GRI 102-9  SUPPLY CHAIN

To learn more, see section 4.4 – Responsible procurement of the Social and Cooperative Responsibility Report.

GRI 102-10  SIGNIFICANT CHANGES TO THE ORGANIZATION AND ITS SUPPLY CHAIN

• April 1, 2018 marked the creation of Aviso Wealth, one of Canada’s largest wealth management firms, thanks to a partnership between provincial credit union centrals, Desjardins and CUMIS.
• Zag Bank will be gradually winding down its operations with a target closure of 2019.
• Aside from regular supplier turnover from one-time initiatives, there were no documented significant changes to our stable supply chain.
GRI 102-11  PRECAUTIONARY PRINCIPLE OR APPROACH

At Desjardins, we take our environmental impact seriously and have made environmental and social risks a part of our risk management framework. In reviewing credit applications from commercial, industrial, real estate or agricultural borrowers, we examine potential environmental risks against current regulations. In 2018, we also started analyzing environmental, social and governance (ESG) criteria that apply to capital market borrowers. Considering ESG criteria is also an integral part of the risk analyses we conduct for our large-scale initiatives.

GRI 102-12  EXTERNAL INITIATIVES

As a corporate citizen committed to sustainable community development, Desjardins supports many initiatives:

- CDP (formerly the Carbon Disclosure Project) – Signatory (2013)
- Declaration of the International Co-operative Alliance – Signatory
- Principles for Positive Impact Finance – Signatory (2017)

Développement international Desjardins supports the following initiatives:

- Principles for Responsible Investment – Signatory (2014)
- Smart Campaign for the protection of microfinance clients – Signatory (2011)
GRI 102-13 MEMBERSHIP OF ASSOCIATIONS

Desjardins maintains close relationships with a number of associations, institutions and public agencies. This may involve a member of our senior management or Board of Directors (Board) sitting on one of our partners’ boards or participating in an advisory committee or working group, or it may take the form of financial support.

GRI 102-14 AND 102-15: STRATEGY AND ANALYSIS

GRI 102-14  STATEMENT FROM SENIOR DECISION-MAKER
See pages 9 to 10 of the Social and Cooperative Responsibility Report to read the Message from the President and CEO.

GRI 102-15  KEY IMPACTS, RISKS AND OPPORTUNITIES

Identification and management of main risks
At Desjardins, we believe it’s important to periodically assess the environment in which we operate and to identify key risks, main risk factors and emerging risks. That’s why we keep a log of risks that are likely to affect our results. We update this risk log at least once a year and use it to make a quantitative and qualitative assessment of risk materiality, to determine our risk profile and to implement appropriate strategies to mitigate risk.

Our Risk Management Division ensures that our risk profile corresponds to our risk appetite. Each quarter, Risk Management ensures that we comply with the statements and indicators set by senior management and the Board of Directors (Board) and provides them with an update. When a risk appetite indicator threshold or limit is exceeded, we look into it immediately. We then inform the appropriate bodies why this occurred and notify them of the action plan, if applicable.

A detailed presentation of our risk management principles, especially in terms of environmental and social risk, can be found in the Risk Management section of the annual report’s Management’s Discussion and Analysis (https://desjardins.com/annualreport).

The complete mandate and composition of the commissions and committees that support the Board in the performance of its duties are available on our website at https://www.desjardins.com/ca/about-us/desjardins/governance-democracy/index.jsp. Additional information specifically about the Risk Management Commission and its governance practices can also be found there.

GRI 102-16 TO 102-17: ETHICS AND INTEGRITY

GRI 102-16  VALUES, PRINCIPLES AND NORMS OF BEHAVIOUR

Culture of integrity
The Board is responsible for promoting Desjardins’s cooperative values—money at the service of human development, democratic action, personal commitment, integrity and rigour in cooperative enterprises, solidarity with the community and inter-cooperation—with a view to earning the trust of the public and ensuring members and clients have confidence in their financial services cooperative. The Board is also responsible for enforcing our rules of professional conduct. Our Code of Professional Conduct (Code), which is available to the public on Desjardins.com, applies to all Desjardins entities. It includes 2 sections: one covering our ethics, mission and values, and a second outlining all our rules of professional conduct. All Desjardins employees and directors can take 2 online training courses on professional conduct and conflicts of interest. Every year, all our employees and directors are required to acknowledge that they’ve read the Code and agree to uphold it.
GRI 102-17 MECHANISMS FOR ADVICE AND CONCERNS ABOUT ETHICS

Our Board of Ethics and Professional Conduct (BEPC) adopts rules of professional conduct for Desjardins directors, and Federation and caisse employees and directors. Our Board of Directors (Board) must ratify these rules before they can come into effect. The BEPC works collaboratively with our subsidiaries, but has no authority over them.

The BEPC is responsible for promoting the values, principles and rules of our Code of Professional Conduct (Code). It also handles professional conduct issues that fall under its scope, and identifies and analyzes situations that raise ethical issues for Desjardins, especially those relating to our mission and values. The Federation also offers advisory services for the entire organization.

BEPC members are all independent from our management team and Board. For Desjardins caisses in Quebec, responsibility for ethics and professional conduct is assumed by an Audit and Professional Conduct Committee and a Governance and Ethics Committee made up of caisse directors. For caisses in Ontario, this responsibility is assumed by an Audit Committee made up of caisse directors. We also have a policy for reporting regulatory violations and violations of the Code. This policy is combined with a confidential reporting mechanism that protects the anonymity of those who use it.

We also oversee the financial reporting process and the disclosure of any major changes that may affect our financial position. We use various channels to ensure effective communication with our many stakeholders. These channels include: the Ombudsman, our ethics and professional conduct team and the caisse complaint handling procedure.

Other mechanisms used by Desjardins:

- Annual general meetings
- Disclosure of quarterly financial results
- Desjardins publications (including annual reports)
- Toll-free telephone numbers
- Intranet portals and the portal for caisse directors
- Desjardins.com (which includes information on education, cooperation and dialogue with our members and clients, and a Member Relations section)
- The Federation’s Member Services Committee
- Procedure for reporting violations of the Code and other regulatory instruments
- Newsletters
- Social media (Facebook, YouTube, LinkedIn, Twitter, etc.)

GRI 102-48  RESTATEMENTS OF INFORMATION
In 2018, GHG emissions were calculated for all sources over which we have financial control, including rental space we occupy and space we own that's occupied by third parties (real estate investments). Estimates were used for these sites when data was not available. In order to perform data quality control earlier in the reporting cycle and reduce the risk of incomplete data, the data collection period for Energy indicators is from November 1 to October 31. The data collection period for all other indicators is from January 1 to December 31.

Where minor restatements were necessary, it has been indicated in the text.
