⁽⁴⁾ See "Basis of presentation of financial information".

MESSAGE FROM SENIOR MANAGEMENT

Lévis, May 15, 2018 — For the first quarter ended March 31, 2018, the Federation posted surplus earnings before dividends to member caisses of \$359 million, a \$130 million increase compared to the corresponding quarter of 2017. Adjusted surplus earnings were up \$122 million. This performance is due, in particular, to higher gains on investments and higher income from growth in assets under management.

This result reflects the contribution of \$106 million made by the Personal and Business Services segment. The Wealth Management and Life and Health Insurance segment contributed \$206 million, while the Property and Casualty Insurance segment contributed \$26 million. A \$21 million contribution to surplus earnings resulted from the operations grouped under the Treasury and Other Support to Desjardins Group Entities category.

"2018 is off to a great start, with first quarter results up over where they stood in Q1 2017," said Guy Cormier, President and Chief Executive Officer. "In terms of performance, we're finding ways to improve our services, expand our socioeconomic leadership role and execute our digital shift to the benefit of our members and clients."

The Federation complies with Basel III rules and maintains very good capitalization. As at March 31, 2018, its Tier 1A and total capital ratios were both 16.6%, compared to 17.5% as at December 31, 2017.

MANAGEMENT'S DISCUSSION AND ANALYSIS

The Management's Discussion and Analysis (MD&A) dated May 15, 2018 presents the analysis of the results of and main changes to the Federation's balance sheet for the period ended March 31, 2018, in comparison to previous periods. The Federation reports financial information in compliance with *Regulation 52-109 respecting Certification of Disclosure in Issuers' Annual and Interim Filings* prescribed by the Canadian Securities Administrators (CSA). Information on the Federation's controls and procedures is presented in the "Additional information" section of this MD&A.

This MD&A should be read in conjunction with the unaudited Condensed Interim Consolidated Financial Statements (the Interim Consolidated Financial Statements), including the notes thereto, as at March 31, 2018, and the Federation's 2017 Annual Report (the 2017 Annual Report), which contains the MD&A and the audited Annual Consolidated Financial Statements (the Annual Consolidated Financial Statements).

Additional information about the Federation is available on the website of the System for Electronic Document Analysis and Retrieval (SEDAR) at www.sedar.com (under the *Fédération des caisses Desjardins du Québec* profile), where its Annual Information Form can be found as well. Further information is available on the Desjardins website at www.desjardins.com/ca/about-us/investor-relations. However, none of the information presented on these sites is incorporated by reference into this MD&A.

CAUTION CONCERNING FORWARD-LOOKING STATEMENTS

The Federation's public communications often include oral or written forward-looking statements. Such forward-looking statements are contained in this MD&A and may be incorporated in other filings with Canadian regulators or in any other communications. Forward-looking statements in this MD&A include, but are not limited to, comments about the Federation's objectives regarding financial performance, priorities, operations, the review of economic conditions and markets, as well as the outlook for the Canadian, U.S., European and other international economies. These forward-looking statements include, among others, those appearing in the "Economic environment and outlook", "Review of financial results", "Balance sheet review" and "Additional information" sections of this MD&A. Such statements are typically identified by words or phrases such as "believe", "expect", "anticipate", "intend", "estimate", "plan" and "may", words and expressions of similar import, and future and conditional verbs.

By their very nature, such statements involve assumptions, uncertainties and inherent risks, both general and specific. It is therefore possible that, due to many factors, the assumptions formulated may be incorrect, or the predictions, forecasts or other forward-looking statements as well as the Federation's objectives and priorities may not materialize or may prove to be inaccurate and that actual results differ materially. The Federation cautions readers against placing undue reliance on these forward-looking statements since actual results, conditions, actions and future events could differ significantly from the targets, expectations, estimates or intents in the forward-looking statements, either explicitly or implicitly.

A number of factors, many of which are beyond the Federation's control and the effects of which can be difficult to predict, could influence the accuracy of the forward-looking statements in this MD&A. These factors include those discussed in Section 4.0, "Risk management", of the 2017 annual MD&A, such as credit, market, liquidity, operational, insurance, strategic and reputation risk. Additional factors include regulatory and legal environment risk, including legislative or regulatory developments in Quebec, Canada or globally, such as changes in fiscal and monetary policies, reporting guidance, liquidity regulatory guidance and capital guidelines, or interpretations thereof. There is also environmental risk, which is the risk of financial, operational or reputational loss for the Federation as a result of environmental impacts or issues, whether they are a result of the Federation's financing, investment or insurance activities or its operations. Lastly, there is the risk related to pension plans, which is the risk of losses resulting from pension plan commitments made by the Federation for the benefit of its employees arising essentially from interest rate, price, foreign exchange and longevity risks.

Additional factors that may affect the accuracy of the forward-looking statements in this MD&A also include factors related to cyber threats, technological advancement and regulatory developments, household indebtedness and real estate market trends, the low interest rate environment and geopolitical risks. Furthermore, there are factors related to general economic and business conditions in regions in which the Federation operates; changes in the economic and financial environment in Quebec, Canada and globally, including short- and long-term interest rates, inflation, debt market fluctuations, foreign exchange rates, the volatility of capital markets, tighter liquidity conditions in certain markets, the strength of the economy and the volume of business conducted by the Federation in a given region; monetary policies; the accuracy and completeness of information concerning clients and counterparties; the critical accounting estimates and accounting standards applied by the Federation; new products and services to maintain or increase the Federation's market share; geographic concentration; acquisitions and joint arrangements; credit ratings; catastrophes and climate change.

Other factors that could influence the accuracy of the forward-looking statements in this MD&A include amendments to tax laws, unexpected changes in consumer spending and saving habits, the ability to implement the Federation's disaster recovery plan within a reasonable time, the potential impact of international conflicts or natural disasters, and the Federation's ability to anticipate and properly manage the risks associated with these factors, despite a disciplined risk management environment.

It is important to note that the above list of factors that could influence future results is not exhaustive. Other factors could have an adverse effect on the Federation's results. Additional information about these and other factors is found in Section 4.0, "Risk management" of the 2017 annual MD&A. Although the Federation believes that the expectations expressed in these forward-looking statements are reasonable, it cannot guarantee that these expectations will prove to be correct. The Federation cautions readers against placing undue reliance on forward-looking statements when making decisions. Readers who rely on these statements must carefully consider these risk factors and other uncertainties and potential events.

The significant economic assumptions underlying the forward-looking statements in this MD&A are described under "Economic outlook for 2018" in the 2017 annual MD&A. These assumptions may also be updated in the quarterly MD&As under "Economic environment and outlook". Any forward-looking statements contained in this MD&A represent the views of management only as at the date hereof, and are presented for the purpose of assisting readers in understanding and interpreting the Federation's balance sheet as at the dates indicated or its results for the periods then ended, as well as its strategic priorities and objectives. These statements may not be appropriate for other purposes. The Federation does not undertake to update any oral or written forward-looking statements that could be made from time to time by or on behalf of the Federation, except as required under applicable securities legislation.

THE FEDERATION'S PROFILE

The Federation is a cooperative entity which is responsible for assuming orientation, framework, coordination, treasury and development activities for Desjardins Group, and acts as a financial agent on Canadian and international capital markets. It provides its member caisses—namely 271 member caisses in Quebec and Ontario as at March 31, 2018—with a variety of services, including certain technical, financial and administrative services.

The Federation enables the caisses and other Desjardins Group components to accelerate their development and better respond to the needs of their members and clients. The Federation's structure has been designed to take into account the needs of Desjardins Group's members and clients, as well as the markets in which it operates.

The Federation is the treasurer and official representative of Desjardins Group with the Bank of Canada and the Canadian banking system.

The Federation also has the right to participate in the Visa Inc. and MasterCard Inc. payment systems in Canada on behalf of Desjardins Group. In addition, it manages majority interests in joint-stock companies through holding companies.

SIGNIFICANT EVENT IN 2018

Creation of Aviso Wealth

On April 1, 2018, Desjardins Group and a partnership comprised of Canada's five provincial credit unions (the Centrals) and The CUMIS Group combined their subsidiaries Credential Financial Inc., Qtrade Canada Inc. and Northwest & Ethical Investments to create Aviso Wealth, a wealth management company held in equal shares by Desjardins Group and a partnership between the Centrals and The CUMIS Group. The results of the subsidiary Qtrade Canada Inc. and the interest held in the associate Northwest & Ethical Investments are presented in the Wealth Management and Life and Health Insurance segment. The results of Aviso Wealth will also be presented in this segment.

BASIS OF PRESENTATION OF FINANCIAL INFORMATION

The Annual and Interim Consolidated Financial Statements have been prepared by the Federation's management in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB) and the accounting requirements of the *Autorité des marchés financiers* (AMF) in Quebec, which do not differ from IFRS. These Interim Consolidated Financial Statements of the Federation have been prepared in accordance with International Accounting Standard (IAS) 34, "Interim Financial Reporting". The accounting policies were applied as described in Note 2, "Basis of presentation and significant accounting policies", to the Annual Consolidated Financial Statements, except for the amendments described in Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements as a result of the adoption of IFRS 9, "Financial Instruments", IFRS 15, "Revenue from Contracts with Customers", and amendments to IFRS 4, "Insurance Contracts", on January 1, 2018. For more information about the accounting policies applied, see the Annual and Interim Consolidated Financial Statements.

This MD&A was prepared in accordance with the regulations in force on continuous disclosure obligations issued by the CSA. Unless otherwise indicated, all amounts are presented in Canadian dollars (\$) and are primarily from the Federation's Annual and Interim Consolidated Financial Statements.

To assess its performance, the Federation uses IFRS measures and various non-IFRS financial measures. Non-IFRS financial measures, other than the regulatory ratios, do not have a standardized definition and are not directly comparable to similar measures used by other companies, and may not be directly comparable to any IFRS measures. Investors, among others, may find these non-IFRS measures useful in analyzing financial performance. The measures currently used are defined as follows:

Adjusted surplus earnings of the Federation before dividends to member caisses

The concept of adjusted surplus earnings is used to exclude specific items in order to present financial performance based on operating activities. These specific items, such as acquisitions and disposals, are unrelated to operations.

The Federation's surplus earnings before dividends to member caisses are adjusted to exclude the following specific items: the gain and expenses, net of income taxes, related to the sale of the subsidiaries Western Financial Group Inc. and Western Life Assurance Company, completed on July 1, 2017.

The following table presents a reconciliation of surplus earnings before dividends to member caisses as presented in the Consolidated Financial Statements and the adjusted surplus earnings as presented in the MD&A.

(in millions of dollars)	For the three-month periods ended		
	March 31, 2018 ⁽¹⁾	December 31, 2017	March 31, 2017
Presentation of the surplus earnings before dividends to member caisses in the Consolidated Financial Statements	\$ 359	\$ 181	\$ 229
Specific items, net of income taxes			
Expenses related to the sale of Western Financial Group Inc. and Western Life Assurance Company	-	-	8
Presentation of the adjusted surplus earnings before dividends to member caisses	\$ 359	\$ 181	\$ 237

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

Adjusted net surplus earnings – Property and Casualty Insurance segment

The net surplus earnings of the Property and Casualty Insurance segment (P&C) are adjusted to exclude the following specific items: the gain and expenses, net of income taxes, related to the sale of the subsidiaries Western Financial Group Inc. and Western Life Assurance Company, completed on July 1, 2017.

The following table presents a reconciliation of the net surplus earnings of the Property and Casualty Insurance segment as presented in the Consolidated Financial Statements, and the adjusted net surplus earnings as presented in the MD&A.

(in millions of dollars)	For the three-month periods ended		
	March 31, 2018 ⁽¹⁾	December 31, 2017	March 31, 2017
Presentation of the net surplus earnings (deficit) of the Property and Casualty Insurance segment in the Consolidated Financial Statements	\$ 26	\$ 48	\$ (18)
Specific items, net of income taxes			
Expenses related to the sale of Western Financial Group Inc. and Western Life Assurance Company	-	-	13
Presentation of the adjusted net surplus earnings (deficit) of the Property and Casualty Insurance segment	\$ 26	\$ 48	\$ (5)

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

Gross credit-impaired loans/gross loans and acceptances ratio

The gross credit-impaired loans/gross loans and acceptances ratio is used to measure loan portfolio quality and is equal to gross credit-impaired loans expressed as a percentage of total gross loans and acceptances. Further to the adoption of IFRS 9 on January 1, 2018, all loans included in Stage 3 of the impairment model are considered to be credit-impaired. The criteria for considering a loan to be impaired were different under IAS 39. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

The "Gross credit-impaired loans by borrower category" table, of Federation's MD&A provides more detailed information on this indicator.

Average loans and acceptances – Average deposits – Average equity

The average balances for these items are used to measure growth. They are equal to averages of the amounts presented in the Consolidated Financial Statements at the end of the quarters calculated starting from the quarter prior to the period concerned.

Loss ratio – Expense ratio – Combined ratio

These ratios are used to measure the profitability of the Property and Casualty Insurance segment.

The loss ratio is equal to incurred claims less reinsurance, expressed as a percentage of net premiums earned, excluding the market yield adjustment. Market yield adjustment is defined as the impact of changes in the discount rate on the provisions for claims and adjustment expenses based on the change in the market-based yield of the underlying assets for these provisions.

The loss ratio is comprised of the following ratios:

- Current year loss ratio, which is the loss ratio excluding catastrophe and major event claims expenses for the current year as well as changes in prior year claims, net of related reinsurance, not including reinstatement premiums, as applicable.
- Loss ratio related to catastrophes and major events, which is the loss ratio including catastrophe and major event claims expenses for the current year, net of reinsurance and including the impact of reinstatement premiums, as applicable.
- Ratio of changes in prior year claims, which is the loss ratio including, in the numerator, the effect of changes in total prior year claims for a given period, net of related reinsurance, not including, in the denominator, reinstatement premiums, as applicable.

The expense ratio is equal to operating expenses expressed as a percentage of net premiums earned.

The combined ratio is equal to the sum of the above two ratios.

The following table presents the calculation of these ratios as presented in the MD&A.

(in millions of dollars and as a percentage)	For the three-month periods ended		
	March 31, 2018	December 31, 2017	March 31, 2017
Net premiums	\$ 1,059	\$ 983	\$ 965
Premiums excluded from the loss ratio ⁽¹⁾	-	-	(32)
Net premiums considered in the ratio denominators	\$ 1,059	\$ 983	\$ 933
Claims, benefits, annuities, and changes in insurance contract liabilities	\$ 815	\$ 599	\$ 719
Market yield adjustment (MYA)	27	(10)	(16)
Other items excluded from the loss ratio ⁽¹⁾	-	-	(8)
Claims, benefits, annuities and changes in insurance contract liabilities excluding the MYA	\$ 842	\$ 589	\$ 695
Loss ratio	79.5%	59.9%	74.5%
Non-interest expense	\$ 277	\$ 249	\$ 326
Other expenses excluded from the expense ratio ⁽²⁾	(4)	(1)	(74)
Operating expenses	\$ 273	\$ 248	\$ 252
Expense ratio	25.8%	25.2%	27.0%
Combined ratio	105.3%	85.1%	101.5%

⁽¹⁾ Comes mainly from the life insurance activities of Western Life Assurance Company, the sale of which was completed on July 1, 2017.

⁽²⁾ Comes mainly from the life insurance and insurance product distribution activities of Western Life Assurance Company and Western Financial Group Inc., including expenses related to the sale of these two entities on July 1, 2017.

Return on equity and adjusted return on equity

Return on equity is used to measure profitability resulting in value creation for members and clients. Expressed as a percentage, it is equal to surplus earnings before dividends to member caisses, excluding the non-controlling interests' share and interest paid to holders of PL and PL-2 investment shares (which are not eligible for the distribution of surplus earnings), divided by average equity before non-controlling interests and PL and PL-2 investment shares.

The following table presents the reconciliation of return on equity with surplus earnings before dividends to member caisses as presented in the MD&A.

(in millions of dollars and as a percentage)	For the three-month periods ended		
	March 31, 2018 ⁽¹⁾	December 31, 2017	March 31, 2017
Surplus earnings before dividends to member caisses	\$ 359	\$ 181	\$ 229
Non-controlling interests' share	(9)	(9)	(5)
Group's share	\$ 350	\$ 172	\$ 224
Average equity before non-controlling interests' share	\$ 15,143	\$ 15,255	\$ 13,943
Return on equity⁽²⁾	9.4%	4.5%	6.5%
Adjusted return on equity⁽²⁾⁽³⁾	9.5%	4.5%	6.7%

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ Corresponds to an annualized calculation that takes into account the number of days in the period concerned.

⁽³⁾ Takes into account the specific items presented under "Adjusted surplus earnings of the Federation before dividends to member caisses" subsection in this section.

Income

Operating income

The concept of operating income is used to analyze financial results. This concept allows for better structuring of financial data and makes it easier to compare operating activities from one period to the next by excluding the volatility of results specific to investments, particularly regarding the extent of life and health insurance and P&C insurance operations, for which a very large proportion of investments is recognized at fair value through profit or loss. The analysis therefore breaks down the Federation's income into two parts, namely operating income and investment income, which make up total income. This measure is not directly comparable to similar measures used by other companies.

Operating income includes net interest income, generated mainly by the Personal and Business Services segment and the Treasury and Other Support to Desjardins Group Entities category, net premiums and other operating income such as assessments, service agreements, lending fees and credit card service revenues, income from brokerage and investment fund services, management and custodial service fees, foreign exchange income as well as other income. These items, taken individually, correspond to those presented in the Consolidated Financial Statements.

