6%**	**78.6%**
Tier 1A capital ratio[3]	**> 15%**	**21.2%**	**20.2%**
Return on equity[4]	**> 8%**	**8.3%**	**6.2%**

Overall performance in 2022

Desjardins Group's performance in recent years has been positive overall, with, in particular, surplus earnings before member dividends of $2,942 million in 2021, and of $2,419 million in 2020. In 2022, given the economic slowdown and rising inflation, surplus earnings before member dividends was $2,050 million. In accordance with the strategic orientations, the sharp increase in non-interest expense, resulting from major investments, had a negative impact on the main financial ratios for the year. In 2023, the stabilization of investments and the implementation of initiatives to improve efficiency and effectiveness will help to strengthen the organization's overall performance. Owing to Desjardins Group's excellent financial strength and high level of capitalization, it continues to participate actively in the reopening of society and the economy, in particular through its significant contribution to members and the community.

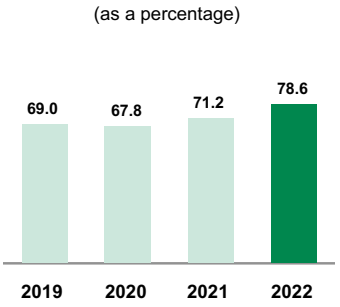

Key indicators	Trend	Adjusted trend[5]
Growth in operating income[2]: A measure of growth in Desjardins Group's operations. **Results achieved in 2022[6]:** Growth was 6.8%, which was within the target of 5% to 8%.		
Growth differential between operating income and non-interest expense[2]: A measure of sustainability and profitability. **Results achieved in 2022[6]:** The growth differential was (4.4)%, which is below the target of more than 0%, but is as expected and in line with the strategic orientations, mainly due to the larger amounts invested in the strategic projects and the higher employee expenses.		

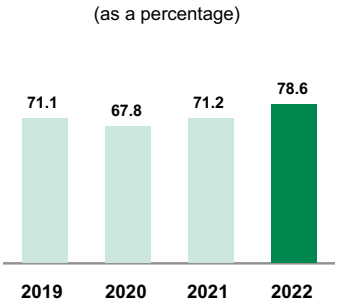

Footnotes to this table are presented on the next page.

Key indicators	Trend	Adjusted trend

Productivity index[2]:
A measure of efficiency.

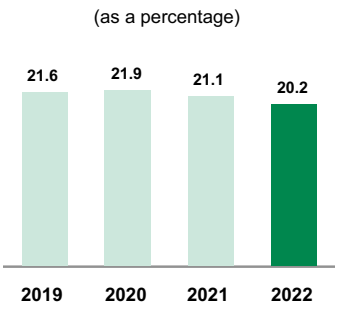

Results achieved in 2022[6]:
The index was 78.6%, which does not match the target productivity index of under 75%, but it is as expected and in line with the strategic orientations, mainly due to the larger amounts invested in strategic projects and the higher employee expenses.

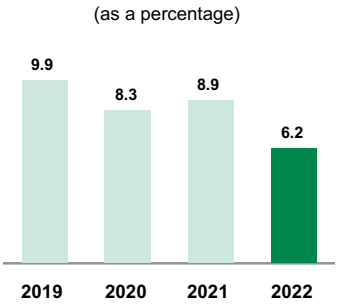

Tier 1A capital ratio[3]:
A measure of Desjardins Group's financial strength.

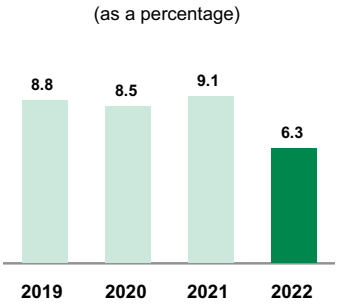

Results achieved in 2022:
As at December 31, 2022, this ratio was 20.2%, whici is above the 15% target.

Return on equity[4]:
A measure of profitability resulting in value creation for members and clients.

Results achieved in 2022:
This indicator and the adjusted indicator were 6.2% and 6.3%, respectively, which do not meet the target of over 8%, but are as expected and in line with the strategic orientations, mainly due to a decrease in surplus earnings, as explained in Section 2.1, “Analysis of 2022 results”.

(1) The four-year results represent the average of the key indicators for the fiscal years 2019 to 2022.
(2) For more information about non-GAAP ratios, see “Non-GAAP and other financial measures” on pages 3 to 7.
(3) In accordance with the base capital adequacy guideline for financial services cooperatives issued by the AMF and taking into account the applicable relief measures introduced by the AMF in response to the COVID-19 pandemic. See Section 3.2, “Capital management”.

(5) Includes the gain related to the sale of the entire portfolio of merchants receiving Desjardins Group services under the Monetico brand in 2019.
(6) The indicator and the adjusted indicator for 2022 are the same in both cases.

FINANCIAL OUTLOOK

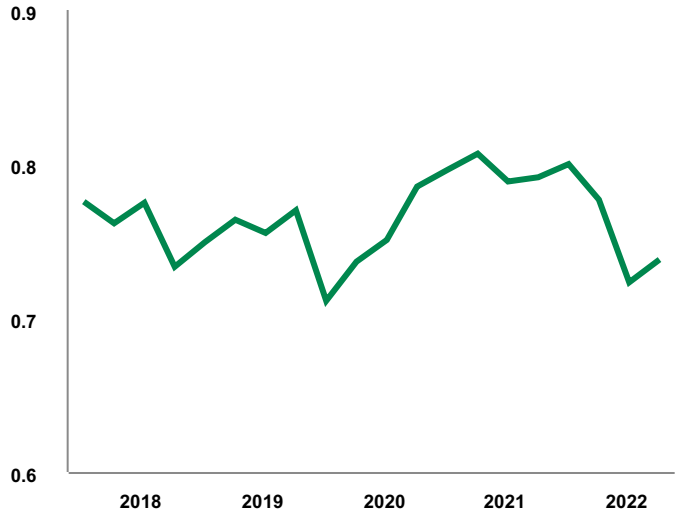

Desjardins Group will continue fiscal 2023 on a solid footing, with a level of capitalization that is higher than the average for the Canadian banking industry. There is still some uncertainty about the full impact of the economic slowdown on Desjardins Group’s operations and results because the economy is expected to be down from 2022, when real GDP in Canada grew by 3.6%. Net interest income will continue to be affected by strong competitive pressure in the banking industry and will be influenced upward by North American key interest rates, which should remain high until inflation is brought under control. In addition, this environment will favour on-balance sheet savings products, which are again becoming more attractive to members and clients.

Moreover, the changeover to IFRS 17 on January 1, 2023 and the complete application of IFRS 9 could prompt Desjardins Group to review certain calculation methods for its long-term financial performance objectives. The new standard will changing the measurement and recognition of insurance contracts as well as disclosure in Desjardins Group's financial statements. The insurers' net surplus earnings will be more sensitive to changes in mainly capital markets, but also in interest rates, which may add to the volatility of quarterly and annual results compared to what was observed in the past. However, the economic value of the insurance contrats will stay the same during the duration of the contract. Work is in progress to update the 2021-2024 strategic planning indicators, which will be monitored in 2023.

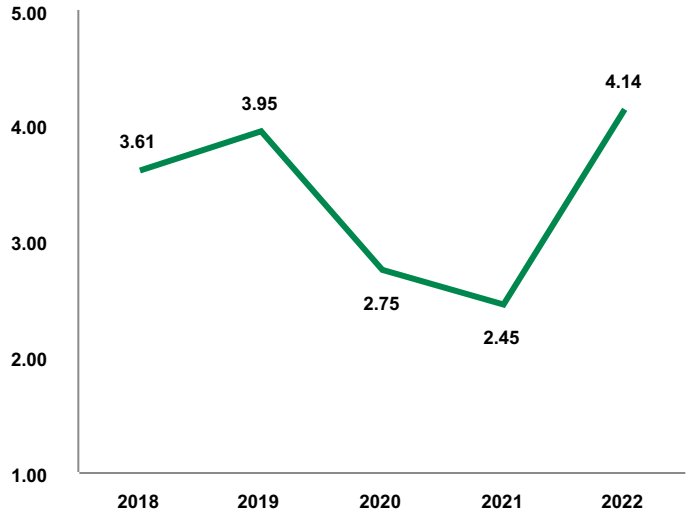

Finally, strict cost control, including the implementation of initiatives to promote efficiency and effectiveness as well as capital management, will allow Desjardins Group to maintain a significant level of investments for the benefit of members and communities by adopting innovative concepts to enhance and streamline service delivery and ensure information security, including privacy.

Global economy

In 2022, the global economy continued to recover from the pandemic. However, the 3.1% growth in global real GDP recorded for 2022 fell significantly short of the 6.2% gain in 2021. Several economies also struggled during the period. Global production was affected by waves of COVID-19, particularly in China and, more importantly, it was further hampered by the war in Ukraine. This led to a surge in prices for raw materials, including energy and food. The war also led to more supply chain problems, further exacerbating inflation, which was already high in many parts of the world. The war's impacts were most apparent in Europe, including the United Kingdom, which faced sharply higher energy prices that undermined household incomes and severely wore down consumer confidence. In China, the economy suffered when major cities were closed in the spring and fall under the government's zero-COVID policy.

Growth is expected to slow even further in most countries in 2023, as the rising cost of living continues to erode real consumer income and interest rate hikes suppress demand for goods and services, particularly in the housing market. Global real GDP growth for 2023 is projected at only 2.2%.

The world's major equity indices posted significant declines in 2022. Although the inflationary environment continued to support growth in corporate profits, surging interest rates took a heavy toll on returns in the financial markets. Higher interest rates first hit government bonds early in the year, and the central banks quickly followed suit with cycles of monetary tightening in Canada, the United States and elsewhere in the world. With the entire yield curve now at the highest levels in 15 years, the risks are driving down economic growth, and this may continue to weigh on equity market performance.

United States

The U.S. economy faced several challenges in 2022. Real GDP actually declined in the first two quarters of the year. However, it was difficult to speak of a recession at that time, as several other indicators, including domestic demand and the labour market, continued to rise. Real GDP growth improved in the third and fourth quarters. Inflation remained problematic throughout 2022, although it peaked at 9.1% in June according to the annual change in the consumer price index. In order to fight excessive growth in the cost of living and keep inflationary expectations under control, the U.S. Federal Reserve began monetary tightening in March and subsequently picked up the pace. The sharp increase in policy rates and market rates, including those on mortgages, was detrimental to the economy. The problems began in the housing market, which declined for most of the year. There was also a marked slowdown in the consumption of goods, even though the post-pandemic recovery in the consumption of services continued unabated.

Annual GDP growth is expected to be sluggish in 2023 as households and businesses continue to be affected by rising interest rates. A recession is therefore expected. A recovery should become apparent in the second half of 2023 as inflation eases and the economy, including the labour market, rebalances. U.S. real GDP grew by a strong 5.9% in 2021 and a respectable 2.1% in 2022, but only 0.7% growth is expected in 2023.

Canada

The Canadian economy continued to recover at a healthy pace in the first half of 2022. In June, the unemployment rate even reached a new historic low of 4.9%. However, there have been significant imbalances due to a combination of strong demand and supply that was constrained by problems in global supply chains and some shortages. As in many other regions of the world, these imbalances caused inflation to accelerate sharply, from 4.8% in December 2021 to a high of 8.1% in June 2022. To bring supply and demand back into better balance and ease the pressures driving up prices, the Bank of Canada began raising its key interest rates in March 2022, followed by other increases throughout the year. By the end of 2022, the target overnight rate stood at 4.25%, up from just 0.25% at the start of the year.

Sharply higher interest rates have had a significant impact on the Canadian economy, particularly in sectors that are most sensitive to interest rates. The housing market declined sharply as prices slipped and sales of existing homes fell. Under these conditions, real GDP growth slowed in the second half of 2022. On the other hand, the much tighter monetary policy began to affect inflation, which began a gradual decline in July 2022. For 2022 as a whole, Canadian real GDP is expected to have grown 3.6%, and inflation should average 6.8%. The problems are expected to peak in 2023 and provoke a recession in Canada. However, Canadian real GDP is expected to post positive growth again in the fall. For 2023 as a whole, Canadian real GDP is expected to be almost of approximately 0.7%. Inflation should continue to normalize throughout the year and average 3.5% for 2023.

Québec

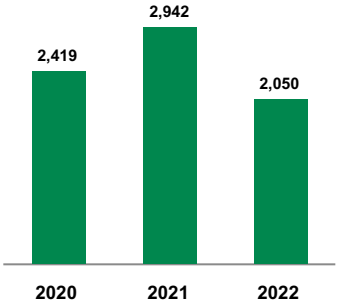

Following an exceptional start to the year, economic growth slowed sharply in the spring of 2022. Annualized real GDP growth fell from 5.5% in the first quarter to 1.2% in the second quarter. The second half of 2022 was particularly challenging. In the third quarter, real GDP contracted at an annualized rate of 1.9%, which could marking the beginning of a recession. The housing market, which changed course in spring 2022, continued to cool. Sales of existing homes declined, with the average price falling 6.9% from the high reached in April to December 2022. Housing starts declined approximately 15% in 2022, ending the strong growth recorded during the pandemic. Rising interest rates also placed pressure on household spending, which was sorely tested. Consumers were contending with high inflation, which was eroding their purchasing power. The inflation rate reached 6.7% in 2022, and Quebecers' confidence plummeted to a level almost as low as that reached at the height of the pandemic. The savings rate, however, remained high at close to 10% in 2022 due to government support measures and relatively limited consumer spending. The overheated labour market conditions nevertheless continued. The unemployment rate reached 4.3% in 2022, and wages grew quickly. As for businesses, supply chain disruptions began to ease, and the cost of shipping containers by sea from Asia fell to near pre-pandemic levels. However, exporting companies are confronted with the global economic slowdown that began in 2022. In addition, high interest rates have made highly leveraged households and businesses more vulnerable. The environment in Québec became more difficult in 2022, and the deterioration of the economy will continue in 2023.

Changes in the markets in which Desjardins Group operates are described in the corresponding analyses in Section 2.2, "Analysis of business segment results".

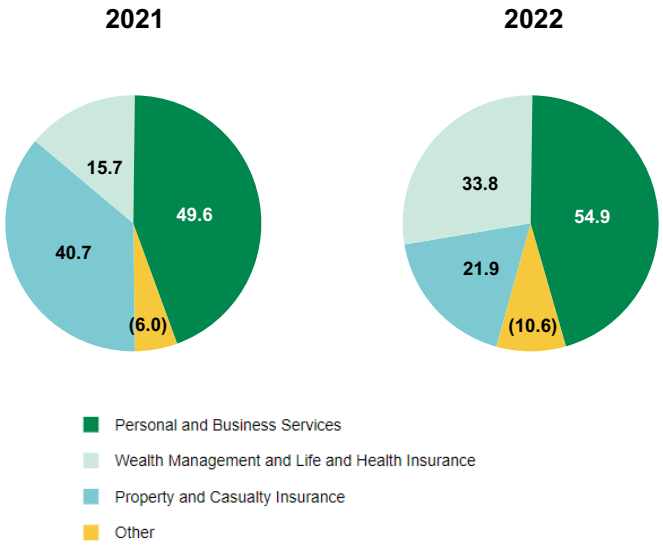

2.0 Review of financial results

2.1 Analysis of 2022 results

Surplus earnings before member dividends
(in millions of dollars)

Segment contributions to surplus earnings before member dividends
(as a percentage)

2022 SURPLUS EARNINGS

For 2022, Desjardins Group reported surplus earnings before member dividends of $2,050 million, a decrease of $892 million, or 30.3%, compared to 2021. This decrease in surplus earnings was largely due to a rise in the cost of automobile and property insurance claims in the Property and Casualty Insurance segment. Fiscal 2022 was marked by an increased frequency of automobile insurance claims, which was lower in 2021 in the context of the pandemic, the impact of inflation and more adverse weather conditions. The decrease in surplus earnings can also be attributed to investments in projects planned in accordance with Desjardins Group's strategic directions and an increase in spending on personnel. This reduction in surplus earnings was partially offset by an increase in net interest income and other operating income[(1)], the effect of higher interest rates on actuarial liabilities in life and health insurance, and an overall more favourable experience in group insurance.

By its very nature as a cooperative financial group, Desjardins Group's mission is to improve the economic and social well-being of people and communities, which it continued to strive to achieve in 2022.

- A total of $518 million was returned to members and the community,[(1)] compared to $497 million for 2021.
  - Provision for member dividends of $403 million, a $16 million increase compared to 2021.
  - An amount of $115 million was given back in the form of sponsorships, donations and scholarships, compared to $110 million for the previous year, with $46 million in 2022 and $41 million in 2021 from the caisses' Community Development Fund.
- Commitments of $14 million made in 2022 under the GoodSpark Fund to support in particular regional social and economic activities. Since 2017, Desjardins Group has made total commitments of $161 million.

Contribution of business segments to surplus earnings:

- Personal and Business Services: **Surplus earnings of $1,126 million,** down $333 million, or 22.8%, compared to 2021, essentially due to:
  - Increase in non-interest expense, mainly as a result of the larger amounts invested, as expected, in strategic projects related in particular to the digital shift and security, as well as the rise in spending on personnel in order to support growth in operations and enhance the services offered to members and clients.
  - Higher provision for credit losses in 2022 than in 2021, reflecting the impact of the improved macroeconomic outlook and borrower credit quality.
  - Offset by an increase in net interest income, less the decline in derivative financial instrument activities, and growth in other operating income[(1)].
- Wealth Management and Life and Health Insurance: **Surplus earnings of $692 million,** up $229 million, or 49.5% compared to 2021, mainly on account of:
  - Favourable effect of higher interest rates on actuarial liabilities.
  - Overall more favourable experience than for the comparative period of 2021, mainly in group insurance.
  - Positive effect of revisions of actuarial assumptions in the normal course of business while they had affected 2021 unfavourably.
  - Larger gains on disposal of securities and real estate investments than in 2021.

  This increase was mitigated in part by the following:
  - Increase in non-interest expense mainly as a result of higher employee expenses and the expected increase in the amounts invested in strategic projects.
  - Markets' impact on guaranteed investment funds more unfavourable than in 2021.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

- Property and Casualty Insurance: **Surplus earnings of $450 million,** down $747 million, or 62.4%, compared to 2021, due to the following:
  - Higher loss ratio compared to 2021, essentially in property insurance and automobile insurance. 2022 was affected by:
    - Higher frequency of claims compared to 2021, particularly in automobile insurance.
    - Impact of inflation.
    - One catastrophe, a rare weather phenomenon called a *derecho*, and five major events (flooding, windstorm, heavy rainfall, Hurricane Fiona and snowstorm), compared to one catastrophe and one major event in 2021.
  - Offset by an increase in investment income[(1)] excluding the change in the fair value of matched bonds.

- **Return on equity was 6.2%,** compared to 8.9% for 2021, primarily due to the decrease in surplus earnings, as explained earlier.

The following table shows return on equity.

Table 6 – Return on equity
For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Surplus earnings before member dividends	**$ 2,050**	$ 2,942	$ 2,419
Non-controlling interests' share	**(67)**	(143)	(84)
Group's share before member dividends	**$ 1,983**	$ 2,799	$ 2,335
Average equity before non-controlling interests' share	**$ 31,978**	$ 31,518	$ 28,247
Return on equity[(1)]	**6.2 %**	8.9 %	8.3 %

(1) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

OPERATING INCOME

Table 7 – Operating income
For the years ended December 31

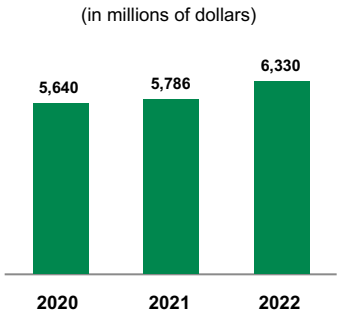

(in millions of dollars)	2022	2021	2020
Net interest income	**$ 6,330**	$ 5,786	$ 5,640
Net premiums	**11,842**	11,278	9,920
Other operating income[(1)] (see Table 10)	**3,626**	3,341	2,839
Total operating income[(1)]	**$ 21,798**	$ 20,405	$ 18,399

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.

Operating income rose to $21,798 million, an increase of $1,393 million, or 6.8%, compared to 2021.

Net interest income

Net interest income is the difference between interest income earned on assets, such as loans and securities, and the interest expense related to liabilities, such as deposits and subordinated notes. It is sensitive to interest rate fluctuations, funding and matching strategies, as well as the composition of interest-bearing or non-interest-bearing financial instruments. For analysis purposes, Table 8 shows the changes in net interest income for the main asset and liability classes, while Table 9 details how net interest income was affected by changes in volume and interest rates for the different assets and liabilities.

Net interest income totalled $6,330 million, up $544 million, or 9.4%, as a result of the following:
- Increase in the average return on loans as a result of the higher interest rate environment.
- Growth in average residential mortgages outstanding and average business loans outstanding.
- Increase in interest income resulting from liquidities and securities.
- Offset by an increase in interest expense on deposits as a result of higher interest rates.

- **Net interest margin of 2.13%** in 2022, up 7 basis points compared to 2021, mainly because of an increase in average loan volume coupled with higher interest rates.

- **Interest income of $9,385 million,** up $1,984 million, or 26.8%, essentially due to the following:
  - Increase in the average return on total interest-bearing assets, namely loans, securities, cash and deposits with financial institutions, which boosted income by $1,381 million.
  - Increase of $603 million in interest income as a result of growth in the average volume of total interest-bearing assets, mainly loans.

- **Interest expense of $3,055 million,** up $1,440 million, or 89.2%, primarily as a result of:
  - Increase of $1,342 million in interest expense, mainly from deposits linked to the growth in interest rates.
  - Growth in the average volume of total interest-bearing liabilities, mainly from deposits, resulting in a $98 million increase in interest expense.

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.

(1) 2021/2020 data have been reclassified to conform to the current year’s presentation.

Net premiums[1]

Net premiums, comprising life and health insurance, annuity, and property and casualty insurance premiums**, totalled $11,842 million,** up $564 million, or 5.0%, compared to 2021, due to items from the following segments:

(in millions of dollars)

Wealth Management and Life and Health Insurance

- **Net insurance and annuity premiums of $6,166 million,** up $499 million, or 8.8%, due to the following:
  – Increase of $313 million essentially in group annuity premiums, primarily as a result of agreements signed with groups, the value of which was higher than that signed in 2021. This growth is reflected in a similar change in actuarial liabilities included under "Claims, benefits, annuities and changes in insurance contract liabilities".
  – Increase of $146 million in group insurance premiums and of $40 million in individual insurance premiums.

Property and Casualty Insurance

- **Net premiums of $6,005 million,** up $96 million, or 1.6%, in particular as a result of business growth.

[1] The difference between total results and the sum of business segment results is due to intersegment transactions.

Other operating income

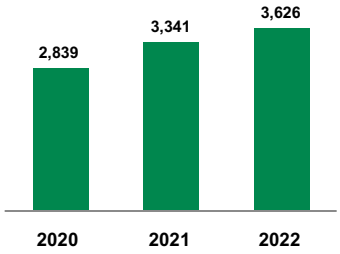

Table 10 – Other operating income
For the years ended December 31

(in millions of dollars)	2022	2021	2020
Deposit and payment service charges	**$ 448**	$ 424	$ 388
Lending fees and credit card service revenues	**991**	735	628
Brokerage and investment fund services	**989**	1,108	954
Management and custodial service fees	**786**	732	617
Foreign exchange income	**119**	121	103
Other	**293**	221	149
Total other operating income[1]	**$ 3,626**	$ 3,341	$ 2,839

[1] For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

Other operating income stood at $3,626 million, for an increase of $285 million, or 8.5%, compared to 2021, due to the following:

(in millions of dollars)

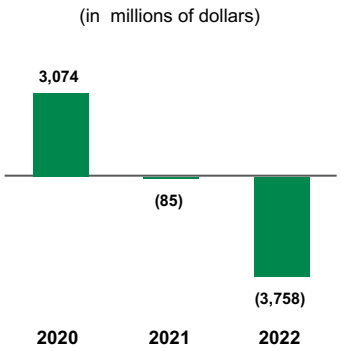

- **Deposit and payment service charges of $448 million,** up $24 million, or 5.7%, on account of growth in transaction volume.
- **Lending fees and credit card service revenues of $991 million,** up $256 million, or 34.8%, because of an increase in business volumes from Desjardins Card Services payment activities.
- **Income from brokerage and investment fund services of $989 million,** down $119 million, or 10.7%, due to:
  – Decline in assets under management as a result in particular of the impact of developments on financial markets.
  – Lower income from securities brokerage activities.
- **Management and custodial service fees of $786 million,** up $54 million, or 7.4%.
- **Foreign exchange income of $119 million,** a comparable amount to that of 2021.
- **Other operating income of $293 million,** up $72 million, or 32.6%, due to the following:
  – Change in investment funds that benefited groups having signed agreements under The Personal banner. It should be remembered that this change was offset by the results of these groups.
  – Smaller increase than in 2021 in the contingent consideration payable as part of the acquisition of the Canadian operations of the State Farm Mutual Automobile Insurance Company (State Farm), arising from favourable developments in claims taken over.
  – Offset by a decrease in income from EspaceProprio operations.

INVESTMENT INCOME[1]

Loss of $3,758 million, reported under "Investment income (loss)", compared to a loss of $85 million for 2021, essentially due to the following:

- Decrease in the fair value of assets backing liabilities related to life and health insurance operations.
  - Change mostly due to fluctuations in the fair value of the bond portfolio mainly as a result of a larger increase in market interest rates than in 2021.
  - It should be mentioned that this change in the fair value of bonds was offset by the decrease in the cost of claims due to matching.
- A greater decrease in the fair value of matched bonds in the Property and Casualty Insurance segment compared to 2021, on account of the greater increase in market interest rates in 2022 than in 2021. It should be mentioned that this change in the fair value of bonds was offset by a decrease in the cost of claims due to matching.
- Decline in derivative financial instrument activities.
- Offset by higher gains on the disposal of securities and real estate investments than in 2021.

TOTAL INCOME

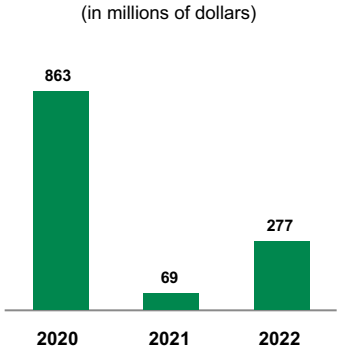

Total income, comprising net interest income, net premiums, other operating income and investment income, **amounted to $18,040 million**, for a decrease of $2,280 million, or 11.2%, compared to 2021. This decrease was mainly due to the decline in investment income, as explained earlier, and it was largely offset by a similar change in actuarial liabilities included in "Claims, benefits, annuities and changes in insurance contract liabilities".

PROVISION FOR CREDIT LOSSES

The provision for credit losses totalled $277 million, up $208 million compared to 2021. The provision for 2022 was affected in particular by an increase in outstandings and a certain deterioration in the credit quality of the credit card portfolios and, to a lesser extent, of the business loan portfolios. The provision for 2021 primarily reflected the impact of an improved macroeconomic outlook and better borrower credit quality. Net write-offs in 2022 and 2021 remained historically low for all the portfolios.

Desjardins Group continued to present a high-quality loan portfolio in 2022.

- The credit loss provisioning rate was 0.11% in 2022, compared to 0.03% for 2021. The increase in this rate was due to the fact that the 2022 provision for credit losses was higher than for 2021, which primarily reflected the impact of the improved macroeconomic outlook and borrower credit quality.
- The ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio, was 0.47%, unchanged from December 31, 2021.

The following table shows the calculation of the credit loss provisioning rate.

Table 11 – Credit loss provisioning rate
For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Total provision for credit losses	**$ 277**	$ 69	$ 863
Provision for credit losses on securities	**5**	1	—
Provision for credit losses on loans and off-balance sheet items	**$ 272**	$ 68	$ 863
Average gross loans	**$ 241,613**	$ 222,138	$ 208,482
Average gross acceptances	**131**	210	200
Average gross loans and acceptances[1]	**$ 241,744**	$ 222,348	$ 208,682
Credit loss provisioning rate[1]	**0.11 %**	0.03 %	0.41 %

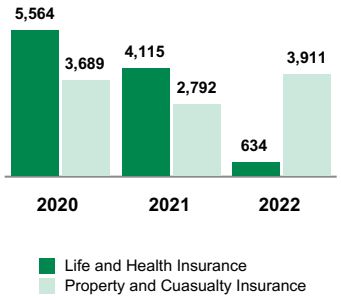

(1) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

CLAIMS, BENEFITS, ANNUITIES AND CHANGES IN INSURANCE CONTRACT LIABILITIES[1]

Expenses related to claims, benefits, annuities and changes in insurance contract liabilities totalled $4,500 million, down $2,383 million, or 34.6%, compared to 2021. This decrease, partially offset by a similar change under "Investment income (loss)", is due to items from the following segments:

(in millions of dollars)

[1] The difference between total results and the sum of business segment results is due to intersegment transactions.

Wealth Management and Life and Health Insurance segment

- **Cost of claims of $634 million,** down $3,481 million, or 84.6%, basically due to:
  - Decrease of $3,736 million in actuarial liabilities under "Insurance contract liabilities", on account of:
    - The decrease in the fair value of matched investments, presented under "Investment income (loss)".
    - Positive effect of higher interest rates on liabilities.
    - Overall more favourable experience in group insurance.
    - Positive effect of revisions of actuarial assumptions in the normal course of business whereas they had affected 2021 unfavourably.
    - Partially offset by provisions made for group annuities related in particular to agreements signed with groups, the value of which was higher than that signed in 2021, as previously mentioned.
  - Offset by the increase in benefits connected with business growth and the higher cost of prescription drugs and health care.

Property and Casualty Insurance segment

- **Cost of claims of $3,911 million,** up $1,119 million, or 40.1%, as a result of:
  - Loss ratio of 73.1%, compared to 50.1% in 2021.
    - Higher current year loss ratio compared to 2021, namely, 75.2% vs. 60.8%, mainly in automobile insurance and in property insurance, reflecting the higher frequency of automobile insurance claims and the impact of inflation, among other things.
    - Less favourable ratio of changes in prior year claims than in 2021, i.e. (6.1%) vs. (12.1%), essentially in automobile insurance, particularly on account of recent inflationary pressures.
    - Higher loss ratio related to catastrophes and major events than in 2021, i.e. 4.0% vs. 1.4%. 2022 was marked by one catastrophe, a rare weather phenomenon called a *derecho*, in Ontario and in Québec, and five major events (flooding, windstorm, heavy rainfall, Hurricane Fiona and snowstorm), compared to one catastrophe, a hailstorm in Alberta, and one major event in 2021.
  - Offset by a higher favourable impact of the increase in the discount rates used to measure the provision for claims than in 2021. It should be mentioned that this favourable impact on the cost of claims was partially offset by a change in the fair value of matched bonds, which is presented under "Investment Income (loss)".

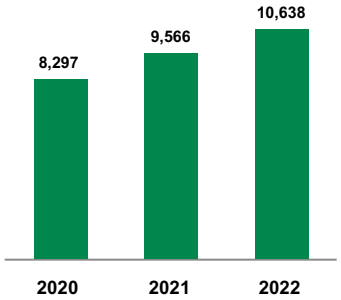

NON-INTEREST EXPENSE AND PRODUCTIVITY INDEX

Table 12 – Non-interest expense
For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021[1]	2020[1]
Salaries and employee benefits			
Salaries	**$ 4,137**	$ 3,553	$ 3,101
Employee benefits	**929**	884	801
	5,066	4,437	3,902
Professional fees	**1,159**	1,013	664
Technology	**978**	893	791
Commissions	**929**	881	788
Occupancy costs	**403**	406	419
Communications	**417**	329	290
Business and capital taxes	**482**	459	418
Other	**1,204**	1,148	1,025
Total non-interest expense	**$ 10,638**	$ 9,566	$ 8,297
Productivity index[2]	**78.6 %**	71.2 %	67.8 %

[1] Data have been reclassified to conform to the current year's presentation.
[2] For more information about non-GAAP ratios, see "Non-GAAP and other financial measures" on pages 3 to 7.

(in millions of dollars)

Non-interest expense totalled $10,638 million for 2022, up $1,072 million, or 11.2%, compared to 2021. This increase was essentially due to:
- Increase in investments, as expected, for the continued implementation of strategic projects related in particular to the digital shift and security.
- Rise in spending on personnel, technology and communication to support growth in operations and enhance the services offered to members and clients.
- Higher rewards program expenses due to growth in payment activity volumes.

- **Salaries and employee benefits of $5,066 million,** up $629 million, or 14.2%, compared to 2021, mainly because of higher salaries due to growth in operations, and strategic projects related to the digital shift, security and indexing.
  - This expense item represented 47.6% of total non-interest expense, namely a percentage slightly higher than 46.4% in 2021.
  - The ratio of employee benefits to total base compensation[(1)] was 22.5% in 2022, down from 24.9% in 2021.

- **Professional fees of $1,159 million,** up $146 million, or 14.4%, compared to 2021 due to increased investments for the continued implementation of strategic projects, related in particular to the digital shift and security.

- **Technology expenses of $978 million,** up $85 million, or 9.5%, compared to 2021, to support growth in operations and enhance the services offered to members and clients.

- **Commissions of $929 million,** up $48 million, or 5.4%, compared to 2021, due to higher expenses related to remuneration on premiums for P&C Insurance operations.

- **Occupancy costs of $403 million,** which is comparable to 2021.

- **Communication expenses of $417 million,** up $88 million, or 26.7%, compared to 2021, due to higher advertising expenses.

- **Business and capital taxes of $482 million,** up $23 million, or 5.0%, compared to 2021.

- **Other expenses of $1,204 million,** up $56 million, or 4.9%, compared to 2021, due to the higher expenses related to the rewards program as a result of higher payment activity volumes.

- **Productivity index at 78.6% for 2022,** compared to 71.2% for 2021, particularly because of the larger amounts invested in strategic projects and the increase in employee expenses.

INCOME TAXES ON SURPLUS EARNINGS AND INDIRECT TAXES

Desjardins Group is a cooperative financial group, and each of its entities that operates as a financial services cooperative—namely the caisses and the Federation—is considered a private and independent company for tax purposes, unlike the vast majority of other Canadian financial institutions, which are large public corporations. Desjardins entities that are not financial services cooperatives are subject to the large corporation tax regime.

- **Income taxes on surplus earnings before member dividends of $575 million,** a decrease of $285 million compared to 2021.
  - Effective tax rate[(1)] of 21.9% for the year ended December 31, 2022, compared to 22.6% for 2021.

Note 28, “Income taxes on surplus earnings”, to the Combined Financial Statements presents, among other things, a reconciliation of the statutory tax rate and the effective tax rate, expressed in dollars.

Indirect taxes consist of property and business taxes, payroll and social security taxes, the goods and services tax, and sales taxes. Indirect taxes are included in non-interest expense. For 2022, Desjardins entities paid $1,954 million in indirect taxes, compared to $1,641 million in 2021.

2.2 Analysis of business segment results

Desjardins Group’s financial reporting is organized by business segments, which are defined based on the needs of members and clients, the markets in which Desjardins operates, and on its internal management structure. Desjardins Group’s financial results are divided into the following three business segments: Personal and Business Services, Wealth Management and Life and Health Insurance, and Property and Casualty Insurance. In addition to these three segments, there is also the Other category. This section presents an analysis of results for each of these segments.

Intersegment transactions are recognized at the exchange amount, which represents the amount agreed upon by the various legal entities and business units. The terms and conditions of these transactions are comparable to those offered on financial markets.

(1) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

2.2.1 Personal and Business Services

PROFILE

Personal and Business Services is central to Desjardins Group's operations. With its comprehensive, integrated line of products and services designed to meet the needs of individual and business members, institutions, non-profit organizations and cooperatives, Desjardins Group is a leader in financial services in Québec and is present on the financial services scene in Ontario as well.

Desjardins's offer includes everyday financial management, savings products, payment services, wealth management, financing, specialized services, access to capital markets, risk and development capital, business ownership transfers and advisory services, and through its distribution network, life and health insurance and property and casualty insurance products.

In addition, members and clients know that they can rely on the largest advisory force in Québec, made up of dedicated professionals who are there for them at every stage in their life or entrepreneurial journey.

To meet the constantly changing needs of its members and clients, Desjardins Group offers its services through the caisse network, the Desjardins Business centres and the Signature Service centres, as well as through complementary networks and specialized mobile teams, in person, by phone, online, via applications for mobile devices, and at ATMs.

SERVICES

- **Everyday financial management:**
  - In particular, transaction services carried out at the caisse counter and at ATMs, requests for information and specialty services, such as purchasing foreign exchange, money orders, drafts and safety deposit boxes. A number of these services are increasingly available online and via mobile devices.
- **Savings and investments:**
  - Products distributed by the caisses, the Desjardins Business centres and the Signature Service centres, as well as through specialized wealth management teams and complementary networks, such as mutual investment funds (Desjardins Funds), market-linked guaranteed investments (MLGI), the guaranteed savings offer, the guaranteed investment fund offer, and annuity products.
- **Integrated business offer:**
  - Customized solutions to support businesses of all sizes in their plans, whether on Québec, Canadian or international markets.
- **Financing:**
  - **Residential mortgages,** for the purchase of land, new or existing homes and for renovations.
  - **Consumer loans,** such as loans for the purchase of automobiles and durable goods, personal loans and lines of credit, student loans and Accord D financing solutions.
  - **Commercial credit,** which makes it possible to offer financing in the commercial and industrial, agricultural and agri-food, and public and institutional sectors, as well as for commercial and multi-residential real estate.
- **Payment:**
  - Debit, credit and prepaid card payment services for individuals and businesses, electronic payment services, and both domestic and international funds transfers.
- ***AccèsD*:**
  - Desjardins Group products and services are available at anytime, anywhere in the world, by phone, online and via applications for mobile devices.
- **Specialized wealth management networks (Signature Service, Private wealth management, Securities and Online brokerage):**
  - Each Desjardins network provides support to members and clients, as well as their families, based on a 360° vision of wealth management.
  - These networks differ from one another in their approach and in the range of proprietary advisory services and products they offer. They have access to a team of specialists from various backgrounds (tax specialists, notaries, lawyers, accountants, etc.) who can cover all aspects of wealth management.
  - Members and clients can simply choose the network that offers them the most appropriate type of support, depending on their net worth, situation and how they wish to manage their wealth.
- **Capital markets:**
  - Meeting the financing needs of Canadian corporations, institutions and cooperatives, and providing advisory services for mergers and acquisitions, as well as intermediation and execution services on the stock and fixed income securities markets.
  - Carried out by seasoned sales and trading teams who are supported by a research team that is renowned in the industry for its excellence.
- **Risk and development capital (Desjardins Capital):**
  - Specializes in direct and indirect investment in small and medium-sized enterprises (SMEs) and cooperatives in every region of Québec.
  - Promotes, supports and encourages the sustainability of SMEs in Québec.
  - As manager of *Capital régional et coopératif Desjardins* (CRCD), *Desjardins Capital* encourages Quebecers to save.
  - Accompanies and provides customized solutions, strategic advice and value-added services for companies in various stages of start-up, growth or transfer.
- **Specialized services:**
  - International services, banking and cash management services, Desjardins employer solutions (payroll and human resources management, as well as group retirement savings), factoring, specialized financing for institutional clients, the franchise sector, health care and professional firms.

