

5 memorization techniques

1 Mental imagery

Come up with funny images to remember the information.

2 Peg system

To remember something in order, associate an image with the number. *Example: one = bun, two = shoe, three = tree, four = door*

3 Acronyms

Use the first letter of each word to make a new word.
*Example: Order of operations for math – BEDMAS
(Brackets, exponents, division/multiplication, addition/subtraction)*

4 Songs

Make up a song about what you need to remember.

5 Phrases or expressions

Use the first letter in each word to make a sentence.
Example: Order of points on a compass – Never eat shredded wheat.