Investment income

Investment income includes net investment income on securities classified and designated as being at fair value through profit or loss, net investment income on securities classified as being at fair value through other comprehensive income, and net investment income on securities measured at amortized cost and other investment income included in the Consolidated Statement of Income under "Net investment income". It also includes the overlay approach adjustment for insurance operations financial assets. The life and health insurance and P&C insurance subsidiaries' matching activities, which include changes in fair value, gains and losses on disposals and interest and dividend income on securities, are presented with investment income, given that these assets back insurance liabilities, for which results are recognized under expenses related to claims, benefits, annuities and changes in insurance contract liabilities in the Consolidated Financial Statements. In addition, this investment income includes changes in the fair value of investments for the Personal and Business Services segment, recognized at fair value through profit or loss. The presentation of 2017 investment income does not take into account the standards and amendments adopted on January 1, 2018 and was therefore compliant with IAS 39. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

The following table shows the correspondence of total income between the MD&A and the Consolidated Financial Statements.

(in millions of dollars)	For the three-month periods ended		
	March 31, 2018 ⁽¹⁾	December 31, 2017	March 31, 2017

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ The breakdown of this line item is presented in Note 12, "Net interest income and net investment income", to the Interim Consolidated Financial Statements.

Credit loss provisioning rate

The credit loss provisioning rate is used to measure loan portfolio quality, and is equal to the provision for credit losses divided by average gross loans and acceptances.

The following table presents the calculation of the credit loss provisioning rate as presented in the MD&A.

(in millions of dollars and as a percentage)	For the three-month periods ended		
	March 31, 2018 ⁽¹⁾	December 31, 2017	March 31, 2017
Provision for credit losses	\$ 89	\$ 74	\$ 73

Average gross acceptances	37	86	58
Average gross loans and acceptances	\$ 58,447	\$ 57,705	\$ 52,911
Credit loss provisioning rate⁽²⁾	0.62%	0.51%	0.56%

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ Corresponds to an annualized calculation that takes into account the number of days in the period concerned.

CHANGES IN THE REGULATORY ENVIRONMENT

This section presents items related to changes in the regulatory environment that apply to Desjardins Group as a whole, including those specific to the Federation and its components.

Desjardins Group closely monitors changes in regulation as they relate to financial products and services, as well as new developments in fraud, corruption, tax evasion, protection of personal information, money laundering, terrorist financing and domestic and international economic sanctions in order to mitigate any negative impact on its operations, and aims to comply with best practices in this regard. Additional information can be found in the "Regulatory environment" section of the 2017 annual MD&A, and the "Capital management" section presents further information on regulatory developments relating to capital.

The Act respecting financial services cooperatives and the Act respecting the Mouvement Desjardins

On October 5, 2017, the Quebec Minister of Finance tabled Bill 141, *An Act mainly to improve the regulation of the financial sector, the protection of deposits of money and the operation of financial institutions* (the Bill) in the National Assembly. The Bill will have significant impacts on all institutions and intermediaries operating in Quebec's financial sector. Bill 141 is intended to update and modernize the legislative framework for Quebec's financial sector so that the financial institutions that it governs will have all the levers they need to operate in a very competitive environment and governance that is consistent with best practices. The Bill will have impacts on a series of laws, including the *Act respecting insurance*, the *Act respecting financial services cooperatives*, the *Act respecting the distribution of financial products and services* and the *Deposit Insurance Act*. The *Act respecting financial service cooperatives* will be amended to, among other things, prescribe the rules for organizing a network of financial services cooperatives and a financial group, and the rules for issuing capital shares and investment shares.

The Bill will also add a chapter concerning the *Groupe coopératif Desjardins* to replace the *Act respecting the Mouvement Desjardins* and strengthen financial solidarity mechanisms within Desjardins, among other things. In this way, the Bill will affirm the Federation's mission to manage Desjardins Group's risks and look after the financial health and sustainability of the cooperative group. The Federation and the *Fonds de sécurité Desjardins* will therefore be given additional special powers of supervision and intervention regarding the protection of creditors, including depositors, and the public interest. The proposed amendments to the *Deposit Insurance Act* include a proposal to have this Act govern the supervision and control of deposit-taking activities and the activities of authorized deposit-taking institutions, as well as recovery and resolution mechanisms in the event of failure of deposit-taking institutions. Furthermore, the Bill will provide for revised supervision for Quebec insurers, including the introduction of a modern regime for selling insurance over the Internet. The Public Finance Commission is currently studying the Bill, but the government's House leader has not yet publicly confirmed a specific timeline for passage of the Bill in its final version. Desjardins Group continues to closely monitor the legislative process and analyze developments and the impacts of this Bill.

Rules concerning capital instruments

The Capital Adequacy Requirements (CAR) Guideline of the Office of the Superintendent of Financial Institutions (OSFI) applicable to Canadian financial institutions includes requirements for Non-Viability Contingent Capital as part of regulatory capital. Desjardins Group, under the AMF's guideline on adequacy of capital base standards, is subject to similar rules applicable to non-viability contingent capital in its regulatory capital. However, Desjardins Group has not issued any instrument subject to these rules, given that discussions with the AMF are still underway on how Desjardins Group will apply them.

The Proceeds of Crime (Money Laundering) and Terrorist Financing Act

Desjardins Group is participating in work sessions with the Financial Transactions and Reports Analysis Centre of Canada (FINTRAC), the Department of Finance Canada and other industry players to discuss future regulatory changes to fight money laundering and terrorist financing (ML/TF). Desjardins Group was thus consulted for the new guidance entitled "Compliance program requirements", the draft guidance to replace "Guideline 2: Suspicious Transactions", the draft document on ML/TF indicators as well as for the public consultation as part of the examination of the Canadian ML/TF regime. While preparing for the implementation of these legislative changes, Desjardins Group is continuing to closely monitor developments to assess their impact on its operations.

Recapitalization regime for domestic systemically important banks

On April 18, 2018, the Department of Finance Canada published the final version of three regulations to implement the main features of the Bank Recapitalization (Bail-in) Regime and the OSFI issued the final version of its guideline on Total Loss Absorbing Capacity (TLAC). The introduction of the regulations and the TLAC guideline are intended to ensure that a non-viable domestic systemically important bank (D-SIB) has sufficient loss absorbing capacity to support its recapitalization. These regulations and the TLAC guideline will come into force on September 23, 2018. The D-SIBs will be required to issue the ratios specified in the TLAC guideline as of the quarter commencing November 1, 2018 and comply with the requirements of the TLAC guideline no later than November 1, 2021. This regime is not applicable immediately to Desjardins Group because it is regulated by the AMF. Furthermore, the bill tabled by the Quebec government on October 5, 2017, as mentioned above, provides for certain recovery and resolution mechanisms in the event of failure of deposit-taking institutions. Desjardins Group continues to monitor developments in this file at the provincial level and is expecting the adoption and implementation of a recapitalization regime similar to the federal one.

Financial reforms in the U.S.

Should reform initiatives in the U.S. pertaining to financial regulation become a reality, they may affect non-U.S. financial institutions operating in the U.S., including Desjardins Group. It should be noted that the future of the reforms being considered is still uncertain when it comes to the U.S. Congress. The rules resulting from the *Dodd-Frank Wall Street Reform and Consumer Protection Act* which affect, in particular, the implementation of provisions on swap trading, proprietary trading and ownership interests in hedge funds (the Volcker rule), as well as those concerning the Enhanced Prudential Standards and the submission of a resolution plan, could be affected. Desjardins Group continues to closely monitor developments in these requirements and the reform initiatives.

Standard for automatic exchange of financial information in tax matters

The Organisation for Economic Co-operation and Development (OECD) has set up a "Standard for Automatic Exchange of Financial Information in Tax Matters", based on the same general principles and obligations as those of the *Foreign Account Tax Compliance Act*, but globally. The standard took effect in Canada on July 1, 2017, with the first exchange of information between Canada and the competent authorities on May 1, 2018. Desjardins Group has implemented various solutions to ensure its compliance while minimizing the impact on member and client experience.

Data confidentiality and security

Data confidentiality and security is a rapidly changing area. In Canada, new provisions of the *Personal Information Protection and Electronic Documents Act* (PIPEDA) should soon come into force. They will, in particular, require businesses to give notice of any breaches of security safeguards and impose the keeping of a register. Failure to give notice will result in a fine. It should be noted that in Europe, the *General Data Protection Regulation* (GDPR), which will come into force on May 25, 2018, provides for new obligations that will apply internationally to entities that control or process the personal data of citizens of the European Union. Several of these obligations, if applicable, could require changes to the processes used by Desjardins Group. In Quebec, consultations took place concerning amendments to *An Act respecting the protection of personal information in the private sector* (ARPPIS). Desjardins Group can expect that stricter rules will be adopted, and it is closely monitoring developments to assess the impacts on its operations.

New standard related to the third pillar of the Basel Committee on Banking Supervision

Desjardins Group continues to monitor changes in capital and liquidity requirements under global standards developed by the Basel Committee on Banking Supervision (BCBS). To this end, in January 2015, the Committee issued a new standard related to the third pillar, which aims to enhance comparability across financial institutions, transparency and disclosure with regard to regulatory capital adequacy and risk exposure. In December 2016, the AMF filed an update of its guideline on the adequacy of capital base standards, which includes provisions with respect to the third pillar. Desjardins Group is currently working to ensure compliance with these new requirements, which will take effect on December 31, 2018. In addition, in March 2017, the BCBS issued the second phase of the standard related to the third pillar. The AMF has not yet announced the effective date of the second phase.

Capital adequacy requirements for life and health insurers

In October 2016, the AMF issued the new *Capital Adequacy Requirements Guideline (CARLI) – Insurance of persons*. This new regulatory framework replaced the *Capital Adequacy Requirements Guideline (CAR) – Life and Health Insurance* as of January 1, 2018. Based on information currently available, the subsidiary Desjardins Financial Security Life Assurance Company complies with the requirements of the new guideline.

Report on Ontario's auto insurance plan

Based on a report by David Marshall on the province of Ontario's automobile insurance system, released in April 2017, the Ontario Finance Minister unveiled Ontario's Fair Auto Insurance Plan in December 2017, aimed at making automobile insurance more affordable for drivers and providing better care for accident victims. The Ontario government will be putting forward various initiatives in the short- and medium-term. Desjardins Group welcomes these initiatives and supports developments in Ontario's automobile insurance.

Guideline on granting residential mortgages

In February 2018, the AMF issued the revision of its guideline on granting residential mortgages, which went into effect in March 2018. The AMF's requirements are similar to those of the OSFI, issued in October 2017, which aim to encourage mortgage lenders to remain prudent in their mortgage underwriting practices and set a new minimum interest rate or "stress test" for uninsured mortgages. Desjardins Group has already applied these practices since January 1, 2018.

Modernization of the Canadian payments system

Technological progress and innovation affect the payments ecosystem, which is undergoing major changes. In 2016, Payments Canada launched a multiyear initiative to modernize the Canadian payments system. The Department of Finance Canada unveiled its project for a retail payments oversight framework in 2017. In December 2017, the Competition Bureau issued the final report from its market study concerning technology-led innovation in the Canadian financial services sector. The report suggests modernizing laws and regulations and provides recommendations for regulators. Desjardins Group continues to monitor work by the industry, the federal government and Payments Canada.

Qualified Intermediary Agreement

The U.S. Qualified Intermediary regime allows clients of financial intermediaries to benefit from more streamlined administrative procedures and more readily take advantage of the reduced tax rates allowed under tax agreements concerning taxable U.S. source income. For their part, financial institutions must comply with the sometimes-complex provisions of an agreement established by the U.S. tax authorities. This agreement has undergone several significant changes in the past few years with very short implementation deadlines. Desjardins Group entities that are QIs are continuing their efforts to take the necessary measures to comply with the last agreement issued in January 2017 and monitor developments.

Section 871(m) of the U.S. Internal Revenue Code

Section 871(m) of the U.S. Internal Revenue Code was set up to ensure that non-U.S. investors pay tax on dividend payments on U.S. equity-linked instruments. For 2017 and 2018, the withholding tax and reporting obligations determined in section 871(m) apply basically to transactions issued on or after January 1, 2017 and that have a delta equal to 1. This regulation has undergone several changes in recent years and is subject to further amendment. The Desjardins Group entities concerned are putting measures in place to apply the regulation and monitor future changes.

Gradual implementation of *Regulation 93-101 on Derivatives: Business Conduct*

In April 2017, the Canadian Securities Administrators (CSA) issued draft *National Instrument 93-101 – Derivatives: Business Conduct* and draft Companion Policy 93-101 *Derivatives: Business Conduct* to establish a comprehensive regime for regulating the business conduct of participants in over-the-counter derivatives markets. The CSA should also publish for comment in 2018 a separate set of proposed registration rules for derivatives dealers, derivatives advisers and potentially other derivatives market participants. The various derivatives market participants are furthermore subject directly or indirectly to a certain number of national and international standards resulting from a regulatory reform that is gradually taking effect. The Desjardins Group entities concerned are closely watching this regulatory development.

Application of the new framework for European markets in financial instruments

In May 2014, European legislatures adopted a new framework for markets in financial instruments (MIF 2), in the form of the *Markets in Financial Instruments Directive* and the *Markets in Financial Instruments Regulation*. The regulatory requirements related to the MIF 2 directive have been applicable since January 3, 2018 and change the framework for carrying on market activities in Europe. One purpose of the new framework is to strengthen investor protection and make financial markets more resilient and transparent. The Desjardins Group entities concerned are closely monitoring this regulatory development and the notices issued in this regard by the CSA.

Report on Climate change-related Disclosure Project

On April 5, 2018, the CSA issued CSA Staff Notice 51-354, *Report on Climate change-related Disclosure Project*. The report summarizes the findings of its project to review the disclosure by reporting issuers of risks and financial impacts associated with climate change, and its plans for future work. The Staff Notice also mentions that the CSA will continue to monitor the quality of issuers' disclosure with respect to climate change-related matters, best practices in the area of climate change-related disclosure and the development of disclosure frameworks. Desjardins Group welcomes these findings and supports the development of climate change-related disclosure. Desjardins Group is closely monitoring regulatory developments in this regard.

ECONOMIC ENVIRONMENT AND OUTLOOK

Global economy

The global economy has continued to grow strongly, but growth rates appear to have stabilized somewhat over the last few months. In the eurozone, real GDP is expected to grow by 2.4% in 2018 following a 2.5% increase in 2017. Since the Brexit referendum, the United Kingdom has gone against trend, unable to profit from the improved economic conditions as much as the other advanced economies. The political uncertainties surrounding Brexit have not been quelled, as we still have no indication what type of agreement will govern relations between the United Kingdom and the European Union after the separation. China's real GDP grew from 6.7% in 2016 to 6.9% in 2017, representing the first improvement since 2010. As in 2017, the Chinese government will target 6.5% growth for 2018. Actual results are less likely to surpass this figure, however, as the government does not seem as keen to stimulate the economy. Real global GDP is expected to have increased by over 3.6% in 2017 and to rise 3.9% in 2018 and in 2019. However, the protectionist threat in the U.S. weighs on these prognoses.

Volatility returned to financial markets with a vengeance in the first few months of 2018. After posting strong growth in January, equity markets slipped in early February as accelerating wage growth in the U.S. suddenly stoked renewed fears of inflation and made bond yields spike. Following a difficult week in which the main market indexes plummeted by more than 10%, the situation calmed down and stock exchanges erased much of their losses. However, the announcement in March of protectionist measures in the U.S. and declines in certain technology stocks exerted downward pressure on the markets. As a result, most of the indexes lost ground in the first quarter of 2018. The Toronto Stock Exchange was disadvantaged by oil transportation problems in Western Canada and growing concerns over the Canadian housing market and U.S. protectionism. Despite the problems in the equity markets, North American bond yields have surged since the beginning of the year as monetary policies in North America continued to be tightened and inflationary pressures increased slightly.

Following its January meeting the Bank of Canada (BoC) announced a third hike in its key interest rates, and is now signalling more clearly that it will continue to tighten monetary policy. However, as the Canadian economy grew slightly less strongly than the BoC had expected at the beginning of the year and certain risks have increased, the BoC's tone has become more cautious, suggesting that it will not announce another hike in key interest rates until the summer. This change of tone from the Canadian monetary authorities widened spreads between U.S. and Canadian bonds, placing the Canadian dollar at a disadvantage. But the dollar may rally slightly over the next few quarters as certain concerns about the Canadian economy abate. The U.S. Federal Reserve adopted a more optimistic tone following passage of U.S. tax reform bill, and it may even begin tightening monetary policy more quickly if the labour market maintains its current momentum or inflationary pressures rise. In this context, bond yields can be expected to continue their gradual climb over the next few quarters.

United States

Real GDP in the U.S. grew 2.3% in 2017, a substantial improvement from the relatively low 1.5% increase recorded for 2016. But some economic indicators continued to disappoint at the start of 2018. Retail sales fell in each of the first two months of the year, which came as a surprise, since the tax cuts should have stimulated the economy. But their positive impact is nevertheless expected to become more evident in the spring. In addition to the potential impacts of tax reform, the economy may also be stimulated by an upsurge in federal government spending. It remains to be seen how an already strong economy will respond to so much economic stimulus. A 2.8% gain in real GDP is expected for 2018, with another 2.5% increase forecast for 2019. Labour market conditions should continue to improve, and inflation is expected to pick up steam. One area of concern is the potential impact of the protectionist measures announced by the U.S. government.

Canada

In Canada, real GDP grew 1.7% (annualized rate) in the fourth quarter of 2017, comparable to the 1.5% gain recorded for the previous quarter. Once again, growth was based on the strength of domestic demand. Not only did household consumer spending continue to rise, but investment surged in the fourth quarter of 2017, both in the residential sector and through businesses and government spending. In general, the growth outlook for domestic demand in 2018 is still relatively good. Furthermore, the labour market has performed very well, and the unemployment rate is close to an all-time low. This being said, the housing market should face some headwinds due to new restrictive measures. Indeed, sales of and prices for existing properties fell sharply in the first few months of 2018. British Columbia and Ontario in particular are expected to be affected by the adjustments to the housing market. After posting 3.0% growth in 2017, the Canadian economy is expected to grow at a slower, more sustainable pace in 2018 and 2019 (2.1% and 1.9%, respectively). On the other hand, certain risks remain. The gradual upswing in interest rates is intensifying concerns over the high level of household debt, and the renegotiation of the North American Free Trade Agreement (NAFTA) and U.S. protectionism are generating considerable uncertainty around exports and business investment.