2022 ACHIEVEMENTS

- In the current economic environment of tightening monetary policy, **providing support to members and clients is still a priority**. Each rate hike increases the number of members in a vulnerable position. Several initiatives have been implemented to support members and clients in a vulnerable position using a proactive approach involving listening and caring, such as preparing our front-line employees to properly support members and clients, making proactive intake calls and sending out a special newsletter about economic conditions.
- **Safety and fraud prevention tips:**
  - Continuation of the "Sharpen your cyber reflexes" program to provide support to members and clients with relevant information and tools: Inviting members and clients to sharpen their cyber reflexes through various tips; the offensive addresses various security issues identified and prioritized by Desjardins Group: phishing, easy money scams, romance scams, investment fraud and transactional best practices.
  - Two-step validation is gradually becoming mandatory for all *AccèsD* and *AccèsD Affaires* users, and providing, as a result, a simple and seamless experience for members and clients, and adding a layer of security to *AccèsD* accounts.
- **Enhanced and simplified digital experience:**
  - Continued reduction in the number of our websites in 2022 to make the navigation and search experience simpler, faster and more engaging for members and clients.
  - *AccèsD* Online and mobile services overhauled to enhance self-service functions for members and clients so they can:
    - Easily manage their credit cards.
    - Have a new experience in consulting and managing their everyday transaction accounts.
    - Have self-serve access to the MLGI portfolio.
  - Voice authentication: Number of users has risen beyond 1 million. For a faster and more secure experience, callers to our Client Relations Centres (CRC) can be identified with their voiceprint. This initiative won the "Coup du coeur du public" award at the Réseau Action TI's OCTAS award gala.
  - Desjardins Virtual Assistant:
    - Makes access simpler for 14 million callers who contact the CRCs. The project was aimed at developing interactive voice response while prioritizing the needs of members and clients. Desjardins is one of the first companies in Canada to provide virtual assistance in French in Québec thanks to Google solutions.
    - Offers advice, particularly for replacing debit and credit cards.
    - This project's execution and delivery won awards in the "Process Transformation – Large Business" category at the Réseau Action TI's most recent OCTAS gala.
  - Roll-out in assisted mode of the new appointment scheduling solution for caisses, CRCs and *AccèsD*. Among other things, it gives members access to the first available advisor with the required expertise, and not only the member's assigned advisor at the caisse.
  - Simplification of the online account application process for entrepreneurs, with increased automation improving the member's or client's experience and ensuring information integrity.
- **Improvement of offers in retail sectors:**
  - Performance of offers enhanced for businesses in the technology, manufacturing and farm sectors. Front-line teams now have tools to provide better support to businesses in these sectors.
  - Development of an offer for syndicates of co-owners to raise members' awareness of amendments to the *Civil Code of Québec* with regard to co-owners' insurance and its impact on the management of a property in co-ownership. This offer helps them to manage and maintain their real estate holdings while giving them access to the expertise of partners to support them in administering their building and to propose innovative and affordable management tools.
  - Offer developed to raise entrepreneurs' awareness and support them in their digital shift, thereby ensuring their competitiveness and increasing their productivity.
- **Introduce young people to entrepreneurship:** Under the Together for Our Youth program, a $500,000 partnership was announced with EVOL to finance two programs for young entrepreneurs in order to support them in their entrepreneurial and sustainable development process through training sessions, co-development, networking, coaching and scholarships.
- **Reinforcing our role as a socioeconomic leader:**
  - More than $6 million was granted in 2022 to Québec and Ontario entrepreneurs by the Momentum Fund, which has a $7 million envelope for the year. Non-repayable funding of up to $20,000 was granted to over 750 businesses to carry out their growth and quality job creation projects, major levers for regional economic development. Since 2020, Desjardins Group has made commitments totalling $14 million under this program.
  - Desjardins GoodSpark Grants for a 3rd year: $3 million in the form of $20,000 grants distributed to 150 small businesses to stimulate economic growth in Ontario and in the Atlantic and Western regions.
- The sector is gradually applying its **ESG approach** to all its operations, in particular:
  - Desjardins Group's commitment, along with the Québec government and other partners, to support the construction of 1,000 affordable housing units in the next three years. This commitment reaffirms our resolve to continue to contribute to the well-being of individuals and communities.
  - Launch of a new offer to support business members to facilitate the attraction, settlement and retention of international workers in Québec, in partnership with Montréal International.
  - A new learning path created by Empowering Women, in conjunction with The A Effect, to have female entrepreneurs tap into their full leadership potential. The Entrepreneur's learning path is offered for free and exclusively to female Desjardins members and clients.
  - Sustainable development commitment: Since August 2022, charging an electric car at a public charging station allows you to accumulate more BONIDOLLARS and receive cash remittances on specific Desjardins credit cards.
  - At the first edition of the *Soirée reconnaissance Réseau Capital*, Desjardins Capital won the award for being an ally of diversity and inclusion for its actions and commitment to promote diversity and inclusion in the financial industry.
- **Modernization of the Canadian payments ecosystem:** As a leading financial institution, Desjardins gradually began rolling out Interac transfers in 2022, providing a simplified and modernized experience for members and clients, and making payments easier, smarter, and safer for all members and clients.
- **Nilson Report:** Desjardins is the financial institution with the best growth in purchase volume and in the number of credit card transactions by small and microbusinesses.
- **40th anniversary of Desjardins Online Brokerage:** Four decades of democratization of equity markets and financial education. Close to 250 educational events are offered every year to beginners or active and seasoned investors. For young investors, the exclusive offer of Broker@ge 18-30 will raise their awareness of the importance of sound financial health and best practices for independent investing for those budding investors who want to start out on equity markets. Moreover, since 2021, there has been no commission on equity and exchange-traded fund (ETF) trades.

INDUSTRY

- **Canadian market:**
  - In 2022, the Canadian financial industry comprised some 81 domestic and foreign banking institutions, as well as 426 savings and loan cooperatives, almost half of which belonged to Desjardins Group.
  - In the banking services industry, on-balance sheet and off-balance sheet personal savings outstanding was estimated at $6,023 billion as at December 31, 2022, for a year-over-year decrease of 1.1%, compared to a 15.2% increase a year earlier. This decrease is due to the lower returns on financial markets, with the S&P/TSX and S&P 500 stock indices down by 8.7% and 19.4%, respectively, in the past 12 months. 2022 was also marked by a very good performance in sales of on-balance sheet savings products (term savings) after a year of strong growth in off-balance sheet personal savings in 2021.
  - Outstanding volume of loans to individuals was estimated at $2,681 billion as at December 31, 2022, a year-over-year increase of 6.9%, down from the 8.5% increase at the previous year-end. This year-over-year growth was largely due to the vigorous housing market, which continued at the start of the year, fuelling the demand for residential mortgages.
  - Business financing outstanding estimated at $1,119 billion as at December 31, 2022, a year-over-year increase of 19.4%, shooting up from the 8.2% increase at the end of 2021.

- **Québec market:**
  - On-balance sheet and off-balance sheet personal savings outstanding was estimated at $1,141 billion as at December 31, 2022, a year-over-year decrease of 1.9%, versus an increase of 17.6% at year-end 2021 due to the same factors as mentioned for personal savings in the Canadian market.
  - Outstanding volume of retail financing was estimated at $469 billion as at December 31, 2022, for a year-over-year increase of 6.6%, compared to a 7.6% increase recorded a year earlier.
  - Business financing outstanding was estimated at $234 billion as at December 31, 2022, for a year-over-year increase of 24.9%, compared to a 14.5% growth at year-end 2021.
    - Agricultural loans, included in business financing, were estimated at $24.8 billion as at December 31, 2022, a year-over-year increase of 7.7%, slowing from its 12.2% growth on the same date a year earlier.

- **Competition in Québec for financial services to individuals and businesses:**
  - Desjardins Group is a leader in many of the fields in which it operates.
  - A leader in residential mortgages, its market share was estimated at about 38% as at December 31, 2022, and it is a major player in consumer credit, with a market share of approximately 26% on the same date.
  - Desjardins Group is a leader in personal savings in Québec, especially in on-balance sheet personal savings products, with a market share of this industry estimated at approximately 41% as at December 31, 2022.
  - In commercial and industrial loans, Desjardins Group is also a major player in Québec, with an estimated market share of approximately 22% as at December 31, 2022.
  - Desjardins Group is a leader in agricultural financing, with a loan portfolio of more than $10.5 billion and an estimated market share of 42% as at December 31, 2022.
  - The major industry players are focusing primarily on client experience, access to services and proactive advice.
  - The fight for market share is therefore very fierce, since all players are adopting strategies aimed at intensifying business relations with their clients and getting to know them better.

Additional information about the economic environment can be found in Section 1.5, “Economic environment and outlook”, of this MD&A.

2023 STRATEGIES AND PRIORITIES

The 2023 strategies and priorities of the Personal and Business Services segment are incorporated into Desjardins Group’s strategic orientations and are aimed at helping Desjardins to achieve its goal of being everyone’s #1 choice, by always working in the best interests of members and clients. The seven strategic directions of Desjardins Group, as presented in Section 1.4, “Strategic orientations and financial objectives”, of this MD&A, are also the strategic directions of the Personal and Business Services segment.

The segment intends to enhance its leadership position in financing, everyday financial management, savings and, through its distribution network, life and health and P&C insurance products. The segment will continue to work always in the best interests of its members and clients, in particular, by giving members and clients a simple, omnichannel experience by leveraging mobile platforms, speeding up the segment’s digital initiatives, and enhancing the support provided by employees in delivering services. The Personal and Business Services segment will also strengthen relationships with our customers by taking a life-event management approach and by making integrated offers. The segment will also continue to strive to enhance the employee experience (including talent management) in order to minimize the impact of labour shortages on the market.

Reaching objectives requires the commitment of every director, manager and employee, as well as a high-calibre, comprehensive and integrated offer that is innovative and easy to access, all in the best interests of members and clients.

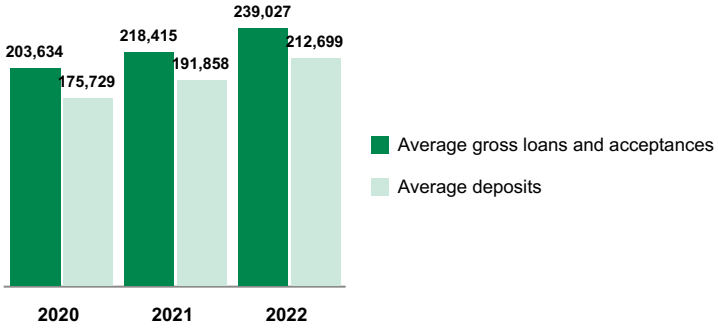

ANALYSIS OF FINANCIAL RESULTS

Table 13 – Personal and Business Services – Segment results
For the years ended December 31

(in millions of dollars and as a percentage)	2022	2021	2020
Net interest income	**$ 5,631**	$ 5,005	$ 4,970
Other operating income[1]	**2,991**	2,684	2,366
Operating income[1]	**8,622**	7,689	7,336
Investment income[1]	**36**	241	276
Total income	**8,658**	7,930	7,612
Provision for credit losses	**274**	75	867
Non-interest expense	**6,860**	5,886	4,987
Income taxes on surplus earnings	**398**	510	444
Surplus earnings before member dividends	**1,126**	1,459	1,314
Member dividends, net of tax recovery	**297**	284	245
Net surplus earnings for the year after member dividends	**$ 829**	$ 1,175	$ 1,069
Indicators			
Average gross loans and acceptances[2]	**$ 239,027**	$ 218,415	$ 203,634
Average deposits[2]	**212,699**	191,858	175,729
Credit loss provisioning rate[2]	**0.11 %**	0.03 %	0.43 %
Gross credit-impaired loans/gross loans and acceptances ratio[2]	**0.48**	0.47	0.64

(2) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

Average gross loans and acceptances and average deposits
(in millions of dollars)

COMPARISON OF 2022 AND 2021

- **Surplus earnings before member dividends of $1,126 million,** down $333 million, or 22.8%, compared to 2021, essentially due to:
  - Increase in non-interest expense, mainly as a result of the larger amounts invested, as expected, in strategic projects related in particular to the digital shift and security, as well as the rise in spending on personnel in order to support growth in operations and enhance the services offered to members and clients.
  - Higher provision for credit losses in 2022 than in 2021, reflecting the impact of the improved macroeconomic outlook and borrower credit quality.
  - Offset by an increase in net interest income, less the decline in derivative financial instrument activities, and growth in other operating income[1].

- **Operating income[1] of $8,622 million,** up $933 million, or 12.1%.

- **Net interest income of $5,631 million,** up $626 million, or 12.5%, due to:
  - Increase in the average return on loans as a result of the higher interest rate environment.
  - Growth in average residential mortgages outstanding and average business loans outstanding.
  - Increase in interest income resulting from liquidities and securities.
  - Offset by an increase in interest expense on deposits as a result of higher interest rates.

- **Other operating income[1] of $2,991 million,** up $307 million, or 11.4%, mainly due to higher business volumes of Desjardins Card Services payment activities.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

- **Investment income[1] of $36 million,** down $205 million, or 85.1%, mainly as a result of:
  – Decline in activities related to derivative financial instruments, which was offset by growth in net interest income.
  – Offset by losses on the disposal of securities realized in 2022, which were smaller than in the previous year.

- **Total income of $8,658 million,** up $728 million, or 9.2%.

- **Provision for credit losses of $274 million,** up $199 million, compared to 2021. The provision for 2022 was affected in particular by an increase in outstandings and a certain deterioration in the credit quality of the credit card portfolios and, to a lesser extent, of the business loan portfolios. The provision for 2021 primarily reflected the impact of an improved macroeconomic outlook and better borrower credit quality. Net write-offs in 2022 and 2021 remained historically low for all the portfolios.

- **Non-interest expense of $6,860 million,** up $974 million, or 16.5%, essentially due to:
  – Increase in amounts invested, in particular for the digital shift and security.
  – A rise in spending on personnel and technology in order to support growth in operations and enhance the services offered to members and clients, particularly wealth management advisory services and Client Relations Centre advisory services.
  – Growth in expenses related to the rewards program as a result of higher volumes of payment activities.

2.2.2 Wealth Management and Life and Health Insurance

PROFILE

The Wealth Management and Life and Health Insurance segment combines different categories of service offers aimed at growing and protecting the assets of Desjardins Group members and clients. These offers are intended for individuals, businesses and their employees.

The segment designs several lines of individual insurance (life and health) coverage as well as investment solutions. It also includes asset management and trust services for institutional clients. This segment is a Canadian leader in responsible investing and responsible insurance.

One of the greatest strengths of the Wealth Management and Life and Health Insurance segment is its vast and diversified Canada-wide distribution network, including:
- Desjardins caisse network.
- Desjardins agent network.
- Desjardins Financial Security Life Assurance Company partner networks.
- External insurance and investment solution networks.
- Actuarial consulting firms and brokers.

To meet members' and clients' needs and preferences, certain product lines are distributed directly via Client Relations Centres, online or through applications for mobile devices. Online services are constantly being fine-tuned so that they meet clients' changing requirements.

Since September 1, 2021, the Wealth Management and Life and Health Insurance segment also includes operations resulting from the acquisition of the assets of investment firm Hexavest Inc., which serves a primarily institutional clientele located mainly in Canada and also internationally.

On November 30, 2022, Desjardins Group, acting through 9479-5176 Quebec Inc., an indirect, wholly-owned subsidiary of the Federation, agreed to acquire the independent life insurance and retail investment distribution operations of Guardian Capital Group Limited, in particular by purchasing all the shares of IDC Worldsource Insurance Network Inc., Worldsource Financial Management Inc. and Worldsource Securities Inc. The transaction is expected to close in the first quarter of 2023, subject to the required regulatory approvals and customary closing conditions. The results of these operations will be accounted for within the Wealth Management and Life and Health Insurance segment.

SERVICES

Life and Health Insurance
- Includes products and services offered to individuals, and a group insurance service offering for businesses and their employees.
- These life and health insurance coverages provide peace of mind by reducing the financial effects that could occur due to illness, disability, accident or death.

Wealth Management
- **Investments:**
  – Wide range of investment solutions for individuals and group retirement savings service proposals for businesses and their employees.
  – Mutual funds, guaranteed investment funds, market-linked guaranteed investments (MLGI) and exchange-traded funds (ETF), including responsible investing product lines, allowing members and clients to find the investment best suited to their needs, whether they are preparing for retirement, planning a trip or any other financial goal.
- **Institutional services:**
  – Services for institutional clients, mainly pension funds, foundations, investment funds and insurers.
  – Asset management by a team of specialists who combine innovation, availability and discipline to design the best customized solutions.
  – Trust services, such as custody of securities on North American and international markets and fiduciary services for businesses.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

2022 ACHIEVEMENTS

Life and Health insurance

- Implementing actions to allow members and clients to obtain **real-time replies** when applying for **individual insurance.**
- Launching the innovative **5-pay PAR**, participating whole life insurance, in order to better meet the needs of our clients and distribution partners.
- Continuation of initiatives aimed at **enhancing the credit insurance offer and support** to meet the coverage needs of members and clients.
- Life and Health Insurance is gradually rolling out its **ESG approach** across all its operations, including:
  - Launching a group insurance offer for people in the process of gender affirmation. This new offering is part of a series of actions taken by Desjardins in its desire to move towards an ever more inclusive society.
  - Rolling out responsible insurance training for employees to raise their awareness of the impact of climate change on the health of Canadians and to anticipate the changing needs of our members, clients and partners in this new environment.
- **Several awards won and recognition gained,** all attesting to our commitment to supporting our members and clients:
  - According to the *Baromètre de l'assurance 2022* (2022 insurance barometer), a satisfaction survey of financial security advisors in Québec, Desjardins stands out for its life insurance and annuity products compared to its competitors.
  - Desjardins stood out at the Insurance Business Canada Awards as the recipient of the Award for Life & Health Insurer of the Year, which recognizes Desjardins's commitment to its products and services, to financial literacy and to its exemplary customer service approach.

Wealth Management

- **Development of the offering integrating ESG considerations** to meet the needs of members and clients**:**
  - Launching responsible annuities: Desjardins is the first Canadian financial institution to exclusively offer responsible annuities in retail investing.
  - New funds and portfolios added to enhance the socially responsible line, enabling our members and clients to contribute to the energy transition.
  - Launching new exchange-traded funds (ETFs), including a U.S. equity mandate with a responsible investing approach.
  - Responsible investing training course for advisors and teams designing investment solutions.
  - New fund offer and training in responsible investing rolled out for members and clients in group retirement savings.
  - Development of the group annuity offering in order to provide a competitive response to the expectations of members and clients.
- **Signing** of the Finance for Biodiversity Pledge aimed at **protecting and restoring biodiversity** through members' financial activities.
- **Several awards won and recognition gained,** all attesting to our commitment to developing high-return investing solutions for members and clients:
  - Garnered 6 FundGrade A+® 2022 awards from Fundata, which recognizes the best investment solutions available in Canada each year, two of which were for responsible investing solutions.
  - Desjardins was ahead of the pack with its line of structured products.
    - The prestigious "Best House, Canada" award (for the third year in a row) by Structured Retail Products.
    - "Best Private Bank" and "Best Sales" awards given in Canada at the first edition of SPi Canada 2022 Awards for Excellence.

INDUSTRY

The wealth management industry and the life and health insurance industry are complementary because their aim is to provide products and services that will increase the net worth of Canadian households and provide them with the coverage they need.

- **Canadian market:**
  - Wealth Management: At the end of 2021, financial assets of close to $6,472 billion were held by Canadian households. Assets were up 15.8% in 2021, growing annually at 8.6% on a compound basis over the past 10 years. Stock markets continued to grow in 2021, fuelled by investor optimism and the savings accumulated during the pandemic. In 2022, inflation and rising key interest rates had an impact on the economy, creating a volatile market and economic environment.
  - Life and Health Insurance: Premium income totalled $139 billion in life and health insurance and in annuities in 2021, exceeding the pre-pandemic level by close to $17 billion and growing an average 5.6% per annum over the last five years. More than 29 million Canadians are financially protected, and $113 billion was paid in benefits in 2021. Since the COVID-19 crisis, the industry has resumed growth and mental health support has become increasingly important with a 75% increase in benefits compared to their pre-pandemic level.

- **Competition in Canada:**
  - Wealth Management: The major industry players are the major banking groups, life and health insurance companies and investment fund manufacturers that are trying to outdo one another in order to win over clients and build their loyalty. Desjardins is one of the most committed players when it comes to promoting and advancing responsible investing in Canada by:
    - Offering an extensive line of responsible investing solutions on the market (more than 30 solutions);
    - Ranking 2nd among mutual fund issuers and 3rd among ETF issuers in responsible investing as at December 31, 2021.
  - Life and Health Insurance: Based on 2021 statistics, there are more than 150 insurers doing business in Canada. Five insurers account for 77.4% of the market. Desjardins Financial Security Life Assurance Company ranks fifth in Canada, with gross written premiums of $5.9 billion in 2021.

- **Changes in expectations of members and clients:**
  - Members' and clients' expectations are constantly changing. They want easy, fast, holistic, digital, customized offers of products and services that are highly cost-efficient and focused on advisory services, education, protection, prevention and well-being. The industry is adjusting and positioning itself to meet these expectations.

2023 STRATEGIES AND PRIORITIES

The 2023 strategies and priorities of the Wealth Management and Life and Health Insurance segment form part of Desjardins Group's strategic orientations that aim to help Desjardins Group to achieve its goal of being everyone's #1 choice. The seven strategic orientations of Desjardins Group, as presented in Section 1.4, "Strategic orientations and financial objectives", of this MD&A, are also the strategic orientations of the Wealth Management and Life and Health Insurance segment.

Just like the other Desjardins Group business segments, the Wealth Management and Life and Health Insurance segment will continue to always work in the best interests of its members and clients, providing a simple and improved digital experience with enhanced, customized support based on their life and health insurance and wealth management needs. The segment will also continue its efforts to improve the employee experience (including talent management) in order to minimize the effects of the labour shortage in the market.

As for the acquisition of Guardian Capital Group Limited's independent distribution operations in insurance and individual savings, Desjardins will implement winning conditions to support these networks in their growth so that they can continue to provide their customers with quality service.

In order to strengthen its leadership in the area of client experience, this segment can rely on a team of employees and distribution partners who are determined to always better meet the needs of members and clients by providing exemplary and distinctive quality service.

ANALYSIS OF FINANCIAL RESULTS

Table 14 – Wealth Management and Life and Health Insurance – Segment results
For the years ended December 31

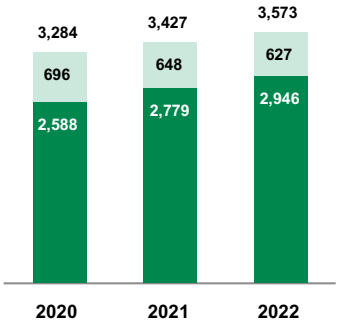

(in millions of dollars)	2022	2021	2020
Net interest income	**$ 7**	$ —	$ 8
Net premiums	**6,166**	5,667	4,711
Other operating income[1]	**1,458**	1,487	1,286
Operating income[1]	**7,631**	7,154	6,005
Investment income (loss)[1]	**(3,430)**	(55)	2,404
Total income	**4,201**	7,099	8,409
Claims, benefits, annuities and changes in insurance contract liabilities	**634**	4,115	5,564
Non-interest expense	**2,653**	2,448	2,100
Income taxes on surplus earnings	**222**	73	136
Net surplus earnings for the year	**$ 692**	$ 463	$ 609
Indicators			
Net sales of saving products[2]	**$ 2,040**	$ 8,552	$ 3,704
Insurance sales[2]	**429**	506	396
Net premiums	**6,166**	5,667	4,711
Group insurance premiums	**3,573**	3,427	3,284
Individual insurance premiums	**968**	928	901
Annuity premiums	**1,625**	1,312	526
Receipts related to segregated funds[2]	**3,665**	4,338	2,368

(2) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

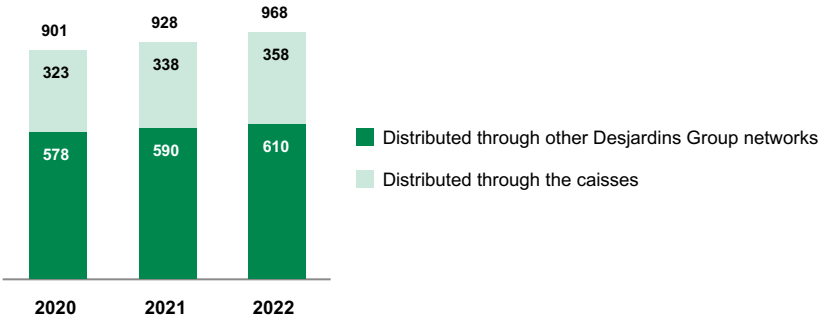

Table 15 – Claims, benefits, annuities and changes in insurance contract liabilities
For the years ended December 31

(in millions of dollars)	2022	2021	2020
Insurance and annuity benefits	**$ 3,663**	$ 3,461	$ 3,158
Change in actuarial liabilities	**(3,176)**	560	2,222
Policyholder dividends, experience refunds and other	**147**	94	184
Total	**$ 634**	$ 4,115	$ 5,564

Group insurance premiums by distribution network
(in millions of dollars)

Individual insurance premiums by distribution network
(in millions of dollars)

COMPARISON OF 2022 AND 2021

- **Net surplus earnings of $692 million,** up $229 million, or 49.5% compared to 2021, mainly on account of:
  – Favourable effect of higher interest rates on actuarial liabilities.
  – Overall more favourable experience than for the comparative period of 2021, mainly in group insurance.
  – Positive effect of revisions of actuarial assumptions in the normal course of business while they had affected 2021 unfavourably.
  – Larger gains on disposal of securities and real estate investments than in 2021.

  This increase was mitigated in part by the following:
  – Increase in non-interest expense mainly as a result of higher employee expenses and the expected increase in the amounts invested in strategic projects.
  – Markets' impact on guaranteed investment funds more unfavourable than in 2021.

- **Operating income[(1)] of $7,631 million,** up $477 million, or 6.7%.

- **Net premiums of $6,166 million,** up $499 million, or 8.8%, due to the following:
  – Increase of $313 million essentially in group annuity premiums, primarily as a result of agreements signed with groups, the value of which was higher than that signed in 2021. This growth is reflected in a similar change in actuarial liabilities included under "Claims, benefits, annuities and changes in insurance contract liabilities".
  – Increase of $146 million in group insurance premiums and of $40 million in individual insurance premiums.

- **Other operating income[(1)] of $1,458 million,** down $29 million, or 2.0%, mainly as a result of the decline in assets under management, related particularly to the impact of financial market developments.

- **Loss of $3,430 million, presented under "Investment income (loss)"[(1)],** compared to loss of $55 million in 2021, primarily due to:
  – Decrease in the fair value of assets backing liabilities related to life and health insurance operations.
    ◦ Change mostly due to fluctuations in the fair value of the bond portfolio mainly as a result of a larger increase in market interest rates than in 2021.
    ◦ It should be mentioned that this change in the fair value of bonds was offset by the decrease in the cost of claims due to matching.
  – Offset by higher gains on the disposal of securities and real estate investments compared to 2021.

- **Total income of $4,201 million,** down $2,898 million, or 40.8%.

- **Expenses related to claims, benefits, annuities and changes in insurance contract liabilities of $634 million,** down $3,481 million, or 84.6%, basically due to:
  – Decrease of $3,736 million in actuarial liabilities under "Insurance contract liabilities", on account of:
    ◦ The decrease in the fair value of matched investments, presented under "Investment income (loss)".
    ◦ Positive effect of higher interest rates on liabilities.
    ◦ Overall more favourable experience in group insurance.
    ◦ Positive effect of revisions of actuarial assumptions in the normal course of business whereas they had affected 2021 unfavourably.
    ◦ Partially offset by provisions made for group annuities related in particular to agreements signed with groups, the value of which was higher than that signed in 2021, as previously mentioned.
  – Offset by the increase in benefits connected with business growth and the higher cost of prescription drugs and health care.

- **Non-interest expense of $2,653 million,** up $205 million, or 8.4%, mainly because of:
  – Higher employee expenses to improve services for members and clients.
  – Larger amounts invested, in particular for the digital shift and security.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

2.2.3 Property and Casualty Insurance

PROFILE

The Property and Casualty (P&C) Insurance segment offers insurance products providing coverage for the assets of Desjardins Group members and clients and guarding them against disaster. This segment includes the operations of Desjardins General Insurance Group Inc. and its subsidiaries, offering a personal line of automobile and property insurance products across Canada and also providing businesses with insurance products. Its products are distributed through property and casualty insurance agents in the Desjardins caisse network in Québec, and at Caisse Desjardins Ontario Credit Union Inc., the Desjardins Business centres, a number of client care centres (call centres), as well as through an exclusive agent network of close to 500 agencies in Ontario, Alberta and New Brunswick. This exclusive agent network distributes P&C insurance and several other financial products. Members and clients also have access to a multitude of services online and via applications for mobile devices.

Desjardins General Insurance Group Inc., which has more than 3.7 million clients, markets its products to the Canada-wide individual and business market under the Desjardins Insurance banner, and to the group market—including members of professional associations and unions, and employers' staff—under The Personal banner.

SERVICES

- **Automobile insurance,** including motorcycle and recreational vehicle insurance:
  - Offers insurance coverage tailored to clients' specific needs and their vehicle features;
  - Also includes the necessary coverage to obtain financial compensation for bodily injury in provinces where such coverage is not provided by a public plan.
- **Property insurance:**
  - Offers owners, co-owners and tenants insurance coverage to protect their physical property, with all-risk insurance coverage and optional coverages for primary and secondary residences.
- **Business insurance:**
  - Covers the insurance requirements for commercial vehicles, commercial property and public liability for businesses;
  - Service is provided to the following sectors, among others: service firms, retailers and wholesalers, garages, general or specialized contractors, offices, health care professionals, commercial buildings, condominiums and apartment buildings.
- **Prevention:**
  - Provides advisory services as well as loss prevention services to members and clients to help them protect their assets and guard against the impacts of disaster or climate change.

2022 ACHIEVEMENTS

- Continued modernization and enhancement of the member and client experience as well as **digital transformation,** in particular by:
  - Continuing to focus on prevention in home insurance with the launch of version 2.0 of the Alert prevention program (a program to prevent damage caused by water, fire, the risk of freezing, and the risk of break-in).
  - Continuing to focus on prevention in automobile insurance by systematically adding the Ajusto program (telematics program with personalized feedback on driving habits) to our basic online offer in Ontario. Ajusto offers a customized rate based on the member's and client's driving habits and also encourages good driving habits by providing members and clients with personalized advice on their driving in order to improve road safety.
- Continuation of the **program to modernize IT systems** with implementation of key milestones, including:
  - Implementing omnichannel transactions in automobile insurance in Québec so that individual and business members and clients can do business with Desjardins and get the same quality of service no matter what channel they choose to use.
- **Overhauling information sites,** including:
  - Migrating the various property and casualty insurance information sites for individuals to Desjardins.com in order to put all the property and casualty insurance products offered by Desjardins on one platform, thereby providing users with a simplified, coherent and personalized experience based on their province.
  - Improving The Personal websites, in particular making navigation easier, adding quick access links to the main online solutions, and including a group search function that is easier to use.
- The segment is gradually rolling out its **ESG approach** in all of its operations, in particular by:
  - Committing $3.2 million over the next three years to supporting different organizations that encourage road safety in Québec and the rest of Canada [Parachute, Traffic Injury Research Foundation (TIRF), Arrive Alive, Operation Red Nose].
  - Adopting a new decarbonization target for the investment portfolio, which breaks down as follows:
    - Aligning the portfolio with the carbon neutrality objectives for 2040 in the following three segments: energy, transportation and real estate, as well as for 2050 for the entire portfolio (commitment to the global Business Ambition for 1.5°C initiative).
    - Aligning the portfolios with the intermediate targets: objective of reducing our financed emissions by 30% by 2025 and by 50% by 2030 compared with 2020.
  - ESG mapping of investments with a view to better integrating and disclosing ESG performance.
  - Decision to incorporate ESG considerations when selecting indemnity providers.
- **Maintained our ranking as the second largest P&C insurer in Canada and Québec and the third largest in Ontario,** based on gross direct premiums written in 2021.

INDUSTRY

- **Canadian market:**
  - The P&C insurance industry offers insurance coverage for motor vehicles, personal and commercial property, and public liability.
  - A mature market, with an average annual premium growth rate of 8.5% over the past five years.
  - In 2021, direct premiums written on the Canadian market totalled $68.9 billion, up 7.6%, particularly as a result of high rates in home insurance and in commercial insurance, which was partially offset by a slowdown in growth in automobile insurance due to changes in driving habits caused by the COVID-19 pandemic.
  - Individual insurance accounts for 58.4% of the market, and business insurance, for 41.6%.

- **State of the industry in 2022:**
  - The labour shortage in Canada was confirmed and it affected a number of sectors of the economy. The unemployment rate reached an all-time low, falling below 5.0% for the first time in over 45 years, while more than a million positions were vacant in the second quarter of 2022, a first in this country.
  - Combined with various external factors, this labour shortage was detrimental to stability and limited the global supply chain capacity of a number of products and services.
  - Strong post-pandemic economic growth, coupled with the above-mentioned factors, pushed inflation up. The growth in the consumer price index that began in 2021 picked up in 2022. Inflation in Canada stood at 8.1% in June, an almost 40-year high. This trend had an impact on claims costs.
  - While the COVID-19 pandemic generated a drop in the frequency of automobile insurance claims, the easing of restrictions and a gradual reinstatement of pre-pandemic lifestyles contributed to a certain normalization of claims frequency in 2022. This normalization picked up in the summer, even though it still had not reached pre-pandemic levels.
  - Consolidation in the insurance broker market picked up; established aggregators (insurers and brokerage firms) remained active while newer players were party to a number of mergers and acquisitions in the market in 2022.
  - Weather events all across Canada affected the industry. In 2022, according to Catastrophe Indices and Quantification Inc. (CatIQ), catastrophic events caused $3.1 billion in insurable losses for the Canadian P&C insurance industry, which makes 2022 the 3rd biggest year for extreme weather-related losses in Canada.

- **Industry trends:**
  - Insurers' proposals continue to be increasingly developed through digital channels.
  - The Canadian market has been continuing to develop quickly, driven by technological innovations, changes in expectations and consumer behaviour as well as the advent of new business models. Insurers are starting to position themselves in response to recent trends such as *InsurTech* or the sharing economy.
  - Since the beginning of the COVID-19 pandemic, Desjardins Group's P&C Insurance segment has seen a sharp increase in telematics programs in the industry.
  - Insurers are turning more and more towards artificial intelligence and advanced analytics, using them mainly in the areas of distribution, underwriting, claims and fraud prevention.
  - The impact of climate change is a major factor affecting the P&C insurance industry.
  - The Desjardins Group P&C Insurance segment is proactive vis-à-vis these new trends by, for instance, modernizing IT systems, working to speed up the digital shift and updating the ESG plan.

2023 STRATEGY AND PRIORITIES

The Property and Casualty Insurance segment's 2023 strategies and priorities fall within the scope of Desjardins Group's strategic orientations, and aim to help Desjardins Group attain its goal of being everyone's #1 choice. The seven strategic orientations of Desjardins Group, as presented in Section 1.4, "Strategic orientations and financial objectives", of this MD&A, are also the strategic orientations of the Property and Casualty Insurance segment.

The segment will continue to always work in the best interests of its members and clients, in particular by providing them with a simple and improved digital experience. The segment is also going to continue working on prevention in the automobile insurance industry through its Ajusto program and in the home insurance industry with the new version of the Alert program. It will also continue investing to improve its understanding of natural catastrophes and the impact of climate change, in an effort to develop programs and action plans for prevention as well as the protection of member and client assets. In addition, the P&C segment will continue to develop its competitive edge with a view to delivering strong, profitable growth, while maintaining control over its costs in an inflationary environment with supply chain disruptions. The segment will also continue to modernize its business systems (NeXT) to support its member- and client-centred developments, reduce operating risks and increase the agility of the organization. To pursue our objective of becoming a Canadian leader in the field of advanced analytics, in 2023, the segment will roll out several additional models in the area of claims and pricing. The segment will also continue its efforts to improve the employee experience (including talent management) in order to minimize the effects of the labour shortage in the market.

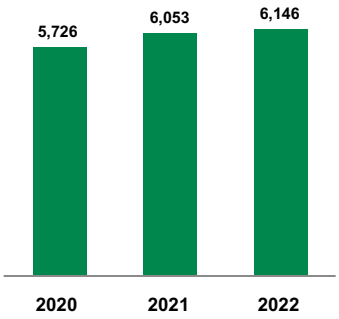

ANALYSIS OF FINANCIAL RESULTS

Table 16 – Property and Casualty Insurance – Segment results
For the years ended December 31

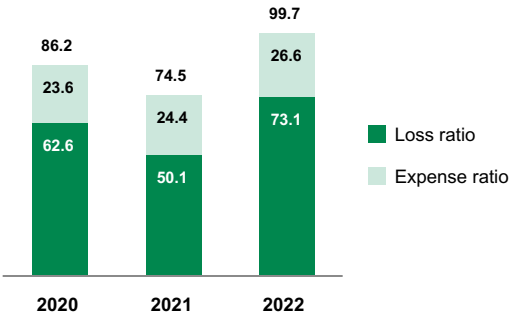

(in millions of dollars and as a percentage)	2022	2021	2020
Net premiums	**$ 6,005**	$ 5,909	$ 5,484

Gross written premiums
(in millions of dollars)

Combined ratio
(as a percentage of net premiums)

COMPARISON OF 2022 AND 2021

- **Net surplus earnings of $450 million,** down $747 million, or 62.4%, compared to 2021, due to the following:
  - Higher loss ratio compared to 2021, essentially in property insurance and automobile insurance. 2022 was affected by:
    - Higher frequency of claims compared to 2021, particularly in automobile insurance.
    - Impact of inflation.
    - One catastrophe, a rare weather phenomenon called a *derecho*, and five major events (flooding, windstorm, heavy rainfall, Hurricane Fiona and snowstorm), compared to one catastrophe and one major event in 2021.
  - Offset by an increase in investment income[1] excluding the change in the fair value of matched bonds.

- **Operating income[1] of $5,969 million,** up $238 million, or 4.2%.

- **Net premiums of $6,005 million,** up $96 million, or 1.6%, in particular as a result of business growth.

- **Loss of $36 million, presented under "Other operating income (loss)"[1]**, compared to loss of $178 million in 2021, due to:
  - The change in investment funds that benefited groups having signed agreements under The Personal banner. It should be mentioned that this change was offset by the results of these groups.
  - Smaller increase than in 2021, in the contingent consideration payable as part of the acquisition of State Farm's Canadian operations, arising from favourable developments in claims taken over.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

- **Investment income[1] of $137 million,** up $17 million, or 14.2% essentially because of:
  - Higher net gains on common shares compared to 2021.
  - Higher interest and dividend income than in 2021.
  - Higher results for derivative financial instruments than in 2021.

  This increase was partially mitigated by the following items:
  - A greater decrease in the fair value of matched bonds compared to 2021, on account of the greater increase in market interest rates in 2022 than in 2021. It should be mentioned that this change in the fair value of bonds was offset by a decrease in the cost of claims due to matching.
  - Net losses on disposal of fixed income securities compared to net gains in 2021.

- **Total income of $6,106 million,** up $255 million, or 4.4%.

- **Cost of claims totalling $3,911 million,** up $1,119 million, or 40.1%, as a result of:
  - Loss ratio of 73.1%, compared to 50.1% in 2021.
    - Higher current year loss ratio compared to 2021, namely, 75.2% vs. 60.8%, mainly in automobile insurance and in property insurance, reflecting the higher frequency of automobile insurance claims and the impact of inflation, among other things.
    - Less favourable ratio of changes in prior year claims than in 2021, i.e. (6.1%) vs. (12.1%), essentially in automobile insurance, particularly on account of recent inflationary pressures.
    - Higher loss ratio related to catastrophes and major events than in 2021, i.e. 4.0% vs. 1.4%. 2022 was marked by one catastrophe, a rare weather phenomenon called a *derecho*, in Ontario and in Québec, and five major events (flooding, windstorm, heavy rainfall, Hurricane Fiona and snowstorm), compared to one catastrophe, a hailstorm in Alberta, and one major event in 2021.
  - Offset by a higher favourable impact of the increase in the discount rates used to measure the provision for claims than in 2021. It should be mentioned that this favourable impact on the cost of claims was partially offset by a change in the fair value of matched bonds, which is presented under “Investment Income (loss)”.

- **Non-interest expense of $1,612 million,** up $152 million, or 10.4%, due to:
  - Higher expenses related to remuneration on premiums.
  - Larger amounts invested, as expected, in particular for the digital shift and security.
  - Higher advertising expenses than in 2021.

2.2.4 Other category

The Other category includes financial information that is not specific to a business segment. It mainly includes treasury activities and those related to financial intermediation between the liquidity surpluses and needs of the caisses. This category also includes the results for the support functions provided by the Federation to Desjardins Group as a whole, including finances, administration, risk management, human resources, communications and marketing, as well as the Desjardins Group Security Office. It also includes the operations of Desjardins Technology Group Inc., which encompasses all of Desjardins Group’s IT operations. In addition to various adjustments required to prepare the Combined Financial Statements, intersegment balance eliminations are classified in this category.

Table 17 – Other category

For the years ended December 31

(in millions of dollars)	2022	2021	2020
Net interest income	**$ 692**	$ 781	$ 662
Net premiums	**(329)**	(298)	(275)
Other operating income (loss)[1]	**(787)**	(652)	(653)
Operating income (loss)[1]	**(424)**	(169)	(266)
Investment income (loss)[1]	**(501)**	(391)	(103)

Net surplus earnings (deficit) for the year	**$ (218)**	$ (177)	$ (126)

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.

COMPARISON OF 2022 AND 2021

- **Net deficit of $218 million,** compared to a net deficit of $177 million in 2021.
  - Market rate fluctuations as well as changes in hedging positions had an overall unfavourable effect on net interest income and investment income[1].
  - Non-interest expense included amounts invested for the continued implementation of Desjardins-wide strategic projects, in particular for the digital shift and security. These initiatives enhanced the member and client experience, improved productivity and ensured the implementation of best practices in security. They also included commitments made with regard to the GoodSpark Fund, with the aim, in particular, of providing social and economic support to the regions.

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.

2.3 Analysis of fourth quarter results and quarterly trends

Table 18 – Results for the previous eight quarters

(unaudited, in millions of dollars and as a percentage)	2022				2021			
	Q4	Q3	Q2	Q1	Q4	Q3	Q2	Q1

(2) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

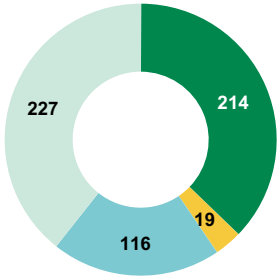

(3) In accordance with the base capital adequacy guideline for financial services cooperatives issued by the AMF and taking into account the applicable relief measures introduced by the AMF in response to the COVID-19 pandemic. See Section 3.2, “Capital management”.

FOURTH QUARTER RESULTS

For the fourth quarter of 2022, Desjardins Group posted surplus earnings before member dividends of $576 million, up $183 million, or 46.6%, compared to the same period in 2021.