Quebec

The Quebec economy has been performing very well. Real GDP growth reached 3.1% in 2017, its highest rate since the first quarter of 2000, and the indicators were even more positive for growth in the first quarter of 2018. Household and business confidence remained high. The year nevertheless began on a negative note for the labour market, in contrast to an impressive improvement recorded in 2017. The unemployment rate rose to 5.6% in March, above the monthly low of 5.0% reached in December. Existing home sales increased by 2.6% in Quebec during the first quarter, compared to a sharp drop in some of the other provinces, despite the strict new federal mortgage rules which came into force on January 1, 2018. Despite increased spending, public finances in Quebec have improved markedly and the government has begun paying down debt. Real GDP growth is expected to slow to around 2.2% in 2018 and 1.9% in 2019, since smaller employment gains and higher interest rates are expected to moderate household spending. The uncertainty surrounding trade relations with the U.S. remains a downside risk for forecasts.

REVIEW OF FINANCIAL RESULTS

IMPACT OF THE SALE OF SUBSIDIARIES

On July 1, 2017, Desjardins Group completed the sale of two of its subsidiaries, namely Western Financial Group Inc., a financial services company, and Western Life Assurance Company, a life and health insurance company, to Trimont Financial Ltd., a subsidiary of The Wawanesa Mutual Insurance Company.

The table below presents the operating results of these two subsidiaries included in the Federation's financial results in the Property and Casualty Insurance segment.

COMPARISON OF THE FIRST QUARTERS OF 2018 AND 2017

Surplus earnings

For the first quarter ended March 31, 2018, the Federation posted surplus earnings before dividends to member caisses of \$359 million, a \$130 million, or 56.8%, increase compared to the same period in 2017. Adjusted surplus earnings were up \$122 million. This increase is due to gains on the disposal of investments, the profit realized following the restructuring of Interac Corp., and higher income from growth in assets under management.

Segment contributions to surplus earnings

- Personal and Business Services: **Contribution of \$106 million**, up \$22 million, or 26.2%, compared to the same period in 2017.
 - Profit related to the restructuring of Interac Corp.
 - The segment contributed 29.5% to surplus earnings.
- Wealth Management and Life and Health Insurance: **Contribution of \$206 million**, up \$63 million, or 44.1%, compared to the first quarter of 2017.
 - Higher gain on the disposal of securities and real estate investments in first quarter 2018.
 - Higher income from growth in assets under management.
 - Offset, however, by a less favourable claims experience for the three-month period ended March 31, 2018.
 - The segment contributed 57.4% to surplus earnings.
- Property and Casualty Insurance: **Contribution of \$26 million**, up \$44 million compared to the same period in 2017.
 - Higher investment income.
 - Smaller increase than in first quarter 2017 in the contingent consideration payable as part of the acquisition of the Canadian operations of State Farm Mutual Automobile Insurance Company (State Farm).
 - Offset by:
 - Higher claims experience than in first quarter 2017.
 - Negative impact of the sale of Western Financial Group Inc. and Western Life Assurance Company on July 1, 2017.
 - The segment contributed 7.2% to surplus earnings.
- Treasury and Other Support to Desjardins Group Entities: **Contribution of \$21 million**, which is comparable to the same period in 2017.
 - The segment contributed 5.9% to surplus earnings.
- **Return on equity was 9.4%**, compared to 6.5% for the quarter ended March 31, 2017, mainly because of the increase in surplus earnings, as explained earlier.

Operating income

Operating income totalled \$3,496 million, up \$249 million, or 7.7%, compared to the first quarter of 2017.

Net interest income was up \$29 million, or 8.6%, to total \$368 million, compared to \$339 million for first quarter 2017, because of growth in the entire portfolio of loans and acceptances outstanding of \$4.8 billion, or 9.0% over the year. This portfolio comprises financing activities in consumer, credit card and other personal loans, as well as loans to business and government.

Net premiums were up \$158 million, or 7.9%, compared to the first quarter of 2017, to total \$2,164 million as at March 31, 2018.

Wealth Management and Life and Health Insurance segment

- **Net insurance and annuity premiums of \$1,143 million**, up \$62 million, or 5.7%, due to business growth.
 - Premiums up \$62 million, with group insurance accounting for \$45 million, annuities for \$9 million, and individual insurance for \$8 million.

Property and Casualty Insurance segment

- **Net premiums of \$1,059 million**, up \$94 million, or 9.7%, essentially due to the following:
 - Increase of \$81 million on account of the reinsurance treaty signed as part of the acquisition of State Farm's Canadian operations, which provides for the cession, scaled down over a five-year period, of the premiums and claims arising from new business and renewals after the acquisition date.
 - Increase due to the larger number of policies issued as a result of multiple growth initiatives across all market segments and regions.
 - Offset by a decrease in net premiums resulting from the sale of Western Life Assurance Company on July 1, 2017.

Other operating income stood at \$964 million, which is an increase of \$62 million, or 6.9%, compared to the first quarter of 2017, mainly on account of the following items:

- Higher income from growth in assets under management.
- Smaller increase than in first quarter 2017 in the contingent consideration payable as part of the acquisition of State Farm's Canadian operations.
- Growth in business volumes from card payment activities.

This increase was partially offset by:

- Decrease in commission income following the sale of Western Financial Group Inc.

Investment income

Investment income totalled \$295 million, a decrease of \$130 million, or 30.6%, compared to the first quarter of 2017, essentially because of the following:

- Decrease primarily due to changes in the fair value of assets backing liabilities related to life and health insurance operations.
 - However, there was a change in actuarial liabilities that in turn led to lower expenses related to claims, benefits, annuities and changes in insurance contract liabilities.
 - Changes for the most part due to fluctuations in the fair value of the bond portfolio related to higher interest rates.
- Reduction in the fair value of bonds in the Property and Casualty Insurance segment on account of higher interest rates on the markets compared to the same period in 2017, whereas an increase in the fair value of bonds was recognized in the comparative quarter of 2017 because of lower long-term interest rates. It should be remembered that this reduction in the value of bonds was offset by a similar reduction in the cost of claims because of a matching strategy.
- Lower trading income from capital markets.

This decrease was partially offset by the following:

- Higher gains on the disposal of securities and real estate investments in first quarter 2018.
- Profit related to the restructuring of Interac Corp.
- A greater change in the fair value of derivative financial instruments associated with the Federation's hedging activities.

Total income

Total income amounted to \$3,791 million, an increase of \$119 million, or 3.2%, compared to the same period in 2017.

Provision for credit losses

The provision for credit losses totalled \$89 million for the first quarter of 2018, up \$16 million, or 21.9%. The increase is mainly due to the impact of the adoption of IFRS 9 as at January 1, 2018 and by the more pessimistic review of economic scenarios and the seasonal migration of borrowers to higher risk ratings. In spite of this increase, the Federation's loan portfolio continued to be of high quality in 2018.

- The credit loss provisioning rate was 0.62% for the first quarter of 2018, compared to 0.56% for the corresponding period of 2017.
- The ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio, was 0.36% compared to 0.14% as at March 31, 2017. This increase was due to the fact that under IFRS 9, all default loans are now considered credit-impaired unless the detrimental impact on the estimated future cash flows is considered negligible.

Claims, benefits, annuities and changes in insurance contract liabilities

Expenses related to claims, benefits, annuities and changes in insurance contract liabilities totalled \$1,656 million, down \$97 million, or 5.5%, compared to the corresponding quarter of 2017.

Wealth Management and Life and Health Insurance segment

- **Cost of claims of \$841 million**, down \$195 million, or 18.8%. This reduction was basically the result of the following:
 - Decrease of \$230 million in the actuarial liabilities recognized under "Insurance contract liabilities", which includes the effect of a decrease in the fair value of matched investments.
 - Offset by an increase in benefits and actuarial liabilities related to growth in operations as well as the less favourable effect of the claims experience.

Property and Casualty Insurance segment

- **Cost of claims of \$815 million**, up \$96 million, or 13.4%, essentially as a result of the following:
 - Increase due to the reinsurance treaty signed as part of the acquisition of State Farm's Canadian operations, which provides for the cession, scaled down over a five-year period, of the premiums and claims arising from new business and renewals after the acquisition date.
 - Growth in business, which led to a higher cost of claims.
 - The P&C insurers' loss ratio was 79.5% for the period ended March 31, 2018, compared to 74.5% for the corresponding period in 2017.
 - Higher ratio partially attributable to less positive developments than in first quarter 2017 concerning prior-year claims, (4.7)% vs. (9.4)%, mainly in automobile insurance.
 - Higher ratio also attributable to higher claims experience for the current year than for the first quarter of 2017 (83.3% vs. 81.4%), mainly in automobile insurance.
 - Offset by less significant impact of catastrophes and major events compared to first quarter 2017.

Non-interest expense

- Non-interest expense totalled \$1,628 million, up \$78 million, or 5.0%, compared to the first quarter of 2017. Remuneration and other payments included in non-interest expense were \$137 million, an \$11 million, or 8.7%, increase compared to the same period in 2017 due to an increase in sales of various Desjardins Group products by the caisse network. If this item were excluded, non-interest expense would have been up \$67 million, or 4.7%, essentially because of:
 - Business growth, particularly in card payment and financing activities and in assets under management.
 - Increase in expense due to the reinsurance treaty signed as part of the acquisition of State Farm's Canadian operations.
 - Offset by a decrease in expenses following the sale of Western Financial Group Inc. and Western Life Assurance Company on July 1, 2017.

Income taxes

- **Income taxes on surplus earnings before dividends to member caisses of \$59 million**, down \$8 million compared to the first quarter of 2017.
 - Effective tax rate of 14.1% for the quarter ended March 31, 2018, compared to 22.6% for the corresponding period in 2017.
 - The lower rate is mainly due to an income tax recovery on remuneration of G capital shares, gains on disposals taxable at 50% in the first quarter of 2018, which was not the case in the same period in 2017, as well as the additional income taxes payable in the first quarter of 2017 related to the sale of Western Financial Group Inc. and Western Life Assurance Company.

RESULTS BY BUSINESS SEGMENT

The Federation's financial reporting is organized by business segments, which are defined based on the needs of Desjardins Group's members and clients, the markets in which the Federation operates, and on its internal management structure. The Federation's financial results are divided into the following three business segments: Personal and Business Services; Wealth Management and Life and Health Insurance; and Property and Casualty Insurance. In addition to these three segments, there is also the Treasury and Other Support to Desjardins Group Entities category. This section presents an analysis of results for each of these segments.

Intersegment transactions are recognized at the exchange amount, which represents the amount agreed upon by the various legal entities and business units. The terms and conditions of these transactions are comparable to those offered on financial markets.

Additional information about each business segment, particularly its profile, activities, industry and 2018 strategies and priorities, can be found on pages 27 to 39 of the 2017 annual MD&A.

Personal and Business Services

The Personal and Business Services segment is central to Desjardins Group's operations. It is responsible for developing a comprehensive, integrated line of products and services designed to meet the needs of individuals, businesses, institutions, non-profit organizations and cooperatives through the Desjardins caisse network, the Desjardins Business centres and specialized teams. It thereby enables Desjardins Group to be a leading player on the financial services scene in Quebec and Ontario. To serve the constantly-changing needs of caisse members and clients, the Federation supports the caisse network and its service centres in distributing products and services by optimizing the performance and profitability of physical and virtual networks through implementing and managing complementary access methods, by phone, online, via applications for mobile devices, and at ATMs. The shared services which the Federation provides to the Personal and Business Services segment are recorded in this segment.

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ Data for 2017 have been reclassified to conform to the current year's presentation, notwithstanding the standards and amendments adopted on January 1, 2018.

⁽³⁾ See "Basis of presentation of financial information".

⁽⁴⁾ Further to the adoption of IFRS 9 on January 1, 2018, all loans included in Stage 3 of the impairment model are considered to be credit-impaired. The criteria for considering a loan to be impaired were different under IAS 39. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

COMPARISON OF THE FIRST QUARTERS OF 2018 AND 2017 – PERSONAL AND BUSINESS SERVICES

- **Surplus earnings before dividends to member caisses of \$106 million**, up \$22 million, or 26.2%.
 - Profit related to the restructuring of Interac Corp.
- **Operating income of \$693 million**, up \$43 million, or 6.6%.
 - Increase of \$12 million in net interest income as a result of year-over-year growth of \$3.2 billion, or 12.8%, in the average portfolio of loans and acceptances outstanding. This portfolio includes financing activities in the area of consumer loans, credit cards and other personal loans, as well as business loans.
 - Other operating income of \$417 million, up \$31 million, or 8.0%, mainly due to the following:
 - ♦ Growth in business volume as a result of card payment activities, including the acquisition of Canada-wide credit card portfolios.
 - ♦ Business growth related to mortgage financing activities.
- **Investment income of \$53 million**, up \$23 million:
 - Profit related to the restructuring of Interac Corp.
 - Offset by decrease in capital market trading income.
- **Total income of \$746 million**, up \$66 million, or 9.7%.
- **Provision for credit losses of \$89 million**, up \$16 million, or 21.9%, mainly as a result of the following:
 - Increase in the provision following the adoption of IFRS 9 as at January 1, 2018.
 - More pessimistic review of economic scenarios.
 - Seasonal migration of borrowers to higher risk ratings.
- **Non-interest expense of \$521 million**, up \$30 million, or 6.1%.
 - Business growth, especially in card payment and financing activities, which had an effect on bonus programs.
 - Higher fees related to the acquisition and implementation of the new Canada-wide credit card portfolios.

Wealth Management and Life and Health Insurance

The Wealth Management and Life and Health Insurance segment combines different categories of service offers aimed at growing the assets of Desjardins Group members and clients and helping them protect their financial security. These offers are intended for individuals and businesses, while its group insurance and savings plans meet the needs of employees through their company, or individuals who are part of any other group. One of the greatest strengths of the Wealth Management and Life and Health Insurance segment is its vast and diversified Canada-wide distribution network, which mainly includes:

- Employees of the caisse network and Desjardins Business centres.
- Financial security advisers dedicated to caisse members.
- Investment advisers and private managers.
- Exclusive agents and independent partners.
- Actuarial consulting firms and group plan representatives.

To meet members' and clients' needs and preferences, certain product lines are also distributed directly via customer care centres, online or through applications for mobile devices. Online services are constantly being finetuned so that they meet clients' changing requirements.

⁽²⁾ See "Basis of presentation of financial information".

COMPARISON OF THE FIRST QUARTERS OF 2018 AND 2017 – WEALTH MANAGEMENT AND LIFE AND HEALTH INSURANCE

- **Net surplus earnings of \$206 million**, up \$63 million, or 44.1%. This increase was mainly the result of:
 - Higher gains on the disposal of securities and real estate investments in the first quarter of 2018.
 - Higher income as a result of growth in assets under management.
 - Offset by a less favourable claims experience.
- **Operating income of \$1,566 million**, up \$120 million, or 8.3%, basically because of:
 - Increase of \$62 million in premiums, of which \$45 million was from group insurance, \$9 million was from annuities, and \$8 million was from individual insurance.
 - Other operating income totalled \$422 million, up \$57 million, or 15.6%.
 - Higher income from growth in assets under management.
- **Investment income of \$155 million**, down \$177 million, or 53.3%.
 - Decrease primarily due to the fluctuation in the fair value of assets backing liabilities related to life and health insurance operations.
 - Offset by the change in actuarial liabilities leading to lower expenses related to claims, benefits, annuities and changes in insurance contract liabilities.
 - Differences due for the most part to changes in the fair value of the portfolio of bonds as a result of higher interest rates.
 - Mitigated by higher gains on the disposal of securities and real estate investments.
- **Total income of \$1,721 million**, down \$57 million, or 3.2%.
- **Expenses related to claims, benefits, annuities and changes in insurance contract liabilities of \$841 million**, down \$195 million, or 18.8%, essentially due to the following:
 - Decrease of \$230 million in actuarial liabilities under "Insurance contract liabilities", which included the effect of the decrease in the fair value of matched investments.
 - Offset by increased benefits and actuarial liabilities from the growth in operations and the less favourable effect of claims experience.
- **Non-interest expense of \$623 million**, up \$62 million, or 11.1%, chiefly as a result of higher expenses for assets under management, but limited by effective cost control in a context of operations growth.

Property and Casualty Insurance

The Property and Casualty Insurance segment offers insurance products allowing Desjardins Group members and clients to protect themselves against disasters. It includes the operations of Desjardins General Insurance Group Inc. and its subsidiaries. Its products are distributed through P&C insurance agents in the Desjardins caisse network in Quebec, a number of client care centres (call centres) and Desjardins Business centres, through an exclusive agent network, as well as online and via applications for mobile devices.

On July 1, 2017, Desjardins Group completed the sale of two of its subsidiaries, namely Western Financial Group Inc. and Western Life Assurance Company. Additional information concerning these transactions is found under "Impact of the sale of subsidiaries" on page 12.

⁽²⁾ See "Basis of presentation of financial information".

COMPARISON OF THE FIRST QUARTERS OF 2018 AND 2017 – PROPERTY AND CASUALTY INSURANCE

- **Net surplus earnings of \$26 million**, up \$44 million compared to the first quarter of 2017, and adjusted net surplus earnings, up \$31 million, essentially due to the following:
 - Higher investment income.
 - Smaller increase than in first quarter 2017 in the contingent consideration payable as part of the acquisition of State Farm's Canadian operations.
 This increase was partly offset by the following:
 - Higher claims experience than in the corresponding quarter of 2017.
 - Unfavourable impact resulting from the sale of Western Financial Group Inc. and Western Life Assurance Company completed on July 1, 2017.
- **Operating income of \$1,038 million**, up \$77 million, or 8.0%.
- **Net premiums of \$1,059 million**, up \$94 million, or 9.7%, primarily as a result of:
 - Increase of \$81 million from the reinsurance treaty signed as part of the acquisition of State Farm's Canadian operations. The treaty provides for the cession, scaled down over a five-year period, of the premiums and claims arising from new business and renewals after the acquisition date.
 - Increase due to the larger number of policies issued as a result of multiple growth initiatives across all market segments and regions.
 - Offset by a decrease in net premiums following the sale of Western Life Assurance Company on July 1, 2017.
- **Losses of \$21 million, presented under other operating income**, up \$16 million, essentially because of the drop in commission income following the sale of Western Financial Group Inc. This decrease was partly offset by the smaller increase than in first quarter 2017 in the contingent consideration payable as part of the acquisition of State Farm's Canadian operations.
- **Investment income of \$90 million**, up \$21 million, or 30.4%, basically as a result of the net gains, higher than those recorded in the first quarter of 2017, on the disposal of funds and common shares related to the rebalancing of the portfolio with the new strategic allocation target. This increase was partly offset by:
 - Decrease in the fair value of bonds as a result of the increase in interest rates on the market, compared to the same period in 2017, while an increase in the fair value of bonds was recorded for the comparative quarter in 2017 because of lower long-term interest rates. The decrease in the value of the bonds was offset by a similar decrease in the cost of claims because of a matching strategy.
- **Total income of \$1,128 million**, up \$98 million, or 9.5%.
- **Cost of claims totalling \$815 million**, up \$96 million, or 13.4%, essentially resulting from:
 - Increase due to the reinsurance treaty signed as part of the acquisition of State Farm's Canadian operations. The treaty provides for the cession, scaled down over a five-year period, of the premiums and claims arising from new business and renewals after the acquisition date.
 - Business growth leading to a higher cost of claims.
 - P&C insurers' loss ratio of 79.5% for the period ended March 31, 2018, compared to 74.5% for the corresponding period in 2017.
 - ♦ Higher ratio partially attributable to less positive developments than in first quarter 2017 concerning prior-year claims, (4.7)% vs. (9.4)%, mainly in automobile insurance.
 - ♦ Higher ratio also due to higher claims experience for the current year than for the corresponding period in 2017 (83.3% vs. 81.4%), mainly in automobile insurance.
 - Offset by less significant impact of catastrophes and major events compared to first quarter 2017.
- **Non-interest expense of \$277 million**, down \$49 million, or 15.0%, mainly as a result of:
 - Lower expenses due to the sale of Western Financial Group Inc. and Western Life Assurance Company completed on July 1, 2017.
 - Offsetting increase in expenses partly due to the effect of the previously mentioned reinsurance treaty on the charges covered by it.

Treasury and Other Support to Desjardins Group Entities category

The Treasury and Other Support to Desjardins Group Entities category includes financial information that is not specific to a business segment. It mainly includes treasury activities and financial intermediation between the caisses' liquidity surpluses and needs, as well as orientation and organizational activities for Desjardins Group. This category also includes the operations of Desjardins Capital Inc. It further includes Desjardins Technology Group Inc., which encompasses all of Desjardins Group's IT operations. In addition to various adjustments required to prepare the Interim Consolidated Financial Statements, this category also contains intersegment balance eliminations.

The Federation does not consider an item-by-item comparative analysis of the operations in this category to be relevant given the integration of various consolidation adjustments and intersegment balance eliminations. Consequently, the Federation presents an analysis of these operations based on their contribution to surplus earnings.

⁽²⁾ Includes support function activities, various adjustments required to prepare the Interim Consolidated Financial Statements, and intersegment balance eliminations.

COMPARISON OF FIRST QUARTERS OF 2018 AND 2017 – CONTRIBUTION TO SURPLUS EARNINGS OF TREASURY AND OTHER SUPPORT TO DESJARDINS GROUP ENTITIES CATEGORY

- **Net surplus earnings of \$21 million before dividends to member caisses**, compared to \$20 million for the same period in 2017.
- **Treasury activities of \$23 million**, unchanged from the corresponding period in 2017.
 - Favourable effect of fluctuations in spreads between European and Canadian interest rate curves on the portion of derivative financial instruments used to hedge foreign currency deposits that does not qualify for hedge accounting.
 - Offset by lower trading income.
- **Activities related to derivatives associated with hedging activities amounting to \$5 million**, unchanged from the same quarter in 2017.
- **Other activities recorded a \$7 million deficit**, compared to an \$8 million deficit in 2017.
 - Other activities affected, in 2018 and 2017, by expenses related to the continued implementation of Desjardins-wide strategic projects, in particular, to improve systems and processes as well as to create innovative technology platforms, thereby enhancing the member and client experience and improving productivity.

SUMMARY OF INTERIM RESULTS

⁽¹⁾ The information presented for the three-month period ended March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ See "Basis of presentation of financial information".

Quarterly income, expenses and surplus earnings before dividends to member caisses fluctuate based on certain trends, including seasonal variations and changes in general economic conditions and capital market conditions. The results of the first three quarters of 2017 were affected by the sale of Western Financial Insurance Company, which was completed on January 1, 2017, while the results of the third quarter of 2017 were affected by the sale of Western Financial Group Inc. and Western Life Assurance Company, completed on July 1, 2017. Additional information concerning these transactions is found under "Impact of the sale of subsidiaries" on page 12. For more information about quarterly trends, see page 42 and 43 of the 2017 annual MD&A.

⁽¹⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

Total assets

As at March 31, 2018, the Federation's total assets stood at \$151.3 billion, up \$5.6 billion, or 3.8%, since December 31, 2017. This growth was largely due to amounts receivable from clients, brokers and financial institutions included in other assets, as well as securities, including those borrowed or purchased under reverse repurchase agreements, which were up \$3.3 billion and \$3.0 billion, respectively, since year-end 2017.

Cash and deposits with financial institutions, and securities

As at March 31, 2018, the Federation's cash and deposits with financial institutions amounted to \$1.8 billion, an increase of \$57 million, or 3.3%, since December 31, 2017. The volume of securities, including securities borrowed or purchased under reverse repurchase agreements, was up \$3.0 billion, or 5.4%, to total \$59.3 billion as at March 31, 2018. The increase was due to growth in market activities and deposits.

Loans and clients' liability under acceptances

As at March 31, 2018, the Federation's outstanding loan portfolio, including acceptances, net of the allowance for credit losses, was \$57.5 billion, a decrease of \$1.2 billion, or 2.1%, since December 31, 2017. Loans to business and government, which represented 61.5% of the Federation's total portfolio, were largely responsible for the decrease.

Business and government loans outstanding, including acceptances, stood at \$35.7 billion as at March 31, 2018, down \$1.4 billion, or 3.7%, since December 31, 2017. Loans to member caisses accounted for part of the decrease. Consumer, credit card and other personal loans outstanding, which made up 31.0% of the Federation's total portfolio, were up by \$398 million, or 2.3%, since year-end 2017, to total \$17.9 billion as at March 31, 2018. The Federation's outstanding residential mortgages, which totalled \$4.4 billion on that date, were up \$33 million, or 0.8%, since December 31, 2017.

Loans and acceptances

(in millions of dollars and as a percentage)	As at March 31, 2018⁽¹⁾		As at December 31, 2017	
Residential mortgages	\$ 4,356	7.5%	\$ 4,323	7.3%
Consumer, credit card and other personal loans	17,945	31.0	17,547	29.8
Business and government	35,679	61.5	37,043	62.9
	57,980	100.0%	58,913	100.0%
Allowance for credit losses	(511)		(198)	
Total loans and acceptances by borrower category	\$ 57,469		\$ 58,715	
Loans guaranteed or insured ⁽²⁾	\$ 5,067		\$ 5,609	

⁽¹⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ Loans fully or partially guaranteed or insured by a public or private insurer or a government.

Credit quality

Information about the quality of the Federation's loan portfolio is presented in the "Risk management" section on page 31 of this MD&A.

Deposits

The Federation's outstanding deposits totalled \$53.8 billion as at March 31, 2018, up \$1.7 billion, or 3.2%, since December 31, 2017, largely as a result of growth in business and government deposits, which accounted for 78.9% of the total deposit portfolio. In fact, these deposits were up \$1.5 billion, or 3.6%, since the end of 2017, to total \$42.4 billion as at the end of first quarter 2018. This increase was due in particular to the various securities, including commercial paper, issued on U.S., Canadian and European markets, which supported the growth in Desjardins Group's funding requirements.

Deposits

(in millions of dollars and as a percentage)	As at March 31, 2018		As at December 31, 2017	
Individuals	\$ 3,952	7.3%	\$ 4,353	8.3%
Business and government	42,445	78.9	40,963	78.6
Deposit-taking institutions	7,409	13.8	6,833	13.1
Total deposits	\$ 53,806	100.0%	\$ 52,149	100.0%

Deposits from deposit-taking institutions totalled \$7.4 billion as at March 31, 2018, up \$576 million, or 8.4%, since December 31, 2017. Deposits from individuals were down \$401 million, or 9.2%, during the same period to total \$4.0 billion as at March 31, 2018.

Insurance contract liabilities

The Federation's insurance contract liabilities stood at \$28.3 billion as at March 31, 2018, down \$27 million, or 0.1%, since December 31, 2017.

Note 15, "Insurance contract liabilities", to the Annual Consolidated Financial Statements provides additional information about Desjardins Group's insurance contract liabilities.

Equity

Equity totalled \$15.8 billion as at March 31, 2018, down \$184 million, or 1.1%, since the prior year-end. Net surplus earnings after dividends to member caisses, totalling \$359 million for the first three months of 2018, and the issues of F capital shares amounting to \$68 million were the source of this growth. The remuneration of \$247 million on F capital shares and the impact of changes in accounting policies in the amount of \$214 million reduced equity.

Note 22, "Capital stock", to the Annual Consolidated Financial Statements provides additional information about the Federation's capital stock.

CAPITAL MANAGEMENT

Capital management is crucial to the financial management of Desjardins Group, including the Federation. Its goal is to ensure that the capital level and structure of Desjardins Group and its components are consistent with their risk profile, distinctive nature and cooperative objectives. Capital management must also ensure that the capital structure is adequate in terms of protection for members and clients, profitability targets, growth objectives, rating agencies' expectations and regulators' requirements. In addition, it must optimize the allocation of capital and internal capital flow mechanisms, and support growth, development and asset risk management at Desjardins Group. Additional information on the Integrated Capital Management Framework can be found in the "Capital management" section of the Federation's 2017 annual MD&A.

Regulatory framework and internal policies

Desjardins Group's capital management is the responsibility of the Federation's Board of Directors. To support it with this task, it has mandated the Management Committee, through the Finance and Risk Management Committee, to ensure that Desjardins Group, including the Federation, has a sufficient capital base in light of the organization's strategic objectives and regulatory obligations. The Finance, Treasury and Administration Executive Division is responsible for preparing, on an annual basis, a capitalization plan to forecast capital trends, devise strategies and recommend action plans for achieving capital objectives and targets.

The current situation and the forecasts show that overall, Desjardins Group, including the Federation, has a solid capital base that maintains it among the best-capitalized financial institutions.

The Federation's capital ratios are calculated according to the AMF's guideline on adequacy of capital base standards applicable to financial services cooperatives (the guideline). This guideline takes into account the global regulatory framework for more resilient banks and banking systems (Basel III) issued by the Bank for International Settlements.

The minimum amount of Tier 1A capital that the Federation must maintain is 8%. In addition, the Tier 1 and total capital ratios must be above 9.5% and 11.5%, respectively. The minimum requirement for the leverage ratio is 3%.

This capital takes into consideration investments made in the Federation's subsidiaries. Some of these subsidiaries are subject to separate requirements regarding regulatory capital, liquidity and financing, which are set by regulatory authorities governing banks, insurers and securities, in particular. The Federation oversees and manages the capital requirements of these entities to ensure efficient use of capital and continuous compliance with the applicable regulation.

In this regard, it should be mentioned that the life and health insurance subsidiaries under provincial jurisdiction are subject to the Capital Adequacy Requirements Guideline (CARLI) issued by the AMF. The property and casualty insurance subsidiaries under provincial jurisdiction must comply with the Guideline on Capital Adequacy Requirements issued by the AMF. The property and casualty insurance subsidiaries under federal jurisdiction must comply with the OSFI's Minimum Capital Test (MCT) Guideline for federally regulated property and casualty insurance companies. Developments in these guidelines are presented in the "Changes in the regulatory environment" section on pages 8 to 10 of this MD&A.

For the purpose of calculating capital, Desjardins Financial Corporation Inc., the holding corporation that mainly includes the insurance companies, has been deconsolidated and presented as a partial capital deduction under the rules for significant investments stated in the guideline. Furthermore, Desjardins Financial Corporation Inc. is subject to the AMF's Capital Adequacy Requirements Guideline (CARLI) – Insurance of persons.

Regulatory developments

Desjardins Group continues to monitor changes in capital requirements under the global standards developed by the Basel Committee on Banking Supervision (BCBS) and to assess their impact on the capital ratios and the leverage ratio. Additional information in this regard can be found in the Federation's 2017 annual MD&A on pages 47 and 48. The "Changes in the regulatory environment" section presents additional details on regulation as it affects all Desjardins Group operations. In addition, this section contains information on the internal recapitalization (bail-in) file, or the TLAC guideline project.

On March 29, 2017, the BCBS issued a document entitled "Regulatory treatment of accounting provisions – interim and transitional arrangements". This document is the result of the application of IFRS 9 effective January 1, 2018, which requires provisioning for expected credit losses rather than incurred losses, as required under IAS 39. The BCBS is maintaining the present regulatory treatment of provisions under the Basel Accord framework for a transitional period. Furthermore, on August 21, the OSFI issued a draft for public consultation on the revision of the Capital Adequacy Requirements Guideline to be implemented in the first quarter of 2018. The proposed changes take up the same principles as the BCBS. Authorities may adopt transitional measures in order to gradually take into account any significant future negative effect on regulatory capital as a result of the introduction of the new impairment model based on expected credit losses under IFRS 9. No transitional measure has been authorized by the AMF following the adoption of IFRS 9.

On December 7, 2017, the BCBS issued a discussion paper on the regulatory treatment of sovereign exposures. Comments on the topic could be sent to the BCBS until March 9, 2018. Because the BCBS did not obtain a consensus in order to make changes to the treatment of exposures to sovereign risk, no consultation has been launched on the topic.

On December 7, 2017, the Group of Central Bank Governors and Heads of Supervision, the BCBS's oversight body, endorsed the outstanding Basel III post-crisis regulatory reforms. The reforms are intended to help reduce excessive variability in risk-weighted assets (RWA) and improve the comparability and transparency of financial institutions' capital ratios by:

- enhancing the robustness and risk sensitivity of the standardized approaches for credit risk, credit valuation adjustment (CVA) risk and operational risk;
- constraining the use of the internal model approaches, by placing limits on certain inputs used to calculate capital requirements under the Internal Ratings-Based (IRB) approach for credit risk and by removing the use of the internal model approaches for the CVA risk and for operational risk;
- adjusting the leverage ratio exposure measurement; and
- replacing the existing Basel I output floor with a more robust risk-sensitive floor based on the revised Basel III standardized approaches.

The BCBS has scheduled the implementation of these reforms for January 1, 2022 and the transitional provisions for applying the output floor based on the revised Basel III standardized approach. The anticipated implementation of the new threshold before January 1, 2022 is left at the discretion of the regulators. The AMF has not yet expressed its intentions in this regard. For its part, the OSFI issued a transitional measure on January 12, 2018 allowing the Basel I output floor to be replaced by a revised capital output floor as of the second quarter of 2018.

On March 22, 2018, the BCBS issued a consultative document entitled "Revisions to the minimum capital requirements for market risk", which addresses certain issues raised following the publication on January 14, 2016 of the revised version of the minimum capital requirements for market risk. The consultative document includes proposed changes aimed, in particular, at increasing the risk sensitivity of the standardized approach and recalibrating risk weights for interest risk, equity risk and foreign exchange risk. It also proposes changes to the "Simplified alternative to the standardised approach to market risk capital requirements" issued on June 29, 2017. Comments are open until June 2018. On December 7, 2017, the BCBS had announced that financial institutions should present information using the standardized approach as of January 1, 2022.

Compliance with requirements

As at March 31, 2018, the Tier 1A, Tier 1 and total capital ratios, calculated in accordance with Basel III requirements, all stood at 16.6%. The leverage ratio was 7.4%.

The Federation and its subsidiaries that are subject to minimum regulatory capital requirements were in compliance with said requirements as at March 31, 2018.

Regulatory capital

The following tables present the Federation's main capital components, regulatory capital balances, risk-weighted assets, capital ratios, and movements in capital during the period.

Main capital components

	Total capital		
	Tier 1 capital		Tier 2 capital
	Tier 1A ⁽¹⁾	Tier 1B ⁽¹⁾	
Eligible items	<ul style="list-style-type: none"> • Reserves and undistributed surplus earnings • Eligible accumulated other comprehensive income • Capital shares 	<ul style="list-style-type: none"> • Non-controlling interests⁽²⁾ 	<ul style="list-style-type: none"> • General allowance • Subordinated notes subject to phase-out • Eligible qualifying shares
Regulatory adjustments	<ul style="list-style-type: none"> • Goodwill • Software • Other intangible assets • Deferred tax assets essentially resulting from loss carryforwards • Shortfall in allowance • Cross-investments⁽³⁾ 		
Deductions	<ul style="list-style-type: none"> • Mainly significant investments in financial entities⁽⁴⁾ 		<ul style="list-style-type: none"> • Investment in preferred shares of a component deconsolidated for regulatory capital purposes • Subordinated financial instrument

⁽¹⁾ The Tier 1A and Tier 1B ratios are the equivalent of the financial institutions' CET 1 and AT1 ratios, for financial services cooperatives regulated by the AMF.

⁽²⁾ The non-controlling interests balance is determined, in particular, based on the nature of the operations and the capitalization level of the investee.

⁽³⁾ Cross-investments in Tier 1A capital of the Desjardins caisse network in Quebec.