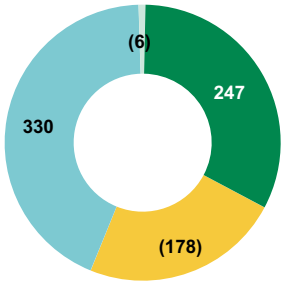

Surplus earnings before member dividends in fourth quarter of 2022
(in millions of dollars)

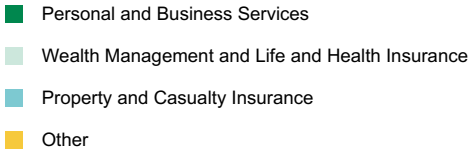

$576 million

Surplus earnings before member dividends in fourth quarter of 2021
(in millions of dollars)

$393 million

Contribution of business segments to surplus earnings:

- Personal and Business Services: **Surplus earnings of $214 million,** down $33 million, or 13.4%, compared to the same period in 2021, as a result of:
  - Increase in non-interest expense due primarily to the larger amounts invested in strategic projects, as expected, in particular for the digital shift and security, as well as higher employee expenses in order to support growth in operations and enhance the services offered to members and clients.
  - Higher provision for credit losses in the fourth quarter of 2022 than in the corresponding quarter of 2021, which reflected the decrease in the provision for credit losses resulting from the refinement of the methodology used to assess certain risk parameters.
  - Offset by an increase in net interest income, net of the decline in activities related to derivative financial instruments, and an increase in other operating income[(1)].
- Wealth Management and Life and Health Insurance: **Surplus earnings of $227 million** compared to a deficit of $6 million in the fourth quarter of 2021, due to:
  - Favourable effect of revisions of actuarial assumptions in the normal course of business, while they had a negative effect in the comparative quarter of 2021.
  - Positive effect of higher interest rates on actuarial liabilities.
  - Overall more favourable experience than for the comparative quarter of 2021, mainly in group insurance.
  - Offset by an increase in non-interest expense mainly as a result of higher employee expenses to enhance the services offered to members and clients as well as larger amounts invested in the digital shift and security.
- Property and Casualty Insurance: **Surplus earnings of $116 million,** down $214 million, or 64.8%, compared to the fourth quarter of 2021, due to:
  - Higher loss ratio compared to the corresponding quarter, essentially in property insurance and automobile insurance because the fourth quarter of 2022 was affected by:
    - Higher frequency of claims compared to the corresponding quarter of 2021, particularly in automobile insurance.
    - Impact of inflation.
  - Increase in non-interest expense on account of higher expenses related to remuneration on premiums.
  - Offset by an increase in investment income[(1)], excluding the change in the fair value of matched bonds.

- **Return on equity of 7.0%,** compared to 4.3% for the fourth quarter of 2021, due to the higher surplus earnings.

- **Operating income[(1)] of $6,321 million,** up $818 million, or 14.9%.

- **Net interest income of $1,579 million,** up $124 million, or 8.5%, on account of:
  - Increase in the average return on loans due to the higher interest rate environment.
  - Growth in average residential mortgages and business loans outstanding.
  - Higher interest income from liquidities and securities.
  - Offset by an increase in interest expense on deposits related to the higher interest rates.

- **Net premiums of $3,812 million,** up $611 million, or 19.1%, due to items from the following segments:
  - **Wealth Management and Life and Health Insurance segment:** Net insurance and annuity premiums of $2,373 million, up $607 million, or 34.4%, compared to the same period in 2021, as a result of:
    - Increase of $550 million essentially in group annuity premiums as a result of agreements signed with groups, the value of which was higher than what was signed in 2021. This growth is reflected in a similar change in actuarial liabilities included under “Claims, benefits, annuities and changes in insurance contract liabilities”.
    - Increase of $51 million in group insurance premiums and of $6 million in individual insurance premiums.
  - **Property and Casualty Insurance segment:** Net premiums of $1,524 million, up $11 million, or 0.7%, compared to the same period in 2021, due in particular to business growth.

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.

- **Other operating income[1] of $930 million,** up $83 million, or 9.8%, mainly due to higher business volumes from Desjardins Card Services payment activities.

- **Investment income[1] of $77 million,** down $791 million, or 91.1%, essentially as a result of:
  - Decrease in the fair value of assets backing liabilities related to life and health insurance operations.
    - Change mostly due to fluctuations in the fair value of the bond portfolio primarily as a result of a slight increase in long-term market interest rates in the fourth quarter of 2022, while they were lower in the corresponding quarter of 2021.
    - It should be mentioned that this change in the fair value of bonds was offset by the decrease in the cost of claims due to matching.
  - Offset by higher interest and dividend income compared to the fourth quarter of 2021.

- **Total income of $6,398 million,** up $27 million, or 0.4%.

- **Provision for credit losses of $80 million,** up $64 million, compared to the same period in 2021. The provision for credit losses for the fourth quarter of 2022 reflected mainly the impact of the deterioration of the economic outlook on retail loan portfolios as well as the start of a deterioration in credit quality for business loan portfolios, as anticipated by the measurement of expected credit losses. It also reflected slightly higher net write-offs compared to the corresponding period of 2021. The provision for credit losses for the fourth quarter of 2021 mainly reflected decreases in the provision due to a refinement of the methodology used to assess certain risk parameters as well as historically low net write-offs.

  Desjardins Group continued to have a high quality loan portfolio in 2022.
  - Ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio was 0.47%, the same ratio as at December 31,2021.

- **Expenses related to claims, benefits, annuities and changes in insurance contract liabilities of $2,784 million,** down $401 million, or 12.6%, due to items from the following segments:
  - **Wealth Management and Life and Health Insurance segment:** Cost of claims totalling $1,785 million, down $742 million, or 29.4%, compared to the same period in 2021, essentially as a result of:
    - Decrease of $878 million in actuarial liabilities included under “Insurance contract liabilities” on account of:
      - Decrease in the fair value of matched investments, presented under “Investment income (loss)”.
      - Favourable effect from revisions of actuarial assumptions in the normal course of business, while they had a negative effect in the comparative quarter of 2021.
      - Positive effect of higher interest rates on liabilities.
      - Overall more favourable experience, mainly in group insurance.
      - Partially offset by provisions made for group annuities related in particular to agreements signed with groups, the value of which was higher than that signed in 2021, as previously mentioned.
    - Offset by the increase in benefits related to business growth and the higher cost of prescription drugs and health care.

  - **Property and Casualty Insurance segment:** Cost of claims totalling $1,006 million, up $345 million, or 52.2%, due to the following:
    - Loss ratio of 68.2% for the fourth quarter of 2022, compared to 46.7% for the corresponding period of 2021.
      - Higher current year loss ratio compared to the corresponding period of 2021, namely, 79.4% vs. 57.5%, mainly in automobile insurance and in property insurance, reflecting in particular the higher frequency of automobile insurance claims and the impact of inflation.
      - Less favourable ratio of changes in prior year claims than in the comparative quarter of 2021, i.e., (12.1%) vs. (12.4%), essentially in automobile insurance.
      - Offset by a lower loss ratio related to catastrophes and major events than in the corresponding quarter of 2021, i.e., 0.9% vs. 1.6%. The fourth quarter of 2022 was marked by one major event, a snowstorm in Québec and Ontario, while the fourth quarter of 2021 had also been marked by one major event, high winds in Québec and Ontario.
    - Lower favourable impact of the increase in the discount rates used to measure the provision for claims compared to the fourth quarter of 2021. It should be mentioned that this impact on the cost of claims was partially offset by a change in the fair value of matched bonds, which is presented under “Investment income (loss)”.

- **Non-interest expense of $2,833 million,** up $97 million, or 3.5%, compared to the fourth quarter of 2021, essentially due to:
  - A rise in spending on personnel and communications in order to support growth in operations and enhance the services offered to members and clients.
  - Higher expenses related to remuneration on premiums.
  - Offset by lower expenses in the quarter for the continued implementation of strategic projects related, in particular, to the digital shift and security.

- **Productivity index at 78.4% for the fourth quarter of 2022,** compared to 85.9% for the same period in 2021, due in particular to growth in income.

- **Income taxes on surplus earnings before member dividends of $125 million,** up $84 million compared to the corresponding period in 2021.
  - Effective tax rate[2] of 17.8% for the fourth quarter of 2022, up from 9.4% for the corresponding period of 2021. Lower favourable effect of tax savings on the effective tax rate in the fourth quarter of 2022 compared to the corresponding period of 2021, due to higher surplus earnings.

(1) For more information about non-GAAP financial measures, see “Non-GAAP and other financial measures” on pages 3 to 7.
(2) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

QUARTERLY TRENDS

Quarterly income, expenses and surplus earnings before member dividends are affected by certain trends, including seasonal variations, and by changes in general economic conditions and the financial markets. Since the beginning of 2020, the quarters have been affected by the public health crisis related to the COVID-19 pandemic as well as by developments in financial markets, leading to significant fluctuations in quarterly results, compared to those normally recorded by Desjardins. The results of Desjardins Group's most recent eight quarters were therefore affected by developments in the global, U.S., Canadian and Québec economies as well as by inflation, with an expected rise of 3.6% and 2.7%, respectively, in Canadian and Québec real GDP in 2022, compared to an increase of 5.0% and 6.0% in 2021. After remaining at 0.25% throughout 2021, the Canadian key interest rate saw a significant rise during the quarters in 2022, increasing from 0.25% to 4.25% between March and December of 2022. Lastly, changes in actuarial assumptions as well as loss experience and weather conditions may also cause significant variations from quarter to quarter. In 2022, one catastrophe and five major events were recorded, while 2021 saw one catastrophe and one major event.

Surplus earnings

- Higher loss experience in property and casualty insurance mainly as a result of the higher frequency of claims in automobile insurance, the impact of inflation, as well as a greater number of catastrophes and major events in 2022 compared to 2021.
- Higher provision for credit losses in 2022 than in 2021, reflecting the impact of the improved macroeconomic outlook and borrower credit quality.
- Increase in non-interest expense, due primarily to the higher amounts invested in strategic orientation projects in particular, and to higher employee expenses to enhance the services offered to members and clients.
- Higher net interest income.

Results

- **Operating income – Upward trend for 2022 quarters, compared to 2021 quarters.**
  - Higher net interest income, in particular due to:
    - Increase in the average return on loans due to the higher interest rate environment.
    - Growth in average residential mortgages and business loans outstanding.
    - Higher interest income from liquidities and securities.
    - Offset by an increase in the interest expense on deposits related to higher interest rates.
  - Growth in property and casualty insurance, group insurance and individual insurance premiums during the past eight quarters.
  - Significant group annuity agreements signed in the fourth quarter of 2022 and in the fourth and third quarters of 2021.
  - Growth in business volumes because of Desjardins Card Services payment activities.

- **Investment income – Fluctuations mainly a result of financial market volatility leading to changes in the fair value of assets backing liabilities related to insurance operations.** As a result of the matching strategy, these fluctuations were offset by a change in provisions, the effect of which was reflected in expenses related to claims, benefits, annuities and changes in insurance contract liabilities.

- **Provision for credit losses – 2022 quarters up compared to 2021 quarters.**
  - The downward trend in the provision for credit losses initiated by the improved macroeconomic outlook in the first half of 2022 was offset by the effect of the deteriorating macroeconomic outlook in the second half of 2022. In 2021, the improved macroeconomic outlook and borrowers' credit quality for all quarters of 2021 had led to significant declines in the loss allowance for expected credit losses.
  - Since the second quarter of 2021, the quarterly provision for credit losses has been reflecting, in particular, the impact of the increase in loans outstanding.
  - Net write-offs were historically low in the quarters of 2022 and 2021, but they started to climb slightly at the end of 2022.
  - Ratio for gross credit-impaired loans, as a percentage of the total portfolio of gross loans and acceptances, slightly down for the 2022 quarters compared to the 2021 quarters. Desjardins Group has continued to have a high-quality loan portfolio.

- **Expenses related to claims, benefits, annuities and changes in insurance contract liabilities – Quarterly fluctuations.**
  - Expenses mainly affected by a change in the fair value of investments associated with life and health insurance activities and property and casualty insurance activities.
  - **Life and health insurance**:
    - Overall more favourable experience for the 2022 quarters, mainly in group insurance.
    - Positive effect of higher interest rates on actuarial liabilities in the last and in the first two quarters of 2022.
    - Provisions made in the fourth quarter of 2022 as well as in the fourth and third quarters of 2021, for the significant group annuity agreements signed.
    - Favourable effect of revisions of actuarial assumptions in the normal course of business in the fourth quarter of 2022 and in second quarter of 2021, whereas the fourth quarter of 2021 was unfavourably affected.
  - **Property and casualty insurance**:
    - Higher current year loss experience, essentially in automobile insurance and in property insurance for the 2022 quarters, reflecting, among other things, the impact of an increase in road traffic, which had fallen considerably in the first half of 2021 as a result of the pandemic, as well as the impact of inflation.
    - Less favourable developments in prior year claims for the 2022 quarters, essentially in automobile insurance, particularly on account of recent inflationary pressures.
    - The second quarter of 2022 and the third quarter of 2021 were affected by one catastrophe.
    - 2022 was affected by five major events, compared to one in 2021.

- **Non-interest expense – Up when 2022 and 2021 quarters are compared.**
  - Increase in amounts invested, as expected, for the continued implementation of strategic projects, in particular for the digital shift and security.
  - Rise in spending on personnel, technology and communication in order to support growth in operations and enhance the services offered to members and clients.
  - Higher rewards program expenses on account of the growth in payment activity volumes.

Surplus earnings from business segments

- **Surplus earnings before member dividends in the Personal and Business Services segment – Down when 2022 and 2021 quarters are compared.**
  - Increase in non-interest expense, due primarily to the larger amounts invested, as expected, in strategic projects related, in particular, to the digital shift and security, as well as higher employee expenses in order to support growth in operations and enhance the services offered to members and clients.
  - Higher provision for credit losses in 2022 than in 2021, reflecting the impact of the improved macroeconomic outlook and borrowers' credit quality.
  - Increase in net interest income resulting mainly from the increase in the average return on loans due to higher interest rate environment, as well as the growth in average residential mortgages and business loans outstanding, partially offset by the increase in the interest expense on deposits related to the rise in interest rates.
  - Increase in business volumes from Desjardins Card Services payment activities.

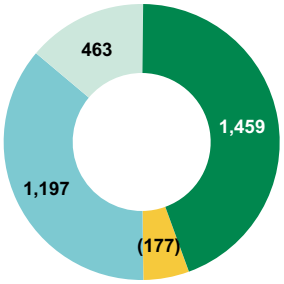

- **Net surplus earnings of the Wealth Management and Life and Health Insurance segment fluctuating over the past eight quarters.**
  - Overall more favourable experience for the 2022 quarters, mainly in group insurance.
  - Positive effect of higher interest rates on actuarial liabilities in the last and in the first two quarters of 2022.
  - Higher gains on the disposal of securities and real estate investments in 2022 than in 2021, mainly in the third and first quarters of 2022.
  - Markets' more negative impact on guaranteed investment funds in 2022, while they had been positively impacted in the third and first quarters of 2021.
  - Higher surplus earnings in the fourth quarter of 2022 and in the second quarter of 2021 primarily due to the favourable effect of revisions of actuarial assumptions in the normal course of business, while the fourth quarter of 2021 had been unfavourably affected by such revisions.
  - Higher level of expenses in 2022 compared to 2021.

- **Net surplus earnings of the Property and Casualty Insurance segment - Down when 2022 and 2021 quarters are compared.**
  - Growth in net premiums over the past eight quarters, due in particular to business growth.
  - Higher current year loss experience, essentially in automobile insurance and in property insurance for the 2022 quarters, reflecting, among other things, the impact of an increase in road traffic, which had fallen considerably in the first half of 2021 as a result of the pandemic, as well as the impact of inflation.
  - Lower current year loss experience in automobile insurance for the first three quarters of 2021, as well as in property insurance in the second and third quarters of 2021.
  - Less favourable developments in prior year claims for the 2022 quarters, essentially in automobile insurance, particularly on account of recent inflationary pressures.
  - Impact of catastrophes and major events over the past eight quarters:
    - One major event, a snowstorm in Québec and Ontario, in the fourth quarter of 2022.
    - Two major events, namely heavy rainfall in Québec and Hurricane Fiona in the Atlantic Provinces and Québec, in the third quarter of 2022.
    - One catastrophe, a rare weather phenomenon called a *derecho*, and one major event characterized by a windstorm and flooding, in the second quarter of 2022.
    - One major event, flooding in Québec and Ontario, in the first quarter of 2022.
    - One major event, high winds in Québec and Ontario, in the fourth quarter of 2021.
    - One catastrophe, a hailstorm in Alberta, in the third quarter of 2021.
  - Investment income, excluding the change in the fair value of matched bonds:
    - Favourable impact on the four quarters of 2022.
    - Favourable impact on the first quarter of 2021.

2.4 Comparison of 2021 and 2020

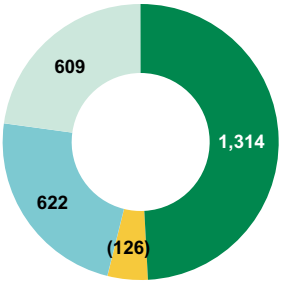

2021 surplus earnings before member dividends
(in millions of dollars)

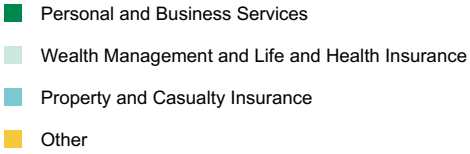

$2,942 million

2020 surplus earnings before member dividends
(in millions of dollars)

$2,419 million

For 2021, Desjardins Group posted surplus earnings before member dividends of $2,942 million, compared to $2,419 million for 2020. Return on equity was 8.9%, compared to 8.3% in 2020.

Segment results

- **Personal and Business Services: Surplus earnings of $1,459 million in 2021,** up $145 million compared to 2020, essentially due to the following:
  - Lower provision for credit losses in 2021 than in 2020, reflecting the deterioration in the economic outlook as a result of the COVID-19 pandemic.
  - Higher net interest income and other operating income[(1)].
  - Offset by higher non-interest expense, due mainly to the larger amounts invested in Desjardins-wide strategic projects.

- **Wealth Management and Life and Health Insurance: Surplus earnings of $463 million in 2021,** down $146 million compared to 2020, essentially due to:
  - Overall unfavourable effect from revisions of actuarial assumptions in the normal course of business.
  - Lower gains on disposal of securities and real estate investments than in 2020.

  This decrease was partially offset by:
  - Impact of the provision and travel insurance claims in 2020, on the cost of claims due to the COVID-19 pandemic.
  - The markets' positive impact on guaranteed investment funds while they had been unfavourably affected in 2020.

- **Property and Casualty Insurance: Surplus earnings of $1,197 million in 2021,** up $575 million compared to 2020, due to:
  - Lower cost of claims, particularly on account of the favourable change in prior year claims, chiefly in automobile insurance.
  - Increase in net premiums, including the impact of the automobile insurance premium refunds of $155 million granted to members and clients as a relief measure to support them during the COVID-19 pandemic in 2020.

Results

- **Operating income[(1)] of $20,405 million in 2021,** up $2,006 million compared to 2020.
  - Net interest income of $5,786 million in 2021, up $146 million compared to 2020, mainly because of:
    - Growth in average residential mortgages outstanding.
    - Lower interest expense despite a larger deposit volume.

    This increase was offset in part by the following:
    - A drop in average consumer and credit card loans outstanding.
    - A decrease in the average return on loans due to lower interest rates.

– Net premiums rose $1,358 million in2021.
  - Wealth Management and Life and Health Insurance segment: Net insurance and annuity premiums up $956 million in 2021, due to the following:
    - Increase of $786 million in premiums essentially from group annuities related in particular to business growth, which was reflected by a similar increase in actuarial liabilities included in "Claims, benefits, annuities and changes in insurance contract liabilities".
    - Increase of $143 million in group insurance premiums and of $27 million in individual insurance premiums.
  - Property and Casualty Insurance segment: Net premiums up $425 million, as a result of:
    - Growth in the average premium, particularly in property insurance.
    - In the second quarter of 2020, automobile insurance premium refunds of $155 million were granted to members and clients as a relief measure to support them during the COVID-19 pandemic.
    - Business growth.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.

- Other operating income[1] stood at $3,341 million, an increase of $502 million in 2021, essentially due to the following:
  - Increase in income from growth in assets under management for Wealth Management operations.
  - Increase in business volumes from Desjardins Card Services payment activities.
  - Higher income from deposit and payment service charges; relief measures had been granted to members in 2020.
  - Income from DuProprio and FairSquare operations.
  - Higher income from securities brokerage activities because of the growth in assets under management.
  - Income from the interest held in Aviso Wealth.
  - Offset by a change in investment funds that benefited groups having signed agreements under The Personal banner. It should be remembered that this change was offset by the results of these groups.

- **Loss of $85 million presented under "Investment income (loss)"[1] in 2021,** compared to income of $3,074 million in 2020, primarily due to:
  - Decrease in the fair value of assets backing liabilities related to life and health insurance operations.
    - Change mostly due to fluctuations in the fair value of the bond portfolio mainly as a result of higher market interest rates while they were lower in 2020.
    - It should be mentioned that this change in the fair value of bonds was offset by the change in the cost of claims due to matching.
  - Decrease in the fair value of matched bonds in the Property and Casualty Insurance segment, contrary to an increase in 2020, primarily because of higher market interest rates in 2021 versus lower interest rates in 2020. It should be mentioned that this fluctuation in the fair value of bonds was offset by the change in the cost of claims due to matching.
  - Lower gains on the disposal of securities and real estate investments compared to 2020.

- **The provision for credit losses totalled $69 million in 2021,** down $794 million compared to 2020. This decline mainly reflected the improved macroeconomic outlook and the credit quality of borrowers, whereas the 2020 provision for credit losses reflected the significant negative impact of a deteriorating economic outlook as a result of the COVID-19 pandemic. The 2021 provision for credit losses also reflected lower net write-offs compared to 2020, in particular in the credit card portfolio.

  Desjardins Group continued to have a quality loan portfolio in 2021.
  - The credit loss provisioning rate was 0.03% for 2021, compared to 0.41% in 2020. The decline in this indicator was due to the fact that the 2021 provision for credit losses was significantly lower than the 2020 provision, reflecting the impact of a deteriorating economic outlook as a result of the COVID-19 pandemic.
  - The ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio, was 0.47% compared to 0.62% as at December 31, 2020.

- **Expenses related to claims, benefits, annuities and changes in insurance contract liabilities totalled $6,883 million,** down $2,350 million in 2021.
  - Wealth Management and Life and Health Insurance segment: Cost of claims down $1,449 million in 2021. This was the result of:
    - Decrease of $1,662 million in actuarial liabilities under "Insurance contract liabilities", which included the effect of the decrease in the fair value of matched investments, which is presented under "Investment income (loss)". This decrease was partially offset by the unfavourable effect of revisions of actuarial assumptions and by business growth.
    - Decrease related to the impact on the cost of claims by the provision and travel insurance claims in 2020, together with the COVID-19 pandemic.
    - Offset by an increase in benefits related to health care claims.
  - Property and Casualty Insurance segment: Cost of claims down $897 million in 2021. This was the result of:
    - Loss ratio of 50.1%, compared to 62.6% in 2020.
      - Ratio of changes in prior year claims more favourable than in the corresponding year, namely (12.1%) compared to (5.3%), essentially in automobile insurance.
      - Lower current year loss ratio than in 2020, namely 60.8% compared to 65.4%, essentially in automobile insurance and property insurance.
      - Loss ratio related to catastrophes and major events, lower than in 2020, namely a ratio of 1.4%, compared to 2.5%. 2021 was marked by one catastrophe and one major event while 2020 was marked by one catastrophe and three major events.
    - Favourable impact of an increase in the discount rates used to measure the provision for claims, while there was a negative impact in 2020. It should be mentioned that this impact on the cost of claims was partially offset by a change in the fair value of matched bonds, which is presented under "Investment income".
    - Offset by business growth leading to an increase in the cost of claims.

- **Non-interest expense totalling $9,566 million,** up $1,269 million in 2021, essentially as a result of:
  - Higher salaries due to growth in operations and indexing.
  - Increase in investments related to the continued implementation of Desjardins-wide strategic projects, in particular for creating innovative technology platforms, privacy, security and improving business processes.
  - Growth in payment activities, including expenses related to the rewards program.

- **Income taxes on surplus earnings before member dividends of $860 million,** up $199 million compared to 2020.
  - Effective tax rate[2] of 22.6% for the year ended December 31, 2021, compared to 21.5% for 2020.

(1) For more information about non-GAAP financial measures, see "Non-GAAP and other financial measures" on pages 3 to 7.
(2) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

ASSETS

As at December 31, 2022, Desjardins Group's total assets stood at $407.1 billion, up $10.0 billion, or 2.5%, since December 31, 2021.

Cash and deposits with financial institutions fell by $7.4 billion, or 45.4% due to a decrease in deposits with the Bank of Canada, while securities, including those borrowed or purchased under reverse repurchase agreements, declined by $2.8 billion, or 2.6%.

Desjardins Group's outstanding loan portfolio, including acceptances, net of the allowance for credit losses, grew by $19.1 billion, or 8.3%. Residential mortgages, as well as business and government loans, accounted for this growth.

Table 20 – Loans and acceptances
As at December 31

(in millions of dollars and as a percentage)	2022		2021		2020	
Residential mortgages	**$ 159,682**	**63.7 %**	$ 149,695	64.6 %	$ 136,208	64.0 %
Consumer, credit card and other personal loans	**24,381**	**9.7**	24,386	10.5	25,310	11.9
Business and government	**66,837**	**26.6**	57,668	24.9	51,343	24.1
	250,900	**100.0 %**	231,749	100.0 %	212,861	100.0 %
Allowance for credit losses	**(1,035)**		(970)		(1,112)	
Total loans and acceptances by borrower category	**$ 249,865**		$ 230,779		$ 211,749	

Desjardins Group's residential mortgages increased by $10.0 billion, or 6.7%, since December 31, 2021, because of the sustained growth in housing activity in the first half of 2022, particularly in Québec. Business and government loans outstanding, including acceptances, grew by $9.2 billion, or 15.9%. Consumer, credit card and other personal loans outstanding were stable compared to December 31, 2021.

Information on the quality of Desjardins Group's loan portfolio is presented in Section 4.2, "Risk management", on pages 75 to 79 of this MD&A.

Segregated fund net assets were down $1.5 billion, or 6.5%, due to the decline in the fair value of the portfolio caused by financial market developments, partially offset by a slight growth in contract holders.

Derivative financial instrument assets fell by $105 million, or 1.8%.

Other assets increased by $2.7 billion, or 16.7%, mainly because of the increase in amounts receivable from clients, brokers and financial institutions, deferred income tax assets and net assets under defined benefit plans.

LIABILITIES

Desjardins Group's total liabilities amounted to $374.7 billion as at December 31, 2022, up $11.1 billion, or 3.1%, since December 31, 2021.

Table 21 – Deposits
As at December 31

(in millions of dollars and as a percentage)	2022		2021		2020	
Individuals	**$ 145,377**	**56.0 %**	$ 136,332	57.2 %	$ 127,928	56.8 %
Business and government	**114,172**	**43.9**	101,644	42.6	96,853	43.0
Deposit-taking institutions	**287**	**0.1**	379	0.2	455	0.2
Total deposits	**$ 259,836**	**100.0 %**	$ 238,355	100.0 %	$ 225,236	100.0 %

Outstanding deposits grew by $21.5 billion, or 9.0%. The increase in business and government deposits, which accounted for 43.9% of Desjardins Group's total deposit portfolio, was partially responsible for this growth. In fact, these outstanding deposits were up $12.5 billion, or 12.3%. Various securities issued on U.S., Canadian and European markets, which made it possible to support the growth of Desjardins Group's funding requirements, contributed to this growth. Personal deposits outstanding, which accounted for 56.0% of the total deposit portfolio, were up $9.0 billion, or 6.6%, mainly as a result of growth in member deposits at the caisses. Deposits from deposit-taking institutions fell by $92 million.

Commitments related to securities sold short and lent or sold under repurchase agreements decreased by $8.1 billion, or 19.0%, to reach a volume of $34.4 billion.

Derivative financial instrument liabilities were up by $1.1 billion, or 19.2%, notably because of the rise in interest rates and fluctuating exchange rates, partially offset by a decrease in stock index options as a result of the downturn in the financial markets.

Desjardins Group's insurance contract liabilities fell by $3.4 billion, or 9.8%, as a result of a change in actuarial liabilities arising from life and health insurance operations.

Segregated fund net liabilities were down by $1.5 billion, or 6.6%, due to the decrease in the fair value of the portfolio caused by financial market developments, offset in part by a slight increase in contract holders.

Other liabilities grew by $0.6 billion, or 3.5%, due mainly to the higher amounts payable to clients, brokers and financial institutions, partially offset by the decrease in net defined benefit plan liabilities.

Subordinated notes increased by $1.0 billion, or 49.4%%, following an issue of $1.0 billion in Non-Viability Contingent Capital (NVCC)-eligible notes under the Canadian NVCC Subordinated Notes Program on August 23, 2022.

EQUITY

Equity has decreased by $1.1 billion, or 3.2%, since December 31, 2021 notably because of the $2.3 billion decline in other comprehensive income, mainly as a result of the decline in the value of the bond portfolio due to higher interest rates, offset in part by net surplus earnings after member dividends totalling $1.8 billion.

Information about income taxes on member dividends, remuneration and dividends is presented in the table below.

Table 22 – Information about member dividends, remuneration and dividends
For the years ended December 31

(in millions of dollars)	2022	2021	2020
Member dividends	**$ 403**	$ 387	$ 330
Remuneration on F capital shares	**262**	208	209
Remuneration on permanent shares	**—**	—	1
Dividends	**80**	25	25
	$ 745	$ 620	$ 565

Note 23, "Capital stock", and Note 24, "Share capital", to the Combined Financial Statements provide additional information about Desjardins Group's capital stock and share capital.

3.2 Capital management

Capital management is crucial to the financial management of Desjardins Group. Its goal is to ensure that the capital level and structure of Desjardins Group and its components are consistent with their risk profile, distinctive nature and cooperative objectives. Capital management must also ensure that the capital structure is adequate in terms of protection for members and clients and creditors, and regulators' expectations and requirements. In addition, it must optimize the allocation of capital and internal capital flow mechanisms, and support growth, development and asset risk management at Desjardins Group.

Desjardins Group advocates prudent management of its capital. Its purpose is to maintain higher regulatory capital ratios than those of the Canadian banking industry and regulatory requirements. Desjardins's prudent capital management is reflected in the quality of the credit ratings assigned by the various rating agencies.

The financial industry is placing more emphasis on sound capitalization of its operations. Now more than ever, rating agencies and the market favour the best-capitalized institutions. These factors argue in favour of a general increase in the level and quality of capital issued by financial institutions. This is also reflected in the enhanced requirements under Basel III. It was against this backdrop that Desjardins Group set its target for Tier 1A capital at 15%.

Desjardins Group's Integrated Capital Management Framework

Broadly speaking, Desjardins Group's Integrated Capital Management Framework includes the policies and processes required to set targets for its capitalization, to establish strategies to ensure that targets are met, to quickly raise capital, to ensure that the components contribute appropriately to capitalization, and to optimize internal capital flow and utilization procedures.

In addition, the Internal Capital Adequacy Assessment Program (ICAAP) enables Desjardins Group to ensure it has an appropriate level of capital to cover all the significant risks to which it is exposed and to implement capital management strategies that take into account changes in its risk profile.

Desjardins Group has developed a stress-testing program aimed at establishing and measuring the effect of various integrated scenarios, i.e. to simulate various economic scenarios and to assess their financial and regulatory repercussions. This process makes it possible to determine if the level of capital is adequate in view of the risks to which Desjardins Group is exposed. Additional information on the ICAAP and the stress-testing program is presented in Section 4.2, "Risk management".

Regulatory framework and internal policies

Desjardins Group's capital management is the responsibility of the Federation's Board of Directors. To support it with this task, it has mandated the Management Committee, through the Finance and Risk Management Committee, to ensure that Desjardins Group has a sufficient capital base in light of the organization's strategic objectives and regulatory obligations. The Finance Executive Division is responsible for preparing a capitalization plan on an annual basis to forecast capital trends, devise strategies and recommend action plans for achieving capital objectives and targets.

The current situation and the forecasts show that, overall, Desjardins Group has a solid capital base that maintains it among the best-capitalized financial institutions in Canada.

Desjardins Group's regulatory capital ratios are calculated according to the base capital adequacy guideline for financial services cooperatives issued by the AMF. This guideline takes into account the global regulatory framework for more resilient banks and banking systems (Basel III) issued by the Bank for International Settlements.

Under this framework, a minimum amount of capital must be maintained on a combined basis by all the Desjardins Group components. Some of these components are subject to separate requirements regarding regulatory capital, liquidity and financing, which are set by regulatory authorities governing trusts, credit unions, insurers and securities, in particular. Desjardins Group oversees and manages the capital requirements of these entities to ensure efficient use of capital and continuous compliance with the applicable regulation.

In this regard, it should be mentioned that the life and health insurance subsidiary under provincial jurisdiction is subject to the *Capital Adequacy Requirements Guideline* (CARLI) issued by the AMF. The property and casualty insurance subsidiaries under provincial jurisdiction must comply with the *Guideline on Capital Adequacy Requirements* issued by the AMF. The property and casualty insurance subsidiaries under federal jurisdiction must comply with the OSFI's *Minimum Capital Test Guideline* for federally regulated property and casualty insurance companies. Changes to these guidelines are being monitored in the "Regulatory environment" section of this MD&A.

For the purpose of calculating capital, Desjardins Financial Corporation Inc., the holding corporation that mainly includes the insurance companies, has been deconsolidated and presented as a partial capital deduction under the rules for significant investments stated in the base capital adequacy guideline applicable to financial services cooperatives. Furthermore, Desjardins Financial Corporation Inc. is subject to the AMF's CARLI guideline.

In addition, the *Total Loss Absorbing Capacity Guideline* (TLAC Guideline) issued by the AMF took effect on March 31, 2019. Since April 1, 2022, Desjardins Group has been required to maintain at all times a minimum loss absorbing capacity composed of unsecured external long-term debt that meets the target criteria, or regulatory capital instruments to support its recapitalization in the event of a failure.

The following table presents a summary of the target regulatory ratios set by the AMF under Basel III.

Table 23 – Summary of ratios regulated by the AMF under Basel III

(as a percentage)	Minimum ratio	Capital conservation buffer	Minimum ratio including capital conservation buffer	Supplement applying to D-SIFIs[1][2]	Minimum ratio including capital conservation buffer and supplement applying to D-SIFIs	Capital and leverage ratio as at December 31, 2022
Tier 1A capital ratio[3]	> 4.5 %	2.5 %	> 7.0 %	1.0 %	> 8.0 %	**20.2 %**
Tier 1 capital ratio[3]	> 6.0	2.5	> 8.5	1.0	> 9.5	**20.2**
Total capital ratio[3]	> 8.0	2.5	> 10.5	1.0	> 11.5	**21.9**
TLAC ratio[4]	> 21.5	N/A	> 21.5	N/A	> 21.5	**28.7**
Leverage ratio[5]	> 3.5	N/A	> 3.5	N/A	> 3.5	**7.6**
TLAC leverage ratio[6]	> 6.75	N/A	> 6.75	N/A	> 6.75	**10.6**

(1) Supplement of 1% applicable to Desjardins Group as a domestic systemically important financial institution (D-SIFI).

(2) The AMF may also, at its discretion, set higher target ratios when circumstances warrant. In this regard, since March 31, 2019, the AMF has been able to activate the countercyclical buffer if it considers that excessive credit growth is associated with a systemic build-up of risk. In this assessment, a countercyclical buffer requirement of between 0% and 2.5% of total risk-weighted assets (RWA) would be imposed if the situation justified it. The requirement would be lifted when the risk either materialized or dissipated.

(3) The capital ratios are expressed as a percentage of regulatory capital to risk-weighted assets.

(4) The TLAC ratio is expressed as a percentage of regulatory capital and TLAC-eligible instruments (as set out in the TLAC Guideline) compared to risk-weighted assets at the level of the resolution group, which is deemed to be Desjardins Group, excluding Caisse Desjardins Ontario Credit Union Inc.

(5) The leverage ratio is calculated by dividing Tier 1 capital by the exposure measure, which is an independent measure of risk that includes: 1) on-balance sheet exposures, 2) securities financing transaction exposures, 3) derivative exposures, and 4) off-balance sheet items.

(6) The TLAC leverage ratio is calculated by dividing the sum total of regulatory capital and TLAC-eligible instruments by the exposure measure at the level of the resolution group.

Regulatory developments

Desjardins Group continues to monitor changes in capital requirements under the global standards developed by the Basel Committee on Banking Supervision (BCBS) and to assess their impact on the capital ratios and the leverage ratio.

On September 8, 2022, the AMF published for consultation the draft *Ligne directrice sur les exigences de capital et de liquidités relatives aux expositions aux cryptoactifs* (Guideline on capital and liquidity requirements for cryptoasset exposures), applicable in particular to financial services cooperatives, as well as provincial life and health insurers and property and casualty insurers. This draft proposes adjusted capital and liquidity requirements based on a classification of cryptoassets that takes into account their risk profile while providing limits governing their exposure. This guideline is scheduled to come into effect on June 1, 2023. Persons interested in submitting their comments were invited to provide them by October 14, 2022.

The AMF has published an update to the base capital adequacy guideline related to the Basel III regulatory reforms approved by the BCBS on December 7, 2017.

These reforms are basically aimed at reducing excessive variability of risk-weighted assets and enhancing the comparability and transparency of financial institution capital ratios:

- By enhancing the robustness and risk sensitivity of the standardized approaches for credit risk and operational risk.
- By limiting the use of the internal ratings-based (IRB) approach, first by limiting the use of certain variables for the calculation of capital requirements, and second, by removing the use of advanced approaches for certain portfolios.
- By adjusting the leverage ratio exposure measure.
- By replacing the existing threshold with a more robust and risk-sensitive floor based on the Basel III revised standardized approaches.

The updated *Capital Adequacy Guideline* has been in effect since January 1, 2023. The amendments, for their part, aimed at completing the incorporation of the new Basel III provisions relating to market risk requirements, and to increasing the robustness and risk sensitivity of the standardized approaches for credit valuation adjustment (CVA) risk, will come into effect on January 1, 2024.

The “Regulatory environment” section presents additional details on regulation as it affects all Desjardins Group operations. In addition, this section contains information on the internal recapitalization (bail-in) regime applicable to Desjardins.

Compliance with requirements

As at December 31, 2022, the Tier 1A, Tier 1 and total capital ratios of Desjardins Group, calculated in accordance with Basel III requirements, were 20.2%, 20.2% and 21.9%, respectively. The leverage ratio was 7.6%. Desjardins Group therefore has very good capitalization, with a Tier 1A capital ratio above the 15% target.

As at December 31, 2022, the Tier 1A capital ratio was down compared to December 31, 2021, due mainly to growth in risk-weighted assets as a result of business growth, as well as a decrease in the value of the bond portfolio due to rising interest rates. Additionally, the revision of some of the methodology aspects of risk-weighted assets had a positive effect on capital ratios in the fourth quarter of 2022.

The TLAC ratio and the TLAC leverage ratio were 28.7% and 10.6%, respectively, as at December 31, 2022.

Desjardins Group and all its components that are subject to minimum regulatory requirements with respect to capitalization were in compliance with said requirements as at December 31, 2022.

Regulatory capital and other TLAC instruments

The following tables present Desjardins Group's main capital and other TLAC instrument components, capital ratios, regulatory capital and other TLAC instruments, and their changes over the year.

Table 24 – Main capital components and other TLAC instruments

	Regulatory capital requirements and other TLAC instruments			
	Total capital			Other TLAC instruments
	Tier 1 capital		Tier 2 capital	
	Tier 1A[1]	Tier 1B[1]		
Eligible items	• Reserves and undistributed surplus earnings • Eligible accumulated other comprehensive income • F capital shares • Eligible portion of general allowance[4]	• Non-controlling interests[2]	• General allowance • NVCC subordinated notes[3] • Eligible qualifying shares	• TLAC senior notes
Regulatory adjustments	• Goodwill • Software • Other intangible assets • Net defined benefits plan assets • Deferred tax assets essentially resulting from loss carryforwards • Shortfall in allowance			
Deductions	• Mainly significant investments in financial entities[5]	• Investment in preferred shares of a component deconsolidated for regulatory capital purposes	• Investment in preferred shares of a component deconsolidated for regulatory capital purposes • Subordinated financial instrument	

(1) The Tier 1A and Tier 1B ratios are the equivalent of the financial institutions' CET1 and AT1 ratios, for financial services cooperatives regulated by the AMF.

(2) The amount of non-controlling interests is determined, in particular, based on the nature of the operations and the capitalization level of the investee.

(3) These notes meet the Non-Viability Contingent Capital (NVCC) requirements of the base capital adequacy guideline applicable to financial services cooperatives. To be eligible, the notes must include a clause requiring the full and permanent conversion into a Tier 1A capital instrument at the point of non-viability.

(4) On March 31, 2020, the AMF published transitional provisions stipulating the inclusion in Tier 1A capital of a portion of the loss allowance for expected credit losses that would otherwise have been included in Tier 2 capital. This adjustment of Tier 1A capital is measured dynamically each quarter as the increase in the Stage 1 and Stage 2 allowances compared to the level at December 31, 2019. The amount obtained is then adjusted for tax effects and subject to a scaling factor of 25% in 2022 (50% in 2021).

(5) Represent the portion of investments in the components deconsolidated for regulatory capital purposes (mainly Desjardins Financial Corporation Inc.) that exceeds 10% of capital net of regulatory adjustments. In addition, when the non-deducted balance, plus deferred tax assets net of corresponding deferred tax liabilities, exceeds 15% of the adjusted capital, the surplus is also deducted from this capital. The net non-deducted balance will be subject to risk-weighting at a rate of 250%.