⁽⁴⁾ Represents the portion of investments in the components deconsolidated for regulatory capital purposes (mainly Desjardins Financial Corporation Inc.) that exceeds 10% of capital net of regulatory adjustments. In addition, when the non-deducted balance, plus deferred tax assets net of corresponding deferred tax liabilities, exceeds 15% of the adjusted capital, the surplus is also deducted from Tier 1A capital. The net non-deducted balance will be subject to risk-weighting at a rate of 250%.

Regulatory capital and capital ratios

(in millions of dollars and as a percentage)

	As at March 31, 2018 ⁽¹⁾	As at December 31, 2017
Tier 1A capital		
Federation's capital shares	\$ 4,569	\$ 4,501
Other capital shares	4,036	4,036
Reserves	502	540
Undistributed surplus earnings	5,688	5,655
Eligible accumulated other comprehensive income	262	456
Deductions ⁽²⁾⁽³⁾	(5,933)	(6,026)
Total Tier 1A capital	9,124	9,162
Non-controlling interests	11	13
Deductions ⁽²⁾	(11)	(13)
Total Tier 1B capital	-	-

Subordinated notes subject to phase-out	849	1,032
General allowance	292	126
Non-controlling interests	-	-
Deductions ⁽²⁾	(1,141)	(1,158)
Total Tier 2 capital	-	-
Total regulatory capital (Tiers 1 and 2)	\$ 9,124	\$ 9,162
Ratios and leverage ratio exposure		
Tier 1A capital ratio ⁽⁴⁾	16.6%	17.5%
Tier 1 capital ratio ⁽⁴⁾	16.6	17.5
Total capital ratio ⁽⁴⁾	16.6	17.5
Leverage ratio ⁽⁵⁾	7.4	7.9
Leverage ratio exposure	\$ 123,275	\$ 115,915

⁽¹⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted on January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ As prescribed by the guideline, when an entity is required to make a deduction from a given capital component but is not adequately provisioned, the difference is deducted from the component of the next highest quality. If Tier 2 capital is insufficient to absorb a deduction, the undeducted portion will be deducted from Tier 1B, and then from Tier 1A, if necessary.

⁽³⁾ Deductions from Tier 1A are comprised of regulatory adjustments (\$2,191 million, \$2,152 million in 2017), for which cross-investments (\$1,742 million, \$1,634 million in 2017), significant investments (\$3,214 million, \$3,137 million in 2017), deferred tax assets attributable to temporary differences (\$7 million, \$0 million in 2017), and items that could not be deducted from Tiers 1B and 2 because of insufficient capital in these tiers (\$521 million, \$737 million in 2017).

⁽⁴⁾ As prescribed by the guideline, the capital ratios are expressed as a percentage of regulatory capital to risk-weighted assets.

⁽⁵⁾ The leverage ratio is calculated according to the guideline and is defined as the capital measure (namely Tier 1 capital), divided by the exposure measure. The exposure measure includes: 1) on-balance sheet exposures, 2) securities financing transaction exposures, 3) derivative exposure, and 4) off-balance sheet exposures.

In compliance with Basel III requirements, capital instruments that no longer meet the eligibility criteria for capital tiers have been excluded from them effective January 1, 2013, as prescribed. In accordance with the transitional measures set out in the guideline, instruments that meet certain conditions are being phased out from capital at an annual rate of 10% over a nine-year period that began on January 1, 2013. The subordinated notes issued by Desjardins Capital Inc. are subject to the 10% amortization. In order to be fully eligible for Tier 2 capital, such notes must meet Non-Viability Contingent Capital (NVCC) requirements. Desjardins Group has not issued any instruments of this type as discussions concerning the application of these regulations by Desjardins Group are still in progress with the AMF.

On December 21, 2017, the Federation filed a new short form prospectus and obtained a receipt to issue F capital shares for a maximum of \$125 million during the 12 months following the date of the receipt. This new issue started on January 23, 2018. During the first quarter of 2018, the Federation issued F capital shares for a cash consideration of \$68 million.

In addition, on March 24, 2018, the distribution of net income of \$60 million to member caisses with regard to G capital shares was approved at the Annual General Meeting of Desjardins Group.

As at March 31, 2018, the Tier 1A capital ratio was down 90 basis points compared to December 31, 2017. Growth in surplus earnings and reserves was offset by an increase in risk-weighted assets, the switch to IFRS 9 and the decrease in accumulated other comprehensive income.

Change in regulatory capital

For the three-month period ended

(in millions of dollars)		March 31, 2018

⁽¹⁾ Amount including the change in defined benefit pension plan liabilities.**Risk-weighted assets (RWA)**

The Federation calculates the risk-weighted assets for credit risk, market risk and operational risk. It uses the Internal Ratings-Based Approach for credit risk related to retail loan portfolios – Personal. Other exposures to credit and market risk are measured according to the Standardized Approach. On June 19, 2017, the Federation received the AMF's authorization to use the Standardized Approach for calculating operational risk as of the present quarter.

As indicated in the table below, risk-weighted assets totalled \$55.0 billion as at March 31, 2018. Of this amount, \$44.5 billion was for credit risk, \$2.4 billion for market risk and \$8.3 billion for operational risk. As at December 31, 2017, risk-weighted assets stood at \$52.4 billion.

Risk-weighted assets

(in millions of dollars and as a percentage)	Internal Ratings-Based Approach								Total as at December 31, 2017
	Standardized Approach				Total as at March 31, 2018

RWA for total capital	-	-	-	-	-	55,012	4,401	-	52,445
Total risk-weighted assets	\$ 37,621	\$ 12,420	\$ 63,781	\$ 35,338	\$ 120,666	\$ 54,950	\$ 4,396	- %	\$ 52,364

⁽¹⁾ Net exposure, after credit risk mitigation (net of loss allowance for expected credit losses on credit-impaired loans other than for retail clients (except for credit card loans) under the Standardized Approach but not under the Internal Ratings-Based Approach in accordance with the AMF guideline).

⁽²⁾ The capital requirement is 8% of risk-weighted assets.

⁽³⁾ Other assets are measured using a method other than the Standardized Approach or the Internal Ratings-Based Approach. Other assets include the investments portion below a certain threshold in components that are deconsolidated for regulatory capital purposes (mainly Desjardins Financial Corporation Inc.), the investments portion below a certain threshold in associates as well as the portion of other deferred tax assets below a certain threshold. These three items are weighted at 250% and the deducted portion (namely above a certain threshold) is weighted at 0%. This class includes the credit valuation adjustment (CVA) charge and additional requirements related to the banking and trading portfolio, which are disclosed in the counterparty credit risk section.

⁽⁴⁾ The scaling factor is a 6.0% calibration of risk-weighted assets measured using the Internal Ratings-Based Approach for credit exposures in accordance with Section 1.3 of the AMF guideline.

⁽⁵⁾ Other risks include equities risk, commodities risk and options risk.

⁽⁶⁾ The scaling factors used since January 1, 2014 to account for the requirements for the CVA charge are being phased in to calculate the Tier 1A, Tier 1 and total capital ratios, which are 80%, 83% and 86%, respectively, in 2018 (72%, 77% and 81% in 2017). They will reach 100% for each capital tier by 2019.

OFF-BALANCE SHEET ARRANGEMENTS

In the normal course of operations, the Federation enters into various off-balance sheet arrangements, including assets under management and under administration on behalf of caisse members and clients, credit instruments, contractual commitments, financial assets held as collateral and other, as well as structured entities, including securitization. Additional information can be found in the "Off-balance sheet arrangements" section of the Federation's 2017 annual MD&A.

Assets under management and under administration

As at March 31, 2018, the Federation administered, for the account of caisse members and its clients, assets worth \$425.0 billion, for an increase of \$5.0 billion, or 1.2%. The financial assets entrusted to the Federation as wealth manager totalled \$65.9 billion as at March 31, 2018, down \$724 million, or 1.1%, since December 31, 2017.

Assets under management and under administration by the Federation are comprised essentially of financial assets in the form of investment funds, securities held in custody and assets accumulated by pension funds. They do not belong to Desjardins Group, but to its members and clients and, as a result, they are not recognized on the Consolidated Balance Sheets. The Wealth Management segment is primarily responsible for the activities related to assets under management and under administration.

Structured entities

In the normal course of operations, the Federation enters into various financial transactions with structured entities to diversify its sources of financing and manage its capital. Structured entities are usually created for a unique and distinct purpose, and they frequently have limited activities. These entities may be included in the Federation's Consolidated Balance Sheets if it controls them. Detailed information concerning significant exposure to structured entities not included in the Federation's Consolidated Balance Sheets is provided below. Note 13, "Interests in other entities", to the Annual Consolidated Financial Statements provides more information on structured entities.

Securitization of the Federation's financial assets

The Federation participates in the *National Housing Act (NHA)* Mortgage-Backed Securities Program to manage its liquidities and capital. Transactions carried out under this Program sometimes require the use of a structured entity, the Canada Housing Trust (CHT), set up by Canada Mortgage and Housing Corporation (CMHC) under the Canada Mortgage Bonds (CMB) Program. Note 8, "Derecognition of financial assets", to the Annual Consolidated Financial Statements provides more information about the securitization of the Federation's loans.

RISK MANAGEMENT

RISK MANAGEMENT

Desjardins Group's objective in risk management is to optimize the risk-return trade-off, in accordance with its risk appetite, by developing and applying integrated risk management strategies, frameworks, practices and procedures to all its operations. To this end, Desjardins developed an Integrated Risk Management Framework aimed, among other things, at giving its senior management and the Federation's Board of Directors an appropriate level of confidence and comfort regarding the understanding and management of the full spectrum of risks associated with the achievement of its objectives.

The Federation is exposed to different types of risk in its normal course of operations, including credit risk, market risk, liquidity risk, operational risk, insurance risk, strategic risk, reputational risk, risk related to pension plans, environmental risk and risk related to the regulatory and legal environment.

Risk management is a function covering all Desjardins Group operations, including those of the Federation. As a result, the description of risk management that follows is a description for Desjardins Group. Strict and effective management of these risks is a priority for Desjardins Group, its purpose being to support its major orientations, particularly regarding its financial stability as well as its sustained and profitable growth, while complying with regulatory requirements. Desjardins Group considers risk an inextricable part of its development, and consequently strives to promote a culture in which each of its business segments, employees and managers is responsible for risk management.

In the first quarter of fiscal 2018, Desjardins Group's governance structure, frameworks and practices for risk management, and the nature and description of the risks to which the Federation is exposed (including operational risk, insurance risk, strategic risk, reputational risk, risk related to pension plans, environmental risk and risk related to the regulatory and legal environment) did not change significantly from those described on pages 56 to 85 of the Federation's 2017 annual MD&A. In addition to these types of risk, other risk factors, which are not under Desjardins Group's control (including the Federation's control) could have an impact on its future results. These principal risks and emerging risks, as well as other risk factors, did not change significantly from those described on pages 53 to 55 of the Federation's 2017 annual MD&A.

CREDIT RISK

Credit risk is the risk of losses resulting from a borrower's, guarantor's, issuer's or counterparty's failure to honour its contractual obligations, whether or not such obligations appear on the Consolidated Balance Sheets.

The Federation is exposed to credit risk first through its direct personal, business and government loans, including through its loans to member caisses. It is also exposed through various other commitments, including letters of credit, transactions involving derivative financial instruments and securities transactions.

Quality of loan portfolio

On January 1, 2018, Desjardins Group adopted IFRS 9, "Financial Instruments", which replaces IAS 39, "Financial Instruments: Recognition and Measurement". Contrary to the approach used by IAS 39, which was based on an "Incurred Loss" impairment model, IFRS 9 uses an "Expected Credit Loss" model. The IFRS 9 impairment model is therefore more forward-looking in nature. For more information, refer to Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

As at March 31, 2018, according to Note 5, "Loans and allowance for credit losses", to the Interim Consolidated Financial Statements, the allowance for credit losses totalled \$511 million, up \$313 million compared to December 31, 2017. This increase was due mainly to the coming into force of IFRS 9 on January 1, 2018, the more pessimistic review of economic scenarios and the seasonal migration of borrowers to higher risk ratings.

Gross credit-impaired loans outstanding are now considered Stage 3 loans of the impairment model. The ratio of gross credit-impaired loans, as a percentage of the total gross loans and acceptances portfolio, was 0.36% for the first quarter of 2018, compared to 0.14% as at December 31, 2017. This increase was due to the fact that under IFRS 9, all default loans are now considered credit-impaired unless the detrimental impact on the estimated future cash flows is considered negligible. The allowance for credit losses on credit-impaired loans totalled \$107 million as at March 31, 2018, resulting in a provisioning rate for credit-impaired loans of 51.2%.

The following tables present gross credit-impaired loans by Federation borrower category and the change in the gross credit-impaired loan balance.

Gross credit-impaired loans⁽¹⁾ by borrower category

(in millions of dollars and as a percentage)	As at March 31, 2018 ⁽²⁾					As at December 31, 2017	
	Gross carrying amount			Allowance for credit losses on credit-impaired loans	Net credit-impaired loans	Gross impaired loans	Net impaired loans
	Gross loans and acceptances	Gross credit-impaired loans					
Residential mortgages	\$ 4,356	\$ 11	0.25 %	\$ 4	\$ 7	\$ 8	\$ 3
Consumer, credit card and other personal loans	17,945	188	1.05	97	91	72	49
Business and government	35,679	10	0.03	6	4	4	-
Total loans	\$ 57,980	\$ 209	0.36 %	\$ 107	\$ 102	\$ 84	\$ 52

⁽¹⁾ Further to the adoption of IFRS 9 on January 1, 2018, all loans included in Stage 3 of the impairment model are considered to be credit-impaired. The criteria for considering a loan to be impaired were different under IAS 39. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted as at January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

Change in gross credit-impaired loans⁽¹⁾

(in millions of dollars)	For the three months periods ended		
	March 31, 2018 ⁽²⁾	December 31, 2017	March 31, 2017
Gross impaired loans at the beginning of the period under IAS 39	\$ 84	\$ 74	\$ 95
Impact of adopting IFRS 9 as at January 1, 2018	125	N/A	N/A
Gross credit-impaired loans at the beginning of the last period under IFRS 9	209	N/A	N/A
Gross credit-impaired loans since the last period	115	109	118
Loans returned to unimpaired status	(33)	(57)	(55)
Write-offs and recoveries	(68)	(68)	(70)
Other changes	(14)	26	6
Gross credit-impaired loans at the end of the period	\$ 209	\$ 84	\$ 94

⁽¹⁾ Further to the adoption of IFRS 9 on January 1, 2018, all loans included in Stage 3 of the impairment model are considered to be credit-impaired. The criteria for considering a loan to be impaired were different under IAS 39. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted as at January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

Counterparty and issuer risk

Counterparty and issuer risk is a credit risk relative to different types of securities, derivative financial instrument and securities lending transactions.

The Desjardins Group Risk Management Executive Division sets the maximum exposure for each counterparty and issuer based on quantitative and qualitative criteria. In addition, limits are set for certain financial instruments. The amounts are then allocated to different components based on their needs.

A large proportion of Desjardins Group's exposure is to the different levels of government in Canada, Quebec public and parapublic entities and major Canadian banks. For most of these counterparties and issuers, the credit rating is A- or higher. Desjardins Group's exposure to U.S. and European financial institutions is low, and its exposure to sovereign debt is concentrated in Canada and the U.S.

MARKET RISK

Market risk refers to the risk of changes in the fair value of financial instruments resulting from fluctuations in the parameters affecting this value, in particular, interest rates, exchange rates, credit spreads and their volatility.

Desjardins Group is primarily exposed to market risk through its trading activities, which result primarily from short-term transactions conducted with the intention of profiting from current price movements or to provide arbitrage revenue. Desjardins Group is also exposed to market risk through its non-trading activities, which group together mainly asset/liability management transactions in the course of its traditional banking activities as well as investment portfolios related to its insurance operations. Desjardins Group and its components have adopted policies that set out the principles, limits and procedures to use in managing market risk.

Governance

Desjardins Group's components are primarily structured into different legal entities to deliver products and services that can be distributed to Desjardins Group members and clients. These legal entities manage financial instruments exposed to market risk and are subject to different regulatory environments such as the banking, securities brokerage, wealth management, life and health insurance and property and casualty insurance industries. The board of directors of these entities delegate to various committees the responsibility of setting up systems and procedures to establish measures adapted to their operations and regulatory environments. These measures, together with the appropriate follow-up procedures, are incorporated into their respective policies and guidelines. The function of the Risk Management Executive Division is to monitor these measures and ensure compliance with the said policies. The main measures used and their follow-up processes are described below.

Management of market risk related to trading activities – Value at Risk

The market risk of trading portfolios is managed on a daily basis under a specific policy. This policy specifies the risk factors that must be measured and the limit for each of these factors as well as the total. Tolerance limits are also provided for various stress testing. Compliance with these limits is monitored daily and a market risk dashboard is produced on a daily basis and sent to senior management. Any limit exceeded is immediately analyzed and the appropriate action is taken.

The main tool used to measure this risk is "Value at Risk" (VaR). VaR is an estimate of the potential loss over a certain period of time at a given confidence level. A Monte Carlo VaR is calculated daily on the trading portfolios, using a 99% confidence level and a holding horizon of one day. It is therefore reasonable to expect a loss exceeding the VaR figure once every 100 days. The calculation of VaR is based on historical data for a one-year interval.

In addition to aggregate VaR, Desjardins Group calculates an aggregate stressed VaR (SVaR). It is calculated in the same way as aggregate VaR, except for the use of historical data. Therefore, instead of using the interval of the past year, aggregate SVaR takes into account the historical data for a crisis period of one year from September 2008.

The table below presents the aggregate VaR and the aggregate SVaR of trading activities by risk category, as well as the diversification effect. Equity price risk, foreign exchange risk, interest rate risk and specific interest rate risk are the four risk categories to which the Federation is exposed. These risk factors are taken into account in measuring the market risk of the trading portfolio. They are reflected in the VaR table presented below. The definition of a trading portfolio meets the various criteria defined in the Basel Capital Accord.

VaR by risk category (Trading portfolio)

(in millions of dollars)	For the quarter ended March 31, 2018				For the quarters ended			
	As at March 31, 2018	Average	High	Low	As at December 31, 2017	Average	As at March 31, 2017	Average
Equities	\$ 0.4	\$ 0.4	\$ 0.8	\$ 0.3	\$ 0.5	\$ 0.4	\$ 0.1	\$ 0.2
Foreign exchange	0.4	0.4	0.7	0.1	0.4	0.3	0.5	0.2
Interest rate	4.6	3.4	4.8	2.0	2.1	2.5	4.5	3.6
Specific interest rate risk ⁽¹⁾	8.4	6.3	9.6	3.6	4.3	5.2	5.4	4.2
Diversification effect ⁽²⁾	(9.1)	(7.0)	N/A ⁽³⁾	N/A ⁽³⁾	(5.1)	(5.8)	(6.0)	(4.5)
Aggregate VaR	\$ 4.7	\$ 3.5	\$ 4.8	\$ 2.1	\$ 2.2	\$ 2.6	\$ 4.5	\$ 3.7
Aggregate SVaR	\$ 22.5	\$ 14.2	\$ 22.5	\$ 8.8	\$ 11.1	\$ 11.1	\$ 13.0	\$ 12.6

⁽¹⁾ Specific risk is the risk directly related to the issuer of a financial security, independent of market events. A portfolio approach is used to distinguish specific risk from general market risk. This approach consists of creating a sub-portfolio that contains the positions involving the specific risk of an issuer such as provinces, municipalities and companies, and a sub-portfolio that contains the positions considered to be without issuer risk such as governments in the local currency.

⁽²⁾ Represents the risk reduction related to diversification, namely the difference between the sum of the VaRs of the various market risks and the aggregate VaR.

⁽³⁾ The highs and lows of the various market risk categories can refer to different dates.

The average of the trading portfolio's aggregate VaR was \$3.5 million for the quarter ended March 31, 2018, up \$0.9 million compared to the quarter ended December 31, 2017, primarily as a result of an increase in the average of the VaR related to the interest rate and specific interest rate risk. The average of the aggregate SVaR was \$14.2 million for the quarter ended March 31, 2018, up \$3.1 million compared to the quarter ended December 31, 2017. It should be noted that there has been no change in the model or assumptions over the periods presented.

Aggregate VaR and aggregate SVaR are appropriate measures for a trading portfolio but they must be interpreted by taking into account certain limits, in particular the following ones:

- these measures do not allow future losses to be predicted if actual market fluctuations differ markedly from those used to do the calculations;
- these measures are used to determine the potential losses for a one-day holding period, not the losses on positions that cannot be liquidated or hedged during this one-day period;
- these measures do not provide information on potential losses beyond the selected confidence interval of 99%.

Given these limitations, the process of monitoring trading activities using VaR is supplemented by stress testing and by establishing limits in this regard.

Back testing

Back testing, which is a daily comparison of the VaR with the profits and losses (P&L) on portfolios, is conducted to validate the VaR model used by ensuring that hypothetical results correspond statistically to those of the VaR model. In addition, an independent modelling validation unit works on the model every year.

Desjardins Group performs back testing daily, applying a hypothetical P&L to its trading portfolios. The hypothetical P&L is calculated by determining the difference in value resulting from changes in market conditions between two consecutive days. The portfolio mix between these two days remains static.

The following chart presents changes in VaR for trading activities as well as the hypothetical P&L related to these activities. During the first quarter of 2018, hypothetical P&L was exceeded by \$0.2 million on March 27 due to interest rate fluctuations.

VaR compared to hypothetical P&L for trading activities

(in millions of dollars)

Stress testing

Certain events that are considered highly unlikely and that may have a significant impact on trading portfolios may occur from time to time. These events are at the tail-end of the distribution and are the result of extreme situations. Use of a stress-testing program is required to assess the impact of these potential situations.

The stress-testing program used for trading portfolios includes historical, hypothetical and sensitivity scenarios based, for instance, on events such as 9/11 or the 2008 credit crisis. Using such stress testing, changes can be monitored in the market value of positions held depending on various scenarios. Most stress-testing is predictive. For a given stress test, shocks are applied to certain risk factors (interest rates, exchange rates and commodities) and the effects of these shocks are passed on to all the risk factors taking historical correlations into account. The running of each stress test is considered to be independent of the others. In addition, certain stress testing is subject to limit tracking. Stress-testing results are analyzed and reported daily using a dashboard, together with VaR calculations, in order to detect vulnerability to such events. The stress-testing program is reviewed periodically to ensure that it is kept current.

Structural Interest rate risk management

Desjardins Group is exposed to structural interest rate risk, which represents the potential impact of interest rate fluctuations on net interest income and the economic value of equity. This risk is the main component of market risk for Desjardins Group's traditional banking activities other than trading, such as accepting deposits and granting loans, as well as for its securities portfolios used for long-term investment purposes and as liquidity reserves.

Interest rate sensitivity is based on the earlier of the repricing or the maturity date of the assets, liabilities and derivative financial instruments used to manage structural interest rate risk. The situation presented reflects the position only on the date indicated and can change significantly in subsequent quarters depending on the preferences of Desjardins Group members and clients, and the application of policies on structural interest rate risk management.

Some Consolidated Balance Sheet items are considered non-interest-rate-sensitive instruments, including investments in equities, non-performing loans, non-interest-bearing deposits, non-maturity deposits with an interest rate not referenced to a specific rate (such as the prime rate), and equity. As dictated in its policies, Desjardins Group's management practices are based on prudent assumptions with respect to the maturity profile used in its models to determine the interest rate sensitivity of such instruments.

In addition to the total sensitivity gap, the main structural interest rate risk factors are:

- the trend in interest rate level and volatility;
- the changes in the shape of the interest rate curve;
- member and client behaviour in their choice of products;
- the financial intermediation margin;
- the optionality of the various financial products offered.

In order to mitigate risk factors, sound and prudent management is applied to optimize net interest income while minimizing the negative incidence of interest rate movements. The established policies describe the principles, limits and procedures that apply to structural interest rate risk management. Simulations are used to measure the effect of different variables on changes in net interest income and the economic value of equity. These policies specify the structural interest rate risk factors, the risk measures selected, the risk tolerance levels and the management limits as well as the procedures in the event that limits are exceeded. Structural interest rate risk is assessed at the required frequency according to portfolio volatility (daily, monthly and quarterly).

The assumptions used in the simulations are based on an analysis of historical data and on the effects of various interest rate environments on changes in such data. These assumptions concern changes in the structure of assets and liabilities, including modelling for non-maturity deposits and equity, in member and client behaviour, and in pricing. Desjardins Group's asset and liability management committee (the Asset/Liability Committee) is responsible for analyzing and approving the global matching strategy on a monthly basis while respecting the parameters defined in structural interest rate risk management policies.

The table below presents the potential impact before income taxes, with regard to structural interest rate risk management associated with banking activities, of a sudden and sustained 100-basis-point increase or decrease in interest rates on net interest income and the economic value of equity for the Federation. The impact on insurance activities is presented in Note 1 of this table.

Interest rate sensitivity (before income taxes)⁽¹⁾

(in millions of dollars)	As at March 31, 2018		As at December 31, 2017		As at March 31, 2017	
	Net interest income ⁽²⁾	Economic value of equity ⁽³⁾	Net interest income ⁽²⁾	Economic value of equity ⁽³⁾	Net interest income ⁽²⁾	Economic value of equity ⁽³⁾
Impact of a 100-basis-point increase in interest rates	\$ (20)	\$ 96	\$ (8)	\$ -	\$ (18)	\$ (10)
Impact of a 100-basis-point decrease in interest rates ⁽⁴⁾	18	(98)	9	-	(45)	21

⁽¹⁾ Interest rate sensitivity related to insurance activities is not reflected in the amounts above. For these activities, a 100-basis-point increase in interest rates would result in a \$233 million decrease in the economic value of equity before taxes as at March 31, 2018, and in a \$226 million and \$218 million decrease as at December 31, 2017 and March 31, 2017, respectively. A 100-basis-point decrease in interest rates would result in a \$211 million increase in the economic value of equity before taxes as at March 31, 2018, and in a \$205 million and \$195 million increase as at December 31, 2017 and March 31, 2017, respectively.

⁽²⁾ Represents the interest rate sensitivity of net interest income for the next 12 months.

⁽³⁾ Represents the sensitivity of the present value of assets, liabilities and off-balance sheet instruments.

⁽⁴⁾ The results of the impact of a decrease in interest rates take into consideration the use of a floor to avoid negative interest rates.

Foreign exchange risk management

Foreign exchange risk arises when the actual or expected value of assets denominated in a foreign currency is higher or lower than that of liabilities denominated in the same currency.

In certain specific situations, Desjardins Group and its components may become exposed to foreign exchange risk, particularly with respect to the U.S. dollar and the euro. This exposure mainly arises from their intermediation activities with members and clients, and their financing and investment activities. A Desjardins Group policy on market risk has set foreign exchange risk exposure limits, which are monitored by the Risk Management Executive Division. To ensure that this risk is properly controlled, Desjardins Group and its components also use, among other things, derivative financial instruments such as foreign exchange forward contracts and currency swaps. Desjardins Group's residual exposure to this risk is low because it reduces its foreign exchange risk by using derivative financial instruments.

LIQUIDITY RISK

Liquidity risk refers to Desjardins Group's capacity to raise the necessary funds (by increasing liabilities or converting assets) to meet a financial obligation, whether or not it appears on the Consolidated Balance Sheets.

Desjardins Group manages liquidity risk in order to ensure that it has timely and cost-effective access to the funds needed to meet its financial obligations as they become due, in both routine and crisis situations. Managing this risk involves maintaining a sufficient level of liquid securities, ensuring stable and diversified sources of funding, monitoring indicators and having a contingency plan in the event of a liquidity crisis.

Liquidity risk management is a key component of the overall risk management strategy. Desjardins Group has established policies describing the principles, limits, risk appetite thresholds as well as the procedures that apply to liquidity risk management. These policies are reviewed on a regular basis to ensure that they are appropriate for the operating environment and prevailing market conditions. They are also updated to reflect regulatory requirements and sound liquidity risk management practices. Given that the insurance companies are subject to specific regulatory requirements, they manage their liquidity risks based on their own needs while following Desjardins Group guidelines. The securities held by these components are not taken into account in the valuation of Desjardins Group's liquidity reserves, since they cannot be used by Desjardins Group's Treasury to generate liquidity for other components.

Desjardins Group's Treasury ensures stable and diversified sources of institutional funding by type, source and maturity. It uses a wide range of financial products and borrowing programs on various markets for its funding needs. Through these operations, the funding needs of Desjardins Group components can be satisfied under conditions comparable to those offered on capital markets.

Furthermore, Desjardins Group issues covered bonds and securitizes CHMC-insured loans in the course of its normal operations, as presented under "Sources of financing". Desjardins Group is also eligible for the Bank of Canada's various intervention programs and loan facilities for Emergency Lending Assistance advances.

The implementation of Basel III strengthens international minimum liquidity requirements through the application of a liquidity coverage ratio (LCR), a net stable funding ratio (NSFR) and the use of Net Cumulative Cash Flow (NCCF). Under its liquidity risk management policy, Desjardins Group already produces these two ratios as well as the NCCF, and reports them on a regular basis to the AMF. It should be noted that the enactment date of the regulatory requirements concerning the NSFR was recently postponed until January 1, 2020, and Desjardins Group intends to comply with this ratio once it has become effective.

Applying the calculation rules established by the Basel Committee on Banking Supervision and incorporated in the AMF's Liquidity Adequacy Guideline, Desjardins Group's average LCR was 119.1% for the quarter ended March 31, 2018, compared to 121.4% for the previous quarter. The AMF requires that the ratio be greater than or equal to 100% in the absence of stressed conditions. This ratio is proactively managed by Desjardins Group's Treasury, and an appropriate level of high-quality liquid assets is maintained for adequate coverage of the theoretical cash outflows associated with the standardized crisis scenario within the Basel III framework. Desjardins Group's main sources of theoretical cash outflows are a potential serious run on deposits by members of Desjardins caisses and a sudden drying-up of the short-term institutional funding sources used on a day-to-day basis by Desjardins Group.

Liquidity risk measurement and monitoring

Desjardins Group determines its liquidity needs by reviewing its current operations and evaluating its future forecasts for balance sheet growth and institutional funding conditions. Various analyses are used to determine the actual liquidity levels of assets and the stability of liabilities based on observed behaviours or contractual maturities. Maintaining liquidity reserves of high-quality assets is required to offset potential cash outflows following a disruption in capital markets, or events that would restrict its access to funding or result in a serious run on deposits.

The minimum liquid asset levels to be maintained by Desjardins Group are specifically prescribed by policies. Daily management of these securities and the reserve level to be maintained is centralized at Desjardins Group Treasury and is subject to monitoring by the Risk Management function under the supervision of the Finance and Risk Management Committee. Securities eligible for liquidity reserves must meet high security and negotiability criteria and provide assurance of their adequacy in the event of a severe liquidity crisis. The securities held are largely Canadian government securities.

In addition to complying with regulatory ratios, a Desjardins-wide stress-testing program has been set up. This program incorporates the concepts put forward by the Basel Committee on Banking Supervision in "Basel III: International Framework for Liquidity Risk Measurement, Standards and Monitoring". The scenarios, based on a downgrade of Desjardins Group combined with a shock on capital markets, make it possible to:

- measure the extent, over a one-year period, of potential cash outflows in a crisis situation;
- implement liquidity ratios and levels to be maintained across Desjardins Group;
- assess the potential marginal cost of such events, depending on the type, severity and level of the crisis.

The calculations are performed daily to ensure compliance with the liquidity levels to be maintained based on crisis scenarios.

Sources of financing

Core funding, which includes capital, long-term liabilities and a diversified deposit portfolio, is the foundation upon which the Federation's liquidity position depends. The solid base of deposits from member caisses combined with wholesale funding, diversified in terms of both the programs used as well as the staggering of contractual maturities, allows it to maintain high regulatory liquidity ratios while ensuring their stability. Total deposits, including wholesale funding, presented on the Consolidated Balance Sheets amounted to \$53.8 billion as at March 31, 2018, up \$1.7 billion since December 31, 2017. Additional information on deposits is presented in the "Balance sheet management" section of this MD&A.

Financing programs and strategies

As Desjardins Group's Treasurer, the Federation meets the needs of the organization's members and clients. Its first priority is to implement appropriate strategies to identify, measure and manage risks, and these strategies are regulated by policies. In the first three months of 2018, the Federation succeeded in maintaining a liquidity level sufficient to meet Desjardins Group's needs through its strict treasury policy, solid institutional financing and the contribution of the caisse network. Short-term wholesale financing is used to finance very liquid assets while long-term wholesale financing is mainly used to finance less liquid assets and to support reserves of liquid assets.

In order to secure long-term financing at the lowest cost on the market, the Federation maintains an active presence in the federally-guaranteed mortgage loan securitization market under the *National Housing Act* (NHA) Mortgage-Backed Securities Program. In addition, to ensure stable financing, it diversifies its sources from institutional markets. It therefore regularly resorts to the capital markets when conditions are favourable and makes public and private issues of term notes on Canadian, U.S. and European markets, as required.

The main programs currently used by the Federation are as follows:

Main financing programs

As at March 31, 2018

	Maximum authorized amount
Medium-term notes (Canadian)	\$7 billion
Covered bonds (multi-currency)	\$10 billion
Short-term notes (European)	€3 billion
Short-term notes (U.S.)	US\$15 billion
Medium-term notes (multi-currency)	€7 billion

The following table represents remaining terms to maturity of wholesale funding.

Remaining contractual terms to maturity of wholesale funding

(in millions of dollars)	As at March 31, 2018								As at December 31, 2017
	Less than 1 month	1 to 3 months	3 to 6 months	6 to 12 months	Total – Less than 1 year	1 to 2 years	Over 2 years	Total	Total
Bearer discount notes	\$ 2,087	\$ 805	\$ 23	\$ 15	\$ 2,930	\$ -	\$ -	\$ 2,930	\$ 2,802
Commercial paper	6,026	3,894	1,697	1,135	12,752	-	-	12,752	9,276
Medium-term notes	-	-	-	1,207	1,207	2,949	4,161	8,317	11,030
Mortgage loan securitization	-	556	331	801	1,688	1,541	6,169	9,398	9,164
Covered bonds	-	-	-	1,585	1,585	1,583	1,582	4,750	4,517
Subordinated notes	-	-	-	-	-	-	1,383	1,383	1,388
Total	\$ 8,113	\$ 5,255	\$ 2,051	\$ 4,743	\$ 20,162	\$ 6,073	\$ 13,295	\$ 39,530	\$ 38,177
Including:									
Secured	\$ -	\$ 556	\$ 331	\$ 2,386	\$ 3,273	\$ 3,124	\$ 9,134	\$ 15,531	\$ 15,069
Unsecured	8,113	4,699	1,720	2,357	16,889	2,949	4,161	23,999	23,108

The total wholesale funding presented in the table above was carried out by the Federation, except for the subordinated notes, which were issued by Desjardins Capital Inc. Total wholesale funding was up \$1.4 billion compared to December 31, 2017, mainly because of an increase in commercial paper, partially offset by a decrease in medium-term notes.

In addition, the Federation diversifies its financing sources in order to limit its dependence on a single currency. The "Wholesale funding by currency" table presents a breakdown of borrowings on markets and subordinated notes by currency. These funds are obtained primarily through short- and medium-term notes, mortgage loan securitization, covered bonds and subordinated notes.

Wholesale funding by currency

(in millions of dollars and as a percentage)

	As at March 31, 2018		As at December 31, 2017	
Canadian dollars	\$ 18,727	47.4%	\$ 18,345	48.1%
U.S. dollars	13,059	33.0	12,105	31.7
Other	7,744	19.6	7,727	20.2
	\$ 39,530	100.0%	\$ 38,177	100.0%

The Federation also participated in new issues under the NHA Mortgage-Backed Securities Program for a total amount of \$607 million in the first three months of 2018.