Table 25 – Regulatory capital and other TLAC instruments

As at December 31

(in millions of dollars and as a percentage)	2022	2021
Tier 1A capital		
F capital shares[1]	**$ 4,889**	$ 4,889
Permanent shares and surplus shares subject to phase-out[2]	**N/A**	84
Reserves and undistributed surplus earnings	**28,906**	26,813
Eligible accumulated other comprehensive income	**(2,154)**	773
Deductions[3]	**(3,485)**	(4,122)
Total Tier 1A capital	**28,156**	28,437
Total Tier 1 capital[4]	**28,156**	28,437
Tier 2 capital		
Eligible instruments[5]	**2,954**	1,985
General allowance	**161**	125
Deductions	**(826)**	(826)
Total Tier 2 capital	**2,289**	1,284
Total regulatory capital (Tiers 1 and 2)	**$ 30,445**	$ 29,721
Total regulatory capital for TLAC purposes[6]	**$ 29,543**	$ 28,997
TLAC senior notes	**9,179**	5,328
Total loss absorbing capacity (TLAC) available	**38,722**	34,325
Risk-weighted assets and leverage ratio exposure		
Risk-weighted assets	**139,311**	134,518
Risk-weighted assets for TLAC purposes[6]	**134,880**	129,311
Leverage ratio exposure[7]	**371,598**	336,136
TLAC Leverage Ratio Exposure[6][7]	**364,519**	329,634
Ratios		
Tier 1A capital ratio	**20.2 %**	21.1 %
Tier 1 capital ratio	**20.2**	21.1
Total capital ratio	**21.9**	22.1
TLAC ratio[6]	**28.7**	26.5
Leverage ratio[7]	**7.6**	8.5
TLAC leverage ratio[6][7]	**10.6**	10.4

(1) Including capital shares held in the Trust Fund of the Federation.

(2) As these capital instruments no longer meet the eligibility criteria for capital tiers, they have been excluded from them since January 1, 2022.

(3) Deductions from Tier 1A are comprised of regulatory adjustments ($899 million, $1,078 million in 2021), significant investments ($2,463 million, $2,913 million in 2021) and items that could not be deducted from Tiers 1B and 2 because of insufficient capital in these tiers ($123 million, $131 million in 2021).

(4) No Tier 1B capital instrument has been issued to date.

(5) Corresponds to eligible qualifying shares and NVCC subordinated notes. For further information, see Note 20 “Subordinated notes“ of the Combined Financial Statements and “Template CCA – Main features of regulatory capital instruments and other TLAC-eligible instruments” in the Pillar 3 Report.

(6) Data calculated at the resolution group level, which is deemed to be Desjardins Group, excluding Caisse Desjardins Ontario Credit Union Inc.

(7) As part of the temporary relief measures issued by the AMF since March 31, 2020, reserves with central banks and securities issued by sovereign borrowers that meet the eligibility criteria for high-quality liquid assets were excluded from the total exposure used when calculating the leverage ratio. Since January 1, 2022, eligible securities issued by sovereign borrowers have been reincorporated into the leverage ratio exposure measure, while reserves at central banks will remain excluded until further notice.

In the year ended December 31, 2022, the caisses redeemed for cancellation all permanent shares and all surplus shares for a cash consideration of $75 million and $18 million, respectively.

The Federation is able to issue eligible instruments as NVCC on Canadian, U.S. and European markets. Since this program was implemented, it has carried out issues of such securities for a total of $3.0 billion as at December 31, 2022. As a result, should there be a trigger event as defined in the base capital adequacy guideline applicable to financial services cooperatives, these notes would automatically and immediately be converted into Tier 1A capital of the Federation.

In addition, Desjardins Group has been issuing TLAC-eligible debt since October 1, 2019, for a total of $9.2 billion as at December 31, 2022, $3.9 billion of which were issued in fiscal 2022.

On December 15, 2022, the Board of Directors approved an interest payment of $262 million to holders of F capital shares.

Table 26 – Change in regulatory capital and other TLAC instruments
For the years ended December 31

(in millions of dollars)	2022	2021
Tier 1A capital		
Balance at beginning of year	**$ 28,437**	$ 26,317
Increase in reserves and undistributed surplus earnings[1]	**2,093**	3,681
Eligible accumulated other comprehensive income	**(2,927)**	(535)
Permanent shares and surplus shares subject to phase-out[2]	**(84)**	(41)
Deductions	**637**	(985)
Balance at end of year	**28,156**	28,437

Total capital	**$ 30,445**	$ 29,721
Total regulatory capital for TLAC purposes[4]	**$ 29,543**	$ 28,997
Other TLAC instruments		
Balance at beginning of the year	**5,328**	2,266
TLAC senior notes	**3,851**	3,062
Balance at end of year	**9,179**	5,328
Total loss absorbing capacity (TLAC) available[4]	**$ 38,722**	$ 34,325

(1) Amount including the change in defined benefit pension plans.
(2) As these capital instruments no longer meet the eligibility criteria for capital tiers, they have been excluded from them since January 1, 2022.
(3) No Tier 1B capital instrument has been issued to date.
(4) Data calculated at the resolution group level, which is deemed to be Desjardins Group, excluding Caisse Desjardins Ontario Credit Union Inc.

Risk-weighted assets (RWA)

Desjardins Group calculates risk-weighted assets for credit risk, market risk and operational risk.

Credit risk

- Desjardins uses the Internal Ratings-Based Approach for credit risk.
- This approach has been used for Retail client exposures – Personal as well as for most exposures in the asset classes consisting of sovereign borrowers, financial institutions, businesses and SMEs similar to other retail client exposures.
- The Standardized Approach is used to measure the credit risk of certain exposures related to components of lesser importance, as well as asset classes that are not significant in terms of amount and perceived risk profile.

Market risk

- Desjardins Group uses internal market risk models for trading portfolios.
- The Standardized Approach is used for foreign exchange risk and commodity risk in the banking portfolio.

Operational risk

- Desjardins Group uses the Standardized Approach to calculate operational risk.

Desjardins is also subject to an RWA floor. When the RWA modelled are lower than the RWA calculated using the Standardized Approach multiplied by a factor set by the AMF, the difference is added to the denominator of the regulatory capital, as specified in the base capital adequacy guideline applicable to financial services cooperatives issued by the AMF.

As indicated in the following table, risk-weighted assets totalled $139.3 billion as at December 31, 2022. Of this amount, $118.8 billion was for credit risk, $4.0 billion for market risk, $15.1 billion for operational risk, and $1.4 billion for the RWA floor adjustment. As at December 31, 2021, risk-weighted assets stood at $134.5 billion.

Table 27 – Risk-weighted assets

(in millions of dollars and as a percentage)	Internal Ratings-Based Approach		Standardized Approach		Total as at December 31, 2022				Total as at December 31, 2021

Total risk-weighted assets before the RWA floor	333,220	81,880	44,869	40,981	400,300	137,856	11,029	34.4	134,518
RWA floor adjustment[9]	—	—	—	—	—	1,455	116	—	—
Total risk-weighted assets	$ 333,220	$ 81,880	$ 44,869	$ 40,981	$ 400,300	$ 139,311	$ 11,145	34.8 %	$ 134,518

(1) Net exposure after credit risk mitigation [net of loss allowance for expected credit losses on credit-impaired loans other than retail clients (except for credit card loans) using the Standardized Approach, excluding those using the Internal Ratings-Based Approach, according to the base capital adequacy guideline for financial services cooperatives issued by the AMF].

(2) The capital requirement is 8% of risk-weighted assets.

(3) Changes in certain methodology aspects resulted in a decrease in RWA in the fourth quarter of 2022.

(4) Other assets are measured using a method other than the Standardized Approach or the Internal Ratings-Based Approach. Other assets include the investments portion below a certain threshold in components that are deconsolidated for regulatory capital purposes (mainly Desjardins Financial Corporation Inc.), the investments portion below a certain threshold in associates as well as the portion of other deferred tax assets above a certain threshold. These three items are weighted at 250% and the deducted portion (namely above a certain threshold) is weighted at 0%. This class does not include the CVA charge and supplementary requirements for the banking and trading portfolios, which are disclosed in the counterparty credit risk section.

(5) The scaling factor is a 6% calibration of risk-weighted assets measured using the Internal Ratings-Based Approach for credit exposures in accordance with Section 1.3 of the base capital adequacy guideline for financial services cooperatives issued by the AMF.

(6) Supplementary charges representing an estimate of default and migration risks of unsecuritized products exposed to interest rate risk.

(7) Represents mainly capital charges calculated using the Standardized Approach for foreign exchange risk and commodity risk in the banking portfolio.

(8) In accordance with a new AMF guideline, the Value at Risk multipliers by risk factor have automatically been increased since June 30, 2022 based on back-testing.

(9) The RWA floor is defined based on the Standardized Approaches.

Movements in risk-weighted assets

In credit risk, fluctuations in RWA for 2022 were segmented into two items, namely credit risk other than counterparty risk and counterparty risk.

- In credit risk other than counterparty risk, the net increase of $0.9 billion in RWA is chiefly due to:
  - Growth in portfolio size, which resulted in a $9.7 billion increase in RWA.
  - Change in exchange rates leading to a $0.6 billion increase in RWA.
  - Changes in procedures and policies, which generated a $7.8 billion decrease in RWA.
  - Updating of models, which caused a $0.8 billion decrease in RWA.
  - Changes in portfolio quality, generating a decrease of $0.8 billion in RWA.
- For counterparty risk, changes in portfolio quality and size resulted in an increase of $0.7 billion.

In market risk, a $1.1 billion increase in RWA was observed due to a fluctuation in risk levels.

In operational risk, a $0.6 billion increase in RWA resulted from the fluctuation in revenue generated.

The RWA floor adjustment as previously defined caused RWA to increase by $1.4 billion in 2022.

Change in exchange rates	**—**	35
Other	**—**	—
Total changes in risk-weighted assets	**1,455**	(177)
Risk-weighted assets at end of year	**$ 1,455**	$ —

(1) Increase or decrease in underlying risk exposure.
(2) Change in risk mitigation factors and portfolio quality.
(3) Change in risk models and parameters.
(4) Regulatory changes and developments in the regulatory capital calculation methods. In accordance with a new AMF guideline, the Value at Risk multipliers by risk factor have automatically been increased since June 30, 2022 based on back-testing.
(5) Change in risk levels and fluctuation in exchange rates, which is not considered to be material.

3.3 Off-balance sheet arrangements

In the normal course of operations, Desjardins Group enters into various off-balance sheet arrangements, including assets under management and under administration on behalf of its members and clients, credit instruments, guarantees, and structured entities, including securitization.

ASSETS UNDER MANAGEMENT AND UNDER ADMINISTRATION

As at December 31, 2022, Desjardins Group administered, for the account of its members and clients, assets totalling $447.3 billion, for a decrease of $35.6 billion, or 7.4% since December 31, 2021. Financial assets placed with Desjardins Group as wealth manager amounted to $76.2 billion as at December 31, 2022, representing a decrease of $15.1 billion, or 16.5% since December 31, 2021. The decrease in assets under management and under administration is due mainly to the decline in assets on account of developments on financial markets.

Assets under management and under administration by Desjardins Group are comprised essentially of financial assets in the form of investment funds, securities held in custody and assets accumulated by pension funds. They do not belong to Desjardins Group, but to its members and clients and, as a result, they are not recognized on the Combined Balance Sheets. The Wealth Management segment is primarily responsible for the activities related to assets under management and under administration.

Table 29 – Assets under management and under administration
As at December 31

(in millions of dollars)	2022	2021	2020
Assets under management[1]			
Institutions and individuals	**$ 17,744**	$ 23,901	$ 20,298
Investment funds	**58,425**	67,357	57,176
Total assets under management	**$ 76,169**	$ 91,258	$ 77,474
Assets under administration[1]			
Individual and institutional trust and custodial services	**$ 322,917**	$ 344,644	$ 335,610
Investment funds	**124,395**	138,267	122,567
Total assets under administration	**$ 447,312**	$ 482,911	$ 458,177

(1) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

CREDIT INSTRUMENTS

In order to meet its members' and clients' financing needs, Desjardins Group enters into various agreements with them for such instruments as credit commitments, indemnification commitments related to securities lending and documentary letters of credit. These products are generally off-balance sheet instruments and may expose Desjardins Group to credit and liquidity risks. These instruments are subject to Desjardins Group's usual risk management rules.

Note 29, "Commitments, guarantees and contingent liabilities", to the Combined Financial Statements provides more detailed information about these credit instruments.

GUARANTEES

Desjardins Group also enters into various guarantee and indemnification agreements with its members and clients in the normal course of operations. These agreements remain off-balance sheet arrangements and include guarantees, standby letters of credit and credit default swaps. Note 29, "Commitments, guarantees and contingent liabilities", to the Combined Financial Statements provides information about these off-balance sheet arrangements.

STRUCTURED ENTITIES

Desjardins Group enters into various financial transactions with structured entities in the normal course of operations to diversify its sources of funding and manage its capital. Structured entities are usually created for a unique and distinct purpose, and they frequently have limited activities. These entities may be included in Desjardins Group's Combined Balance Sheets if it has control over them. Detailed information concerning significant exposure to structured entities not included in Desjardins Group's Combined Balance Sheets is provided below. Note 14, "Interests in other entities", to the Combined Financial Statements provides more information about structured entities.

Securitization of Desjardins Group's financial assets

Desjardins Group participates in the *National Housing Act* (NHA) Mortgage-Backed Securities Program to manage its liquidities and capital. Transactions carried out under this program sometimes require the use of a structured entity, the Canada Housing Trust (CHT), set up by Canada Mortgage and Housing Corporation (CMHC) under the Canada Mortgage Bonds (CMB) Program. Note 9, "Derecognition of financial assets", to the Combined Financial Statements provides more information about the securitization of Desjardins Group's loans.

4.0 Risk management

The shaded areas and tables marked with an asterisk (*) in this section contain information about credit, market and liquidity risks in accordance with IFRS 7, “Financial Instruments: Disclosures”. They also contain an analysis of how Desjardins Group assesses its risks as well as a description of its risk management objectives, policies and methods. IFRS 7 provides that risk disclosures may be included in the MD&A. Consequently, the shaded areas and tables marked with an asterisk (*) contain audited information and are an integral part of the Combined Financial Statements, as explained in Note 30, “Financial instrument risk management”, to the Combined Financial Statements.

4.1 Risk factors that could impact future results

In addition to the risks presented in Section 4.2 of this MD&A, other systemic or macroeconomic risk factors, which are outside of Desjardins Group’s control, may impact its future results. Furthermore, as indicated in the caution concerning forward-looking statements, general or specific risks and uncertainties may cause the actual results of Desjardins Group to differ from those in the forward-looking statements. Some of these risk factors are presented below.

4.1.1 Main risks and emerging risks

Principal risks and emerging risks are risks or risk factors that could have a significant impact on Desjardins Group’s financial autonomy and would likely affect its reputation, the volatility of its results, the adequacy of its capitalization or liquidities, in the event they fully materialize. Among these risks, certain so-called emerging risks are sharply growing risk factors, or ones that are developing unexpectedly, with unanticipated results. Desjardins Group continues to be proactive in identifying and tracking these risks so that it can take the appropriate management measures when required. For example, the external environment is continuously monitored to identify the risk factors and economic and regulatory events that could impact its operations. In addition, regular exchanges between the Risk Management Executive Division, risk officers and the business segments further define the risk factors of greatest concern.

	Description
Security breaches	Risks related to cyber threats have been on the rise for a number of years and more specifically in the context of the geopolitical situation in Europe. Both the aggregation of new services for members and clients and the exposure of online services are becoming increasingly complex and gradually extending to more and more areas and products. Increased monitoring of Desjardins Group’s employees and infrastructures, including that of applications involving confidential data, has been set up in order to better meet the performance needs of teleworking and to mitigate the risks associated with service interruptions, information security and reputation. In addition, the perpetrators of cyber threats are using increasingly sophisticated methods and strategies for criminal purposes. Consequently, Desjardins Group has been investing in technology for many years, strengthening its cyber-defence capabilities in order to detect security incidents as quickly as possible by optimizing its processes to respond efficiently to incidents and by attracting and training new talent in order to continue to develop its defence methods. The Desjardins Group Security Office ensures the protection of members’ and clients’ assets.
Household and corporate indebtedness	With the rapid hikes in interest rates, debt service has considerably increased for many households and businesses. In such conditions, an increasing number of households and businesses could experience difficulties in assuming their financial obligations. As a result, their solvency could significantly deteriorate. The recession anticipated in 2023 could also lead to growth in insolvency cases. Desjardins Group has sound practices in granting and managing mortgage financing, including a stress test involving interest rates for mortgage financing, which should allow it to circumvent this risk.
Technological developments	Innovative technologies are being increasingly taken into consideration and adopted by financial institutions. These innovative technologies represent a crucial vector for transforming business processes and models. Use of these technologies exposes financial institutions to other risks relating to cyber threats, system stability, the modernizing of infrastructure, complex environments, systems interdependence, and digital transformation. The members’ and clients’ growing needs to access banking transactions remotely require pursuing the shift that is well underway at Desjardins. Regulatory authorities’ expectations will be increasingly demanding, and financial sector requirements will continue to grow in terms of managing technology risk. The growing presence of FinTech and InsurTech, which offer simple, innovative technology solutions that meet the expectations of members and clients, puts more pressure on traditional financial institutions to adapt. To meet the needs of its members and clients, Desjardins Group is in line with this trend and remains active in managing this operational and strategic risk, among others, by strengthening and rationalizing the technology ecosystem through investments and by reviewing and diversifying its products, services and distribution channels.
Regulatory developments	The financial services industry is one of the most tightly monitored and regulated, and industry regulation has been rapidly expanding for many years now. This trend is in response to a number of socio-economic phenomena: the development of new, increasingly complex financial products, ongoing volatility in the securities market, increasingly complex financial fraud, the fight against money laundering and terrorist financing, the fight against tax evasion, compliance with economic sanctions and the protection of personal information. Although Desjardins Group actively monitors and manages regulatory risk, changes in regulation, its complexity and its uncertainty could have an impact on the performance of its operations, its reputation, its strategies and its financial objectives. As an independent supervisory function, the Vice-President and Chief Compliance and Privacy Officer, Desjardins Group promotes a proactive approach to compliance by fully integrating it into the organization’s regular operations. Maintaining an effective compliance management framework mobilizes significant amounts of technical, human and financial resources.

	Description
Interest rate developments	The Bank of Canada has significantly increased its key interest rates in 2022 to curb the high inflation rate. The constraining effects on demand are being felt, and a recession is anticipated in 2023 in Canada (in particular in Québec and Ontario). However, disruptions in global supply chains are gradually subsiding. Supply and demand are progressively attaining a better equilibrium, which should ease the upward pressure on inflation. After reaching a cyclical high in late 2022 or early 2023, Canadian key interest rates should remain at the same level for a good portion of 2023. If inflation is under control, key interest rates could start to decrease towards the end of 2023 to bring the monetary policy to a less restrictive level. Our financial results are sensitive to interest rate fluctuations as indicated under “Structural interest rate risk management”.
Climate change	In a context where the impact of climate change risks is widely recognized, Desjardins Group understands the importance of better identifying the various aspects of those risks (transition, physical or reputation) and measuring their current and future impact. This is challenging due to the complex and unpredictable nature of climate events and the developing scientific research on the topic. The close interrelations between these risks and the political and regulatory environment, the macroeconomic situation, certain industry innovations, the global geopolitical situation or the more pressing social expectations, to name only a few, impose continuous monitoring in this area. Desjardins Group continues its efforts in that regard with various ongoing initiatives in relation with its governance framework and aimed at integrating these risks into strategies and climate change risk management. Like our peers, we are working to obtain more granular and current data to support our initiatives.
Biodiversity loss	A hot topic, in particular with Montréal hosting COP15, biodiversity loss was ranked as the third most pressing global risk for the next ten years by the World Economic Forum in its 2021-2022 report, which is also an important issue in Canada. The decline of biodiversity could lead to significant economic and financial risks in addition to having an impact on our collectivities. Disclosure standards are expected in 2023-2024, in relation with the work of the Taskforce on Nature-related Financial Disclosures (TNFD) and the Partnership for Biodiversity Accounting Financials (PBAF) or the recent statements made by the International Sustainability Standards Board (ISSB), which expects to address soon this emerging risk. As it is the case with climate risks, there are three categories of risks: physical, transition and reputation. The first studies on the dependencies between the financial system and biodiversity have been published. New approaches and methodologies are however required to estimate the financial risks associated with biodiversity loss. Desjardins Group is developing an action plan to better factor in the management of these risks and strategies in its governance framework.
Geopolitical uncertainties	Everywhere in the world, the population now lives with COVID-19 and its variants. However, the pandemic is not over, and we are not immune to a new resurgence that would require introducing new restrictive measures in some countries. The war in Ukraine is also a significant risk. A more generalized conflict involving directly NATO (North Atlantic Treaty Organization) member countries would lead to serious humanitarian and economic consequences. The impact on the global economy of the sanctions imposed to Russia remains uncertain. Lastly, the relations between China and the United States over Taiwan are likely to remain tense.

4.1.2 Other risk factors that could impact future results

	Description
General economic and business conditions in regions in which Desjardins Group operates	General economic and business conditions in the regions where Desjardins Group operates may significantly affect its income and surplus earnings. These conditions include short- and long-term interest rates, inflation, debt securities market fluctuations, foreign exchange rates, financial market volatility, tighter liquidity conditions in certain markets, the level of indebtedness, the strength of the economy, consumer spending and saving habits, and the volume of business conducted by Desjardins Group in a given region.
Monetary policies	The monetary policies of the Bank of Canada and the U.S. Federal Reserve, as well as interventions in capital markets, have an impact on Desjardins Group’s income. The general level of interest rates may impact Desjardins Group’s profitability because fluctuations affect the spread between interest paid on deposits and interest earned on loans, thereby affecting Desjardins Group’s net interest income. Furthermore, considering the current level of indebtedness of Canadian households, an even greater increase in interest rates could have more impact on debt service, leading to an increased risk of loan losses for financial institutions. Desjardins Group has no control over changes in monetary policies or capital market conditions, and it therefore cannot forecast or anticipate them systematically.
Critical accounting estimates and accounting standards	The Combined Financial Statements are prepared in accordance with the IFRS. The accounting policies used by Desjardins Group determine how it reports its financial position and results of operations, and management may be required to make estimates or rely on assumptions about matters that are inherently uncertain. Any change in these estimates and assumptions, as well as in accounting standards and policies, may have a significant impact on Desjardins Group’s financial position and results of operations. Significant accounting policies and future accounting changes are described in Note 2, “Significant accounting policies”, to the Combined Financial Statements.
New products and services to maintain or increase market share	Competitive pressures from Canadian financial institutions and the emergence of new competitors have led Desjardins Group to develop new products and services at a faster pace to meet the expectations of its members and clients. Developing these new products and services may involve some risks. In that context, Desjardins remains active to manage these risks, in particular by making investments and by reviewing and diversifying its products, services and distribution channels. At Desjardins Group, there is a risk management governance that involves identifying, analyzing, disclosing and monitoring all financial and non-financial risks created by new products and services.

	Description
Geographic concentration	Although Desjardins Group is diversified through its insurance operations, its banking operations are heavily concentrated in Québec. As at December 31, 2022, its loans to Québec members and clients therefore accounted for 90.3% of its aggregate loan portfolio. As a result of this significant geographic concentration, its results largely depend on economic conditions in Québec. Any deterioration in these conditions could adversely impact: • past due loans; • problem assets and foreclosed property; • claims and lawsuits; • the demand for products and services; • the value of collateral available for loans, especially mortgages, and by extension, clients' and members' borrowing capacity, the value of assets associated with impaired loans and collateral coverage.
Acquisitions and joint arrangements	Desjardins Group has implemented a rigorous internal control environment for the acquisition and joint arrangement processes, which include risk management practices that involve identifying, analyzing, disclosing and monitoring all financial and non-financial risks created by acquisitions and joint arrangements.
Credit ratings	The credit ratings assigned to Desjardins Group by rating agencies are instrumental to its access to sources of wholesale funding and the cost of such funding. These ratings may be revised or withdrawn at any time by the agencies. In addition, a significant downgrade to various ratings could push up Desjardins Group's cost of funding, reduce its access to financial markets, and increase additional obligations required by its counterparties.
Dependency on third parties	We need to rely on third parties in order to provide top-quality, secure services. These third parties play a major role in supporting Desjardins Group's operations as well as in implementing technological innovations that allow Desjardins to improve the services it offers to members and clients (IT, office automation, telecommunications, cloud and other providers and suppliers). Using third parties can, however, generate certain risks. Desjardins recognizes the importance of these risks and is putting in place all the necessary measures to mitigate them. Inadequate management of third-party risk could affect Desjardins Group's ability to provide the services that members and clients need. This type of risk could have an impact on information security, business continuity, as well as on other types of risks, such as reputational risk. The oversight process used for outsourcing, together with the incident management process, allow Desjardins to adequately prevent and handle third-party risk.
Ability to recruit and retain talents	Desjardins Group's future performance is based in part on its ability to recruit key people, develop them and retain them. There is strong competition, partially fueled by a relatively low unemployment rate, to attract and retain the best qualified people in the finance sectors, in particular with the arrival of new players in some sectors and the adoption of the concept of global workforce. Consequently, this aspect is periodically monitored through the governance mechanisms of the Management Committee of the Human Resources function, quarterly to the Desjardins Group Management Committee and annually with filing a report with Desjardins Group's Human Resources Commission, to deploy the appropriate strategies to put in place the success factors that enhance Desjardins Group's competitiveness as an employer.
Taxation risk	The Canadian, provincial and foreign tax laws, and their interpretations by tax authorities and courts, are constantly evolving, like the tax policies of governments. These numerous changes and the complexity in interpreting and applying legislation may have a significant impact on the tax expense amounts, the deferred tax balances and the effective tax rate during the year when they occur and, consequently, on the calculation of Desjardins Group's surplus earnings.
COVID-19 pandemic	The COVID-19 pandemic as well as its associated risks are still being monitored by Desjardins Group. Many actions have been taken by Desjardins Group to address this issue, and active monitoring of the effects and evolution of the COVID-19 pandemic is in place. The COVID-19 pandemic has had and will continue to have an impact on the risks to which Desjardins Group is exposed in the normal course of its business.
Other factors	Other factors that may have an impact on Desjardins Group's future results include interest rate benchmark reform (for further information, see Note 3, "Interest rate benchmark reform", to the Combined Financial Statements), unexpected changes in consumer spending and saving habits, the possible impact on operations of international conflicts, public health crises, such as pandemics and epidemics or any other similar disease affecting the local, national or global economy, as well as Desjardins Group's ability to anticipate and manage the risks associated with these factors properly despite a disciplined risk management environment. Desjardins Group cautions the reader that factors other than the foregoing could affect future results. Investors and other stakeholders relying on forward-looking statements to make decisions with respect to Desjardins Group should carefully consider these factors as well as other uncertainties, potential events, and industry factors or other items specific to Desjardins Group that could adversely impact its future results.

4.2 Risk management

4.2.1 Integrated Risk Management Framework

Desjardins Group's objective in risk management is to optimize the risk-return trade-off by developing and applying integrated risk management strategies, frameworks, practices and procedures to all of the organization's business sectors and support functions. To this end, Desjardins developed an Integrated Risk Management Framework reflective of its business strategies and organizational risk-taking philosophy which is aimed, among other things, at giving its senior management and the Federation's Board of Directors an appropriate level of confidence and comfort regarding the understanding and management of the risks associated with the achievement of its objectives, including risks related to external factors like climate change.

Risk identification

Desjardins Group considers it important to periodically assess the environment in which it operates and to identify key risks, as well as the aforesaid principal risk factors and emerging risk factors to which it is exposed. Desjardins Group has a risk log that sets out the main categories and subcategories of risks which could affect Desjardins Group. The log is updated periodically and is used as a basis to make a quantitative and qualitative assessment of risk materiality, to determine Desjardins Group's risk profile and to implement appropriate strategies to mitigate risk.

In the normal course of business, Desjardins Group is exposed to the principal risks shown below, which are covered in specific subsections of this MD&A.

Credit	Market	Liquidity	Operational	Insurance	Strategic	Reputation	Environmental or social	Regulatory

Strict and effective management of these risks is a priority for Desjardins Group, its purpose being to support its major orientations, particularly regarding its financial soundness as well as its sustained and profitable growth, while complying with regulatory requirements. Desjardins Group considers risk an inextricable part of its development and consequently strives to promote a proactive approach in which each of its business segments, employees and managers is responsible for risk management.

Risk measurement

Desjardins Group uses both quantitative and qualitative techniques to determine its risk exposure. It ensures that an appropriate selection of measurement tools and mitigation techniques are designed and maintained in order to support its business development.

Models, which are involved in various aspects of risk management, play a central role in assessing risk at Desjardins Group and support decision-making in many situations. They are applied to various aspects of risk management. Quantitative models are used for modelling credit risk measurement parameters. Other quantitative models are also used in market risk measurement, economic capital calculations, asset valuation, pricing, technological obsolescence and cybercrime. Risks are quantified based on both the current economic context as well as on hypothetical stress-testing situations, which are measured for specific risks on a Desjardins-wide integrated basis.

Desjardins-wide integrated stress testing

Desjardins-wide sensitivity tests and crisis scenarios are used as additional risk analysis tools to measure the potential impact of exceptional but plausible events on, in particular, profitability, liquidity and capital levels. Organization-wide crisis scenarios are developed based on the anticipated economic outlook under unfavourable conditions.

Desjardins-wide integrated stress testing is conducted annually. It begins with an analysis of multi-factor scenarios developed by the Economic Studies team. These scenarios consider the current economic conditions, the principal risk factors to which the organization is exposed and emerging risk factors. Several scenarios are developed, and those that will be quantified are selected by Desjardins Group's senior management. The main factors projected for each scenario include housing prices, stock indices, inflation, unemployment rate and several interest rate curves.

This integrated stress testing exercise is performed with the input from various business units and business segments. The measured impacts deal mainly with the credit portfolio of the Desjardins caisse network and the Federation, the two insurance groups, namely Desjardins Financial Security and Desjardins General Insurance Group Inc., as well as the Desjardins Group Pension Plan. As the exercise incorporates a cross-sector perspective of Desjardins Group's operations, it is an essential risk management tool to identify diversification sources and potential vulnerability areas.

The results of the exercise are presented to various internal committees consisting of Desjardins Group's directors and senior management, namely the Risk Management Commission, the Desjardins Group Finance and Risk Management Committee, the Desjardins Group Management Committee and the Federation's Board of Directors.

During Desjardins-wide stress testing in 2022, the scenarios developed separately considered the possibility of a greater-than-expected rise in inflation and a recession with a sharp inversion of the interest rate curve. The results obtained from the assessment of these scenarios show that Desjardins Group's current capitalization levels would be enough to withstand the economic deterioration considered and that its capital ratios would still exceed regulatory limits and its own risk appetite limits.

The exercise is tied in with Desjardins Group's integrated financial planning and is an essential component of the Internal Capital Adequacy Assessment Program (ICAAP). The results of the stress testing exercise are used as a complement to the results of the economic capital quantification in determining capitalization targets. They are also used in updating risk appetite indicators.

The scenarios quantified in the integrated stress testing exercise are part of a range of scenarios used by Desjardins Group to identify, assess and manage risks. They include the stress testing scenarios on which is based the living will exercise as well as the regulatory scenario developed using the assumptions prescribed by the *Autorité des marchés financiers* (AMF). This latter exercise is performed according to the frequency set by the AMF, generally every two years. The last such regulatory scenario was carried out in 2021.

Ad hoc scenarios can also be quickly quantified to respond to specific situations, and senior management's or regulatory authorities' requests. For instance, at the beginning of the COVID-19 pandemic in 2020, a crisis scenario was quantified to assess the potential impact of this change in economic conditions and to guide strategic thinking.

Risk disclosure

A risk disclosure report is prepared quarterly and presented to the Desjardins Group Finance and Risk Management Committee, the Desjardins Group Management Committee, the Risk Management Commission and the Federation's Board of Directors. These reports provide relevant information on changes in the principal risks identified as well as on the capital position, particularly capital adequacy in relation to Desjardins Group's risk profile. These reports are regularly updated to include the latest risk management developments.

Risk appetite

As a significant component of the Integrated Risk Management Framework, risk appetite makes it possible to determine the risk type and level that Desjardins is prepared to assume in pursuing its business and strategic objectives. Risk appetite forms an integral part of strategic planning, which makes it possible to guide risk-taking in order to ensure Desjardins Group's stability and sustainability in the case of unfavourable future events that could affect reputation, the volatility of profitability, capital adequacy or liquidities. As a result, risk appetite provides a basis for integrated risk management by promoting a better understanding of the effect of principal risks and emerging risk factors on Desjardins Group's results.

The risk appetite framework reflects Desjardins Group's risk-taking philosophy, mission and values and is based on:
- taking necessary risks to enrich the lives of people and communities and managing such risks conscientiously;
- protecting Desjardins Group's reputation with its members, clients, communities, regulatory authorities and other stakeholders, while respecting its cooperative values;
- understanding the risks arising from Desjardins Group's operations and engaging in only new activities for which the risks are defined, assessed and understood;
- ensuring Desjardins Group's financial sustainability by preserving a capitalization level that meets market expectations and complies with regulatory requirements;
- managing liquidities and refinancing activities in order to guard against liquidity risk;
- thanks to adequate profitability in light of risk exposure, ensuring Desjardins Group's sustainability to be able to give back to members and communities and to meet its financial commitments;
- acting as a socio-economic leader in the development of a low greenhouse gas emission economy and supporting our members, clients and other stakeholders in the transition;
- taking the appropriate measures against internal and external threats to protect information, including personal information and the safety of our members' and clients' assets, as well as those of Desjardins Group;
- modernizing Desjardins Group technology to adjust to member, client and employee needs;
- balancing credit risk and long-term return with Desjardins Group's members and clients to support them and communities throughout our relationship;
- avoiding excessively large risk concentrations;
- maintaining an effective control environment and promoting sound management of operational and regulatory risks.

The Board of Directors approves the Risk Appetite Framework and ensures that Desjardins Group's financial and strategic objectives are in line with its risk appetite. The Risk Appetite Framework is reviewed regularly and submitted to the Federation's Board of Directors for approval. The Risk Management Executive Division relays the main guidelines for risk appetite to the business segments and components, and supports them in implementing these concepts by ensuring consistency in all the indicators, their targets, their levels and their limits with the Desjardins Group Risk Appetite Framework.

The risk management function ensures that Desjardins Group's risk profile is in line with its risk appetite. Each quarter, it reports to senior management and the Board of Directors on the compliance with the risk appetite statements and indicators. In the event a threshold or limit for a risk appetite indicator is exceeded, the investigation into the situation and the corrective measures, as applicable, are brought to the attention of the appropriate bodies.

Proactive risk management approach

A proactive risk management approach is one of the cornerstones of Desjardins Group's Integrated Risk Management Framework. It represents all the practices and behaviours of individuals and groups within the organization that condition the collective ability to identify, understand and openly discuss risks and handle present and future risks. Stakeholders, including the Board of Directors, senior management and the Risk Management Executive Division, guide risk-taking behaviour to be in line with Desjardins Group's risk management frameworks. A proactive risk management approach promotes open and transparent communication between Desjardins Group's risk management function and its other support functions, business segments and components, while promoting an appropriate risk-return trade-off.

Ethical conduct and integrity are firmly entrenched in Desjardins Group's proactive risk management approach, which relies on the *Desjardins Code of Professional Conduct.* The code sets out the values, principles and rules that Desjardins Group has espoused in order to maintain a high level of integrity.

Other methods used to support the proactive risk management approach and to promote accountability for risk include:
- defining and communicating risk management roles and responsibilities to all line levels in terms of an operations management approach based on the Three Lines of Defence model;
- alignment of strategic decisions and compensation processes with risk-taking;
- the dissemination of risk management frameworks;
- the organizing of risk management training and awareness sessions, bearing in mind the type of risk discussed and the role of the various parties involved.

Risk management and the Integrated Risk Management Framework are based on the following guidelines that provide in particular for:
- the accountability of Desjardins Group's business segments and other functions with regard to the risks inherent to their operations;
- the independence of the risk management function in relation to business segments;
- implementation at every level of the organization in order to obtain a comprehensive vision of risk exposure;
- a procedure aimed at ensuring that risk matters are disclosed and flagged accurately and transparently to senior management in a timely manner;
- the existence and presence of a complete and rigorous process to determine the appropriate capital level based on the risks assumed;
- consideration of risk management in the formulation of strategic plans and business strategies and in the resulting decisions;
- thorough risk assessment prior to launching new products or initiating transactions with a strong financial impact.

Compensation in relation to risk management

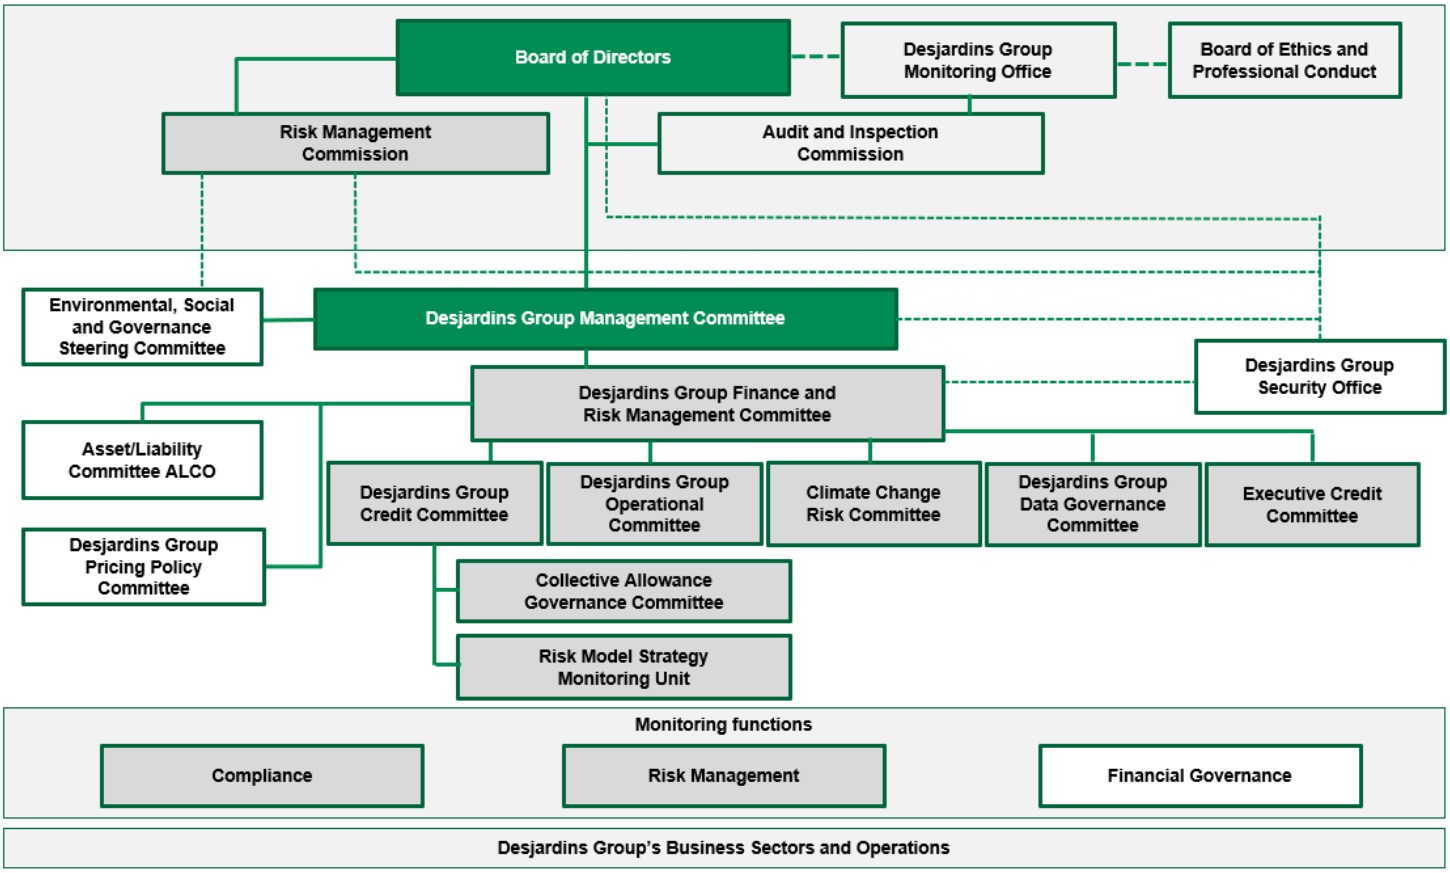

Desjardins Group has established strict governance with regard to total compensation. The Board of Directors, supported by the Human Resource Commission, is responsible for the annual changes in the total compensation of all employees and managers. In this regard, it establishes an annual salary review, sets the objectives and measures the results of the general incentive plan. It has developed, through adding environmental, social and governance (ESG) criteria, an additional mechanism to factor in not only financial risks, but also extra-financial risks in determining the overall incentive plan for all hierarchical levels. It also establishes a framework for all individual incentive plans that apply to Desjardins Group's sales force and investment teams.

Acting as a subcommittee of the Board of Directors, the Human Resources Commission is responsible for making recommendations to the Board of Directors with respect to all aspects of total compensation for all Desjardins Group employees, managers and senior executives other than the President and Chief Executive Officer. The Committee on the Aggregate Remuneration and Succession of the President and Chief Executive Officer of Desjardins Group is responsible for defining the compensation, working conditions, annual objectives and annual performance review of the President and Chief Executive Officer, and it recommends them to the Board of Directors.