Outstanding notes issued under the Federation's medium-term financing programs amounted to \$22.5 billion as at March 31, 2018, compared to \$24.7 billion as at December 31, 2017. The outstanding notes for these issues are presented under "Deposits – Business and government" in the Consolidated Balance Sheets. Desjardins Capital Inc.'s senior notes outstanding totalled \$1.4 billion as at March 31, 2018, unchanged from December 31, 2017. Furthermore, to round out its financing and increase its capital base, in the first three months of 2018, the Federation issued F capital shares for a cash consideration of \$68 million.

Overall, these transactions made it possible to adequately meet the liquidity needs of Desjardins Group, to better diversify its sources of financing and to further extend their average term.

Credit ratings of securities issued

Desjardins Group's credit ratings affect its ability to access sources of funding on capital markets, as well as the conditions of such funding. They are also a factor considered in certain Desjardins Group transactions involving counterparties.

Rating agencies assign credit ratings and related ratings outlooks based on their own proprietary methodology, which includes a number of analytical criteria, including factors that are not under Desjardins Group's control. The rating agencies evaluate Desjardins Group primarily on a combined basis and recognize its capitalization, its consistent financial performance, its significant market shares in Quebec and the quality of its assets. Consequently, the credit ratings of the Federation, a reporting issuer, and of Desjardins Capital Inc., a venture issuer, are backed by Desjardins Group's financial strength.

During the first three months of 2018, the credit ratings and outlooks assigned to Desjardins Group remained unchanged.

After the publication, on April 18, 2018, of the Department of Finance Canada's final version of regulations to implement the main features of the Bank Recapitalization (Bail-in) Regime and of the OSFI's final version of its guideline on Total Loss Absorbing Capacity (TLAC), DBRS issued a press release with a number of ratings decisions. In particular, the agency revised the credit ratings outlook for four Canadian banks from negative to stable and downgraded the subordinated debt ratings for the six major Canadian banks. Given that the Bail-in Regime is not applicable to AMF-regulated Desjardins Group, it was not mentioned in the DBRS press release.

The ratings outlooks for Desjardins Group from S&P and Fitch are stable, but DBRS' and Moody's outlooks for Desjardins Group are negative. DBRS' assignment of a negative ratings outlook to Desjardins Group and Moody's assignment of a negative ratings outlook to Desjardins Group and to the six major Canadian banks stem from the uncertainty about continued government support to systemically important financial institutions on account of the Bail-in Regime applicable to them. However, Moody's ratings outlook for Desjardins Capital Inc. remains stable.

The Federation and Desjardins Capital Inc. have first-class credit ratings that are among the best of the major Canadian and international banking institutions.

Credit ratings of securities issued

	DBRS	STANDARD & POOR'S	MOODY'S	FITCH
<i>Fédération des caisses Desjardins du Québec</i>				
Short-term	R-1 (high)	A-1	P-1	F1+
Medium- and long-term, senior	AA	A+	Aa2	AA-
<i>Desjardins Capital Inc.</i>				
Medium- and long-term, senior	AA (low)	A	A2	A+

Desjardins Group regularly monitors the additional level of obligations that its counterparties would require in the event of a credit rating downgrade for the Federation and Desjardins Capital Inc. This monitoring enables Desjardins Group to assess the impact of such a downgrade on its funding capabilities, and its ability to perform transactions in the normal course of its operations as well as ensure that it has the additional liquid assets and collateral necessary to meet its obligations. Currently, Desjardins Group is not obliged to provide additional collateral in the event of its credit rating being lowered three notches by one or more credit rating agencies.

Contractual maturities of on-balance sheet items and off-balance sheet commitments

The following table presents assets and liabilities recorded on the Consolidated Balance Sheets and off-balance sheet commitments at their carrying amount and classified according to their residual contractual maturities. The classification of maturities is an information source with regard to liquidity and financing risk, but it differs from the analysis performed by the Federation to determine the expected maturity of the items for liquidity risk management purposes. Many factors other than contractual maturity are taken into consideration to measure expected future cash flows and liquidity risk.

The value of the credit commitments presented in this table represents the maximum amount of additional credit that the Federation could be required to grant if the commitments were fully used. The value of guarantees and standby letters of credit amounts to the maximum cash outflows that the Federation could be required to make in the event of complete default of the parties to the guarantees, without taking any possible recovery into account. These commitments and guarantees do not necessarily represent future liquidity needs because a large portion of these instruments will expire or be cancelled without giving rise to any cash outflows.

The table below will henceforth present contractual maturities of on-balance sheet items and off-balance sheet commitments in accordance with the Enhanced Disclosure Task Force's recommendations for comparison purposes with other financial institutions. Note 15, "Insurance contract liabilities", to the Annual Consolidated Financial Statements provides additional information on the contractual maturities of actuarial liabilities and provisions for claims and adjustment expenses.

⁽¹⁾ The information presented as at March 31, 2018 takes into account the standards and amendments adopted as at January 1, 2018. The comparative data have not been restated. For more information, see Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements.

⁽²⁾ Equity securities are classified under "No stated maturity".

⁽³⁾ Amounts repayable on demand are classified under "No stated maturity".

⁽⁴⁾ Deposits payable on demand or after notice are considered as having "No stated maturity".

⁽⁵⁾ Amounts are presented by remaining contractual maturity of the underlying security.

⁽⁶⁾ Includes personal lines of credit, lines of credit secured by real or immovable property and credit card lines for which the amounts committed are unconditionally revocable at any time at the Federation's discretion.

ADDITIONAL INFORMATION RELATED TO CERTAIN RISK EXPOSURES

The tables below provide details about more complex financial instruments that carry a higher risk.

Asset-backed securities

(in millions of dollars)	As at March 31, 2018		As at December 31, 2017	
	Notional amounts	Fair value	Notional amounts	Fair value
Financial asset-backed and mortgage-backed securities ⁽¹⁾	\$ 149	\$ 150	\$ 146	\$ 148

⁽¹⁾ None of the securities held is directly backed by subprime residential mortgage loans. Following the adoption of IFRS 9 as at January 1, 2018, these securities are presented under "Securities at fair value through profit or loss" and "Securities at fair value through other comprehensive income" on the Consolidated Balance Sheets. As at December 31, 2017, they were presented under "Securities at fair value through profit or loss" and "Available-for-sale securities".

Derivative financial instruments

(in millions of dollars)	As at March 31, 2018			As at December 31, 2017		
	Notional amounts	Positive value	Negative value	Notional amounts	Positive value	Negative value
Credit default swaps ⁽¹⁾	\$ 412	\$ 7	\$ -	\$ 616	\$ 13	\$ 2
Total return swaps ⁽²⁾	96	-	-	86	-	1

⁽¹⁾ Credit default swaps are presented in the Consolidated Balance Sheets as derivative financial instruments.

⁽²⁾ These amounts do not include any amounts realized as part of securitization activities. Total return swaps are presented in the Consolidated Balance Sheets as derivative financial instruments.

Leveraged finance loans and subprime loans

(in millions of dollars)	As at March 31, 2018	As at December 31, 2017
Leveraged finance loans ⁽¹⁾	\$ 150	\$ 149
Alt-A mortgage loans ⁽²⁾	19	19
Subprime residential mortgage loans ⁽³⁾	2	1

⁽¹⁾ Leveraged finance loans are defined as loans to large corporations and finance companies whose credit rating is between BB+ and D, and whose level of indebtedness is very high compared to other companies in the same industry.

⁽²⁾ Alt-A mortgage loans are defined as loans to borrowers with non-standard income documentation. These loans are presented in the Consolidated Balance Sheets under "Loans – Residential mortgages" and are measured at amortized cost.

⁽³⁾ Subprime residential mortgage loans are defined as loans to borrowers with a high credit risk profile. Subprime residential mortgages are recorded in the Consolidated Balance Sheets under "Loans – Residential mortgages" and are measured at amortized cost.

ADDITIONAL INFORMATION

CONTROLS AND PROCEDURES

During the interim period ended March 31, 2018, the Federation did not make any changes to its internal control over financial reporting that have materially affected, or may materially affect, its operations. The adoption of IFRS 9, "Financial Instruments", IFRS 15, "Revenue from Contracts with Customers", and the amendments to IFRS 4, "Insurance Contracts", did not have a significant impact on internal control over financial reporting. The parties involved and their responsibilities regarding internal control are described on page 86 of the 2017 annual MD&A.

RELATED PARTY DISCLOSURES

In the normal course of operations, the Federation offers financial services to related parties, including its associates and other related companies, and enters into agreements for operating services with them. It also pays its key management personnel compensation under normal market conditions. The Federation carries out transactions with other Desjardins Group entities, which are primarily caisses.

Furthermore, the Federation provides its financial products and services, under normal market conditions, to its directors, its key management personnel and the persons related to them.

The Federation has set up a process to obtain assurance that all transactions with its officers and the persons related to them have been carried out as arm's length transactions and in compliance with the legislative framework for its various components. These policies and procedures have not changed significantly since December 31, 2017.

Additional information on related party transactions is provided in Note 33, "Related party disclosures", to the Annual Consolidated Financial Statements.

CRITICAL ACCOUNTING POLICIES AND ESTIMATES

A description of the accounting policies used by the Federation is essential to understanding the Annual and Interim Consolidated Financial Statements. The significant accounting policies are described in Note 2, "Basis of presentation and significant accounting policies", to the Federation's Annual Consolidated Financial Statements on pages 109 to 124 of the 2017 Annual Report, except for the amendments described in Note 2, "Basis of presentation and significant accounting policies", to the Interim Consolidated Financial Statements as a result of the adoption of IFRS 9, "Financial Instruments", IFRS 15, "Revenue from Contracts with Customers", and amendments to IFRS 4, "Insurance Contracts", on January 1, 2018.

Some of these policies are of particular importance in presenting the Federation's financial position and operating results because they require management to make judgments as well as estimates and assumptions that may affect the reported amounts of some assets, liabilities, income and expenses, as well as related information. Explanations of the significant accounting policies that have required management to make difficult, subjective or complex judgments, often about matters that are inherently uncertain, are provided on pages 87 to 91 of the 2017 annual MD&A as well in Note 2, "Basis of presentation and significant accounting policies", and Note 5, "Loans and allowance for credit losses", to these Interim Consolidated Financial Statements.

No material change was made to these judgments, estimates, assumptions and accounting policies during the first three months of 2018, except for the changes regarding the accounting standards adopted on January 1, 2018.

FUTURE ACCOUNTING CHANGES

Accounting standards issued by the IASB but not yet effective for the Federation are presented in Note 2, "Basis of presentation and significant accounting policies", to the Federation's Annual Consolidated Financial Statements, on pages 124 to 126 of the 2017 Annual Report. Additional information is also presented under "Future accounting changes" on pages 91 to 95 of the 2017 annual MD&A. Since then, the IASB has issued the following changes:

Conceptual Framework for Financial Reporting

In March 2018, the IAS issued the "Conceptual Framework for Financial Reporting", which replaces the existing "Conceptual Framework for Financial Reporting". The "Conceptual Framework for Financial Reporting" includes new concepts, updates definitions and recognition criteria for assets and liabilities, and clarifies certain key concepts. The Federation is currently assessing the impact of adopting this new framework, which will be effective for annual periods beginning on or after January 1, 2020.

Notes to the Condensed Interim Consolidated Financial Statements

(unaudited)

NOTE 1 – INFORMATION ON THE *FÉDÉRATION DES CAISSES DESJARDINS DU QUÉBEC*

Nature of operations

The *Fédération des caisses Desjardins du Québec* (the Federation) is the cooperative entity responsible for assuming orientation, framework, coordination and development activities for Desjardins Group. The role of the Federation is also to protect the interests of Desjardins Group members. It provides its member caisses with a variety of services, including certain technical, financial, and administrative services. The member caisses exercise a collective power over the Federation, and each of them has a significant influence on the Federation.

In addition, the Federation is the parent company of several financial services subsidiaries. The address of its head office is 100 Des Commandeurs Street, Lévis, Quebec, Canada.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES

BASIS OF PRESENTATION

Statement of compliance

Pursuant to the *Act Respecting Financial Services Cooperatives*, these unaudited Condensed Interim Consolidated Financial Statements (the Interim Consolidated Financial Statements) have been prepared by the Federation's management in accordance with the International Financial Reporting Standards (IFRS) issued by the International Accounting Standards Board (IASB), more specifically in accordance with International Accounting Standard (IAS) 34, "Interim Financial Reporting", and the accounting requirements of the *Autorité des marchés financiers* (AMF) in Quebec, which do not differ from IFRS. Certain comparative figures have been reclassified to conform with the presentation of the Interim Consolidated Financial Statements for the current period. These reclassifications had no impact on the Federation's profit or loss or total assets and liabilities.

These Interim Consolidated Financial Statements should be read in conjunction with the audited Annual Consolidated Financial Statements (the Annual Consolidated Financial Statements) for the year ended December 31, 2017, and the shaded areas of section 4.0, "Risk management", of the related Management's Discussion and Analysis, which are an integral part of the Annual Consolidated Financial Statements. All accounting policies were applied as described in Note 2, "Basis of presentation and significant accounting policies", to the Annual Consolidated Financial Statements, except for the changes described in the "Changes in accounting policies" section of this note.

These Interim Consolidated Financial Statements were approved by the Board of Directors of the Federation on May 15, 2018.

Presentation and functional currency

These Interim Consolidated Financial Statements are expressed in Canadian dollars, which is also the functional currency of the Federation. Dollar amounts presented in the tables of the Notes to the Interim Consolidated Financial Statements are in millions of dollars, unless otherwise stated.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)**CHANGES IN ACCOUNTING POLICIES**

On January 1, 2018, the Federation adopted IFRS 9, “Financial Instruments”, IFRS 15, “Revenue from Contracts with Customers”, and the amendments to IFRS 4, “Insurance Contracts”.

IFRS 9 replaces IAS 39, “Financial Instruments: Recognition and Measurement”, and gives rise to new requirements for the classification and measurement of financial assets and liabilities and the impairment of financial assets, as well as requirements for hedge accounting. As permitted by IFRS 9, the Federation decided to continue applying the hedge accounting requirements of IAS 39 instead of adopting the provisions of IFRS 9.

The amendments to IFRS 4 are designed to address the concerns of insurers and their representative bodies about the different effective dates of IFRS 9 and new IFRS 17, “Insurance Contracts”. The amendments permit, but do not require, an entity that issues insurance contracts to elect to use one of two options in connection with adopting IFRS 9: deferring the initial application date of IFRS 9 to January 1, 2021 or applying the overlay approach. The Federation elected to apply the overlay approach, which is the only option proposed by these amendments that it may apply, to financial assets that are eligible and designated in accordance with certain specific criteria.

IFRS 15 introduces a single, comprehensive revenue recognition model for all contracts with customers other than those that are within the scope of other standards, such as financial instruments, insurance contracts and leases. The core principle of this standard is that revenue recognition should depict the transfer of control over a good or a service in an amount that reflects the consideration received or expected to be received in exchange for such good or service.

The significant accounting policies set out below arise from the adoption of these new standards and amendments and are applicable retrospectively as of January 1, 2018 without restatement of comparative periods. Consequently, the information presented for fiscal 2017 is in accordance with the accounting policies described in the Annual Consolidated Financial Statements for the year ended December 31, 2017.

a) Financial assets and liabilities

Financial assets and liabilities are recognized on the date the Federation becomes a party to their contractual provisions, namely the date of acquisition or issuance of the financial instrument. Regular-way purchases and sales of financial assets are recognized on a trade-date basis.

Classification and measurement

The classification of financial assets and liabilities in the classes defined in the financial instrument standard is presented in Note 3, “Carrying amount of financial instruments”.

Financial assets are classified based on their contractual cash flow characteristics and the business model under which they are held.

Contractual cash flow characteristics

In order to meet the cash flow characteristics criterion for purposes of classifying a financial asset, the cash flows from this asset must be solely payments of principal and interest on the principal amount outstanding. Principal is generally the fair value of the financial asset at initial recognition. Interest consists mainly of consideration for the time value of money and for the credit risk associated with the principal amount outstanding during a particular period of time, but it may also include consideration for other basic lending risks and costs, such as liquidity risk and administrative costs, as well as a certain profit margin.

Business model

The Federation’s business models are determined in a manner that reflects how groups of financial assets are managed to achieve a particular business objective. The business models refer to how the Federation manages its financial assets in order to generate cash flows, that is, they reflect whether cash flows will result from collecting contractual cash flows, selling financial assets or both. Determining business models requires the use of judgment and is based on all relevant evidence that is available to the Federation at the date of the assessment.

The Federation’s business models are defined as follows:

- Held to collect contractual cash flows: The objective of holding financial assets is achieved by collecting contractual cash flows.
- Held to collect contractual cash flows and sell: The objective is achieved by both collecting contractual cash flows and selling financial assets.
- Other business models: The objective is not consistent with any of the above-mentioned business models.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

The classification and measurement of financial assets can be summarized as follows:

Classes		Categories	Recognition	
			Initial	Subsequent
Financial assets	At fair value through profit or loss (i)	Classified as at fair value through profit or loss (ii)	Fair value	Fair value
		Designated as at fair value through profit or loss (iii)	Fair value	Fair value
	At fair value through other comprehensive income (iv)	Classified as at fair value through other comprehensive income (v)	Fair value	Fair value
		Designated as at fair value through other comprehensive income (vi)	Fair value	Fair value
	Amortized cost (vii)		Fair value	Amortized cost

(i) Financial assets included in the “At fair value through profit or loss” class comprise financial assets “Classified as at fair value through profit or loss” and “Designated as at fair value through profit or loss”. Therefore:

- Changes in fair value of financial assets included in this class are recorded in the Consolidated Statements of Income under “Net investment income”.
- Interest income – calculated using the effective interest method – and dividend income from securities included in the “At fair value through profit or loss” class of the Personal and Business Services segment and the Other category is recognized under “Interest income – Securities” and, for the other segments, such income is mainly recognized under “Net investment income”. Interest income from derivative financial instruments is recognized under “Net investment income”.