Incentive plans for senior executives, other than the President and Chief Executive Officer, which are consistent with the aim to promote sound risk management over a time horizon of more than one year, provide for the medium to long-term deferral of a significant portion of members' annual bonus. The amounts thus deferred can vary annually depending on Desjardins Group's overall performance. This formula encourages key stakeholders to have a long-term vision of Desjardins Group's development, always in the best interests of members and clients, for whom the organization's sustainability is an important and reassuring factor.

Risk management governance

The Integrated Risk Management Framework is based on a solid risk governance structure and reflects Desjardins Group's organizational structure as shown below.

The Federation's Board of Directors is responsible for guiding, planning, coordinating and monitoring all of Desjardins Group's operations, and in such capacity, it participates actively in overseeing the major risks to which Desjardins Group is exposed. It is in particular responsible for adopting the overall directions and strategies proposed by senior management as well as risk management policies aimed at ensuring sound and prudent management of operations.

The Board is supported in this regard by the Risk Management Commission, the Audit and Inspection Commission, the Board of Ethics and Professional Conduct and the Desjardins Group Management Committee. Further information about these bodies is found in the Corporate Governance section of the 2022 Desjardins Group Annual Report.

The Desjardins Group Management Committee makes recommendations to the Board of Directors concerning risk management guidelines and strategies and ensures that they are implemented effectively and efficiently.

The Committee relies on the Desjardins Group Finance and Risk Management Committee and the Environmental, Social and Governance Steering Committee in performing its duties.

The Desjardins Group Finance and Risk Management Committee is responsible for ensuring that the on- or off-balance sheet principal risks to which Desjardins Group is or will be exposed directly or through one or more of its subsidiaries, have been identified and measured, and for assessing the potential impact of identified risks on business strategies.

This committee is supported by the Desjardins Group Credit Committee, the Desjardins Group Data Governance Committee, the Desjardins Group Operational Risk Committee and the Climate Change Risk Committee.

- The Desjardins Group Credit Committee approves large credit commitments, taking into account ESG analysis, and monitors activities related to assessing and quantifying credit risk. In its monitoring role, the committee is supported by the risk model and strategy monitoring unit and by the collective allowance governance committee.
- The Desjardins Group Data Governance Committee monitors data quality and compliance with regulatory requirements related to data within the scope of Desjardins Group data governance.
- The Desjardins Group Operational Risk Committee has a cross-sector view and monitors the different categories of operational and regulatory risks to which the Group is exposed.
- The Climate Change Risk Committee has a cross-sector view and monitors the climate change risks to which the Group is exposed.

The Desjardins Group Finance and Risk Management Committee is also responsible for overseeing and monitoring interest rate and liquidity risk management as well as ensuring compliance with Desjardins Group's pricing policy and the consistency of pricing with Desjardins's strategic objectives and financial targets. These mandates are performed through the Asset/Liability Committee (ALCO) and the Desjardins Group Pricing Policy Committee.

The Environmental, Social and Governance Steering Committee is responsible for reviewing environmental, social and governance position statements, assessing their inherent risks and ensuring that they are in line with Desjardins Group's strategic priorities. It reports to the Desjardins Group Management Committee and the Risk Management Commission.

The Security Office coordinates organizational initiatives and institutes cross-sector security strategies in order to continue to reinforce its practices aimed at protecting Desjardins members and clients, their assets and their personal information. It reports to the Desjardins Group Finance and Risk Management Committee, the Desjardins Group Management Committee, the Risk Management Commission and the Board of Directors.

Operations management approach based on the Three Lines of Defence model

Risk management governance and the Integrated Risk Management Framework are also based on the Three Lines of Defence model. The Three Lines of Defence encompass complementary responsibilities that are coordinated to support sound and prudent risk management. The management approach based on this model focuses in particular on segregation of tasks and the assignment of complementary roles and responsibilities that are clearly defined between the various parties within the organization in terms of risk management, as the following table illustrates:

THREE LINES OF DEFENCE MODEL	
First line	
Operationalization and control	• Identifies and analyzes its operational risks and manages gaps between its processes, practices and controls, and framework statements. • Coaches and trains employees on how to apply processes and controls and makes them accountable. • Establishes practices to ensure the sustainability of compliance maintenance capabilities over time. • Develops, deploys and validates processes and controls to close gaps. • Measures and monitors the performance of the processes and controls deployed. • Adjusts processes and controls as required. • Upon request, demonstrates compliance with frameworks, including risk appetite. • Triggers the escalation process defined in the framework if one of the triggers is activated. • Ensures that employees adopt and apply the processes and controls.
Second line	
Framework, monitoring and reporting	• Establishes the objectives, scope, principles and structure of the oversight framework. • Establishes expectations of the first line, the escalation processes and the triggers for its activation. • Has the framework approved by the appropriate organizational authority. • Provides complementary expertise, a cross-functional vision, assurance, monitoring and constructive criticism to risk management. • Monitors the risk levels of the processes and controls deployed. • Monitors compliance with the frameworks and reports to the various stakeholders (senior management, authorities and regulators) as set forth in the framework.
Third line	
Independent assurance	• Gives an independent and objective opinion on the effectiveness of governance, risk management and internal controls and issues findings to improve effectiveness. • Provides objective assurance to the Management Committee and the Board of Directors concerning the overall effectiveness of governance, risk management and internal controls.

1st Line of Defence

The first line of defence, assumed by process owners, is responsible for the overall performance of the activities assigned to it in the process and for managing the resulting risks.

Consequently, the business sectors and several responsibilities of the Desjardins Group Security Office ensure day-to-day risk management in compliance with the risk appetite framework. They design, implement and maintain effective internal controls, and monitor their risk profile.

2nd Line of Defence

The Risk Management Executive Division is a strategic function whose main purpose is to partner with the business sectors and Desjardins as a whole in their development by identifying, measuring and managing risks. It also ensures that risk management is aligned with Desjardins's risk appetite and business strategy.

In partnership with the business sectors, the Desjardins Group risk management function is responsible for recommending and establishing risk management frameworks, and ensures that the appropriate risk management infrastructure, processes and practices are set up to target all major Desjardins-wide risks.

The Risk Management Executive Division can also rely on the work performed by the Desjardins Group Security Office and the compliance and financial governance functions which, based on their separate mandates, help to regulate and manage certain issues inherent to Desjardins Group's operations.

3rd Line of Defence

The **Desjardins Group Monitoring Office** is an independent and objective advisory and assurance body that assists Desjardins Group's officers in carrying out their governance, risk management and control responsibilities.

Moreover, it assists the President and Chief Executive Officer of Desjardins Group, and oversees and advises management in its duty to ensure sound and prudent management. In so doing, it contributes to improving Desjardins Group's overall performance and maintaining the confidence of its members, the public and regulatory bodies. The Desjardins Group Monitoring Office includes the internal audit services of Desjardins Group components.

4.2.2 Basel capital accord

Basel III is an international capital adequacy tool designed to align regulatory capital requirements more closely with risk exposure and to further the continuous development of the risk assessment capabilities of financial institutions.

The Basel III framework is essentially based on three pillars:
- the first pillar sets out the requirements for risk-weighted regulatory capital;
- the second pillar deals with the supervisory review process;
- the third pillar stipulates financial disclosure requirements.

Credit risk

- Desjardins uses the Internal Ratings-Based Approach for credit risk.
- This approach is used for retail loan portfolios – Personal and for most exposures in the asset classes consisting of sovereign borrowers, financial institutions, businesses and SMEs similar to other retail client exposures.
- The Standardized Approach is used to measure the credit risk of certain exposures related to components of lesser importance, as well as asset classes that are not significant in terms of amount and perceived risk profile.

Market risk

- Desjardins Group uses market risk internal models for trading portfolios.
- The Standardized Approach is used for foreign exchange risk and commodity risk in the banking portfolio.

Operational risk

- Desjardins Group uses the Standardized Approach to calculate operational risk.

These provisions are used to calculate Desjardins's capital ratios, among other things.

Desjardins Group has also set up an internal capital adequacy assessment program (ICAAP). This program is a sound management practice recognized in the industry and is the key element of the second pillar of the Basel Accord. It allows a financial institution to provide for an appropriate level of capital to cover all major risks to which it is exposed, and to implement capital management strategies that follow the changes in its risk profile.

This program is under the responsibility of the Risk Management Executive Division. Capital adequacy is assessed by verifying whether available capital is sufficient to cover the capital required. The units responsible oversee the overall adequacy of Desjardins Group's available capital based on both internal measures of economic capital and the regulatory capital requirements under the first pillar. The results of stress testing exercises are also considered in the capital adequacy assessment.

The internal measure of capital used by Desjardins Group is economic capital, namely the amount of capital that an institution must maintain, in addition to expected losses, to remain solvent over a certain horizon and at a high confidence level. For Desjardins Group, economic capital is assessed over a one-year horizon. A confidence level is selected to meet the objective of maintaining attractive credit ratings. In order to assess Desjardins Group's overall capital adequacy in relation to its risk profile, all significant risks identified through the risk logging process are assessed using internal methodologies to measure economic capital. It should be pointed out that all economic capital methodologies are validated independently to ensure that modelling input and assumptions used allow the assessed risk to be measured appropriately.

In the course of its operations, Desjardins Group is exposed to various risks. The table below provides its risk profile by business segment. Economic capital is broken down to illustrate the relative size of the risks associated with the various business segments. The distribution of risk-weighted assets shows Desjardins Group's exposure to credit risk, market risk and operational risk for the purposes of regulatory capital measurement.

Table 30 – Economic capital and risk-weighted assets by business segment and by risk type

As at December 31, 2022

(in millions of dollars and as a percentage)

Desjardins Group

Economic capital	
Banking activities	
Credit risk	43.4 %
Market risk	1.8
Operational risk	4.9
Other risks[1]	2.5
Total banking activities	52.6
Insurance activities	40.0
Risk related to goodwill and other intangible assets[2]	7.4

Risk-weighted assets	
Credit risk	$ 118,783
Market risk	3,959
Operational risk	15,114
RWA floor adjustment	1,455

Business segment	Personal and Business Services	Wealth Management and Life and Health Insurance	Property and Casualty Insurance	Other
Balance sheet[3]	Assets $ 321,357	Assets $ 51,737	Assets $ 15,473	Assets $ 18,542
Economic capital	Proportion of total for Desjardins Group 32.7 % Banking activities Credit risk 67.5 Market risk 2.6 Operational risk 12.7 Other risks[4] 17.1 Total banking activities 99.9 Insurance activities[5] — Risk related to goodwill and other intangible assets[2] 0.1	Proportion of total for Desjardins Group 23.2 % Banking activities Credit risk 6.5 Market risk — Operational risk — Other risks[4] — Total banking activities 6.5 Insurance activities[5] 88.4 Risk related to goodwill and other intangible assets[2] 5.1	Proportion of total for Desjardins Group 14.7 % Banking activities Credit risk — Market risk — Operational risk — Other risks[4] — Total banking activities — Insurance activities[5] 91.3 Risk related to goodwill and other intangible assets[2] 8.7	Proportion of total for Desjardins Group 29.4 % Banking activities Credit risk 37.1 Market risk 2.3 Operational risk — Other risks[4] 54.6 Total banking activities 94.0 Insurance activities[5] — Risk related to goodwill and other intangible assets[2] 6.0
Risk-weighted assets	Credit risk[6] $ 91,811 Market risk 1,889 Operational risk 11,887	Credit risk $ 6,820 Market risk 41 Operational risk 255	Credit risk $ 4,363 Market risk — Operational risk —	Credit risk $ 15,789 Market risk 2,029 Operational risk 2,972
Risk profile	Desjardins Group is exposed to credit risk, market risk, operational risk and other risks, including in particular liquidity risk, interest rate risk, strategic risk, reputation risk and insurance risk.			

(1) Includes defined benefit plan risk, liquidity risk, interest rate risk, strategic risk, reputation risk and the diversification effect.

(2) The economic capital amount for the risk related to goodwill and other intangible assets is the carrying amount of these assets. It is considered that in a worst-case scenario for economic capital, the value of these assets would become nil.

(3) The different adjustments required to prepare the Combined Financial Statements as well as intersegment balance eliminations are classified in the asset amount of the Other category.

(4) Includes liquidity risk, interest rate risk, strategic risk and reputation risk. The risk related to other credit assets and deferred tax assets, defined benefit plan risk and the diversification effect are not allocated to business segments.

(5) For insurance operations, economic capital is the total amount of economic capital calculated for life and health and P&C insurance activities.

(6) Changes in certain methodology aspects resulted in a decrease in RWA in the fourth quarter of 2022.

Again this year, numerous efforts were made throughout Desjardins Group to reinforce the implementation of sound risk management practices and to align regulatory capital requirements more closely with risk exposure. Desjardins Group is continuing to invest in improving its tools and systems and aligning them with sound practices in the industry for the principal types of risk. In recent years, the Bank for International Settlements has issued new requirements (Basel III) for the global regulation of capital standards. These rules, in effect since January 1, 2013, have increased not only capital requirements but also risk management requirements. In addition to the changes made to the level and definition of eligible capital and the measurement of risk-weighted assets, Basel III has, under the second pillar, introduced new liquidity requirements and raised expectations for a number of management practices. Disclosure standards, which fall under the third pillar, have also been enhanced. Desjardins Group will continue its development by integrating these new regulatory requirements into its Integrated Risk Management Framework.

Additional information about capital management is presented in Section 3.2, "Capital management".

4.2.3 Credit risk

Credit risk is the risk of losses resulting from a borrower's, guarantor's, issuer's or counterparty's failure to honour its contractual obligations, whether or not such obligations appear on the Combined Balance Sheets.

Desjardins Group is exposed to credit risk first through its direct personal, business and government loans, which represented 61.4% of the combined assets on the balance sheet as at December 31, 2022, compared to 58.1% at the end of 2021. It is also exposed through various other commitments, including letters of credit and transactions involving derivative financial instruments as well as securities transactions.

The current macroeconomic environment, characterized by increased inflationary pressures, rapid interest rate hikes, significant supply chain disruptions, labour shortages and growing geopolitical tensions, among others, continues to give rise to uncertainty.

In the current context of inflation and continued restrictive monetary policy by the Bank of Canada, Desjardins Group supports its vulnerable members and clients who are more greatly affected by the increase in interest rates.

This situation also requires management to continue to make particularly complex judgments to estimate the allowance for expected credit losses. To take into account relevant risk factors related to the unprecedented macroeconomic environment that are not reflected in models, management continues to apply expert credit judgment in measuring the allowance for expected credit losses. Expert adjustments are thus applied to some credit risk measures and some forward-looking information that should not be as representative of an improvement in portfolio credit quality as what historical data used in the models would otherwise suggest.

The credit portfolio remains in good shape despite the economic uncertainty.

Credit risk management

Desjardins Group upholds its goal of effectively serving all its members and clients. To this end, it has developed robust distribution channels specialized by product and client. The units and components that make up these channels are considered centres of expertise and are accountable for their performance in their respective markets, including the management of credit risk. In this regard, they have latitude regarding the framework they use and the approval given and are also equipped with the corresponding management and monitoring tools and structures. To assist these units and components, Desjardins Group has set up centralized structures and procedures to ensure that its Integrated Risk Management Framework permits effective management that is also sound and prudent.

The Risk Management Executive Division has been structured so that it can effectively manage credit risk and provide credit approval, support, quantification and monitoring, and report on credit matters.

Framework

A set of policies, guidelines, standards, rules and practices govern all aspects of credit risk management at Desjardins Group. These frameworks define the responsibilities and powers of the parties involved, the limits imposed by risk appetite, the rules governing the assignment and administration of files, and the disclosure rules for Desjardins Group's exposure to credit risks.

All these frameworks govern Desjardins's credit risk management and control activities.

Assessment of regulatory capital

The AMF has authorized two credit risk assessment approaches to be included in calculating regulatory capital, namely the Standardized Approach and the Internal Ratings-Based Approach. The calculation of risk-weighted assets (RWA) is used to measure Desjardins Group's credit risk, market risk and operational risk. Desjardins has adopted the Internal Ratings-Based Approach for credit risk. In order to apply this method, Desjardins Group had to make internal estimates to calculate the probability of default (PD), loss given default (LGD) and exposure at default (EAD). Desjardins uses the Standardized Approach to measure the credit risk of certain exposures related to components of lesser importance, as well as asset classes that are not significant in terms of amount and perceived risk profile.

PD is the likelihood of a borrower defaulting on its obligations within a one-year time horizon. Internal rating models, estimated using logistic regressions, produce risk levels monthly for retail personal and business clients as well as for some non-retail client portfolios. For retail clientele, behavioural scoring models are used, with predictive features related, in particular, to borrower and account-specific features such as account age, loan size and delinquency. These models allow proactive management of the portfolio credit risk. However, for regulatory purposes, the PD from rating models is:

- adjusted slightly upward (prudential margin) to compensate for the historical volatility of PD;
- calibrated by groups of products, for behavioural scoring models applicable to retail clientele, according to the following drivers: residential mortgages, loans and lines of credit, point-of-sale financing and credit cards.

LGD measures the size of the possible economic loss in the event of the borrower's default. It is expressed as a percentage of EAD. LGD estimates reflect average economic losses by collateral or guarantee type input into an internal history. Economic losses include direct and indirect management costs as well as any recoveries adjusted for the delay between the time of default and the time of the transaction. LGD is adjusted upward to take into account the possible effects of an economic slowdown.

EAD is an estimate of the amount outstanding for a given exposure at the time of default. For on-balance sheet exposures, EAD is equal to the balance at the time of observation. For off-balance sheet exposures, EAD includes an estimate of the additional drawdowns that may occur between the time of observation and the default. Estimates of such possible additional drawdowns reflect the internal history of the average drawdown on revolving credit products between the observation date and the time of default. Finally, as in the case of LGD, EAD of off-balance sheet exposures is adjusted upward to take into account the possible effects of an economic slowdown.

Differences between the parameters used for accounting and regulatory capital purposes

Loss allowances for expected credit losses for accounting purposes according to IFRS 9 are based primarily on the parameters used to calculate regulatory capital under the Internal-Ratings Based Approach, namely PD, LGD and EAD. However, there are certain differences, and the main ones are presented in the table below:

	Regulatory capital	IFRS 9
PD	• Estimated using a long-term average for a full economic cycle. • Projected over the next 12 months. • Definition of default associated with an instrument for which payments have been past due for over 90 days, or certain other criteria.	• Estimated at a point in time for the next 12 months or for the lifetime of the instrument. • Based on past experience, current conditions and relevant forward-looking information. • Corresponds to the definition of default used for regulatory capital purposes.
LGD	• Based on losses that would be expected during an economic downturn. • Subject to certain regulatory floors. • Takes into account all direct and indirect recovery costs. • Discounted to account for the recovery period until default using the discount rate required for regulatory capital purposes.	• Based on past experience, current conditions and relevant forward-looking information. • Excessive conservatism and floors are excluded. • Takes into account only direct recovery costs. • Discounted to account for the recovery period until default using the initial effective interest rate.
EAD	• Corresponds to drawn amounts plus expected use of undrawn amounts before default.	• Based on the expected balance of amounts in default projected over the next 12 months or the lifetime of the instrument based on forward-looking expectations.
Discounting	• No discounting between the date of default and the reporting date.	• Discounting from the date of default to the reporting date using the initial effective interest rate.

More specifically, credit and counterparty risk exposure includes the following categories:
- Used exposure is the amount of funds invested or advanced to a member or client.
- Unused exposure is the amount of credit in loans or margins that has been authorized, but not yet used after credit conversion factors (CCF) have been applied.
- Repo-style transactions are contractual transactions between two parties, including a retrocession commitment at a pre-set price. Repo-style transactions include repurchase agreement transactions, reverse repurchase agreement transactions, and lending and borrowing of securities that are not outstanding with a central counterparty as well as these same transactions carried out with a non-qualifying central counterparty.
- Over-the-counter (OTC) derivative instruments refer to all OTC derivative financial instruments with different underlying instruments.
- Off-balance sheet exposures include guarantees, commitments, derivatives and other contractual agreements of which the total notional principal amount may not be recognized on the balance sheet.
- The net exposure is calculated after using credit risk mitigation (CRM) techniques, including collateral, guarantees and credit derivatives.

As at December 31, 2022, the EAD was $402.2 billion before using CRM techniques and $373.1 billion after using CRM techniques. The complete results of the credit risk assessment by type of exposure, asset class and the calculation methods of the Standardized Approach and the Basel III Internal Ratings-Based Approach as required by the AMF are found in Table 31, “Risk Exposure by Asset Class (Exposure at default [EAD])”.

Desjardins Group uses the Internal Ratings-Based Approach on 85.5% of exposure at default. Consequently, 14.5% of exposure at default is, for now, assessed using the Standardized Approach. Desjardins Group periodically reviews portfolios subject to the Standardized Approach to determine whether the Advanced Internal Ratings-Based Approach should be applied.

[1] After using credit risk mitigation (CRM) techniques, including collateral, guarantees and credit derivatives.

Credit granting

The Risk Management Executive Division assigns approval limits to the various units and components, including the caisse network. The units and components are primarily responsible for approving the files originating from them. However, the Risk Management Executive Division approves any commitments exceeding the approval limits assigned to them. Its approval responsibilities and the depth of the analyses required depend on product features as well as the complexity and extent of transaction risk.

The Risk Management Executive Division also sets commitment limits, namely the maximum commitment that can be granted to a borrower and the related entities. Risk-sharing arrangements can also be made with other financial institutions through banking syndicates.

Retail loans

Retail loan portfolios consist of residential mortgages, personal loans and lines of credit, point-of-sale financing and credit card loans. The Internal Ratings-Based Approach for credit risk is currently used for most of these portfolios.

In general, credit decisions are based on risk ratings generated using predictive credit scoring models. Credit adjudication and portfolio management methodologies are designed to ensure consistent granting of credit and early identification of problem loans. Desjardins Group's automated risk rating system measures the creditworthiness of each member and client on a monthly basis. This process ensures the quick, valid identification and management of problem loans.

The table below presents PD tranches in relation to risk levels.

Table 33 – Probabilities of default of retail clients by risk level*

Risk levels	PD tranches
Excellent	**0.00% to 0.14%**
Very low	**0.15% to 0.49%**
Low	**0.50% to 2.49%**
Moderate	**2.50% to 9.99%**
High	**10.00% to 99.99%**
Default	**100.00%**

Monitoring performance of credit risk assessment models using the Internal Ratings-Based Approach

For portfolios assessed using the Internal Ratings-Based Approach, the Risk Management Executive Division is responsible for the design, development and performance monitoring of models, in accordance with various guidelines on the subject.

Credit risk assessment models are developed and tested by specialized teams supported by the business units and related credit risk management units concerned by the model.

The performance of credit risk parameters is analyzed on an ongoing basis through back testing. This testing is performed on out-of-time and out-of-sample inputs and aims to assess parameter robustness and adequacy. Where a statistically significant overage is observed, prudential upward adjustments are made to reflect an unexpected trend in a segment in particular. These adjustments, allowing a more adequate risk assessment related to the transactions and borrowers, are validated and approved by the units responsible.

More specifically for PD, such back testing takes the form of various statistical tests to assess the following criteria:
- the model's discriminating power;
- the calibration of the model;
- the stability of model results.

Independent validations are also performed on credit risk assessment models. The most critical aspects to be validated are factors allowing appropriate risk classification by level, the adequate quantification of exposures and the use of assessment techniques taking external factors into consideration, such as economic conditions and the credit situation and, lastly, alignment with internal policies and regulatory provisions.

The model approval procedure and reporting are regulated by different bodies depending on the type and size of the approval in question. As a result, new models and significant changes to existing models are approved by the next higher committee than the one that is informed of the annual model performance monitoring results and authorizes any resulting recommendations.

Loans to businesses, sovereign borrowers and financial institutions

These loans include retail loans, loans to sovereign borrowers and public administrations, loans to the housing sector and loans to other businesses.

The following table presents the internal rating scale and the corresponding ratings of external agencies.

Table 34 – Probabilities of default of businesses, financial institutions and sovereign borrowers by risk level*

Risk level	Desjardins ratings	PD tranches			S&P ratings	Moody's ratings
		Businesses	Financial institutions	Sovereign brorrowers		
Acceptable risk						
Investment grade	[1 – 4]	**0.00% to 0.49%**	**0.00% to 0.26%**	**0.00% to 0.14%**	AAA – BBB-	Aaa – Baa3
Other than investment grade	[4.5 – 7]	**0.50% to 6.18%**	**0.27% to 5.47%**	**0.15% to 2.06%**	BB+ – B-	Ba1 – B3
Under watch	[7.5 – 9.75]	**6.19% to 99.99%**	**5.48% to 99.99%**	**2.07% to 99.99%**	CCC+ – CC	Caa1 – Ca
Default	10	**100.00%**	**100.00%**	**100.00%**	D	C

Retail clients, small residential rental properties and small commercial rental properties

Credit scoring systems based on proven statistics are used to assess the risk of credit activities involving these client bases.

These systems were designed using the behavioural history of borrowers with a profile or characteristics similar to those of the applicant in order to estimate the transaction risk.

Such systems are used for initial approval as well as for the monthly reassessment of borrowers' risk levels. Ongoing updates allow for proactive management of the credit risk of portfolios.

The performance of these systems is periodically analyzed, and adjustments are made regularly to measure transaction and borrower risk as adequately as possible. The units responsible for developing scoring systems and the underlying models ensure that adequate controls are set up to monitor their stability and performance.

Other segments

The granting of credit is based on the detailed analysis of a file. Each borrower's financial, market and management characteristics are analyzed using a credit risk assessment model designed from internal and external historical data, taking into account the size of the business, the special characteristics of the main industry in which the borrower operates, and the performance of comparable businesses.

In order to determine the model to be used, a segment is assigned to each borrower based on the borrower's main industry and some other features. A quantitative analysis based on financial data is supplemented by an assessment of qualitative factors by the person in charge of the file. Once this analysis is finished, each borrower is assigned a credit risk rating representing the borrower's risk level.

The use of scoring results has been expanded to other risk management and governance activities such as establishing analysis requirements and the required decision-making level, determining the different types of follow-up activities, as well as assessing and disclosing portfolio risk quality.

Credit risk mitigation

When a loan is granted to a member or client, Desjardins Group may obtain collateral to mitigate the borrower's credit risk. Such collateral is normally in the form of assets such as capital assets, receivables, inventory, equipment, securities (government securities, equities, etc.) or cash.

For some portfolios, programs offered by various organizations, in particular Canada Mortgage and Housing Corporation (CMHC) and *La Financière agricole du Québec*, are used in addition to customary collateral. As at December 31, 2022, guaranteed or insured loans represented 19.7% of Desjardins Group's total gross loans, compared to 20.6% at the end of 2021. As a result of these additional measures, the residual credit risk is minimal for loan portfolios with such collateral. In order for enhanced credit offered by a guarantor to be considered a credit risk mitigation technique, the guarantor must meet certain specific criteria to allow this.

Frameworks adapted to each type of collateral contain the requirements for appraising collateral, its legal validity and follow-up. The type of collateral as well as the value of the assets encumbered by such collateral are established on the basis of a credit risk assessment of the transaction and the borrower, depending in particular on the borrower's PD. Such an assessment is required whenever any new loan is granted in accordance with Desjardins Group's frameworks. When an outside professional, such as a chartered appraiser or an environmental assessment firm, is required to determine the value of the collateral, the selection of the professional and the mandate must comply with the necessary requirements in the frameworks. Considering that the collateral is used to recover all or part of the unpaid balance of a loan in the event of the borrower's default to make payment, the quality, the legal validity and the ease with which the collateral can be realized are determining factors in obtaining a loan.

In order to ensure that the value of the collateral remains adequate, it must be periodically updated. The frequency of reappraisals depends in particular on the risk level, the type of collateral or certain triggering events such as a deterioration in the borrower's financial position or the sale of an asset held as collateral. The decision-making level is responsible for approving the updated value of the collateral, if applicable.

During the year ended December 31, 2022, no significant changes were made to the credit risk mitigation policies and no significant changes occurred in the quality of assets held as collateral.

Loan debt relief

In managing loan portfolios, Desjardins Group may, for financial or legal reasons, change the original terms and conditions of a loan granted to a borrower experiencing financial difficulty and therefore prevented from discharging his obligations. Such changes may include an interest rate adjustment, the deferral or extension of principal and interest payments, or the waiver of a tranche of the principal or interest.

File monitoring and management of higher risk files

Credit practices govern the monitoring of loans. Files are reassessed on a regular basis. Requirements regarding review frequency and depth increase with a higher PD or the size of potential losses on receivables. The officer in charge of the file monitors high risk loans using various intervention methods. A positioning, which must be authorized by the appropriate decision-making level, is required to be performed for files with irregularities or increased risk as well as for files in default.

The unit in charge of the financing is primarily responsible for monitoring files and for managing higher risks. However, certain tasks or files may be outsourced to the Federation's intervention units specializing in turnarounds or recovery. Supervision reports produced and submitted periodically to the appropriate bodies make it possible to monitor the position of high-risk borrowers as well as changes in the corrective measures put in place. In addition, a report accounting for credit activities, covering changes in credit quality and financial issues, is submitted quarterly to the management of the component concerned.

Default situations

Identification of default

In accordance with the AMF guideline on adequacy of capital base standards, the following two criteria are used to identify a default situation:

- Quantitative criterion: A borrower's payments are past due by more than 90 days.
- Qualitative criterion: Desjardins Group believes that a borrower is unlikely to repay his debt in full unless the appropriate action is taken, such as realization on a collateral or guarantee, if any.

These criteria are applicable to all clients.

Impact of default

The impact of a default consists of associating the identified default on exposure with all the same borrower's commitments as well as with other entities in its borrower group. Such impacts vary according to the type of client base.

For individuals, barring exceptions, Desjardins Group does not pass on the default.

For retail businesses, small residential rental properties and small commercial rental properties, the default is passed on only to the borrower's exposures to commitments with the same entity within the scope of Desjardins Group. For the application of this criterion, the caisse network is considered one and the same entity.

For non-retail businesses, public administrations, financial institutions and sovereign borrowers, the default is entirely passed on through all the borrower's commitments in the scope of Desjardins Group. The default may also be passed on to other entities forming part of its borrower group according to a case-by-case analysis.

Removing default

When default is recognized in terms of the quantitative criterion, it may be removed immediately for clients that are retail businesses, small residential rental properties, small commercial rental properties and individuals, subject to certain conditions stipulated in the credit risk guidelines. If not, it is generally removed within a minimum of 3 to 6 months if certain conditions set out in the credit risk guidelines are met.

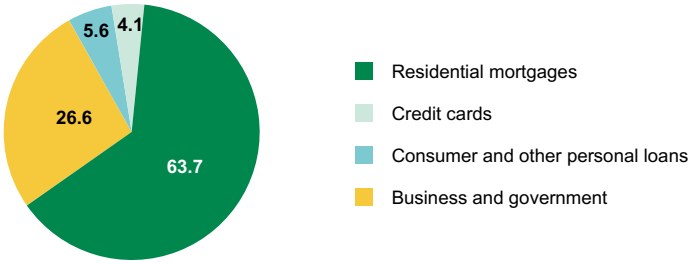

Monitoring of portfolio and reporting

The Risk Management Executive Division oversees the management of all risks to which the organization is exposed, including credit risks. The operating methods require ongoing monitoring of the credit risks to which Desjardins Group is exposed, as well as periodic reporting on portfolio quality to the appropriate bodies.

Breakdown and quality of loan portfolio

The following chart presents the distribution of loans and acceptances by borrower category. Over half of the portfolio consists of residential mortgages, for which, statistically, the loss rate is lower.

Breakdown of loans and acceptances
As at December 31, 2022
(as a percentage)

Loans by borrower category and by industry are presented in the table below. As at December 31, 2022, the main sectors of the business loan portfolio were real estate, agriculture and construction. They accounted for 52.9% of the business loan portfolio, which amounted to $63.3 billion. As at December 31, 2021, the main industries were real estate, agriculture and construction.

(1) Including loans to governments.

Loans by geographic distribution are presented in the following table. Desjardins Group's operations are highly concentrated in Québec. Therefore, as at December 31, 2022, the loans granted by Desjardins to members and clients in Québec accounted for 90.3% of the total loan portfolio, compared to 91.2% as at December 31, 2021.

Table 36 – Loans by geographic distribution
As at December 31

The following table presents the aging of gross loans that are past due but not credit-impaired.

Table 37 – Gross loans past due but no credit-impaired[1]
As at December 31

	2022			2021[2]		
(in millions of dollars)	31 to 90 days	91 to or more	Total	31 to 90 days	91 to or more	Total
Residential mortgages	**$ 139**	**$ 20**	**$ 159**	$ 95	$ 23	$ 118
Consumer, credit card and other personal loans	**134**	**38**	**172**	124	39	163
Business and government	**32**	**64**	**96**	20	40	60
	$ 305	**$ 122**	**$ 427**	$ 239	$ 102	$ 341

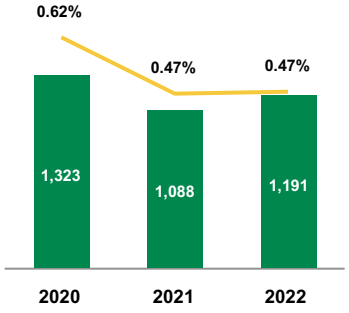

(1) Loans less than 31 days past due are not presented because, in general, they are not an indication that a borrower will not meet payment obligations.
(2) Data as at December 31, 2021 were restated to conform to the current year's presentation.

As at December 31, 2022, according to Note 8, "Loans and allowance for credit losses" to the Combined Financial Statements, the allowance for expected credit losses on loans stood at $1,035 million and the allowance for expected credit losses on off-balance sheet items was $53 million, for a total of $1,088 million, up $46 million compared to December 31, 2021.

This increase was essentially due to the growth in outstanding loans since December 31, 2021 and a certain deterioration in the credit quality of the credit card portfolios and, to a lesser extent, of the business loan portfolios. The impact of the improvement in the macroeconomic outlook that occurred in early 2022 was offset by the impact of the deterioration that arose in the second half of 2022. For more information on the methodology and assumptions used to estimate the loss allowance for expected credit losses, refer to Note 2, "Significant accounting policies", and Note 8, "Loans and allowance for credit losses", to the Combined Financial Statements.

Gross credit-impaired loans outstanding are the loans included in Stage 3 of the impairment model. The ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio, was 0.47% as at December 31, 2022, unchanged from December 31, 2021. The allowance for credit losses on credit-impaired loans totalled $311 million as at December 31, 2022, for a provisioning rate on credit-impaired loans of 26.1%.

Gross credit-impaired loans and gross credit-impaired loan ratios
(in millions of dollars and as a percentage)

The following tables present the gross credit-impaired loans by Desjardins Group borrower category and the change in the gross credit-impaired loan balance.

Table 38 – Gross credit-impaired loans by borrower category
As at December 31

(in millions of dollars and as a percentage)	2022					2021		2020	
	Gross carrying amount			Allowance for credit losses on credit-impaired loans	Net credit-impaired loans	Gross credit-impaired loans	Net credit-impaired loans	Gross credit-impaired loans	Net credit-impaired loans
	Gross loans and acceptances	Gross credit-impaired loans[1]							
Residential mortgages	$ 159,682	$ 245	0.15 %	$ 16	$ 229	$ 209	$ 189	$ 374	$ 345
Consumer, credit and other personal loans	24,381	170	0.70	91	79	148	68	212	86
Business and government	66,837	776	1.16	204	572	731	552	737	556
Total	$ 250,900	$ 1,191	0.47 %	$ 311	$ 880	$ 1,088	$ 809	$ 1,323	$ 987

(1) For more information on the gross credit-impaired loans/gross loans and acceptances ratio, which is a supplemental financial measure, see the Glossary on pages 113 to 120.

Table 39 – Change in gross credit-impaired loans
For the years ended December 31

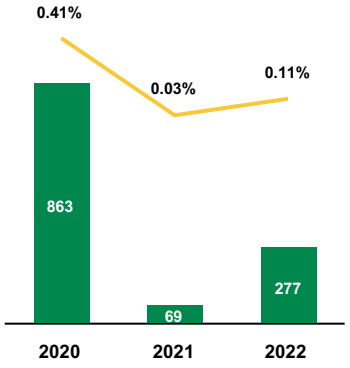

(in millions of dollars)	2022	2021	2020
Gross credit-impaired loans at the beginning loans	**$ 1,088**	$ 1,323	$ 1,142
Gross loans that became credit-impaired during the year	**2,411**	2,412	2,408
Loans returned to unimpaired status	**(2,083)**	(2,467)	(1,870)
Write-offs and recoveries	**(226)**	(216)	(396)
Other changes	**1**	36	39
Gross credit-impaired loans at the end of the year	**$ 1,191**	$ 1,088	$ 1,323

Desjardins Group's provision for credit losses totalled $277 million for 2022, up $208 million compared to 2021. The provision for 2022 was affected in particular by an increase in outstandings and a certain deterioration in the credit quality of the credit card portfolios and, to a lesser extent, of the business loan portfolios. The provision for 2021 primarily reflected the impact of an improved macroeconomic outlook and better borrower credit quality. Net write-offs in 2022 and 2021 remained historically low for all the portfolios.

The credit loss provisioning rate was 0.11% at the end of fiscal 2022, compared to 0.03% recorded as at December 31, 2021.

Additional information about the credit risk related to the recognition and measurement of the allowance for credit losses is presented in Note 2, "Significant accounting policies", and Note 8, "Loans and allowance for credit losses", to the Combined Financial Statements.

Provision for credit losses and credit loss provisioning rate[1]
(in millions of dollars and as a percentage)

(1) For more information on supplemental financial measures, see the Glossary on pages 113 to 120.

The following tables are presented to meet the disclosure requirements of the *Residential Hypothecary Lending Guideline* issued by the AMF. They present the residential mortgage portfolio of the caisse network in Québec and the Caisse Desjardins Ontario Credit Union Inc. by product type and geographic area, as well as the corresponding loan-to-value ratios.

(3) Home equity lines of credit including related amortized loans and consumer lines of credit secured by a property with up to four units.

(4) Represents the geographic areas of Canada other than Québec and Ontario.

The following table presents Desjardins Group's residential mortgage portfolio by remaining amortization period.

Table 42 – Remaining amortization period for residential mortgage loans[1]
Caisse network in Québec and Caisse Desjardins Ontario Credit Union Inc.[2]
As at December 31

(in millions of dollars in gross loans and as a percentage of the total by remaining amortization category)	Total amortized loans					
	2022		2021		2020	
0 to 10 years	**$ 3,608**	**2.9 %**	$ 3,615	3.1 %	$ 3,293	3.1 %
10 to 20 years	**23,226**	**18.9**	22,472	19.6	20,024	19.1
20 to 25 years	**83,592**	**68.1**	78,666	68.5	71,785	68.6
25 to 30 years	**10,820**	**8.8**	9,010	7.8	8,187	7.8
30 to 35 years	**1,050**	**0.9**	895	0.8	1,108	1.1
35 years and more	**442**	**0.4**	244	0.2	282	0.3
All amortization periods	**$ 122,738**	**100.0 %**	$ 114,902	100.0 %	$ 104,679	100.0 %

(1) The variable rate mortgage loans of the caisse network represented 29.1% as at December 31, 2022 (24.8% as at December 31, 2021 and 22.2% as at December 31, 2020).

(2) Caisse Desjardins Ontario Credit Union Inc. is not legally subject to the AMF rules but is subject instead to the FSRAO rules.

Counterparty and issuer risk

Counterparty and issuer risk is a credit risk relative to different types of securities, derivative financial instrument and securities lending transactions.

Desjardins Group is exposed to counterparty and issuer risk through the matching transactions of its traditional banking activities, its trading activities and the investment portfolios of its insurance companies. According to its classification, each counterparty or issuer is assigned a risk rating based on internal models or the ratings issued by rating agencies (DBRS, Fitch, Moody's and Standard & Poor's) recognized by the AMF and the OSFI. The Risk Management Executive Division establishes an exposure limit for a counterparty or issuer after measuring its risk rating. Desjardins Group's exposure limits are established on the basis of its risk appetite framework and its Tier 1A capital. These amounts are then allocated to various components based on their needs. Limits may also apply to certain financial instruments, if considered relevant.

A large proportion of Desjardins Group's risk exposure is to the different levels of government in Canada, Québec public and parapublic entities and major Canadian banks. For most of these counterparties and issuers, the credit rating is A- or higher. Apart from its U.S. sovereign debt holdings and its commitments to major international banks, Desjardins Group's exposure to foreign entities is low.

In its derivative financial instrument and securities lending transactions, which include repurchase agreements, reverse repurchase agreements and securities borrowing and lending, Desjardins Group is exposed to counterparty credit risk.

Desjardins Group uses derivative financial instruments primarily for asset and liability management purposes. Derivative financial instruments are contracts whose value is based on an underlying asset, such as interest rates, exchange rates or financial indices. The vast majority of Desjardins Group's derivative financial instruments are traded over the counter with a counterparty and include forward exchange contracts, currency swaps, interest rate swaps, credit default swaps, total return swaps, forward rate agreements, and currency, interest rate and stock index options. Other instruments are exchange-traded contracts, consisting mainly of futures and swaps traded through a clearing house. They are standard contracts executed on established stock exchanges or well-capitalized clearing houses for which the counterparty risk is very low. The proportion of contracts via clearing houses increased in 2022 because existing and forthcoming regulations are definitely in favour of clearing.

The credit risk associated with derivative financial instruments traded over the counter refers to the risk that a counterparty will fail to honour its contractual obligations toward Desjardins Group at a time when the fair value of the instrument is positive for Desjardins. This risk normally represents a small fraction of the notional amount. It is quantified using two measurements, namely replacement cost and the credit risk equivalent. Replacement cost refers to the current replacement cost of all contracts with a positive fair value. Credit risk equivalent is equal to the sum of this replacement cost and the potential credit exposure. Desjardins Group limits counterparty risk exposure by entering into master agreements called International Swaps and Derivatives Association (ISDA) agreements, which define the terms and conditions for the transactions. These agreements provide for netting to determine the net exposure in the event of default. In addition, a Credit Support Annex can be added to the master agreement in order to request the counterparties to pay or secure the current market value of the positions when such value exceeds a certain threshold. The value of these different measures and the impact of the master netting agreements is presented in Note 21, "Derivative financial instruments and hedging activities", to the Combined Financial Statements.

Desjardins Group also limits its risk by doing business with counterparties that have a high credit rating. Note 21, "Derivative financial instruments and hedging activities", to the Combined Financial Statements presents derivative financial instruments by credit risk rating and type of counterparty. Based on replacement cost, this note indicates that substantially all of Desjardins Group's counterparties have credit ratings ranging from AAA to A-.

Securities lending transactions are governed by standard industry agreements. To mitigate its credit risk exposure, Desjardins Group also requires a percentage of collateralization (a pledge) on these transactions. Furthermore, some of these transactions are settled through a clearing house.

Desjardins Group accepts from its counterparties only financial collateral that complies with the eligibility criteria set out in its policies. These criteria allow for the timely realization of collateral, if necessary, in the event of default. The types of collateral received and pledged by Desjardins Group are mainly cash and government securities.

Additional information about credit risk is presented in Note 6, "Offsetting financial assets and liabilities", Note 21, "Derivative financial instruments and hedging activities", and Note 29, "Commitments, guarantees and contingent liabilities", to the Combined Financial Statements.

4.2.4 Market risk

Market risk refers to the risk of loss arising from changes in the fair value of financial instruments as a result of fluctuations in the parameters affecting this value, in particular, interest rates, exchange rates, credit spreads and their volatility.

Desjardins Group is exposed to market risk through its trading activities, which result primarily from short-term transactions conducted with the intention of profiting from current price movements or to provide arbitrage revenue. Desjardins Group is also exposed to market risk through its non-trading activities, which group together mainly asset/liability management transactions in the course of its traditional banking activities as well as investment portfolios related to its insurance operations. Desjardins Group and its components have adopted policies that set out the principles, limits and procedures to use in managing market risk.

Governance

Desjardins Group's components are primarily structured into different legal entities to deliver products and services that can be distributed to Desjardins Group members and clients. These legal entities manage financial instruments exposed to market risk and are subject to different regulatory environments such as the banking, securities brokerage, wealth management, life and health insurance and property and casualty insurance industries. The board of directors of these entities delegate to various committees the responsibility of setting up systems and procedures to establish measures adapted to their operations and regulatory environments. These measures, together with the appropriate follow-up procedures, are added to their respective policies and guidelines. The function of the Risk Management Executive Division is to monitor these measures and ensure compliance with the said policies. The main measures used and their follow-up processes are described in the following pages.

Link between market risk and the Combined Balance Sheets

The following table presents the link between the main Combined Balance Sheet data and the positions included in its trading activities and non-trading activities. The principal market risks associated with non-trading activities are also indicated in the table.

Table 43 – Link between market risk and the Combined Balance Sheets
As at December 31, 2022

(in millions of dollars)	Combined Balance Sheets	Exposed to market risk		Not exposed to market risk	Principal risks associated with non-trading activities
		Trading activities[1][2]	Non-trading activities[3]		
Assets					
Cash and deposits with financial institutions	$ 8,913	$ —	$ 8,913	$ —	Interest rate
Securities

(1) Trading activity positions for which the risk measure is VaR and SVaR.

(2) The amounts reported in trading activities reflect intercompany eliminations.

(3) Positions mainly related to non-trading banking activities and insurance activities.

Management of market risk related to trading activities - Value at risk

The market risk of trading portfolios is managed on a daily basis under specific frameworks, which specify the risk factors to be measured and the limit for each of these factors as well as the total. Tolerance limits are also provided for various stress tests. Compliance with these limits is monitored daily, and a market risk dashboard is produced on a daily basis and sent to senior management. Any limit that is exceeded is immediately analyzed and appropriate action is taken.

The main tool used to measure this risk is “Value at Risk” (VaR). VaR is an estimate of the potential loss over a certain time interval at a given confidence level. A Monte Carlo VaR is calculated daily on the trading portfolios, using a 99% confidence level and a holding horizon of one day (holding horizon scaled up to 10 days for the purpose of regulatory capital calculations). It is therefore reasonable to expect a loss exceeding the VaR figure once every 100 days. The calculation of VaR is based on historical data for a one-year interval.

In addition to aggregate VaR, Desjardins Group calculates an aggregate stressed VaR (SVaR). It is calculated in the same way as aggregate VaR, except for the use of historical data. Therefore, instead of using the interval of the past year, the aggregate SVaR takes into account the historical data for a crisis period of one year, which includes the 2008 financial crisis. However, a ratio of aggregate SVaR to VaR is calculated on a daily basis to ensure that the stress period selected is still adequate. In addition, this stress period is reviewed periodically, as well as stress testing.

The incremental risk charge (IRC) supplements the VaR and SVaR measures and represents an estimate of default and migration risks of unsecuritized products held in the trading portfolio, exposed to interest rate risk, and measured over a one-year horizon at a 99.9% confidence level.

The aggregate VaR and the aggregate SVaR for Desjardins Group's trading activities by risk category as well as the incremental risk charge (IRC) are presented in the table below. Equity price risk, foreign exchange risk, interest rate risk and specific interest rate risk are the four market risk categories to which Desjardins Group is exposed. These risk factors are taken into account in measuring the market risk of the trading portfolio. They are reflected in the VaR table presented below. The definition of a trading portfolio meets the various criteria defined in the base capital adequacy guideline issued by the AMF.

Table 44 – Market risk measures for the trading portfolio*

(in millions of dollars)	As at December 31, 2022	For the year ended December 31, 2022			As at December 31, 2021	For the year ended December 31, 2021		
		Average	High	Low		Average	High	Low
Equities	**$ 0.8**	**$ 0.6**	**$ 0.9**	**$ 0.3**	$ 0.4	$ 0.5	$ 1.2	$ 0.1
Foreign exchange	**0.9**	**0.7**	**3.0**	**0.05**	0.2	0.6	3.3	0.1
Interest rate	**6.6**	**4.4**	**7.8**	**2.2**	3.4	4.0	7.2	2.2
Specific interest rate risk[1]	**0.9**	**2.3**	**6.0**	**0.7**	3.1	2.1	4.5	1.2
Diversification effect[2]	**(2.1)**	**(3.4)**	**N/A[3]**	**N/A[3]**	(3.7)	(3.0)	N/A[3]	N/A[3]
Aggregate VaR	**$ 7.1**	**$ 4.6**	**$ 9.0**	**$ 2.4**	$ 3.4	$ 4.2	$ 8.0	$ 2.4
Aggregate SVaR	**$ 11.3**	**$ 12.0**	**$ 25.2**	**$ 6.0**	$ 7.7	$ 12.7	$ 25.3	$ 6.6
Incremental risk charge (IRC)	**$ 57.1**	**$ 69.3**	**$ 97.2**	**$ 49.7**	$ 72.5	$ 71.7	$ 108.9	$ 50.0

(1) Specific risk is the risk directly related to the issuer of a financial security, independent of market events. A portfolio approach is used to distinguish the specific risk from the general market risk. This approach consists of creating a sub-portfolio that contains the positions involving the specific risk of the issuer, such as provinces, municipalities and companies, and a sub-portfolio that contains the positions considered to be without issuer risk, such as governments in the local currency.

(2) Refers to the risk reduction related to diversification, namely the difference between the sum of the VaR of the various market risks and the aggregate VaR.

(3) The highs and lows of the various types of market risk can occur on different dates. It is not relevant to calculate a diversification effect.

The average of the trading portfolio's aggregate VaR was $4.6 million for 2022, up $0.4 million compared to 2021. As for the average of the aggregate SVaR, it was $12.0 million for 2022, down $0.7 million compared to 2021. The average of the incremental risk charge was $69.3 million, down $2.4 million compared to 2021.

It should be noted that the volatility observed during fiscal 2022 had an impact on market data and, consequently, on the VaR results as the model uses historical data for one year.

Aggregate VaR and aggregate SVaR are appropriate measures for a trading portfolio, but they must be interpreted by taking into account certain limits, in particular the following:

- These measures do not allow future losses to be predicted if the actual market fluctuations differ markedly from those used to do the calculations;
- These measures are used to determine the potential losses for a one-day holding period, and not the losses on positions that cannot be liquidated or hedged during this one-day period;
- These measures do not provide information on potential losses beyond the selected confidence level of 99%.

Given these limits, the process of monitoring trading activities using VaR is supplemented by stress testing and by establishing limits in this regard.

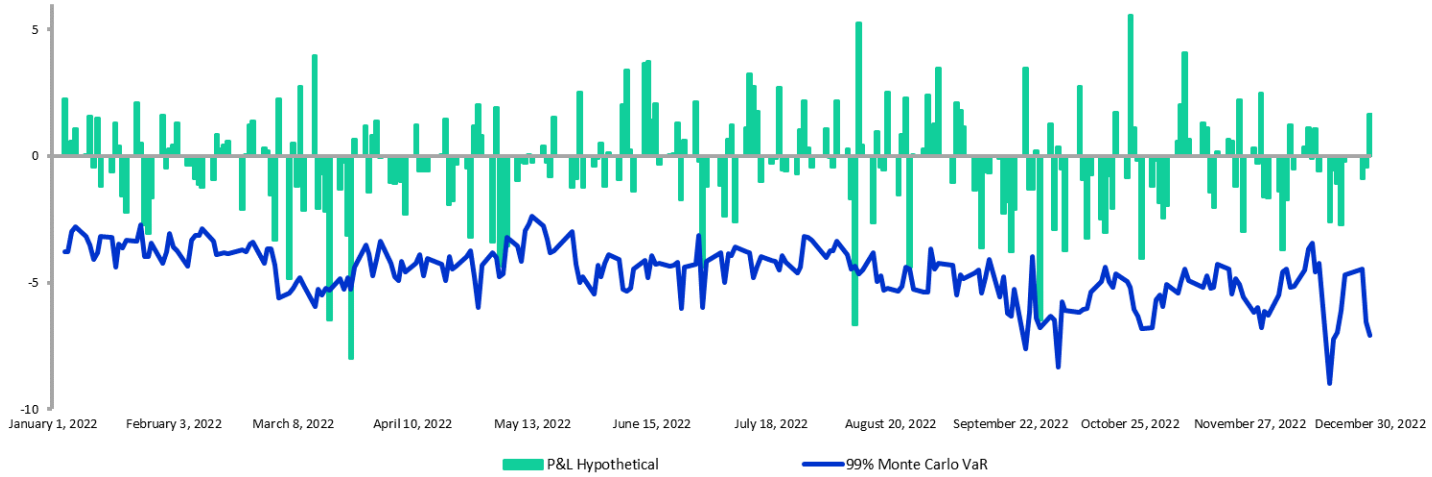

Back testing

Back testing, which is a daily comparison of the VaR with the profits and losses (P&L) on portfolios, is conducted to validate the VaR model used by ensuring that results correspond statistically to those of the VaR model. In addition, an independent modelling validation unit works on the model every year.

Desjardins Group performs back testing daily, applying a hypothetical P&L and an actual P&L to its trading portfolios. The hypothetical P&L is calculated by determining the difference in value resulting from changes in market conditions between two consecutive days. The portfolio mix between these two days remains static.

The following chart presents changes in VaR for trading activities as well as hypothetical P&L related to these activities for 2022. During fiscal 2022, four hypothetical P&L overages compared to VaR were observed for Desjardins Group. However, no actual P&L overages compared to VaR were observed for Desjardins Group.

VaR compared to hypothetical P&L for trading activities
(in millions of dollars)

Stress testing

Certain events that are considered highly unlikely and that could have a significant impact on trading portfolios may occur from time to time. These events are at the tail-end of the distribution and are the result of extreme situations. Use of a stress-testing program is required to assess the impact of these potential situations.

The stress-testing program used for trading portfolios includes historical, hypothetical and sensitivity scenarios based, for instance, on events such as 9/11 or the 2008 credit crisis. Using such stress testing, changes can be monitored in the fair value of positions held depending on various scenarios. Most stress-testing is predictive. For a given stress test, shocks are applied to certain risk factors (interest rates, exchange rates, commodities) and the effects of these shocks are passed on to all the risk factors, taking historical correlations into account. The running of each stress test is considered to be independent of the others. In addition, certain stress testing is subject to limit tracking. Stress-testing results are analyzed and reported daily using a dashboard, together with VaR calculations, in order to detect vulnerability to such events. The stress-testing program is reviewed periodically to ensure that it is kept current.

Structural interest rate risk management

Desjardins Group is exposed to structural interest rate risk, which represents the potential impact of interest rate fluctuations on net interest income and the economic value of equity. This risk is the main component of market risk for Desjardins Group's traditional banking activities other than trading, such as accepting deposits and granting loans, as well as for its securities portfolios used for long-term investment purposes and as liquidity reserves.

Interest rate sensitivity is based on the earlier of the repricing or the maturity date of the assets, liabilities and derivative financial instruments used to manage structural interest rate risk. The situation presented reflects the position only on the date indicated and can change significantly in subsequent years depending on the preferences of Desjardins Group members and clients, and the application of policies on structural interest rate risk management.

Some Combined Balance Sheet items are considered non-interest-rate-sensitive instruments, including investments in equities, non-performing loans, non-interest-bearing deposits, non-maturity deposits with an interest rate not referenced to a specific rate (such as the prime rate), and equity. As dictated in its policies, Desjardins Group's management practices are based on prudent assumptions with respect to the maturity profile used in its models to determine the interest rate sensitivity of such instruments.

In addition to the total sensitivity gap, the main structural interest rate risk factors are:
- the trend in interest rate level and volatility;
- the changes in the shape of the interest rate curve;
- member and client behaviour in their choice of products;
- the financial intermediation margin;
- the optionality of the various financial products offered.

In order to mitigate risk factors, sound and prudent management is applied to optimize net interest income while reducing the negative incidence of interest rate movements. The established policies describe the principles, limits and procedures that apply to structural interest rate risk management. Simulations are used to measure the effect of different variables on changes in net interest income and the economic value of equity. These policies specify the structural interest rate risk factors, the risk measures selected, the risk tolerance levels and the management limits as well as the procedures in the event that limits are exceeded. Structural interest rate risk is assessed at the required frequency according to portfolio volatility (daily, monthly and quarterly).

The assumptions used in the simulations are based on an analysis of historical data and on the effects of various interest rate environments on changes in such data. These assumptions concern changes in the structure of assets and liabilities, including modelling for non-maturity deposits and equity, in member and client behaviour, and in pricing. Desjardins Group's Asset/Liability Committee (ALCO) is responsible for analyzing and approving the global matching strategy on a monthly basis while respecting the parameters defined in structural interest rate risk management policies.

The table below presents the potential impact before income taxes, with regard to structural interest rate risk management associated with banking activities, of a sudden and sustained 100-basis-point increase and decrease in interest rates on net interest income and the economic value of equity for Desjardins Group, assuming the balance sheet is stable and management takes no measures to mitigate risk. The impact related to insurance activities is presented in Note 1 of this table.

Table 45 – Interest rate sensitivity (before income taxes)[1]*
As at December 31

	2022		2021	
(in millions of dollars)	**Net interest income[2]**	**Economic value of equity[3]**	Net interest income[2]	Economic value of equity[3]
Impact of a 100-basis-point increase in interest rates	**$ (100)**	**$ (402)**	$ 17	$ (160)
Impact of a 100-basis-point decrease in interest rates (25-basis-point decrease as at December 31, 2021)[4]	**108**	**382**	(1)	37

(1) Interest rate sensitivity related to insurance activities is not reflected in the amounts above. For these activities, a 100-basis-point increase in interest rates would result in a $45 million decrease in the economic value of equity before taxes as at December 31, 2022, and a $218 million decrease as at December 31, 2021. A 100-basis-point decrease in interest rates would result in a $65 million increase in the economic value of equity before taxes as at December 31, 2022. A 25-basis-point decrease in interest rates would result in an increase of $53 million in the economic value of equity before taxes as at December 31, 2021. Additional information is provided in the "Interest rate risk management" section of Note 17, "Insurance contract liabilities", to the Combined Financial Statements.

(2) Represents the interest rate sensitivity of net interest income for the next 12 months.

(3) Represents the sensitivity of the present value of assets, liabilities and off-balance sheet instruments.

(4) The results of the impact of a decrease in interest rates take into consideration the use of a floor to avoid negative interest rates. Due to the current interest level, the impact of a decrease in interest rates was calculated using a 100-basis-point decrease as at December 31, 2022 compared to a 25-basis-point decrease as at December 31, 2021.

Foreign exchange risk management

Foreign exchange risk corresponds to the potential loss arising from a change in exchange rates liabilities denominated in the same currency.

Desjardins Group and its components are exposed to foreign exchange risk, particularly with respect to the U.S. dollar and the euro, as a result of their intermediation activities with members and clients, and their financing and investment activities. Desjardins Group frameworks set foreign exchange risk exposure limits, which are monitored by the Risk Management Executive Division and by the insurance components for their respective operations. To ensure that this risk is properly controlled, Desjardins Group and its components also use, among other things, derivative financial instruments such as forward exchange contracts and currency swaps. Desjardins Group's residual exposure to this risk is low because it reduces its foreign exchange risk by using derivative financial instruments.

Price risk management

In its non-trading activities, Desjardins Group is exposed to price risk, related mainly to components that operate in insurance and their investment portfolios. Price risk is the risk of potential loss resulting from a change in the fair value of assets (shares, commodities, real estate properties, index-based assets) but not resulting from a change in interest rates or foreign exchange rates, or in the credit quality of a counterparty.

Management of price risk related to real estate activities

The insurance components may be exposed to changes in the real estate market through the properties they own, whose fair value may fluctuate. They manage this risk using policies that set out diversification limits such as geographic limits and limits for real estate property categories. Each real estate investment is subject to an annual professional appraisal to determine its fair value in accordance with the standards prescribed by regulatory authorities.

Management of price risk related to stock markets

The insurance components may also be exposed to price risk related to stock markets, particularly through the equity securities and derivative financial instruments they hold as well as the minimum guarantees provided under segregated fund contracts, whose value is affected by market fluctuations. They manage this risk using the different limits set in policies and a hedging program to mitigate the effect of market volatility. For additional information, see Note 17, "Insurance contract liabilities", to the Combined Financial Statements.

4.2.5 Liquidity risk

Liquidity risk refers to Desjardins Group's capacity to raise the necessary funds (by increasing liabilities or converting assets) to meet a financial obligation, whether or not it appears on the Combined Balance Sheets.

Desjardins Group manages liquidity risk in order to ensure that it has timely and cost-effective access to the funds needed to meet its financial obligations as they become due, in both routine and crisis situations. Managing this risk involves maintaining a sufficient level of liquid securities, ensuring stable and diversified sources of financing, monitoring indicators and having a contingency plan in the event of a liquidity crisis.

Liquidity risk management is a key component of the overall risk management strategy. Desjardins Group has established policies describing the principles, limits, risk appetite thresholds as well as the procedures that apply to liquidity risk management. These policies are reviewed on a regular basis to ensure that they are appropriate for the operating environment and prevailing market conditions. They are also updated to reflect regulatory requirements and sound liquidity risk management practices. Given that the insurance companies are subject to specific regulatory requirements, they manage their liquidity risks based on their own needs while following Desjardins Group guidelines. The securities held by these components are not taken into account in the valuation of Desjardins Group's liquidity reserves.

Desjardins Group's Treasury ensures stable and diversified sources of institutional funding by type, source and maturity. It uses a wide range of financial products and borrowing programs on various markets for its funding needs. Through these operations, the funding needs of Desjardins Group components can be satisfied under conditions comparable to those offered on financial markets.

Furthermore, Desjardins Group issues covered bonds and securitizes CHMC-insured loans in the course of its normal operations. Desjardins Group is also eligible for the Bank of Canada's various intervention programs and loan facilities for Emergency Lending Assistance advances.

The implementation of Basel III strengthens international minimum liquidity requirements through the application of a liquidity coverage ratio (LCR), a net stable funding ratio (NSFR) and the use of Net Cumulative Cash Flow (NCCF). Under its liquidity risk management policy, Desjardins Group already produces these two ratios as well as the NCCF, and reports them on a regular basis to the AMF.

The AMF announced that it has revised its base capital adequacy guideline. The changes, which will come into effect during fiscal 2023, deal mainly with the requirements related to the NCCF supervisory tool to improve the risk sensitivity of the metric. The changes to this guideline do not have a material impact on Desjardins Group's liquidity practices.

Liquidity risk measurement and monitoring

Desjardins Group determines its liquidity needs by reviewing its current operations and evaluating its future forecasts for balance sheet growth and institutional funding conditions. Various analyses are used to determine the actual liquidity levels of assets and the stability of liabilities based on observed behaviours or contractual maturities. Maintaining liquidity reserves of high-quality assets is required to offset potential cash outflows following a disruption in financial markets, or events that would restrict its access to funding or result in a serious run on deposits.

The minimum liquid asset levels to be maintained by Desjardins Group are specifically prescribed by policies. Daily management of these securities and the reserve level to be maintained is centralized at Desjardins Group Treasury and is subject to monitoring by the Risk Management function under the supervision of the Finance and Risk Management Committee. Securities eligible for liquidity reserves must meet high security and negotiability criteria and provide assurance of their adequacy in the event of a severe liquidity crisis. The securities held are largely Canadian government securities.

In addition to complying with regulatory ratios, a Desjardins-wide stress testing program has been set up. This program incorporates the concepts put forward by the Basel Committee on Banking Supervision (BCBS) in *Basel III: International Framework for Liquidity Risk Measurement, Standards and Monitoring*. The scenarios make it possible to:

- measure the magnitude of potential cash outflows in a crisis situation;
- implement liquidity ratios and levels to be maintained across Desjardins Group;
- assess the potential marginal cost of such events, depending on the type, severity and level of the crisis.

Liquid assets

The following tables present a summary of Desjardins Group's liquid assets, which do not include assets held by the insurance subsidiaries because these assets are committed to covering insurance liabilities and not the liquidity needs of Desjardins Group's other components. Liquid assets constitute Desjardins Group's primary liquidity reserve for all its operations. Encumbered liquid assets mainly include liquid assets that are pledged as collateral or cannot be used because of regulatory, legal, operational or any other restrictions.

Table 46 – Liquid assets[1]

As at December 31, 2022

(in millions of dollars)	Liquid assets held by Desjardins Group	Securities held as collateral - Securities financing and derivative trading	Total liquid assets	Encumbered liquid assets	Unencumbered liquid assets
Cash and deposit with financial institutions	**$ 7,751**	**$ —**	**$ 7,751**	**$ 589**	**$ 7,162**

Total	**$ 52,510**	$ 48,631

(1) Excluding assets held by insurance subsidiaries. Substantially all unencumbered liquid assets presented in this table are issued in Canadian dollars.

Liquidity risk indicators

The purpose of monitoring liquidity indicators daily is to quickly identify a lack of liquidity, whether potential or real, within Desjardins Group and on financial markets. Warning levels subject to an escalation process are established for each of these indicators. If one or more indicators trigger a warning level, the Desjardins Group Finance and Risk Management Committee is immediately alerted. This committee would also act as a crisis committee should the contingency plan be put into action.

This plan lists the sources of liquidity available in exceptional situations. In addition, it lays down the decision-making and information process. The aim of the plan is to allow quick and effective intervention in order to minimize disruptions caused by sudden changes in member and client behaviour and potential disruptions in capital markets or economic conditions. Furthermore, in the event of a crisis extensive enough to question Desjardins Group's creditworthiness, a living will has been prepared to enable the crisis committee to draw on a broader range of liquidity sources to deal with the situation.

Encumbered assets

In the normal course of its operations, Desjardins Group pledges securities, loans and other assets as collateral, mainly with regard to financing operations, participation in clearing and payments systems and operations related to provisions for claims and adjustment expenses. The following table presents, for all assets on the Combined Balance Sheets and securities held as collateral, those that are encumbered as well as those that may be pledged as collateral as part of financing or other transactions.

Table 48 – Encumbered assets
As at December 31, 2022

(in millions of dollars)	Combined Balance Sheet assets	Securities held as collateral	Total assets	Breakdown of total assets			
				Encumbered assets		Unencumbered assets	
				Pledged as collateral	Other[1]	Available as collateral	Other[2]

Total	$ 407,109	$ 23,686	$ 430,795	$ 69,218	$ 1,134	$ 111,532	$ 248,911

As at December 31, 2021

(in millions of dollars)	Combined Balance Sheet assets	Securities held as collateral	Total assets	Breakdown of total assets			
				Encumbered assets		Unencumbered assets	
				Pledged as collateral	Other[1]	Available as collateral	Other[2]
Cash and deposits with financial institutions	$ 16,328	$ —	$ 16,328	$ —	$ 535	$ 14,715	$ 1,078
Securities	93,099	17,968	111,067	46,436	1,315	29,482	33,834
Securities borrowed or purchased under reverse repurchase agreements	12,019	—	12,019	—	—	—	12,019
Net loans and acceptances[3]	230,779	—	230,779	26,809	—	63,449	140,521
Segregated fund net assets	22,804	—	22,804	—	—	—	22,804
Other assets	22,056	—	22,056	—	—	—	22,056
Total	$ 397,085	$ 17,968	$ 415,053	$ 73,245	$ 1,850	$ 107,646	$ 232,312

(1) Assets that cannot be used for legal or other reasons.
(2) "Other" unencumbered assets include those of the insurance companies as well as assets that in management's opinion would not be immediately available for collateral or financing purposes in their current form. Some of these other assets could eventually be pledged to the central bank.
(3) Comparative data have been adjusted to conform to the current year's presentation because of a refinement in methodology.

Liquidity coverage ratio

The liquidity coverage ratio (LCR) was developed by the BCBS to promote the short-term resilience of the liquidity risk profile of financial institutions and was integrated into the AMF's *Liquidity Adequacy Guideline*. The LCR is the ratio of a stock of unencumbered high-quality liquid assets (HQLA) to net cash outflows over the next 30 days in the event of an acute liquidity stress scenario.

Under the AMF's *Liquidity Adequacy Guideline*, HQLA eligible for the purpose of calculating the LCR consist of assets that can be converted quickly into cash at little or no loss of value on financial markets. For Desjardins Group, such high-quality liquid assets are comprised essentially of cash and highly rated securities issued or guaranteed by various levels of government. The guideline also prescribes weightings for cash inflows and outflows.

Desjardins Group's average LCR was 140% for the quarter ended December 31, 2022, compared to 136% for the previous quarter. The AMF stipulates that this ratio is not to be less than the minimum requirements of 100% in the absence of stressed conditions. This ratio is proactively managed by Desjardins Group's Treasury, and an appropriate level of high-quality liquid assets is maintained for adequate coverage of the theoretical cash outflows associated with the standardized crisis scenario within the Basel III framework. Desjardins Group's main sources of theoretical cash outflows are a potential serious run on deposits by members of Desjardins caisses and a sudden drying-up of the short-term institutional funding sources used on a day-to-day basis by Desjardins Group.

The following table presents quantitative information regarding the LCR, based on the template recommended by the disclosure requirements of the AMF's *Liquidity Adequacy Guideline*.

Table 49 – Liquidity coverage ratio[1]

(in millions of dollars and as a percentage)	For the quarter ended December 31, 2022		For the quarter ended September 30, 2022
	Total non-weighted[2] value (average[4])	Total weighted[3] value (average[4])	Total weighted[3] value (average[4])
High-quality liquid assets			
Total high-quality liquid assets	N/A	$ 44,768	$ 43,784
Cash outflows			
Retail deposits and small business deposits, including:	$ 104,349	6,576	6,801
Stable deposits	55,114	1,653	1,728
Less stable deposits	49,235	4,923	5,073
Unsecured wholesale funding, including:	39,939	19,383	18,927
Operational deposits (all counterparties) and deposits in cooperative bank networks	11,639	2,760	3,308
Non-operational deposits (all counterparties)	19,782	8,105	7,794
Unsecured debt	8,518	8,518	7,825
Secured wholesale funding	N/A	83	84
Additional requirements, including:	18,063	3,591	4,055
Outflows related to exposures on derivatives and other collateral required	1,290	1,172	1,262
Outflows related to funding loss on debt products	182	182	752
Credit and liquidity facilities	16,591	2,237	2,041
Other contractual funding liabilities	3,699	2,094	2,317
Other contingent funding liabilities	89,056	2,320	2,254
Total cash outflows	N/A	$ 34,047	$ 34,438
Cash inflows			
Secured loans (e.g. reverse repurchase agreements)	$ 7,308	$ 451	$ 523
Inflows related to completely effective exposures	3,209	1,604	1,549
Other cash inflows	48	48	6
Total cash inflows	$ 10,565	$ 2,103	$ 2,078

	Total adjusted value[5]	Total adjusted value[5]
Total high-quality liquid assets	$ 44,768	$ 43,784
Total net cash outflows	31,944	32,360
Liquidity coverage ratio	140 %	136 %

(1) Excluding the insurance subsidiaries.
(2) The non-weighted values of cash inflows and outflows represent unpaid balances either maturing or falling due and payable within 30 days.
(3) Weighted values are calculated after the "haircuts" prescribed for high quality liquid assets and the rates prescribed for cash inflows and outflows have been applied.
(4) The ratio is presented based on the average of daily data for the quarter.
(5) The total adjusted value takes into account, if applicable, the caps prescribed by the AMF for high-quality liquid assets and cash inflows.

Net stable funding ratio

The net stable funding ratio (NSFR) was developed by the BCBS to promote the medium- and long-term resilience of the liquidity risk profile of financial institutions and was integrated into the AMF's *Liquidity Adequacy Guideline*. The NSFR requires financial institutions to maintain a stable funding and capitalization profile in relation to the composition of their assets and off-balance sheet activities. The NSFR limits overreliance on short-term wholesale funding, encourages better assessment of funding risk across all on- and off-balance sheet items, and promotes funding stability. This ratio presents the amount of available stable funding (ASF) relative to the amount of required stable funding (RSF).

The amount of ASF designates the portion of capital and liabilities considered stable over a one-year horizon. Liabilities with the longest contractual maturities are the most significant contributors to the increase in the ratio. The amount of RSF is measured based on the broad characteristics of the liquidity risk profile of assets and off-balance sheet exposures. The amounts of ASF and RSF are weighted to reflect the degree of stability of liabilities and the liquidity of assets. According to the AMF's *Liquidity Adequacy Guideline*, this ratio should be equal to at least 100% on an on-going basis.

The table below presents quantitative information regarding the NSFR, based on the template recommended by the disclosure requirements of the AMF's *Liquidity Adequacy Guideline*.

Table 50 – Net Stable Funding Ratio[1]

	As at December 31, 2022					As at September 30, 2022
	Unweighted value by residual maturity					
(in millions of dollars and as a percentage)	No maturity	< 6 months	From 6 months to < 1 year	≥ 1 year	Weighted value	Weighted value

Off-balance sheet items	N/A	—	108,363	—	2,709	2,546
Total RSF	N/A	N/A	N/A	N/A	$ 184,666	$ 182,010
Net Stable Funding Ratio	N/A	N/A	N/A	N/A	126 %	126 %

(1) Excluding the insurance subsidiaries.
(2) The amounts in these lines include the categories of residual maturities of less than 6 months, 6 months to less than 1 year and 1 year or more.

Sources of financing

Core funding, which includes capital, long-term liabilities and a diversified deposit portfolio, is the foundation upon which Desjardins Group's liquidity position depends. The solid base of deposits from individuals combined with wholesale funding, diversified in terms of both the programs used as well as the staggering of contractual maturities, allows Desjardins Group to maintain high regulatory liquidity ratios while ensuring their stability. For more information on contractual maturities, see the table "Contractual maturities of on-balance sheet items and off-balance sheet commitments" in Note 30, "Financial instrument risk management" to the Combined Financial Statements. Total deposits, including wholesale funding, presented on the Combined Balance Sheets amounted to $259.8 billion as at December 31, 2022, up $21.5 billion since December 31, 2021. Additional information on deposits is presented in Section 3.1, "Balance sheet management", of this MD&A.

Funding programs and strategies

As Desjardins Group's Treasurer, the Federation meets the needs of the organization's members and clients. Its first priority is to implement appropriate strategies to identify, measure and manage risks, and these strategies are regulated by policies. In 2022, the Federation succeeded in maintaining a liquidity level sufficient to meet Desjardins Group's needs through its strict treasury policy, solid institutional funding and the contribution of the caisse network. Short-term wholesale funding is used to finance very liquid assets while long-term wholesale funding is mainly used to finance less liquid assets and to support reserves of liquid assets.

In order to secure long-term funding at the lowest cost on the market, the Federation maintains an active presence in the federally-guaranteed mortgage loan securitization market under the *National Housing Act* (NHA) Mortgage-Backed Securities Program. In addition, to ensure stable funding, it diversifies its sources from institutional markets. It therefore resorts to the capital markets when conditions are favourable, and makes public and private issues of term notes on Canadian, U.S. and European markets, as required.

The main programs currently used by the Federation are as follows:

Table 51 – Main financing programs

Financing program	Maximum authorized amount
Medium-term notes (Canadian)[1]	**$10 billion**
Covered bonds (multi-currency)[1]	**$26 billion**
Short-term notes (multi-currency)	**€5 billion**
Short-term notes (U.S.)	**US$20 billion**
Medium-term and subordinated notes (multi-currency)[1]	**€10 billion**
NVCC subordinated notes (Canadian)[1]	**$5 billion**
Medium-term notes (Australian)[1]	**A$3 billion**

[1] Sustainable bonds may be issued under these funding programs in compliance with the Desjardins Sustainable Bond Framework.

The following table presents the remaining terms to maturity of wholesale funding.

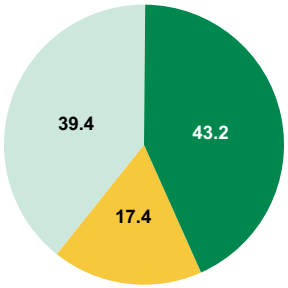

Table 52 – Remaining contractual term to maturity of wholesale funding
As at December 31

	2022								2021
(in millions of dollars)	Less than 1 month	1 to 3 months	3 to 6 months	6 to 12 months	Total - Less than 1 year	1 to 2 years	Over 2 years	Total	Total

Desjardins Group's total wholesale funding presented in the table above was carried out by the Federation. Total wholesale funding increased by $11.1 billion compared to December 31, 2021. This increase was primarily due to the increase in commercial paper, covered bonds and medium-term notes. Desjardins Group does not foresee any event, commitment or requirement that could have a major impact on its ability to raise funds through wholesale funding or its members' deposits.

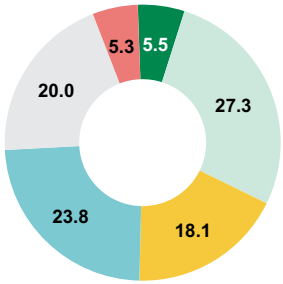

In addition, Desjardins Group diversifies its funding sources in order to limit its reliance on a single currency. The “Wholesale funding by currency” table presents a breakdown of borrowings on markets and subordinated notes by currency. These funds are obtained primarily through short- and medium-term notes, mortgage loan securitization, covered bonds and subordinated notes.

Moreover, the Federation participated in new issues under the NHA Mortgage-Backed Securities Program for a total amount of $2.5 billion in 2022. During the same period and at the beginning of 2023, the Federation also made the following issues:

- On February 8, 2022, an issue totalling €750 million under its legislative covered bond program;
- On May 19, 2022, an issue totalling $1.0 billion, subject to the bail-in regime, under its Canadian medium-term note program;
- On August 23, 2022, an issue totalling US$1,250 million, subject to the bail-in regime, under its multi-currency medium-term note program;
- On August 23, 2022, an issue of $1.0 billion in notes eligible as Non-Viability Contingent Capital under its Canadian NVCC subordinated notes program;
- On August 31, 2022, an issue totalling €750 million under its legislative covered bond program.
- On October 14, 2022, an issue totalling US$1.0 billion under its legislative covered bond program.
- On November 16, 2022, an issue totalling $1.0 billion, subject to the bail-in regime, under its Canadian medium-term note program;
- On November 28, 2022, an issue totalling €750 million under its legislative covered bond program;
- On January 23, 2023, an issue totalling US$600 million, subject to the bail-in regime, under its multi-currency medium-term note program;
- On January 31, 2023, an issue totalling 325 million Swiss francs under its legislative covered bond program.

Outstanding notes issued under the Federation’s medium-term funding programs amounted to $34.0 billion as at December 31, 2022, compared to $29.3 billion as at December 31, 2021. The outstanding notes for these issues are presented under “Deposits – Business and government” on the Combined Balance Sheets.

Overall, these transactions made it possible to adequately meet the liquidity needs of Desjardins Group, to better diversify its sources of financing and to further extend their average term.

Credit rating of securities issued and outstanding

Desjardins Group’s credit ratings affect its ability to access sources of funding on capital markets, as well as the conditions of such funding. They are also a factor considered in certain Desjardins Group transactions involving counterparties.

Rating agencies assign credit ratings and related ratings outlooks based on their own proprietary methodology, which includes a number of analytical criteria, including factors that are not under Desjardins Group’s control. The rating agencies evaluate Desjardins Group primarily on a combined basis and recognize its capitalization, its consistent financial performance, its significant market shares in Québec and the quality of its assets. Consequently, the credit ratings of the Federation, a reporting issuer, is backed by Desjardins Group’s financial strength.

The Federation has first-class credit ratings that are among the best of the major Canadian and international banking institutions.

Highlights of decisions by the rating agencies concerning Desjardins Group's instruments:

- On July 14, 2022, DBRS affirmed the ratings of the instruments issued by the Federation while maintaining the outlook as stable. This reflects Desjardins Group's strong presence in Québec, with leading market shares for deposits, residential mortgages and insurance.
- On September 19, 2022, Standard & Poor's affirmed the ratings of the instruments issued by the Federation while maintaining the outlook as stable. This assessment reflects the strength of Desjardins Group's balance sheet.
- On November 30, 2022, Fitch affirmed the ratings of the instruments issued by the Federation while maintaining the outlook as stable.
- On December 12, 2022, Moody's affirmed the ratings of the instruments issued by the Federation while maintaining the outlook as stable. This assessment reflects the strong capitalization level of Desjardins Group, and the stability of its income thanks to its retail banking operations.

A list of the various credit ratings assigned to the instruments of the *Fédération des caisses Desjardins du Québec* are found in the following table.

(1) Represents Moody's long-term deposit rating and counterparty risk rating, S&P's issuer credit rating, DBRS's long-term deposit rating, and Fitch's long-term issuer default rating, long-term deposit rating and derivative counterparty rating.
(2) Includes senior medium- and long-term debt issued before March 31, 2019, as well as senior medium- and long-term debt issued on or after this date and which is excluded from the recapitalization (bail-in) regime applicable to Desjardins Group.
(3) Includes senior medium- and long-term debt issued on or after March 31, 2019, which qualifies for the recapitalization (bail-in) regime applicable to Desjardins Group.

Desjardins Group regularly monitors the additional level of obligations its counterparties would require in the event of a credit rating downgrade for the Federation. This monitoring enables Desjardins Group to assess the impact of such a downgrade on its funding capabilities and its ability to perform transactions in the normal course of its operations as well as ensure that it has the additional liquid assets and collateral necessary to meet its obligations. Currently, Desjardins Group is not obliged to provide additional collateral in the event of its credit rating being lowered three notches by one or several credit rating agencies.

4.2.6 Operational risk

Operational risk is the risk of inadequacy or failure attributable to processes, people, internal systems or external events and resulting in losses or failure to achieve objectives, and takes into consideration the impact of failures to achieve the strategic objectives of the component concerned or Desjardins Group, if applicable.

Operational risk is inherent to all of Desjardins Group's activities, including management and control practices in other risk areas (credit, market, liquidity, etc.) as well as activities carried out by a third party. This risk may, in particular, lead to losses mainly resulting from theft, fraud, damage to tangible assets, non-compliance with legislation or regulations, systems failures, unauthorized access to computer systems, cyber threats, or problems or errors in process management. To maintain this risk at an acceptable level, an operational risk management framework has been developed and deployed throughout the organization. The framework includes the usual practices for sound management of operations and is based on the three lines of defence model, clearly defining the roles and responsibilities in risk and operations management.

Operational risk management framework

The purpose of the operational risk management framework is to identify, measure, mitigate and monitor operational risk as well as make interventions and disclosures for operational risk in accordance with operational risk appetite and the frameworks adopted by the Board of Directors. It is supported by guidelines setting out operational risk management foundations. At the same time, the operational risk management framework connects with the other areas of risk.

The operational risk management framework is reviewed annually to ensure its adequacy and its relevance based on Desjardins Group's risk profile and developments in industry practices.

Governance

Risk management governance emphasizes accountability and effective risk oversight. Operational risk is governed by frameworks, which are reviewed periodically to ensure consistency with the Integrated Risk Management Framework approved by the Board of Directors.

Reporting is done on a regular basis to the committees that provide risk management oversight so that their members can assess Desjardins Group's operational risk exposure.

Information technology and security risk

An information technology (IT) risk refers to the risk related to the inability to maintain (management/performance) and/or to modernize infrastructure, applications or technology data bases. A security risk is the risk of theft, loss, leak or disclosure of confidential information/data (loss of confidentiality) through an intentional or unintentional act (internal threat, error, negligence or omission), including cyber-attacks.

Technology is a crucial element in the development and maintenance of Desjardins Group's operations. A failure or disruption of IT systems may have a serious impact on its members and clients, as well as on its operations. These two risks are at the very core of risk management activities. Modernization programs to ensure that disruptions to its critical assets and environments are prevented or contained and that preventive and reactive security controls are added to address internal and external threats make up our core and ongoing activities. In order to effectively monitor these risks, scenario analysis, analysis of major changes and monitoring of operational events are examples of activities allowing the identification of these risks and their management within the organization. Governance that follows industry sound practices is implemented to monitor and contain these risks at set acceptable tolerance levels. The Desjardins Group Security Office protects members and clients, their assets and their personal information.

Third party risk

A third party risk refers to the risk of loss or incidents as a result of outsourcing, including reliance on the third parties involved. A third party is an entity with which the organization does business, including suppliers and their subcontractors, trade partners, affiliates, brokers, distributors, resellers and agents.

Through its operational risk management program, Desjardins Group monitors its third parties with proactive mechanisms to ensure efficient management of third party risks and to comply with changing regulatory requirements. In addition, each major acquisition is subject to enhanced governance to continuously ensure that its performance is aligned with the needs of the organization.

Business continuity risk

Business continuity risk refers to the risk related to the interruption of one or several activities having an impact on the ability to adequately serve members and clients or the ability to operate normally. It includes the risk of incidents resulting from a dysfunction in information systems, networks and telecommunication, or from business interruptions.

Business incident analysis can identify the organization's priority activities, based on an assessment of interruption events, considering operational, reputation, regulatory and financial aspects. Considering the changing nature of any organization and the implied impact on its level of preparation, an update is necessary at least every year, or whenever there is a significant change, by adding change management and continuous improvement principles. The business continuity approach ensures that continuity solutions are identified, implemented and validated to maintain an acceptable and approved service level, considering the priority activities and the continuity requirements needed according to the major consequences recognized. Exercises are planned at regular intervals to check the relevance and performance of the identified solutions in addition to ensuring that personnel are prepared.

Model risk

Model risk is a potential negative consequence of making a business decision based on the outputs of a poorly designed, used or managed model. This risk may arise, among others, from inappropriate assumptions or methodological choices, improper data, inadequate implementation or deployment, incorrect use or insufficient maintenance.

A model is a method used to produce, based on assumptions and using inputs, a forecast, a classification or a proxy for unavailable information with an inherent uncertainty.

To ensure sound management of Desjardins Group's model risk and support the unit monitoring risk models and strategies in its role, activities such as the design, performance monitoring and validation of models for credit risk, market risk, economic capital and stress testing are subject to guidelines that specify the roles and responsibilities of the various parties involved in these activities.

The validation group, which is independent from the units responsible for developing models and the end-user units, is in charge of running the appropriate validation program based on the model's importance. For the most important models, the program consists of a series of points to be validated for evaluating the model on design methodology, including assumptions, reliability and data quality. The program also includes an assessment of the possibility of automatic replication of certain results obtained by the modelling teams and the review of some aspects affecting implementation of the models. In addition, for models used to calculate regulatory capital, validation aims to assess compliance with applicable regulatory requirements. For models of lesser importance, the program has a smaller number of validation points. A model's importance level also dictates how often the model's performance will be validated during its useful life. Even though the governance structure overseeing design and performance monitoring activities includes controls that mitigate the risk that inadequate models are deployed and used, independent validation is the main measure mitigating this risk.

It should be noted that, over the 2021-2024 strategic planning horizon, Desjardins Group has undertaken to increase model risk governance in order to broaden its scope to all models used in Desjardins Group's operations. This initiative will also be an opportunity for a Desjardins-wide roll-out of the model risk management practices with which all major financial institutions in Canada must comply. In fact, the importance of using quantitative models to support the business decision-making process in a number of areas of operation, and not only in the area of risk management, justifies that Desjardins develop its model risk governance and management practices. In that regard, new Desjardins-wide frameworks were adopted in 2022 and will be gradually operationalized by 2024 to cover all models.

Approaches to identifying, measuring and monitoring operational risk

With respect to the operational risk management framework, the following table illustrates the tools and methods used to identify, measure and monitor operational risk.

	Description
Risk and control identification and measurement	A standard inventory of operational risks to which Desjardins Group is exposed has been prepared and is used as the basis for determining the most significant operational risks and evaluating the effectiveness of the mitigation measures in place to reduce them. The risk and control assessments, carried out on a periodic basis, can be related to projects, products, systems, processes and activities, as well as to strategic initiatives and important new products. Consideration of various internal and external factors (losses, audit findings, etc.) is an integral part of these assessments. When the results indicate operational risk exposures that exceed the established tolerance level, action plans are prepared to reduce exposure to an acceptable level.
Collection and analysis of internal events	The collection of internal event data is carried out to list and quantify events according to predetermined levels. Internal events are indexed in a database. Through analysis, causes are better understood, trends are determined, and corrective measures are taken when necessary. Contingent liabilities, including the impact of litigation, are presented in Note 29, “Commitments, guarantees and contingent liabilities”, to the Combined Financial Statements.
Risk indicators	To monitor their risk profile and track developments in it, the business segments and support functions establish operational risk indicators to help them proactively monitor any increase in their exposure to the most significant risks and act accordingly when the tolerance level is reached.
Risk disclosure	The nature and levels of operational risks are frequently disclosed to senior management as well as the various committees overseeing risk management. This promotes an effective management of operational risk that enables taking action quickly when required and establish the various priorities based on the importance of the risks involved.
Scenario analysis	Scenario analysis consists of assessing events that could lead to a major operational risk, but have little likelihood of occurring (e.g. earthquake). The analysis makes it possible to identify vulnerabilities to such risks within the organization in order to apply the required mitigation measures.
Risk-sharing and insurance programs	Desjardins Group has developed insurance programs to give itself additional protection against material operational losses. These programs offer protection based on the business segment’s needs, the institution’s risk tolerance, as well as emerging risks on the market.
Calculation of capital exposed to operational risk	Since second quarter of 2017, Desjardins Group has used the Standardized Approach to calculate its operational risk in the form of regulatory capital exposed to operational risk. It should be noted that a revised version of the base capital adequacy guideline is effective as of January 1, 2023. Desjardins Group will calculate regulatory capital for operational risk in accordance with the Basel III methodology following this update.

4.2.7 Insurance risk

Desjardins Group is exposed to insurance risk in the course of its life and health and property and casualty insurance operations.

Life and health insurance risk refers to the risk that the amount and timing of benefits and expenses payable on life insurance, health insurance or annuity contract products differ from those expected.

Insurance risk for the life and health insurance subsidiaries is composed of the following elements:
- Mortality risk: Financial consequence resulting from amounts payable on life insurance products that differ from the projections, due to mortality;
- Longevity risk: Financial consequence resulting from amounts payable on annuity contracts that differ from the projections, due to the survival of annuitants;
- Morbidity/disability risk: Financial consequence resulting from amounts payable on health insurance products that differ from the projections, due to the state of health of insureds;
- Policyholder behaviour risk: Financial consequence resulting from life or health policyholder or annuitant behaviour in keeping a policy or contract in force or exercising any clauses specified in policies or contracts;
- Expense risk: Financial consequence resulting from the administrative expenses incurred to service life or health insurance products or annuity contracts that differ from the projections.

Property and casualty insurance risk is the risk that benefits payable on property and casualty insurance products differ from the amounts estimated when designing, pricing or measuring actuarial reserves.

Property and casualty insurance risk is composed of the following elements:
- Underwriting risk: Financial consequence resulting from an increase in the frequency or severity of losses (e.g., fire, theft, water damage, vandalism) covered by the insurance products offered, which mainly cover physical damage to property, bodily injury as well as liability of insureds (civil, legal, etc.);
- Catastrophe risk: Financial consequence resulting from an increase in the frequency or severity of catastrophes covered by insurance policies;
- Reserve risk: Financial consequence resulting from inadequate provisions or actuarial reserves.

Identifying, assessing and mitigating the risks associated with new insurance products and changes made to existing ones are part of a thorough product approval process. All risks at the insurance subsidiaries, including insurance risk, are managed in accordance with their Integrated Risk Management Policy, in line with Desjardins Group’s Integrated Risk Management Framework. The process of logging risks under this policy makes it possible to identify all risks likely to affect the subsidiary concerned that should be the subject of governance and a framework, as well as to maintain a register of all such risks and assess them using the appropriate method.

The subsidiaries are responsible for the risk they generate, including insurance risk. Each one has its own specific governance structure. Insurance risk is governed by several policies that clearly set out the roles and responsibilities of the different parties concerned so that they can comply with the various regulatory guidelines. The subsidiaries also have a robust infrastructure that includes the appropriate tools for ensuring the availability, integrity, completeness and aggregation of all the data necessary for sound insurance risk management.

Insurance risk arises from potential errors in projections concerning the many factors used to set premiums, including future returns on investments, underwriting experience in terms of loss experience, mortality and morbidity, and administrative expenses. These projections are essentially based on actuarial assumptions that must be consistent with the standards of practice in effect in Canada. The insurance subsidiaries also adopt strict pricing standards and policies and perform spot checks to compare their projections with actual results. Insurance product design and pricing are reviewed on a regular basis. Some product pricing may be adjusted depending on the accuracy of projections.

In addition, the subsidiaries limit their losses through reinsurance treaties that vary based on the nature of the operations. The property and casualty insurance subsidiaries also have additional protection with respect to large-scale catastrophic events.

To reduce reinsurance risk, the insurance subsidiaries do business with many reinsurers that meet financial strength criteria, most of which are governed by the same regulatory authorities as the subsidiaries. Such reinsurance treaties do not release the subsidiaries from their obligations toward their policyholders but do mitigate the risks to which they are exposed.

The subsidiaries comply with the standards for sound management practices established by the regulatory bodies that govern them and test their financial soundness using unfavourable scenarios and measure the effect of such scenarios on their capitalization ratio. These tests include stress testing, including the standardized acute stress scenarios required from time to time by regulators, as well as an examination of financial soundness. Test results showed that capital was adequate in each case.

Each insurance sector subsidiary provides independent reports and assessments of its exposure to different risks to its Board of Directors as well as to the appropriate levels at Desjardins Group. They report in particular on changes in material risks and the effectiveness of the procedures in place to mitigate them, the results of risk analyses, and the main assumptions and findings from the stress testing.

The activities specific to the insurance subsidiaries expose them, in addition to insurance risk, to other types of risk, notably the risks identified in Note 17, “Insurance contract liabilities”, to the Combined Financial Statements, as well as other risk factors identified in Section 4.1, “Risk factors that could impact future results”.

4.2.8 Strategic risk

Strategic risk refers to the risk of loss attributable to the occurrence of external and internal events or the implementation of inappropriate strategies that may prevent Desjardins Group from achieving its strategic priorities.

It is first up to senior management and the Board of Directors to address, define and monitor developments in the strategic orientations of Desjardins Group according to its risk appetite and the consultation processes specific to Desjardins. Events that could compromise the achievement of Desjardins Group’s strategic objectives are systematically and periodically monitored by the Board of Directors and senior management. Business segments and support functions identify and periodically assess events and risks that could prevent the achievement of strategic objectives, and report thereon to the appropriate bodies.

Organizational development plans are assessed in light of the organization’s risk appetite framework to ensure that such initiatives are in line with the organization’s strategic plan. Furthermore, this plan is updated annually to take market developments into account, in particular major trends in the industry and action taken by competitors.

4.2.9 Reputation risk

Reputation risk is the risk that a negative perception by the stakeholders, whether or not justified, of Desjardins Group’s practices, actions or lack of action could have an unfavourable impact on its income and equity, and the trust that it inspires.

A reputation is of critical importance, and reputation risk cannot be managed separately from other risks. Therefore, managing reputation risk in all its business segments is a constant concern for Desjardins Group. In this regard, Desjardins Group seeks to ensure that all employees are constantly aware of the potential repercussions of their actions on Desjardins’s reputation and image. Desjardins Group considers it essential to foster a proactive approach to risk management in which integrity and ethical conduct are fundamental values.

Desjardins Group has defined a management framework, and roles and responsibilities with regard to reputation risk. This framework is in addition to various processes already in place to identify, measure and govern this risk, such as the previously mentioned operational risk management initiatives, the regulatory compliance program, ethical requirements, and reputation risk assessment as part of new initiatives and the introduction of new products. All these aspects aim to promote sound reputation risk management. In addition, the President and Chief Executive Officer of Desjardins Group is the main person responsible for the culture change process. The aim of this process is to effect a profound change in behaviour in order to always work in the best interests of members and clients. This process also helps manage reputation risks.

4.2.10 Environmental or social risk

Environmental or social risk results from an environmental or social event or issue in connection with Desjardins Group's operations or its financing, investment or insurance activities, which could result in financial losses or harm its reputation. This risk may also materialize indirectly through business relations with other entities whose operations could involve Environmental, Social or Governance (ESG) issues.

Environmental or social risk includes climate change risks, including both the negative impact that they may cause to the organization through its vulnerabilities and those of its members and clients and the negative impact the organization could have on them. In a context where the impact of climate change risks is widely recognized, Desjardins Group understands the importance of better identifying the various aspects of those risks (transition, physical or reputation) and measuring their current and future impact. The environmental or social risk also includes biodiversity loss risk.

Desjardins Group has long recognized the importance of social and environmental issues, and sees this as a key part of its values and business decision-making processes. In the interest of transparency, Desjardins Group publishes its Social and Cooperative Responsibility Report, prepared in accordance with the guidelines of the Global Reporting Initiative (GRI), and also responds to the Climate Change Questionnaire provided by CDP and produces a report entitled "Climate action at Desjardins". These two public disclosures address the risks and opportunities associated with climate change and are aligned with the recommendations of the Task Force on Climate-related Financial Disclosures (TCFD). Here follows a discussion of key aspects of these disclosures.

Governance

Climate change risks are overseen by the Board of Directors, helped by the Desjardins Group Management Committee, which presents to it recommendations regarding ESG risk management strategies and frameworks, including climate change and biodiversity loss risks.

In fulfilling its responsibilities, the Desjardins Group Management Committee relies on the Desjardins Group Finance and Risk Management Committee and the Environmental, Social and Governance Steering Committee. The latter recommends ESG orientations (including climate change and biodiversity loss risks) and monitors them. It is also responsible for ensuring that the organization is cohesive and that ESG factors are better taken into account in business decision-making processes.

The Climate Change Risk Committee, which is a sub-committee of the Desjardins Group Finance and Risk Management Committee, aims to obtain a cross-sector view of Desjardins Group's exposure to climate change risks and monitor them. It ensures that a harmonized approach is maintained throughout the various Desjardins Group components and legal entities, in particular by implementing policies and guidelines, clarifying the principles on which climate change risk management is based throughout the organization as well as the roles and responsibilities. It also ensures that the strategic orientations and initiatives that are proposed contribute effectively and efficiently to managing climate change risks.

Desjardins Group continues to implement its climate-related orientations. It also works to build a better understanding of these cross-sector risks within its various bodies and the organization while monitoring the best practices regarding these topics.

Strategy

Sustainable development is a priority for Desjardins Group. It has developed a sustainable development policy for all its operations, incorporating orientations for the development of a sustainable and responsible economy as part of its risk appetite framework. It is also a signatory to several international United Nations frameworks for integrating ESG criteria into its business model: the Principles for Responsible Investment (since 2009), the Principles for Responsible Insurance (2019) and the Responsible Banking Principles (2019).

In 2021, Desjardins Group stated its net zero 2040 ambition for its extended operations and its financing and capital investment activities in three key sectors (energy, transportation and real estate). This ambition was formalized when Desjardins joined Business Ambition for 1.5°C, a global coalition organized by the Science-Based Targets initiative (SBTi). Desjardins Global Asset Management has made a commitment to the Net Zero Asset Managers Initiative.

In line with its ambitions, Desjardins Group was the first North American institution to join the Powering Past Coal Alliance to exit the thermal coal industry.

Desjardins Group's strategic orientations with respect to climate change and its resulting commitments are based on identifying climate change risks and assessing exposures and potential impacts for Desjardins Group, its members and its clients.

The consequences of climate change risks include the impairment of certain assets or the loss of income or profitability that could reduce the value of investments or the credit rating of a business. The transition support we offer our members and clients takes various forms, including increasing the financing of renewable energies, supporting businesses in carbon-intensive sectors, defining science-based targets using the current SBTi approach or offering sustainable finance products to better face the impact of climate change.

Risk management

In order to mitigate environmental or social risk, and to be consistent with its commitment towards a sustainable and responsible economy, Desjardins Group has incorporated ESG factors into its business decision-making processes. In accordance with our Integrated Risk Management Framework, a frontline team specialized in sustainable development and responsible finance supports the segments as they consider climate change risks in relation to how they manage their specific risks. Tools and reference materials are also being developed to support the business sectors in that respect.

In addition, a dedicated climate-related risk team, in collaboration with the other second-line defence teams (insurance, credit, etc.), is in place to oversee and monitor how this cross-sector risk is included and managed. Desjardins Group identifies and assesses its climate change risks in a multidisciplinary, organization-wide process.

Business segments and support functions work with professionals from Risk Management and the Sustainable Development and Responsible Finance team to identify the main risks affecting their operations, as well as their impact.

In 2022, the work to improve climate change risk management and further integrate those risks into the organization's risk appetite framework continued and accelerated. The climate change risk management approach was revised, and the methodology for the qualitative analysis of risk was once again enhanced. An ESG risk management policy and a climate change risk management statement of appetite and guideline were developed to define and oversee these risks, identify the transmission channels of these risks to the organization's operations and highlight the expectations of the Desjardins Group's Board of Directors with respect to risk management.

Metrics and targets

Desjardins Group maintains its leadership in sustainable development through varied initiatives that are integrated into its Strategic Plan and performance management. In particular, this is achieved by monitoring the carbon footprint of its operational and financial activities, the exposures of its financings and investments in carbon-intensive sectors, namely energy, transportation and real estate, and its business volume in renewable energies, as well as by implementing targets related to reductions in its greenhouse gas (GHG) emissions. When considered relevant, these indicators and targets are gradually integrated into performance objectives.

In 2021, Desjardins Group implemented a net zero 2040 target for the energy, transportation and real estate sectors. This year, the target for reductions in operational GHG emissions was updated. Work is underway to set intermediate science-based targets and improve the methodologies used to monitor exposures to carbon-intensive sectors. In connection with Desjardins Group's statement of appetite for climate change risks, a first appetite indicator was developed in 2022. Others are currently being developed.

In addition, we would like to highlight the second public disclosure of our financed emissions (investing and lending) as per the methodology of the Partnership for Carbon Accounting Financials (PCAF).

4.2.11 Regulatory risks

The financial services industry is one of the most strictly regulated and monitored sectors. For several years, the regulations governing the industry have been expanding significantly, notably in terms of the extent and the complexity of applicable regulations. The pressure exerted by regulatory authorities is mounting and their oversight powers are increasing, and this exposes Desjardins Group to monetary sanctions and greater reputation risk.

Regulatory authorities and bodies

This evolution is in response to numerous socio-economic phenomena such as the development of new, increasingly complex financial products, the continuing volatility in the securities industry, increasingly complex financial fraud, the fight against money laundering and terrorist financing, and the fight against tax evasion, to mention but a few. In addition to federal (Canada and the U.S.) and provincial government requirements, due consideration must be given to the requirements of the *Autorité des marchés financiers* (AMF), the Canadian Securities Administrators (CSA), the Office of the Superintendent of Financial Institutions (OSFI), the Financial Transactions and Reports Analysis Centre of Canada (FINTRAC), the Mutual Fund Dealers Association of Canada (MFDA), and the Investment Industry Regulatory Organization of Canada (IIROC). Complying with important legislative and regulatory provisions, such as those on the protection of personal information, laws and regulations governing insurance, the *Foreign Account Tax Compliance Act*, the Standard for Automatic Exchange of Financial Account Information in Tax Matters, the *Dodd-Frank Wall Street Reform and Consumer Protection Act* and the Basel accords, requires considerable technical, human and financial resources and also affects the way Desjardins Group manages its current operations and implements its business strategies.

Compliance management framework

Fulfilling an independent supervisory function, the Vice-President and Chief Compliance and Privacy Officer of Desjardins Group fosters a proactive approach to compliance by fully integrating compliance into the organization's current operations.

The management framework applies to legal and regulatory risks, including the fight against financial crimes and corruption as well as fraud and privacy risks. It is based on identifying and monitoring of regulatory obligations and overseeing the functional units subject to them. The compliance management framework provides for the following:

- developing frameworks and documentation to comply with the regulatory requirements in effect;
- implementing training programs and coaching initiatives (advisory role);
- deploying operations oversight and inspection programs;
- reporting on the compliance status to the Company's Board of Directors and senior management.

To maintain its reputation for integrity as well as the confidence of its members and clients, the market and the general public, Desjardins Group has also adopted a code of professional conduct applicable to the officers and employees of all its components.

This compliance management framework provides reasonable assurance that Desjardins Group's operations are carried out in compliance with applicable regulations. Despite all these efforts, Desjardins Group may not be able to predict the exact impact of regulatory developments and appropriately implement strategies to respond. It could then sustain an adverse impact on its financial performance, its operations and its reputation. For further information, refer to the "Regulatory environment" section of this MD&A.

Compliance organizational structure

The Vice-President and Chief Compliance and Privacy Officer of Desjardins Group reports to the Executive Vice-President, Risk Management of Desjardins Group. The Chief Compliance Officers of all the components report to the Chief Compliance Officer of Desjardins Group.

Legal and regulatory

Legal and regulatory risk is the risk associated with the non-compliance by Desjardins Group with obligations arising from the anticipation, interpretation or application of a legislative or regulatory provision or a contractual commitment, which could have an impact on the conduct of its operations, its reputation, its strategies and its financial objectives.

Legal and regulatory risk entails, inter alia, effectively preventing and handling possible disputes and claims that may lead in particular to judgments or decisions by a court of law or regulatory body that could result in orders to pay damages, financial penalties or sanctions. Moreover, the legal and regulatory environment is evolving quickly and could increase Desjardins Group's exposure to new types of litigation. In addition, some lawsuits against Desjardins Group may be very complex and be based on legal theories that are new or have never been verified. The outcome of such lawsuits may be difficult to predict or estimate until the proceedings have reached an advanced stage, which may take several years. Class action lawsuits or multi-party litigation may feature an additional risk of judgments with substantial monetary, non-monetary or punitive damages. Plaintiffs who bring a class action or other lawsuit sometimes claim very large amounts, and it is impossible to determine Desjardins Group's liability, if any, for some time. Legal liability or an important regulatory measure could have an adverse effect on the current activities of Desjardins Group, its results of operations and its financial position, in addition to damaging its reputation. Even if Desjardins Group won its court case or was no longer the subject of measures imposed by regulatory bodies, these situations could harm its reputation and have an adverse impact on its financial position, due in particular to the costs associated with such proceedings, and its brand image.

During fiscal 2022, the *Autorité des marchés financiers* (AMF) worked on the *Regulation respecting complaint processing and dispute resolution in the financial sector* and a draft *Incentive Management Guideline*. At the federal level, the Office of the Superintendent of Financial Institutions Canada (OSFI), one of the regulatory authorities governing certain Desjardins Group components, held several legislative consultations.

Privacy

Privacy risk is the risk associated with inadequate handling of personal information (theft or breach, loss, collection, consent management, use, disclosure, retention, destruction or infringement of the rights of individuals related to their personal information), through intentional or unintentional actions (internal threat, error, negligence or omission). The key consequences of privacy risk deal with Desjardins Group's reputation, compliance and potential financial losses.

An Act to modernize legislative provisions as regards the protection of personal information came into force gradually as of September 2022 and provides for increased powers for the Commission on Access to Information (CAI) and the use of more significant sanctions against businesses as of September 2023. Desjardins Group complies fully with the provisions that came into force on September 22, 2022, namely the designation of a person in charge of the protection of personal information, the handling of confidentiality incidents and the frameworks for disclosing personal information for study, research or statistical purposes and as part of a commercial transaction. The federal bill C-27, *An Act to enact the Consumer Privacy Protection Act, the Personal Information and Data Protection Tribunal Act and the Artificial Intelligence and Data Act and to make consequential and related amendments to other Acts*, was also tabled in June 2022 and is being analyzed by Desjardins Group.

Fraud and financial crimes

Fraud and financial crime risk is the risk associated with acts conducted illegally by internal or external parties with the intent to cause harm, benefit from them or misappropriate assets belonging to Desjardins Group, members or clients, or the risk associated with non-compliance by Desjardins Group with obligations arising from the anticipation, interpretation or application of a legislative or regulatory provision regarding financial crimes.

To protect members and clients as well as the organization, Desjardins Group continually improves its processes and solutions to adequately prevent, detect and deal with fraud. To do so, fraud risks are identified on an ongoing basis and effective and robust mitigation measures are constantly evolving. With respect to the fight against money laundering and terrorist financing, the Financial Transactions and Reports Analysis Centre of Canada (FINTRAC) imposing a monetary sanction to a Canadian financial institution confirms that this regulator is willing to impose more severe sanctions for non-compliance with the *Proceeds of Crime (Money Laundering) and Terrorist Financing Act*.

5.0 Additional information

5.1 Controls and procedures

DISCLOSURE CONTROLS AND PROCEDURES

In accordance with the CSA guidance in National Instrument 52-109, the President and CEO as well as the Executive Vice-President Finance and Chief Financial Officer (CFO) caused to be designed disclosure controls and procedures (DCPs). These controls and procedures are designed to provide reasonable assurance that the information presented in annual, interim or other reports filed or transmitted under securities legislation is recorded, processed, summarized and reported within the time periods prescribed by such legislation. These controls and procedures are also designed to warrant that such information is assembled and disclosed to the management of Desjardins Group, including its signing officers, in accordance with what is appropriate to make timely decisions regarding disclosure.

As at December 31, 2022, Desjardins Group management, in collaboration with the President and CEO, and the CFO, assessed the design and effectiveness of its DCPs. Based on the results of this assessment, the President and CEO, and the CFO concluded that the DCPs were adequately designed and effective.

INTERNAL CONTROL OVER FINANCIAL REPORTING

Desjardins Group management caused an adequate internal control over financial reporting process to be designed and has maintained it. This process is designed to provide reasonable assurance regarding the reliability of financial reporting and the preparation of Combined Financial Statements for external purposes in accordance with IFRS. Internal control over financial reporting (ICFR) includes, in particular, those policies and procedures that:

- pertain to the maintenance of records that, in reasonable detail, accurately and fairly reflect the transactions and dispositions of assets;
- are designed to provide reasonable assurance that transactions are recorded as necessary to permit preparation of the Combined Financial Statements in accordance with IFRS, and that cash receipts and payments are being made only in accordance with authorizations of management and directors;
- are designed to provide reasonable assurance regarding prevention or timely detection of unauthorized acquisition, use or disposition of the assets that could have a significant impact on the Annual Combined Financial Statements or Interim Financial Reports.

Because of its inherent limitations, ICFR may not prevent or detect all misstatements on a timely basis. Management's assessment of the controls provides only reasonable, not absolute, assurance that all the problems related to control which could give rise to material misstatements have been detected.

Desjardins Group management, in collaboration with the President and CEO, and the CFO, have assessed the design and effectiveness of ICFR. This assessment was performed in accordance with the 2013 Internal Control – Integrated Framework published by the Committee of Sponsoring Organizations of the Treadway Commission (COSO) for financial controls and in accordance with the Control Objectives for Information and Related Technologies (COBIT) framework for IT general controls.

Based on the results of the assessment, the President and CEO, and the CFO, concluded that as at December 31, 2022, ICFR was adequately designed and effective.

The DCPs and ICFR set forth in Regulation 52-109 are applied in the Federation's Annual Information Form prepared in accordance with Regulation 51-102, and for the purposes of certifying Desjardins Group under Regulation 52-109, the Federation's information form is considered to be Desjardins Group's Annual Information Form.

CHANGE IN INTERNAL CONTROL OVER FINANCIAL REPORTING

During the year ended December 31, 2022, Desjardins Group did not make any changes to its policies, procedures and other processes with regard to internal control that had materially affected, or may materially affect, ICFR.

Various other aspects of corporate governance are examined in more detail in the "Corporate governance" section of the 2022 Desjardins Group Annual Report.

5.2 Related party disclosures

In the normal course of operations, Desjardins Group offers financial services to related parties, including its associates, joint ventures and other related companies, and enters into agreements for operating services with them. It also pays its key management personnel compensation under normal market conditions.

Furthermore, Desjardins Group provides its financial products and services, under normal market conditions, to its directors, its key management personnel and the persons related to them.

Desjardins Group's key management personnel are the members of its Board of Directors and its Management Committee. They are responsible for the planning, management and control of Desjardins Group's operations, and have the authority to perform their duties.

Desjardins Group has set up a process to obtain assurance that all transactions with its officers and the persons related to them have been carried out as arm's-length transactions and in compliance with the legislative framework for its various components.

Additional information about related party transactions is presented in Note 32, "Related party disclosures", to the Combined Financial Statements.

5.3 Critical accounting policies and estimates

A description of the accounting policies used by Desjardins Group is essential to understanding the Combined Financial Statements as at December 31, 2022. The significant accounting policies are described in Note 2, "Significant accounting policies", to the Combined Financial Statements. Some of these policies are of particular importance in presenting Desjardins Group's financial position and operating results because they require management to make judgments as well as estimates and assumptions that may affect the reported amounts of some assets, liabilities, income and expenses, as well as related information. The significant accounting policies that required management to make difficult, subjective or complex judgments, often involving uncertainties, are discussed below.

The economic environment continues to generate sources of uncertainty that have an impact on judgments as well as significant estimates and assumptions made by management in preparing the Combined Financial Statements. This particularly affects the loss allowance for expected credit losses. For more information about significant judgments made to estimate the loss allowance for expected credit losses, see Note 8, "Loans and allowance for credit losses", to the Combined Financial Statements.

STRUCTURED ENTITIES

A structured entity is consolidated when it is controlled by a Desjardins Group entity. Management must make significant judgments when it assesses the various elements and all related facts and circumstances as a whole to determine whether control exists, especially in the case of structured entities.

A structured entity is an entity that has been designed so that voting rights or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes: restricted activities, a narrow and well-defined objective, insufficient equity to permit it to finance its activities without subordinated financial support, or financing in the form of multiple contractually linked instruments issued to investors.

Additional information about structured entities is presented in Note 14, "Interests in other entities", to the Combined Financial Statements.

DETERMINATION OF THE FAIR VALUE OF FINANCIAL INSTRUMENTS

The fair value of a financial instrument is the price that would be received to sell an asset or paid to transfer a liability in an orderly transaction between market participants at the measurement date.

The fair value measurement of financial instruments is determined using a three-level hierarchy, reflecting the importance of the inputs used for the measurements. Level 1 denotes measurement based on quoted prices (unadjusted) in active markets for identical assets or liabilities, while level 2 designates valuation techniques based primarily on observable market data. Level 3 concerns valuation techniques not based primarily on observable market data.

There is little subjectivity in the determination of the fair value of financial instruments, especially securities and commitments related to securities sold short, obtained from quoted prices on active markets. This fair value is based on the quoted price within the bid-ask spread that is most representative of fair value in the circumstances.

If there are no quoted prices on active markets, fair value is determined using models that maximize the use of observable inputs and minimize the use of unobservable inputs. In such cases, fair value estimates are established using valuation techniques such as cash flow discounting, comparisons with similar financial instruments, option pricing models and other techniques commonly used by market participants, if these techniques have been demonstrated to provide reliable estimates. Valuation techniques rely on assumptions concerning the amount and timing of estimated future cash flows and discount rates that are mainly based on observable data, such as interest rate yield curves, exchange rates, credit curves and volatility factors. When one or several material inputs are not observable on the market, fair value is determined mainly based on internal inputs and estimates that take into account the characteristics specific to the financial instrument and any factor relevant to the measurement. For complex financial instruments, significant judgment is used in determining the valuation technique to be used and in selecting inputs and adjustments associated with this technique. Due to the need to use estimates and make judgments when applying many valuation techniques, fair value estimates for identical or similar assets may differ between entities. Fair value reflects market conditions on a given date and may not be representative of future fair values. It should not be considered as being realizable in the event of immediate settlement of these instruments.

Loans

The fair value of performing loans is determined by discounting expected contractual cash flows using market interest rates charged for similar new loans at the reporting date, and takes estimated prepayments into account, adjusted to take into account credit losses on the loan portfolio. Changes in interest rates and in the creditworthiness of borrowers are the main causes of changes in the fair value of loans held by Desjardins Group, which result in a favourable or unfavourable difference compared to their carrying amount.

Deposits

The fair value of fixed-rate deposits is determined by discounting expected cash flows using market interest rates currently being offered for deposits with substantially the same term and takes estimated prepayments into account. The fair value of deposits with floating-rate features or with no stated maturity is assumed to be equal to their carrying amount. The fair value of certain liabilities presented under “Deposits – Business and government” is based on the market price for similar instruments or on expected cash flow discounting. For financial liabilities designated as at fair value through profit or loss, the fair value takes option pricing models into account, and the valuation techniques are similar to those used for derivative financial instruments.

Subordinated notes

The fair value of subordinated notes is based on market price.

Derivative financial instruments

The fair value of derivative financial instruments is determined using pricing models that incorporate current market prices and the contractual prices of the underlying instruments, the time value of money, interest rate yield curves, credit curves and volatility factors. This fair value is presented without taking into account the impact of legally enforceable master netting agreements. However, Desjardins Group adjusts the measurement of these instruments based on credit risk, and such adjustments reflect the financial ability of the counterparties to the contracts and the creditworthiness of Desjardins Group, as well as credit risk mitigation measures such as legally enforceable master netting agreements. Note 21, “Derivative financial instruments and hedging activities”, to the Combined Financial Statements describes the type of derivative financial instruments held by Desjardins Group.

Financial instruments whose fair value equals their carrying amount

The carrying amount of certain financial instruments is a reasonable approximation of their fair value given their maturity in the short term or their features. These financial instruments include the following items: “Cash and deposits with financial institutions”, “Securities borrowed or purchased under reverse repurchase agreements”, “Clients’ liability under acceptances”, “Amounts receivable from clients, brokers and financial institutions”, some items included in “Other assets – Other”, “Acceptances”, “Commitments related to securities lent or sold under repurchase agreements”, “Amounts payable to clients, brokers and financial institutions” and some items included in “Other liabilities – Other”.

Additional information on the fair value of financial instruments is presented in Note 5, “Fair value of financial instruments”, to the Combined Financial Statements. Note 2, “Significant accounting policies” to the Combined Financial Statements provides information on the classification and measurement of financial assets and financial liabilities.

DERECOGNITION OF FINANCIAL ASSETS

A financial asset is derecognized from the Combined Balance Sheets when the contractual rights to the cash flows from the asset expire, when the contractual rights to receive these cash flows are retained but Desjardins Group has the obligation to pay them to a third party under certain conditions, or when Desjardins Group transfers the contractual rights to receive the cash flows and substantially all the risks and rewards of ownership of the asset have been transferred.

When substantially all the risks and rewards of ownership of the transferred financial asset are retained by Desjardins Group, such asset is not derecognized from the Combined Balance Sheets and a financial liability is recognized, when appropriate.

When substantially all the risks and rewards related to a financial asset are neither transferred nor retained, Desjardins Group derecognizes the financial asset over which it does not retain control and recognizes an asset or a liability representing the rights and obligations created or retained in the asset transfer. If control of the financial asset is retained, Desjardins Group continues to recognize the asset in the Combined Balance Sheets to the extent of its continuing involvement in said asset.

When a financial asset is derecognized in its entirety, a gain or a loss is recognized in the Combined Statements of Income for an amount equal to the difference between the carrying amount of the asset and the value of the consideration received.

Management must use its judgment to determine whether the contractual rights to the cash flows have expired, have been transferred or have been retained with an obligation to pay them to a third party. With respect to the transfer of substantially all the risks and rewards of ownership of the assets, management evaluates Desjardins Group's exposure before and after the transfer as well as the changes in the amount and timing of the net cash flows of the transferred asset. Lastly, management must make judgments to determine whether it controls the financial asset and to measure retained rights.

Additional information about the derecognition of financial assets is presented in Note 9, "Derecognition of financial assets", to the Combined Financial Statements.

IMPAIRMENT OF FINANCIAL INSTRUMENTS

At each reporting date, Desjardins Group recognizes a loss allowance for expected credit losses for debt instruments classified at amortized cost or at fair value through other comprehensive income, as well as certain off-balance sheet items, namely loan commitments and financial guarantees, which are not measured at fair value through profit or loss. This allowance is estimated based on an impairment model that comprises three different stages:

- Stage 1: For financial instruments that have not had a significant increase in credit risk since initial recognition and are not considered credit-impaired financial assets, a loss allowance amounting to 12-month expected credit losses is recognized.
- Stage 2: For financial instruments that have had a significant increase in credit risk since initial recognition but are not considered credit-impaired financial assets, a loss allowance amounting to the lifetime expected credit losses is recognized.
- Stage 3: For financial assets considered credit impaired, a loss allowance amounting to the lifetime expected credit losses continues to be recognized.

Financial instruments may, over their life, move from one impairment model stage to another based on the improvement or deterioration in their credit risk and the level of expected credit losses. Instruments are always classified in the various stages of the impairment model based on the credit risk between the reporting date and the initial recognition date of the financial instrument and an analysis of evidence of impairment.

Determination of significant increases in credit risk

To determine whether, at the reporting date, credit risk has significantly increased since initial recognition, Desjardins Group bases its assessment on the change in default risk over the expected life of the financial instrument, which requires significant judgment.

To this end, Desjardins Group compares the PD of the financial instrument at the reporting date with its PD at the date of initial recognition. In addition, it considers reasonable and supportable information indicating a significant increase in credit risk since initial recognition, including qualitative information and information about future economic conditions to the extent that it affects the assessment of the instrument's PD. The criteria used to determine a significant increase in credit risk vary depending on the groups of financial instruments having credit risk characteristics in common and are mainly based on a relative change combined with an absolute change in the PD. They also include absolute PD thresholds and certain other criteria. All instruments that are more than 30 days past due are transferred to Stage 2 of the impairment model.

Definition of default and credit impaired financial asset

The definition of default used in the impairment model corresponds to the definition used for internal credit risk management purposes and for regulatory purposes. It considers relevant quantitative and qualitative factors. In particular, a loan is in default when contractual payments are over 90 days past due. A financial asset is considered credit-impaired when it is in default, unless the detrimental impact on the estimated future cash flows is considered insignificant.

Measurement of the loss allowance for expected credit losses

The loss allowance for expected credit losses reflects an unbiased amount, based on a probability-weighted present value of cash flow shortfalls, and takes into account reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. Generally, the loss allowance for expected credit losses represents the present value of the difference between cash flows that are due, or the amount of the commitment that may be used under the terms and conditions of the contract, and total cash flows that Desjardins Group expects to receive. For credit- impaired financial assets, expected credit losses are calculated based on the difference between the gross carrying amount of the asset and estimated cash flows.

The measurement of the loss allowance for expected credit losses is estimated for each exposure at the reporting date and is based on the result of multiplying the three credit risk parameters, namely PD, loss given default (LGD) and exposure at default (EAD). The result of this multiplication is then discounted using the effective interest rate. The parameters are estimated using an appropriate segmentation that considers common credit risk characteristics. For financial instruments in Stage 1 of the impairment model, credit risk parameters are projected over a maximum horizon of 12 months, while for those in Stage 2 or Stage 3, they are projected over the remaining life of the instrument.

To determine the credit risk parameters, financial instruments are aggregated based on their common credit risk characteristics.

The loss allowance for expected credit losses also considers information about future economic conditions. To incorporate forward-looking information relevant to the determination of significant increases in credit risk and the measurement of the loss allowance for expected credit losses, Desjardins Group uses the econometric models for credit risk projection. These models estimate the impact of macroeconomic variables on the various credit risk parameters. Desjardins Group uses three scenarios to determine the loss allowance for expected credit losses and assigns to each scenario a probability of occurrence. It may also make adjustments to take into account the relevant information that affects the measurement of the loss allowance and that has not been incorporated into the credit risk parameters.

For credit-impaired financial assets that are individually material, measuring the loss allowance for expected credit losses is based on an extensive review of the borrower's situation and the realization of collateral held. The measurement represents a probability-weighted present value, calculated using the effective interest rate, of cash flow shortfalls that takes into consideration the impact of various scenarios that may materialize and information about future economic conditions.

Key data and assumptions

Estimating the loss allowance for expected credit losses under IFRS 9 is based on a set of assumptions and methodologies specific to credit risk and changes in economic conditions, and therefore requires significant judgment to be exercised. The main items requiring significant judgment that affected its measurement are the following:

- Changes in the borrowers' credit risk rating (or PD);
- Determination of significant increases in credit risk;
- Incorporation of forward-looking information;
- Estimated life of revolving credit facilities.

The current macroeconomic environment, characterized by increased inflationary pressures, rapid interest rate hikes, labour shortages, some supply chain disruptions and growing geopolitical tensions, among others, continues to give rise to uncertainty. Therefore, management has to continue making particularly complex judgments to estimate the allowance for credit losses in the current situation.

To take into account relevant risk factors related to the macroeconomic environment that are not reflected in models, management continues to apply expert credit judgment in measuring the allowance for expected credit losses. Expert adjustments are thus applied to some credit risk measures and some forward-looking information that should not be as representative of an improvement in portfolio credit quality as what historical data used in the models would otherwise suggest.

Changes in the borrowers' credit risk rating or probability of default

The borrowers' credit risk rating is the foundation of the credit risk assessment model. The rating of a borrower is directly related to its estimated PD. Many variables are taken into consideration in credit risk assessment models. Changes in the borrowers' credit risk rating have an impact on determining significant increases in credit risk, as this is mainly based on the change in the borrower's PD, and measuring the loss allowance for expected credit losses.

Changes in the credit risk rating may increase or decrease the loss allowance for expected credit losses. Generally, a deterioration in a borrower's credit risk rating gives rise to an increase in the allowance, while an improvement results in a decrease in the allowance.

Determination of significant increases in credit risk

To determine whether, at the reporting date, credit risk has significantly increased since initial recognition, Desjardins Group bases its assessment on the change in default risk over the expected life of the financial instrument. As this assessment takes into account forward-looking information at the time of granting and at the reporting date, a significant increase in credit risk may be caused by a deterioration in economic forecasts integrated into the prospective evaluation, a deterioration in the borrower's situation or a combination of both of these factors.

The determination of significant increases in credit risk since initial recognition may have a significant upward or downward impact on the loss allowance for expected credit losses as Stage 1 loans are subject to a loss allowance amounting to 12-months' expected credit losses, while the loss allowance for Stage 2 loans is equal to lifetime expected credit losses.

Incorporation of forward-looking information

Desjardins Group uses three different scenarios to determine the loss allowance for expected credit losses, namely a base scenario, an upside scenario and a downside scenario. Projections for each scenario are provided for a four-year horizon. The macroeconomic variables projected under each scenario and the related probability of occurrence have a significant impact on determining significant increases in credit risk and measuring the loss allowance for expected credit losses. The models vary depending on the portfolios and include one or several of the following main variables: gross domestic product, unemployment rate, the Consumer Price Index, housing prices, the corporate credit spread and the S&P/TSX index. The macroeconomic variable projection and the determination of the probabilities of occurrence of the three different scenarios are reviewed quarterly.

The incorporation of forward-looking information may increase or decrease the loss allowance for expected credit losses. Generally, an improvement in the outlook will give rise to a decrease in the allowance, while a deterioration will result in an increase in the allowance.

Estimated life of revolving credit facilities

The expected life of most financial instruments is equal to the maximum contractual term during which Desjardins Group is exposed to credit risk, including extension options that may be exercised solely by the borrower. The exception to this rule concerns revolving credit facilities, which consist of personal and business lines of credit and credit card loans, for which their life must be estimated. To determine the life of revolving credit facilities, Desjardins Group determines the period over which there is exposure to credit risk but for which expected credit losses would not be mitigated by normal credit risk management actions. This estimate takes into account the period over which it was exposed to credit risk on similar financial instruments and the credit risk management actions that it expects to take once the credit risk on the financial instruments has increased.

The determination of the estimated life of revolving credit facilities has a significant impact on estimating the loss allowance for expected credit losses, mainly for revolving credit facilities in Stage 2 of the impairment model. Generally, an increase in the estimated life of revolving credit facilities gives rise to an increase in expected credit losses.

Additional information about loans and the allowance for credit losses, in particular a sensitivity analysis of the allowance for credit losses, is presented in Note 8, "Loans and allowance for credit losses" to the Combined Financial Statements.

IMPAIRMENT OF "AVAILABLE-FOR-SALE" SECURITIES UNDER IAS 39 CONSIDERED FOR THE OVERLAY APPROACH

Desjardins Group elected to designate certain eligible insurance operations financial assets for the overlay approach permitted by IFRS 4, "Insurance Contracts", to reduce the volatility in profit or loss arising from the different effective dates of IFRS 9, "Financial Instruments", and IFRS 17, "Insurance Contracts".

The overlay approach involves reclassifying between net surplus earnings and other comprehensive income, for designated financial assets, the difference between the amount reported in the Combined Statements of Income under IFRS 9 and the amount that would have been reported if Desjardins Group had continued to apply IAS 39. As a result, net surplus earnings related to designated financial assets reported in the Combined Statements of Income correspond to the amount that would have been reported if Desjardins Group had continued to apply IAS 39.

In determining the amount that would have been reported in the Combined Statements of Income if IAS 39 had been applied, Desjardins Group considers, in particular, the impairment of "Available-for-sale" securities under IAS 39, which requires the significant use of judgment.

Under IAS 39, "Available-for-sale" securities are examined at the reporting date to determine whether there is any objective evidence that they are impaired. In measuring the impairment loss, factors considered include, but are not limited to, a significant or prolonged decline in fair value, major financial difficulties of the issuer, a breach of contract, the increasing probability that the issuer would enter bankruptcy or a restructuring and the disappearance of an active market for the asset in question. Debt securities are assessed individually to determine whether there is any objective evidence of impairment. For equity securities, objective evidence of impairment would also include a significant or prolonged decline in fair value below cost.

IMPAIRMENT OF NON-FINANCIAL ASSETS

Desjardins Group assesses at the reporting date whether there is evidence that an asset may be impaired. An impairment loss is recognized when the carrying amount of the asset exceeds its recoverable amount.

The recoverable amount represents the higher of the fair value less costs of disposal and the value in use. Fair value represents the best estimate of the amount that could be obtained from the sale of the asset in an arm's-length transaction between knowledgeable and willing parties. The value in use is calculated using the most appropriate method, generally by discounting recoverable future cash flows.

Estimating the recoverable amount of a non-financial asset to determine whether it is impaired also requires that management make estimates and assumptions. Any change in these estimates and assumptions could impact the determination of the recoverable amount of non-financial assets and, therefore, the outcome of the impairment test. The main estimates and assumptions used in calculating the recoverable amount are future cash flows estimated based on internal financial forecasts, expected future earnings, the growth rate and the discount rate.

INSURANCE CONTRACT LIABILITIES

Life and health insurance contract liabilities

Life and health insurance contract liabilities consist of actuarial liabilities, benefits payable, provisions for claims not reported, provisions for dividends and experience refunds as well as policyholder deposits.

Actuarial liabilities represent the amounts which, together with estimated future premiums and net investment income, will provide for all the life and health insurance subsidiary's commitments regarding estimated future benefits, policyholder dividends and related expenses. The appointed actuary of the subsidiary is required to determine the actuarial liabilities needed to meet its future commitments. These actuarial liabilities are determined using the Canadian Asset Liability Method (CALM), in accordance with Canadian accepted actuarial practices, and they are equal to the value in the Combined Balance Sheets of the assets that back them.

Property and casualty insurance contract liabilities

Property and casualty insurance contract liabilities consist of unearned premiums, provisions for claims and adjustment expenses.

Unearned premiums represent the portion of premiums remaining to be earned at the reporting date.

The provisions for claims and adjustment expenses related to the insurance policies of the property and casualty insurance subsidiaries are estimated using actuarial techniques that consider best estimate assumptions, taking into account currently known data, which are regularly reviewed and updated. Any resulting adjustment is recognized in the Combined Statements of Income for the year in which the revision occurs. The provision for claims and adjustment expenses is reported on a discounted basis using the rate of return of the underlying assets, with a margin for adverse deviations.

Note 17, "Insurance contract liabilities", to the Combined Financial Statements provides information about accounting for the various life and health and property and casualty insurance contract liabilities, the main assumptions used and the impact on profit or loss of changes to assumptions.

PROVISIONS AND CONTINGENT LIABILITIES

Provisions are liabilities of uncertain timing or amount. A provision is recognized when Desjardins Group has an obligation (legal or constructive) as a result of a past event, the settlement of which should result in an outflow of resources embodying economic benefits, and when a reliable estimate can be made of the amount of the obligation. The amount of the obligation is discounted where the effect of the time value of money is material.

Provisions are based on management's best estimate of the amounts required to settle the obligations on the reporting date, taking into account the relevant risks and uncertainties. Management must use significant judgment in determining whether a current obligation exists and in estimating the likelihood, timing and amount of any outflow of resources. Desjardins Group regularly examines the measurement of provisions and makes, on a quarterly basis, the adjustments required based on new available information. Actual results may differ significantly from forecasts.

A contingent liability is a possible obligation that arises from past events and whose existence will be confirmed only by the occurrence or non-occurrence of one or more uncertain future events not wholly within the control of Desjardins Group or an obligation that arises from a past event and for which an outflow of resources embodying economic benefits is not probable or cannot be estimated reliably. In the normal course of its business, Desjardins Group is involved in various litigation and legal proceedings.

Additional information is presented in Note 29, "Commitments, guarantees and contingent liabilities", to the Combined Financial Statements.

INCOME TAXES ON SURPLUS EARNINGS

The income tax expense on surplus earnings recognized in the Combined Statements of Income comprises the current and deferred tax expense on operating surplus earnings as well as the income tax consequences of remuneration on capital stock and dividends when certain conditions are met. The total income tax expense includes the income tax expense on surplus earnings recognized in the Combined Statements of Income as well as current and deferred taxes on items recognized outside profit or loss directly in the Combined Statements of Comprehensive Income or the Combined Statements of Changes in Equity.

The total income tax expense is based on the expected tax treatment of the transactions. To determine the current and deferred portions of these income taxes, management must make judgments to establish assumptions concerning the dates on which deferred income tax assets and liabilities will be reversed. Significant judgment must be used to interpret the relevant tax legislation in order to determine the income tax expense. If Desjardins Group's interpretation differs from that of taxation authorities or if the reversal dates do not correspond to the forecasted dates, the provision for income taxes on surplus earnings may increase or decrease in subsequent years.

Note 28, "Income taxes on surplus earnings", to the Combined Financial Statements provides additional information on income taxes on surplus earnings.

MEMBER DIVIDENDS

The board of directors of each caisse recommends for approval the surplus earnings distribution plan at the annual general meeting of members, which is held in the four months following year-end. The amount of member dividends to be paid is part of this plan. Member dividends take into consideration the financial framework for the appropriation of surplus earnings related to the Desjardins Group Integrated Financial Plan, which provides for member dividends based on Desjardins Group's financial capacity and capitalization. The difference between the amount of member dividends actually paid following the general meetings held by the caisses and the estimated amount is charged to combined profit or loss for the year in which the payments are made.

Member dividends are calculated on the basis of average balances maintained in the following product families: Accounts, Loans and lines of credit, Savings and investments, and Funds. For credit card volumes, the dividend calculation is based on net purchases for the year concerned. For the Insurance product family, member dividends are calculated based on the premium paid for the relevant year Lastly, for certain Desjardins Securities Inc. operations (Signature Service, Securities Brokerage and Online Brokerage), the calculation is based on the commissions and fees covering the year concerned. The provision for member dividends is allocated to the Personal and Business Services segment.

EMPLOYEE BENEFITS

Desjardins Group offers the majority of its employees a defined benefit pension plan and a defined benefit supplemental pension plan. For employees meeting certain criteria based on age and the number of years of participation in the plan, it also offers a post-retirement benefit plan that provides medical, dental and life insurance to retiring employees and their dependents.

Group pension plans are plans whose risks are shared by entities under common control. The main group pension plan offered, the Desjardins Group Pension Plan (DGPP), is a funded defined benefit group plan. Participants and employers share the risks and costs related to the DGPP, including any deficit, on a pro rata basis of 35% and 65%, respectively.

For the DGPP, benefits are determined on the basis of the number of years of membership and take into consideration the average salary of the employee's five most highly paid years, for years of service accumulated before 2013, and the eight most highly paid years, for years of service accumulated subsequently. Benefits are indexed annually using the Consumer Price Index, up to a maximum of 3% for years of service accumulated before 2013, and of 1% for a period of 10 years starting at age 65 for years of service accumulated after 2013.

Defined benefit pension plans are plans for which Desjardins Group has formally committed to a level of benefits and therefore assumes actuarial and, when the plans are funded, investment risks. Since the terms of the pension plans are such that future changes in salary levels will have an impact on the amount of future benefits, the cost of the benefits and the value of the defined benefit plan obligation are in general actuarially determined using various assumptions. Although management believes that the assumptions used in the actuarial valuation process are reasonable, there remains a degree of risk and uncertainty that may cause future actual results to differ materially from these assumptions, which could give rise to actuarial gains or losses.

Actuarial calculations are made based on management's best estimate assumptions primarily concerning the plan obligation discount rate, and also, but to a lesser extent, salary increases, the retirement age of employees, the mortality rate, the rate of increase in pension benefits and the participants' future contributions that will be used to make up the deficit. The participants' estimated discounted contributions required to make up the deficit reduce the defined benefit plan obligation. A complete actuarial valuation is performed each year by a qualified actuary. The discount rates used have been determined by reference to the rates of high quality corporate bonds whose terms are consistent with those of the plans' cash flows.

The terms of the post-retirement benefit plans are such that changes in salary levels or healthcare costs will have an impact on the amount of future benefits. The cost of these benefits is accrued over a part of the service lives of employees using accounting policies similar to those used for defined benefit pension plans.

Note 18, "Employee benefits – Pension and post-retirement benefit ", to the Combined Financial Statements provides further information on accounting for defined benefit plans and on the sensitivity of the key assumptions.

5.4 Future accounting changes

Accounting standards and amendments issued by the IASB but not yet effective as at December 31, 2022 are presented below. Regulatory authorities have stated that early adoption of these standards and amendments will not be permitted, unless they indicate otherwise.

IFRS 17, "INSURANCE CONTRACTS"

In May 2017, the IASB issued IFRS 17, "Insurance Contracts", which will replace the current standard, IFRS 4, "Insurance Contracts", for annual reporting periods beginning on or after January 1, 2023. IFRS 17 establishes principles for the recognition, measurement, presentation and disclosure of all insurance contracts. IFRS 17 provides a general model for measuring insurance contracts, but also includes the premium allocation approach for contracts with a period of one year or less as well as the variable fee approach for insurance contracts with direct participation features.

The general measurement model and the variable fee approach are based on the discounted value of estimated expected future cash flows for the duration of the contract. Insurance profits resulting from issuing insurance contracts measured using these two methods are recorded separately in the insurance liability for contractual service margin. These deferred profits will be recognized in profit and loss as services are rendered. For contracts measured using the premium allocation approach, insurance revenue is recognized as services are rendered, while insurance expenses are recognized when they are incurred. In all cases, when insurance contracts are onerous upon issuance, a loss is immediately recognized in profit or loss.

The life and health insurance subsidiary will apply the premium allocation approach to measure the liability for remaining coverage for its group insurance contracts and certain other short-term insurance contracts. The liability for remaining coverage for individual segregated fund contracts and individual life insurance contracts with participation features will be measured using the variable fee approach. The general measurement model will be applied to all other long-term insurance contracts. At the date of transition, the requirements in IFRS 17 will be applied on a retrospective basis to short-term insurance contracts and the fair value approach will be applied to long-term insurance contracts.

The property and casualty insurance subsidiaries will apply the premium allocation approach to measure the liability for remaining coverage. At the date of transition, the requirements in IFRS 17 will be applied on a retrospective basis to all insurance contracts, except for claims assumed in a past acquisition, for which the modified retrospective approach will be used.

As part of its application, IFRS 17 allows for certain choices to be made. Desjardins Group made the following choices:

- Amortize insurance acquisition cash flows for insurance contracts measured using the premium allocation approach over the duration of the related contracts.
- Apply the accounting offset measure allowed in the statement of income as part of using the strategy for mitigating the financial risks associated with segregated fund contracts.
- Recognize insurance finance income and insurance finance expenses solely in the Combined Statements of Income.
- Not discount the liability for remaining coverage for insurance contracts measured using the premium allocation approach that do not exceed one year.

Desjardins Group has evaluated that adopting IFRS 17 will have an impact on its restated Combined Balance Sheet as at January 1, 2022, including the establishment of a contractual service margin of $2,850 million to $2,950 million arising from the insurance contracts of the life and health insurance subsidiary in force as at that date. Undistributed surplus earnings and reserves will increase by an aggregate amount of $550 million to $575 million, which is mainly explained by an amount of $448 million from accumulated other comprehensive income following the discontinuation of the overlay approach. Overall, adopting IFRS 17 will have a favorable net impact of up to $200 million on equity.

Desjardins Group continues to assess the impact of adopting IFRS 17 on its Combined Financial Statements as at December 31, 2022.

Lastly, the requirements in IFRS 17 allow revising the designation or classification of insurance operations financial assets recognized under IFRS 9 at the date of the initial application of IFRS 17. Desjardins Group chose to not restate comparative figures in its Combined Financial Statements to reflect changes in designation or classification for these financial assets that were made as at January 1, 2023. The impact of such changes is still being assessed.

5.5 Additional information required pursuant to the AMF's decision No. 2021-FS-0091

In addition to the entities comprising the Desjardins Cooperative Group (as defined in Section 1.1, “Profile and structure”) and the subsidiaries of such entities, Desjardins Group’s Combined Financial Statements include Caisse Desjardins Ontario Credit Union Inc. (CDO). The CDO’s financial information is compared to that of Desjardins Group in the table below.

Table 54 - CDO's financial information

As at December 31 or for the years ended December 31

Risk-weighted assets[2]	**139,311**	134,518	120,101	113,861	129,474

(1) In accordance with the standards in effect before the adoption by Desjardins Group of IFRS 16, “Leases”, on January 1, 2019, on a retrospective basis without restatement of comparative periods.

(2) In accordance with the base capital adequacy guideline for financial services cooperatives issued by the AMF and taking into account the applicable relief measures introduced by the AMF in response to the COVID-19 pandemic. See Section 3.2, “Capital Management”.

(3) In accordance with the *Total Loss Absorbing Capacity Guideline* (TLAC Guideline) issued by the AMF and based on risk-weighted assets and exposures for purposes of the leverage ratio at the level of the resolution group, which is deemed to be Desjardins Group, excluding Caisse Desjardins Ontario Credit Union Inc. See Section 3.2 “Capital management”.

(4) In accordance with the *Liquidity Adequacy Guideline* issued by the AMF. See Section 4.0, “Risk Management”.

(5) For more information about non-GAAP ratios, see “Non-GAAP and other financial measures” on pages 3 to 7.

(6) For further information about supplementary financial measures, see the Glossary on pages 113 to 120.

5.7 Supplementary information

The tables below meet the financial disclosure requirements stipulated in the *Act Respecting Financial Services Cooperatives*.

Glossary

Acceptance
Short-term debt security traded on the money market, guaranteed by a financial institution for a borrower in exchange for a stamping fee.

Actuarial liabilities
Amounts which, together with estimated future premiums and net investment income, will provide for all the life and health insurance subsidiaries' commitments regarding estimated future benefits, contract holder dividends and related expenses.

Allowance for credit losses
The loss allowance for expected credit losses reflects an unbiased amount, based on a probability-weighted present value of cash flow shortfalls, and takes into account reasonable and supportable information about past events, current conditions and forecasts of future economic conditions.

Amortized cost
For a financial asset or a financial liability, represents the historical cost at initial recognition, decreased or increased by amortization and any differences that made it fluctuate from initial recognition to maturity.

Annuity premium
Amount invested by a policyholder in order to receive annuity payments, immediately or after an accumulation period.

Assets under administration
Assets administered by a financial institution that are beneficially owned by its members or clients and are therefore not recognized on its Combined Balance Sheet. Services provided in respect of such assets are administrative in nature, such as custodial services, collection of investment income and settlement of buy and sell transactions.

Assets under management
Assets managed by a financial institution that are beneficially owned by its members or clients and are therefore not recognized on its Combined Balance Sheet. Services provided in respect of assets under management include selecting investments and offering investment advice. Assets under management may also be administered by the financial institution. In such case, they are included in assets under administration.

***Autorité des marchés financiers* (AMF)**
Organization whose mission is to enforce the laws governing the financial industry in Québec, particularly in the areas of insurance, securities, deposit-taking institutions and financial product and service distribution.

Average assets
Average of assets presented in the Combined Financial Statements at the end of the last five quarters calculated as of December 31.

Average deposits
Average of deposits presented in the Combined Financial Statements at the end of the last five quarters calculated as of December 31.

Average equity before non-controlling interests
Average of equity before non-controlling interests presented in the Combined Financial Statements at the end of the last five quarters calculated as of December 31.

Average gross loans and acceptances
Average of loans, including clients' liability under acceptances, presented in the Combined Financial Statements at the end of the last five quarters calculated as of December 31.

Average interest-bearing assets
Include securities, cash and deposits with financial institutions, as well as loans, and exclude insurance assets as well as all other assets not generating net interest income. The average is calculated based on month-end balances for the year.

Average net loans and acceptances
Average of loans, including clients' liability under acceptances, net of the allowance for credit losses presented in the Combined Financial Statements at the end of the last five quarters calculated as of December 31.

Basis point
Unit of measure equal to one one-hundredth of a percent (0.01%).

Bond
Certificate evidencing a debt under which the issuer promises to pay the holder a specified amount of interest for a specified period of time, and to repay the borrowing at maturity. Generally, assets are pledged as security for the borrowing, except in the case of government or corporate bonds. This term is often used to describe any debt security.

Capital ratios

Ratios determined by dividing regulatory capital by risk-weighted assets. These measures are defined in the guideline on adequacy of capital base standards applicable to financial services cooperatives issued by the AMF.

Capital share

Equity security offered to Desjardins caisse members.

Catastrophe and notable event

– Catastrophe

In property and casualty insurance, group of claims caused by one or multiple close events arising from, among others, natural or other than natural causes, for which the cost is deemed significant since it reaches a minimum threshold, established annually Desjardins Group's management, for the reinsurance program retention.

- Natural catastrophes can take many forms and include, but are not limited to, hurricanes, tornados, windstorms, hailstorms, heavy rainfalls, ice storms, floods, extreme weather conditions and wildfires.
- Catastrophes other than natural catastrophes include, but are not limited to, terrorist acts, riots, explosions, crashes, train wrecks, large-scale cyber attacks.

– Notable event

In property and casualty insurance, group of claims caused by one or multiple close events arising from, among others, natural or other than natural causes, for which the impact on the loss ratio and claims frequency is deemed significant by Desjardins Group's management.

Commitment

– Direct commitment

Any agreement entered into by a Desjardins Group component with a natural or legal person creating an on- or off-balance sheet exposure, either disbursed or non-disbursed, revocable or irrevocable, with or without condition, that may lead to losses for the component if the debtor is unable to meet its obligations.

– Indirect commitment

Any financial receivable creating a credit exposure that is acquired by a Desjardins Group component in connection with a purchase on the market or the delivery of a financial asset pledged as collateral by a client or a counterparty, whose value may change in particular as a result of the deterioration of the creditworthiness of the counterparty associated to this receivable or changes in market prices.

Countercyclical buffer

The countercyclical buffer aims to ensure that capital requirements take account of the macro-financial environment in which Desjardins Group operates. The AMF could deploy this buffer when it judges that excessive credit growth is associated with a build-up of system-wide risks and, as such, would provide a buffer of capital to absorb potential losses.

Covered bond

Full recourse on-balance sheet bond issued by a financial institution and secured by assets, comprised mainly of mortgage loans, over which investors enjoy a priority claim in the event of an issuer's insolvency or bankruptcy. These assets are separated from the issuer's assets in the event of the issuer's insolvency or bankruptcy and belong to a bankruptcy remote structured entity that guarantees the bond.

Credit commitment

Unused portions of authorizations to extend credit in the form of loans, guarantees or letters of credit, whose primary purpose is to ensure that members and clients have funds available, when necessary, for variable maturity terms and under specific conditions.

Credit instrument

Credit facility offered in the form of a loan or other financing vehicle recognized in the Combined Balance Sheets or in the form of an off-balance sheet product. Credit instruments include credit commitments, documentary letters of credit as well as guarantees and standby letters of credit.

Credit loss provisioning rate

Provision for credit losses on loans and off-balance sheet items expressed as a percentage of average gross loans and acceptances.

Credit risk

Risk of losses resulting from a borrower's, guarantor's, issuer's or counterparty's failure to honour its contractual obligations, whether or not such obligations appear on the Combined Balance Sheets.

Credit valuation adjustment

Adjustment representing the market value of a potential loss on over-the-counter derivatives due to counterparty and issuer risk.

Defined benefit pension plan

Pension plan guaranteeing each participant a defined level of retirement income that is often based on a formula set by the plan in terms of the participant's salary and years of service.

Derivative financial instrument, or derivative

Financial contract whose value fluctuates based on an underlying asset, but that does not require holding or delivering the underlying asset itself. Derivatives are used to transfer, modify or reduce current or expected risks, including risks related to interest and exchange rates and financial indexes.

Desjardins Group (Desjardins) component

Cooperative or subsidiary that is part of Desjardins Group.

Documentary letter of credit
Instrument issued for a member or a client that represents Desjardins Group's agreement to honour drafts presented by a third party upon completion of certain activities, up to a set maximum amount. Desjardins Group is exposed to the risk that the client does not ultimately pay the amount of the drafts. However, the amounts used are secured by the related goods.

Economic capital
Amount of capital that an institution must maintain, in addition to anticipated losses, to ensure its solvency over a certain horizon and at a high confidence level.

Effective interest rate
Rate determined by discounting total future cash flows, including those related to commissions paid or received, premiums or discounts and transaction costs.

Effective tax rate
Income tax expense on surplus earnings expressed as a percentage of operating surplus earnings.

Environmental or social risk
Risk that the impact of an environmental or social event or issue in connection with Desjardins Group’s operations or its financing, investing or insurance activities, which could result in financial losses or harm its reputation. This risk may also materialize indirectly through business relations with other entities whose operations could involve Environmental, Social or Governance (ESG) issues.

Exposure at default (EAD)
Estimate of the amount of a given exposure at time of default. For balance sheet exposures, it corresponds to the balance as at observation time. For off-balance sheet exposures, it includes an estimate of additional draws that may be made between observation time and default.

Exposures related to residential mortgage loans
In accordance with the regulatory capital framework, risk category that includes mortgage loans and credit margins secured by real property granted to individuals.

Fair value
Price that would be received to sell an asset or paid to transfer a liability in an orderly transaction at the measurement date.

Fair value measurement
Measurement to determine the approximate value at which financial instruments could be traded in a current transaction between willing parties.

Forward contract
Contractual commitment to sell or purchase a determined quantity of a specified underlying asset on a future specified date and at a predetermined price. These contracts, which are derivatives, are tailored and traded over the counter.

Forward exchange contract
Contractual commitment to sell or purchase a fixed amount of foreign currency on a specified future date and at a predetermined exchange rate.

Fraud and financial crime risk
Risk associated with acts conducted illegally by internal or external parties with the intent to cause harm, benefit from them or misappropriate assets belonging to Desjardins Group, members or clients, or risk associated with non-compliance by Desjardins Group with obligations arising from the anticipation, interpretation or application of a legislative or regulatory provision regarding financial crimes.

Futures contract
Contractual commitment to sell or purchase a determined quantity of a specified underlying asset on a future specified date and at a predetermined price. These contracts, which are derivatives, are standardized and exchange-traded.

Gross credit-impaired loan
A financial asset is credit impaired when one or more events that have a detrimental impact on the estimated cash flows of that financial asset have occurred. A financial asset is therefore considered credit-impaired when it is in default, unless the detrimental impact on the estimated future cash flows is considered insignificant. The definition of default is associated with an instrument for which contractual payments are 90 days past due, or certain other criteria.

Gross credit-impaired loans/gross loans and acceptances
Gross credit-impaired loans expressed as a percentage to total gross loans and acceptances.

Gross premiums written
In property and casualty insurance, the premiums stipulated in insurance policies issued during the year. In life and health insurance, insurance or annuity premiums for the policies or certificates issued during the year.

Group insurance premium
Payment that the insurance policyholder is required to make to maintain the contract in force. This payment represents the cost of insurance. The premium is directly proportional to the number of insured persons and the coverage chosen by the policyholder.

Guarantee and standby letter of credit

Irrevocable commitment by a financial institution to make payments in the event that a member or client cannot meet financial obligations to third parties. Desjardins Group's policy with respect to collateral received for these instruments is generally the same as for loans.

Hedge fund

Investment fund offered to accredited investors. A hedge fund manager enjoys great latitude with respect to the investment strategies to be used, which may include selling short, leverage, program trading, swaps, arbitrage and derivatives.

Hedging

Transaction designed to reduce or offset Desjardins Group's exposure to one or more financial risks that involves taking a position exposed to effects that are equivalent, but of opposite direction, to the effects of market fluctuations on an existing or forecasted position.

Incremental risk charge (IRC)

Additional capital charge related to default and migration risks of positions with issuer risk in trading portfolios.

Indemnification commitment related to securities lending

Commitment made to members and clients with whom Desjardins Group entered into securities lending agreements and intended to ensure that the fair value of the securities lent will be reimbursed if the borrower does not return the borrowed securities or if the fair value of assets held as collateral is insufficient to cover the fair value of the securities lent. These commitments usually mature before being used.

Individual insurance premium

Payment that the insurance policyholder is required to make to maintain the contract in force. This payment represents the cost of insurance and can sometimes include a savings component. The cost of insurance portion of the premium is directly proportional to the amount of risk underwritten by the insurer.

Insurance contract liabilities

Provision representing the amount of an insurance company's commitments toward all insureds and beneficiaries, established to guarantee the payment of benefits.

Insurance premium

Payment that the insurance policyholder is required to make to maintain the contract in force. This payment represents the cost of insurance and can sometimes include a savings component. The premium is directly proportional to the amount of risk underwritten by the insurer.

Insurance risk

- Life and health insurance risk is the risk that the amount and timing of benefits and expenses payable on life insurance, health insurance or annuity contract products differ from those expected.
- Property and casualty insurance risk is the risk that benefits payable on property and casualty insurance products differ from the amounts estimated when designing, pricing or measuring actuarial reserves.

Insurance sales

Metric used to measure growth in Wealth Management and Life and Health Insurance segment operations. It is equal to annualized gross new premiums under group and individual insurance policies.

Internal Models Method

Approach used to calculate, with internal models, risk-weighted assets for the four areas of market risk: interest rate risk, equity price risk, foreign exchange risk and commodity risk. The calculation is based on different risk measures, such as Value at Risk, stressed Value at Risk and the incremental risk charge (IRC).

Internal Ratings-Based Approach

Approach under which risk weighing is based on the type of counterparty (individuals, small or medium-sized business, large corporation, etc.) and risk-weighting factors determined using internal parameters: the borrower's probability of default, loss given default, applicable maturity and exposure at default.

Large loss

In property and casualty insurance, single claim having a significant cost.

Legal and regulatory risk

Risk associated with the non-compliance by Desjardins Group with obligations arising from the anticipation, interpretation or application of a legislative or regulatory provision or a contractual commitment, which could have an impact on the conduct of its operations, its reputation, its strategies and its financial objectives.

Leverage ratio

Ratio calculated as the capital measure, which is Tier 1 capital, divided by the exposure measure. The exposure measure includes:

- on-balance sheet exposures;
- securities financing transaction exposures;
- derivative exposures; and
- off-balance sheet items.

Liquidity coverage ratio
Ratio determined by dividing the stock of unencumbered HQLA by the amount of net cash outflows for the next 30 days assuming an acute liquidity stress scenario.

Liquidity risk
Risk related to Desjardins Group's capacity to raise the necessary funds (by increasing liabilities or converting assets) to meet a financial obligation, whether or not it appears on the Combined Balance Sheets.

Loss given default (LGD)
Economic loss that may be incurred should the borrower default, expressed as a percentage of exposure at default.

Market risk
Risk of loss arising from changes in the fair value of financial instruments as a result of fluctuations in the parameters affecting this value, in particular, interest rates, exchange rates, credit spreads and their volatility.

Master netting agreement
Standard agreement developed to reduce the credit risk of multiple derivative transactions by creating a legal right to set off the obligations of a counterparty in the event of default.

Matching
Process of adjusting asset, liability and off-balance sheet item maturities in order to reduce risks related to interest or exchange rates and financial indexes. Matching is used in asset/liability management.

Member dividend
As a cooperative financial group, Desjardins Group distributes to its members a portion of its surplus earnings for a given year, taking into account its financial capacity. This distribution, called member dividend, is paid by the caisses and tailored to each member based on the use they make of their cooperative's financial services.

Morbidity rate
Probability that a person of a given age will suffer an illness or disability. The accident/health insurance premium paid by a person belonging to a particular age group is based on this group's morbidity rate.

Mortality rate
Rate of death in a particular group of persons. The life insurance premium paid by a person belonging to a particular age group is based on this group's mortality rate.

Mortgage-backed security
Security created through the securitization of a pool of residential mortgage loans under the *National Housing Act*.

Net interest income
Difference between what a financial institution receives on assets such as loans and securities and what it pays out on liabilities such as deposits and subordinated bonds.

Net interest margin
Net interest income expressed as a percentage of average interest-bearing assets.

Net premiums
In property and casualty insurance, premiums earned for a given period, net of reinsurance premiums. In life and health insurance, comprise insurance premiums and annuity premiums, net of reinsurance premiums.

Net sales of savings products
Metric used to measure growth in Wealth Management and Life and Health Insurance segment operations. It is equal to sales of group and individual savings products manufactured and distributed by segment entities, and is comprised of on- or off-balance sheet deposits, less redemptions.

Net stable funding ratio (NSFR)
Ratio determined by dividing available stable funding, designated by capital and liabilities, by required stable funding, designated by assets.

Notional amount
Reference amount used to calculate payments for instruments such as forward rate agreements and interest rate swaps. This amount is called "notional" because it does not change hands.

NVCC subordinated notes
Securities that meet the non-viability contingent capital (NVCC) requirements set out in the guideline on adequacy of capital base standards applicable to financial services cooperatives issued by the AMF, in particular securities issued by the Federation with a clause providing for their automatic conversion into capital shares of the Federation upon the occurrence of a trigger event as defined in the guideline.

Off-balance sheet exposure
Includes guarantees, commitments, derivatives and other contractual agreements whose total notional amount may not be recognized on the balance sheet.

Office of the Superintendent of Financial Institutions (OSFI)
Organization whose mission is to enforce all laws governing the financial industry in Canada, particularly as concerns banks, insurance companies, trust companies, loan companies, cooperative credit associations, fraternal companies and private pension plans subject to federal oversight.

Operational risk
Risk of inadequacy or failure attributable to processes, people, internal systems or external events and resulting in losses or failure to achieve objectives and takes into account the impact of failures on the achievement of the strategic objectives of the relevant component or Desjardins Group, as the case may be.

Option
Contractual agreement that grants the right, but not the obligation, to sell (put option) or to buy (call option) a specified amount of a financial instrument at a predetermined price (the exercise or strike price) on or before a specified date.

Other retail client exposures
In accordance with the regulatory capital framework, risk category that includes all loans granted to individuals except for exposures related to residential mortgage loans and qualifying revolving retail client exposures.

Pension plan
Contract under which participants receive retirement benefits under certain terms starting at a given age. A pension plan is funded through contributions made either by the employer alone or by both the employer and the participants.

Price risk
Risk of potential loss resulting from a change in the market value of assets (shares, commodities, real estate properties, index-based assets) but not resulting from a change in interest or foreign exchange rates or in the credit quality of a counterparty.

Privacy risk
Risk associated with inadequate handling of personal information (theft or breach, loss, collection, consent management, use, disclosure, retention, destruction or infringement of the rights of individuals related to their personal information) through intentional or unintentional actions (internal threat, error, negligence or omission). The key consequences of privacy risk deal with Desjardins Group’s reputation, compliance and potential financial losses.

Probability of default (PD)
Probability that a borrower defaults on his obligations over a period of one year.

Provision for credit losses
Amount recognized in profit or loss to bring the allowance for credit losses to a level determined appropriate by management. It includes provisions for credit losses on unimpaired and impaired financial assets.

Qualifying revolving retail client exposures
In accordance with the regulatory capital framework, risk category that includes credit card loans and unsecured credit margins granted to individuals.

Ratio of employee benefits to total base compensation
Employee benefits expressed as a percentage of salaries.

Regulatory capital
In accordance with the definition set out in the guideline on adequacy of capital base standards applicable to financial services cooperatives issued by the AMF, the regulatory capital under Basel III comprises Tier 1A capital, Tier 1 capital and Tier 2 capital. The composition of these various tiers is presented in the “Capital management” section of the Management's Discussion and Analysis.

Regulatory funds
Funds needed to cover unexpected losses, calculated according to parameters and methods prescribed by regulatory authorities.

Reinstatement premium
Premium payable to restore the original reinsurance coverage limit that has been reduced by the occurrence of a catastrophe. Reinstatement premiums are recognized in net premiums.

Reinsurance treaty
Agreement whereby one insurer assumes all or part of a risk undertaken by another insurer. Despite the treaty, the original insurer remains fully liable to its policyholders for the insurance obligations.

Repurchase agreement
Agreement involving both the sale of securities for cash and the repurchase of these securities for value at a later date. This type of agreement represents a form of short-term financing.

Reputation risk
Risk that a negative perception by the stakeholders, whether or not justified, of Desjardins Group's practices, actions or lack of action could have an unfavourable impact income and equity, and the trust that Desjardins Group inspires.

Return on equity

Return on equity is equal to surplus earnings before member dividends, excluding the non-controlling interests' share, expressed as a percentage of average equity before non-controlling interests.

Reverse repurchase agreement

Agreement involving both the purchase of securities for cash and the sale of these securities for value at a later date. This type of agreement represents a form of short-term financing.

Risk-weighted assets

Assets adjusted based on a risk-weighting factor prescribed by regulations to reflect the level of risk associated with items presented in the combined balance sheets. Some assets are not weighted, but rather deducted from capital. The calculation method is defined in the guidelines issued by the AMF. For more details, see the "Capital management" section of the Management's Discussion and Analysis.

Scaling factor

Adjustment representing 6.0% of risk assets measured using the Internal Ratings-Based Approach, applied to credit exposures in compliance with section 1.3 of the AMF guideline on the base capital adequacy guideline applicable to financial services cooperatives.

Securitization

Process by which financial assets, such as mortgage loans, are converted into asset-backed securities.

Security borrowed or purchased

Security typically borrowed or purchased to cover a short position. The borrowing or purchase usually requires that an asset, taking the form or cash or highly rated securities, be pledged as collateral by the borrower.

Security lent or sold

Security typically lent or sold to cover a short position of the borrower. The loan or sale usually requires that an asset, taking the form or cash or highly rated securities, be pledged as collateral by the borrower.

Security sold short

Commitment by a seller to sell a security it does not own. Typically, the seller initially borrows the security to deliver it to the purchaser. At a later date, the seller buys an identical security to replace the borrowed security.

Segregated fund

Type of fund offered by insurance companies through a variable contract that provides the contract holder with a number of guarantees, such as principal repayment upon death. Segregated funds encompass a range of categories of securities and are designed to meet a variety of investment objectives. Segregated fund deposits represent amounts invested by clients. Segregated funds are comprised of investment funds with capital guaranteed upon death or at maturity.

Segregated fund deposits

Amounts paid by annuity contract holders in order to invest in segregated funds. Individual annuity contracts provide for a guarantee of the principal on death or at maturity.

Standardized Approach

- Credit risk
  Default approach used to calculate risk-weighted assets. Under this method, the entity uses valuations performed by external credit assessment institutions recognized by the AMF to determine the risk-weighting factors related to the various exposure categories.
- Market risk
  Default approach used to calculate risk-weighted assets for the four areas of market risk: interest rate risk, equity price risk, foreign exchange risk and commodity risk. The calculation is based on predefined rules such as those on the size and nature of the financial instruments held.
- Operational risk
  Risk measurement approach used to assess the capital charge for operational risk. For this measurement, activities are divided into predefined business lines for a financial institution. The capital charge is calculated by multiplying each business line's gross income by a specific factor. The total capital charge represents the three-year average of the summation of the capital charges across each of the business lines in each year.

Strategic risk

Risk of loss of value attributable to the occurrence of external and internal events or the implementation of inadequate strategies that might prevent the relevant component or Desjardins Group from achieving its strategic objectives.

Stressed Value at Risk (VaR)

Value calculated in the same way as the Value at Risk, except for the historical data used, which are for a one-year stress period.

Structural interest rate risk

Risk related to the potential impact of interest rate fluctuations on net interest income and the economic value of equity.

Structured entity

Entity that has been designed so that voting rights or similar rights are not the dominant factor in deciding who controls the entity, such as when any voting rights relate to administrative tasks only and the relevant activities are directed by means of contractual arrangements. A structured entity often has some or all of the following features or attributes: restricted activities, a narrow and well-defined objective, insufficient equity to permit it to finance its activities without subordinated financial support, or financing in the form of multiple contractually linked instruments to investors.

Subordinated note
Unsecured note whose repayment in the event of liquidation is subordinated to the prior repayment of certain other creditors.

Subsidiary
Company controlled by the Federation.

Swap
Derivative financial instrument under which two parties agree to exchange interest rates or currencies for a specified period according to predetermined rules.

TLAC leverage ratio
Ratio determined by dividing the total loss absorbing capacity by the exposure measure. The exposure measure is independent from risk and includes:
– on-balance sheet exposures;
– securities financing transaction exposures;
– derivative exposures; and
– off-balance sheet items.

TLAC ratio
Ratio determined by dividing the total loss absorbing capacity (TLAC) by risk-weighted assets.

Total loss absorbing capacity – TLAC
Regulatory capital and instruments that meet the eligibility criteria set out in the Total Loss Absorbing Capacity Guideline issued by the AMF.

Underwriting experience
In life and health insurance, the difference between actual results and actuarial assumptions used to determine premiums or actuarial liabilities, as applicable.

Unused exposure
Amount of credit authorizations offered in the form of margins or loans that is not yet used.

Used exposure
Amount of funds invested in or advanced to a member or client.

Value at Risk (VaR)
Potential loss that could occur by the next business day in normal market conditions and at a confidence level of 99% (approximate loss that could occur once every 100 days).