(ii) Financial assets “Classified as at fair value through profit or loss” include the following:

- Debt instruments that are managed either for trading purposes or on a fair value basis or do not meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal or interest.
- Equity instruments.
- Derivative financial instruments.

Certain financial assets “Classified as at fair value through profit or loss” are designated for the overlay approach. For more information, see the “Application of the overlay approach to insurance operations financial assets” section of this note.

(iii) Financial assets “Designated as at fair value through profit or loss” are debt securities designated as such by management upon initial recognition, on an instrument-by-instrument basis. Management may make this irrevocable designation if doing so eliminates or significantly reduces a measurement or recognition inconsistency for the financial asset.

The Federation’s financial assets included in this measurement category comprise mainly securities (debt instruments) that back the life and health insurance actuarial liabilities and the property and casualty insurance provisions for claims.

(iv) Financial assets included in the “At fair value through other comprehensive income” class comprise financial assets “Classified as at fair value through other comprehensive income” and “Designated as at fair value through other comprehensive income”. Therefore:

- Changes in fair value of financial assets included in this class are recorded in the Consolidated Statements of Comprehensive Income as “Net unrealized losses”. For financial assets “Classified as at fair value through other comprehensive income”, gains and losses are reclassified to the Consolidated Statements of Income when the asset is derecognized, while for financial assets “Designated as at fair value through other comprehensive income”, gains and losses are never reclassified subsequently to the Consolidated Statements of Income and are reclassified immediately to undistributed surplus earnings.
- Premiums and discounts on the purchase of financial assets “At fair value through other comprehensive income” are amortized over the life of the securities using the effective interest method and recognized under “Interest income – Securities” for the Personal and Business Services segment and the Other category and, for the other segments, are mainly recognized under “Net investment income”.

(v) Financial assets “Classified as at fair value through other comprehensive income” include debt instruments that are held within a business model whose objective is achieved by both collecting contractual cash flows and selling financial assets and meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal or interest.

(vi) Financial assets “Designated as at fair value through other comprehensive income” include equity securities for which an irrevocable election was made, on an instrument-by-instrument basis. Financial assets included in this measurement category comprise investments in private companies that will be held on a long-term basis.

(vii) Securities included in the “Amortized cost” class are financial assets that are held within a business model whose objective is achieved by collecting contractual cash flows and meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal or interest.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

Securities included in this class are initially recognized at fair value in the Consolidated Balance Sheets and, at subsequent reporting dates, they are measured at amortized cost using the effective interest method. Income recognized on securities included in the “Amortized cost” class is presented under “Interest income – Loans” in the Consolidated Statements of Income when it is recognized by the Personal and Business Services segment and the Other category, while for the other segments, it is recognized mainly under “Net investment income”.

Financial assets are not reclassified following their initial recognition, except when the business model for managing those financial assets is changed.

Application of the overlay approach to insurance operations financial assets

The Federation elected to designate certain eligible financial assets for the overlay approach to reduce the volatility in profit or loss arising from the different effective dates of IFRS 9, “Financial Instruments”, and IFRS 17, “Insurance Contracts”. To be eligible, a financial asset must meet the following criteria:

- It is measured at fair value through profit or loss applying IFRS 9 but would not have been measured at fair value through profit or loss in its entirety applying IAS 39, “Financial Instruments: Recognition and Measurement”.
- It is held in respect of an activity connected with contracts within the scope of IFRS 4.

The overlay approach involves reclassifying between net surplus earnings and other comprehensive income, for designated financial assets, the difference between the amount reported in the Consolidated Statements of Income under IFRS 9 and the amount that would have been reported if the Federation had continued to apply IAS 39 in such a way that net surplus earnings related to designated financial instruments reported in the Consolidated Statements of Income correspond to the amount that would have been reported if the Federation had continued to apply IAS 39. In determining the amount that would have been reported in the Consolidated Statements of Income if IAS 39 had been applied, the Federation considers gains (losses) on sales of securities, foreign currency fair value hedge accounting for equity instruments as well as impairment losses on equity instruments using accounting policies consistent with IAS 39.

Reclassifications to other comprehensive income are presented under “Overlay approach adjustment for insurance operations financial assets” in the Consolidated Statements of Income and under “Net change in unrealized gains and losses related to the overlay approach adjustment for insurance operations financial assets” in the Consolidated Statements of Comprehensive Income. The overlay approach may be used for the years beginning before January 1, 2021 or until the adoption of IFRS 17, if earlier.

Financial liabilities are classified based on their characteristics and the intention of management upon their acquisition.

The classification and measurement of financial liabilities can be summarized as follows:

Classes		Categories	Recognition	
			Initial	Subsequent
Financial liabilities	At fair value through profit or loss (i)	Classified as at fair value through profit or loss (ii)	Fair value	Fair value
		Designated as at fair value through profit or loss (iii)	Fair value	Fair value
	Amortized cost (iv)		Fair value	Amortized cost

(i) Financial liabilities included in the “At fair value through profit or loss” class comprise financial liabilities “Classified as at fair value through profit or loss” and “Designated as at fair value through profit or loss”. Therefore:

- Changes in fair value of financial liabilities included in this class are recorded in the Consolidated Statements of Income under “Net investment income”, except for financial liabilities designated as at fair value, for which the change in fair value that is attributable to the Federation’s own credit risk is recognized in other comprehensive income with no subsequent reclassification to profit or loss.
- Interest expense related to financial liabilities included in the “At fair value through profit or loss” class is recognized under “Net investment income”.

(ii) Financial liabilities “Classified as at fair value through profit or loss” are securities held for trading and include debt securities issued with the intention to repurchase them in the near term and securities that are part of a portfolio of securities that are managed together and for which there is evidence of an actual pattern of short-term profit-taking, such as “Commitments related to securities sold short”. Derivative financial instruments are also classified as “Held for trading”.

(iii) Financial liabilities “Designated as at fair value through profit or loss” are designated as such by management upon initial recognition, on an instrument-by-instrument basis, and are essentially debt securities. Management may make this irrevocable designation if doing so eliminates or significantly reduces a measurement or recognition inconsistency for the financial liability if a group of financial liabilities is managed and its performance is evaluated on a fair value basis, or if the liabilities are hybrid financial liabilities including at least one embedded derivative that would otherwise be separated from the host contract and recognized separately.

The Federation held no financial liabilities classified in this measurement category at the reporting date.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

(iv) Financial liabilities that are not in the “At fair value through profit or loss” class are included in the “Amortized cost” class.

Financial liabilities included in this class are initially recognized at fair value in the Consolidated Balance Sheets and, at subsequent reporting dates, they are measured at amortized cost using the effective interest method. Interest expense on securities included in the “Amortized cost” class is recognized under “Interest expense” in the Consolidated Statements of Income for the Personal and Business Services segment and the Other category. Interest expense for the other segments is recognized mainly under “Net investment income” in the Consolidated Statements of Income.

b) Impairment of financial instruments

At each reporting date, the Federation recognizes a loss allowance for expected credit losses for debt instruments classified as at amortized cost or as at fair value through other comprehensive income, as well as certain off-balance sheet items, namely loan commitments and financial guarantees. The loss allowance for expected credit losses is estimated based on an impairment model that comprises three different stages:

- Stage 1: For financial instruments that have not had a significant increase in credit risk since initial recognition and are not considered as credit-impaired financial assets, a loss allowance amounting to 12-month expected credit losses is recognized.
- Stage 2: For financial instruments that have had a significant increase in credit risk since initial recognition but are not considered as credit-impaired financial assets, a loss allowance amounting to the lifetime expected credit losses is recognized.
- Stage 3: For financial instruments considered as credit impaired, a loss allowance amounting to the lifetime expected credit losses continues to be recognized.

Financial instruments may, over their life, move from one impairment model stage to another based on the improvement or deterioration in their credit risk and the level of expected credit losses. Instruments are always classified in the various stages of the impairment model based on the change in credit risk between the reporting date and the initial recognition date of the financial instrument and an analysis of evidence of impairment.

Determination of significant increases in credit risk

To determine whether, at the reporting date, credit risk has significantly increased since initial recognition, the Federation bases its assessment on the change in default risk over the expected life of the financial instrument, which requires significant judgment.

To this end, the Federation compares the probability of default (PD) of the financial instrument at the reporting date with the PD at the date of initial recognition. In addition, reasonable and supportable information that is indicative of significant increases in credit risk since initial recognition is considered, including qualitative information and information about future economic conditions to the extent that it affects the assessment of the instrument's PD. The criteria used to determine a significant increase in credit risk are mainly based on a relative change combined with an absolute change in the PD and vary depending of the type of client base. All instruments that are more than 30 days past due are also transferred to Stage 2 of the impairment model.

Definition of default and credit-impaired financial asset

The definition of default used in the impairment model corresponds to the definition used for internal credit risk management purposes and for regulatory purposes. This definition considers relevant quantitative and qualitative factors. In particular, a loan is in default when contractual payments are over 90 days past due. A financial asset is considered credit-impaired when it is in default, unless the detrimental impact on estimated future cash flows is considered insignificant.

Measurement of the loss allowance for expected credit losses

The loss allowance for expected credit losses reflects an unbiased amount, based on a probability-weighted present value of cash flow shortfalls, and takes into account reasonable and supportable information about past events, current conditions and forecasts of future economic conditions. Generally, the loss allowance for expected credit losses represents the present value of the difference between cash flows that are due, or the amount of the commitment that may be used under the terms and conditions of a contract, and total cash flows that the Federation expects to receive. For credit-impaired financial assets, expected credit losses are calculated based on the difference between the gross carrying amount of the asset and estimated cash flows.

The measurement of the loss allowance for expected credit losses is estimated for each exposure at the reporting date and is based on the result of multiplying the three credit risk parameters, namely PD, loss given default (LGD) and exposure at default (EAD). The result of this multiplication is then discounted using the effective interest rate. The parameters are estimated using an appropriate segmentation that considers common credit risk characteristics. For financial instruments in Stage 1 of the impairment model, credit risk parameters are projected over a maximum horizon of 12-months, while for those in Stage 2 or Stage 3, they are projected over the remaining life of the instrument.

The loss allowance for expected credit losses also considers information about future economic conditions. To incorporate forward-looking information relevant to the determination of significant increases in credit risk and the measurement of the loss allowance for expected credit losses, the Federation uses the econometric models for credit risk projection. These models estimate the impact of macroeconomic variables on the various credit risk parameters. The Federation uses three scenarios (base, upside and downside) to determine the loss allowance for expected credit losses and assigns to each scenario a probability of occurrence. The Federation may also make adjustments to take into account the relevant information that affects the measurement of the loss allowance for expected credit losses and that has not been incorporated into the credit risk parameters. Incorporating forward-looking information is based on a set of assumptions and methodologies specific to credit risk and economic projections and therefore requires a high degree of judgment.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

For credit-impaired financial assets that are individually material, measuring the loss allowance for expected credit losses does not require using credit risk parameters, but is based on an extensive review of the borrower's situation and the realization of collateral held. The measurement represents a probability-weighted present value, calculated using the effective interest rate, of cash flow shortfalls that takes into consideration the impact of various scenarios that may materialize and information about future economic conditions.

Expected life

The expected life of most financial instruments is equal to the maximum contractual term during which the Federation is exposed to credit risk, including extension options that may be exercised solely by the borrower. The exception to this rule concerns revolving exposures, which consist of personal and business lines of credit and credit card loans, for which the life is estimated as being the period over which there is exposure to credit risk but for which expected credit losses would not be mitigated by normal credit risk management actions.

Recognition of the loss allowance for expected credit losses

The loss allowance for expected credit losses on loans is recorded under "Allowance for credit losses" in the Consolidated Balance Sheets and under "Provision for credit losses" in the Consolidated Statements of Income.

The loss allowance for expected credit losses on loan commitments and financial guarantees is recorded under "Other liabilities – Other" in the Consolidated Balance Sheets and under "Provision for credit losses" in the Consolidated Statements of Income.

Loss allowances for expected credit losses on securities at "amortized cost" are recorded against "Securities – Securities at amortized cost" in the Consolidated Balance Sheets and under "Provision for credit losses" in the Consolidated Statements of Income, while loss allowances for expected credit losses on securities "Classified as at fair value through other comprehensive income" are recognized under "Net unrealized losses on debt securities classified as at fair value through other comprehensive income" in the Consolidated Statements of Comprehensive Income and under "Provision for credit losses" in the Consolidated Statements of Income.

Foreclosed assets

Assets foreclosed to settle credit-impaired loans are recognized on the date of the foreclosure at their fair value less costs to sell. Any difference between the carrying amount of the loan and the fair value recorded for the foreclosed assets is recognized under "Provision for credit losses".

Loan write-off

A loan is written off, in whole or in part, when recovery is no longer reasonably expected, which is when all attempts at restructuring or collection have been made and, based on an assessment of the file in its entirety, there are no other means to recover the loan. When a loan is written off completely, any subsequent payments are recorded under "Provision for credit losses" in the Consolidated Statements of Income. Credit card balances are written off completely when no payment has been received at the end of a period of 180 days. These balances could however still be subject to enforcement actions.

c) Derivative financial instruments and hedging activities

Hybrid financial instruments

When a hybrid contract contains a host that is an asset within the scope of IFRS 9, the entire hybrid contract is classified and recognized based on the characteristics of the hybrid contract.

An embedded derivative is separated from the host and accounted for separately as a derivative when the host is not an asset within the scope of IFRS 9 and the following conditions are met: (a) the economic characteristics and risks of the embedded derivative are not closely related to the economic characteristics and risks of the host; (b) a separate instrument with the same terms as the embedded derivative would meet the definition of a derivative; and (c) the hybrid contract is not measured at fair value with changes in fair value recognized in the Consolidated Statements of Income.

The Federation does not hold any hybrid financial instruments containing a host that is not an asset within the scope of IFRS 9.

d) Revenue recognition

Revenue is recognized when the Federation has transferred control of a good or service. In addition to the items mentioned in section a), "Financial assets and liabilities", the specific recognition criteria that follow must also be met before revenue can be recognized.

Net interest income

Interest income and expense are mainly earned or incurred by the Personal and Business Services segment and the Other category. They are recognized using the effective interest method for all financial instruments measured at amortized cost, for interest-bearing financial assets "Classified as at fair value through other comprehensive income" and for financial instruments included in the "At fair value through profit or loss" class.

The effective interest method is a method used in the calculation of the amortized cost of a financial asset or liability and in the allocation of interest income or interest expense over the relevant period. The effective interest rate is the rate that discounts future cash payments or receipts through the expected life of the financial instrument to the gross carrying amount of a financial asset or to the amortized cost of a financial liability.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (continued)

For financial assets that are not considered credit-impaired (Stages 1 and 2), interest income is calculated on the gross carrying amount of the financial instrument. For credit-impaired financial assets (Stage 3), interest income is calculated by applying the effective interest rate to the amortized cost of the asset, which corresponds to the gross carrying amount less the loss allowance for expected credit losses.

IMPACT OF CHANGES IN ACCOUNTING POLICIES

The retrospective impact of applying IFRS 9, IFRS 15 and amendments to IFRS 4 have been recognized in the opening balances of the Consolidated Balance Sheet as at January 1, 2018.

The following table presents the impact of adopting these standards and amendments on the Federation's Consolidated Balance Sheet as at January 1, 2018.

	Balance as at December 31, 2017	IFRS 9	IFRS 15	IFRS 4	Opening balance as at January 1, 2018

		At fair value through profit or loss – held for trading	Classified as at fair value through profit or loss	452	452
Subordinated notes		Financial liabilities at amortized cost	Amortized cost	1,388	1,388
Total financial liabilities				\$ 83,756	\$ 83,756

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

- (1) Certain items in cash and deposits with financial institutions were classified as “Held for trading” under IAS 39 as at December 31, 2017. As at January 1, 2018, the Federation classified these debt instruments as at “Amortized cost” under IFRS 9 as they are held within a business model whose objective is achieved by collecting contractual cash flows and meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal and interest. The effective interest rate on these debt instruments ranged from 0.59% and 1.73% as at January 1, 2018, and interest income recognized on these securities during the three-month period ended March 31, 2018 was insignificant. All these securities matured or were sold during the three-month period ended March 31, 2018.
- (2) These debt instruments were classified as “Designated as at fair value through profit or loss” under IAS 39 as at December 31, 2017. As at January 1, 2018, these debt instruments were “Classified as at fair value through profit or loss” as the contractual terms of these financial assets give rise to cash flows that are not solely payments of principal and interest on the principal amount outstanding.
- (3) These debt instruments were classified as “Available for sale” under IAS 39 as at December 31, 2017. They were recognized at fair value and changes in fair value were recognized in the Consolidated Statements of Comprehensive Income. As at January 1, 2018, under IFRS 9, these debt instruments were “Classified as at fair value through profit or loss” either because they are held within a business model whose objective is achieved by selling financial assets or because they do not meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal and interest.
- (4) These debt instruments were classified as “Available for sale” under IAS 39 as at December 31, 2017. They were recognized at fair value and changes in fair value were recognized in the Consolidated Statements of Comprehensive Income. As at January 1, 2018, the Federation classified these debt instruments as at “Amortized cost” under IFRS 9 as they are held within a business model whose objective is achieved by collecting contractual cash flows and meet the criteria of the contractual cash flow test performed to determine whether cash flows are solely payments of principal and interest. The fair value of the securities still held as at March 31, 2018 was \$1,072 million. If these securities had not be reclassified to be measured at “Amortized cost” under IFRS 9 as at January 1, 2018, a loss of \$1 million would have been recognized in the Consolidated Statement of Comprehensive Income for the three-month period ended March 31, 2018.
- (5) These equity instruments were classified as “Designated as at fair value through profit or loss” under IAS 39 as at December 31, 2017. As at January 1, 2018, these equity instruments were “Classified as at fair value through profit or loss” as, under IFRS 9, all investments in equity instruments other than those designated as at fair value through other comprehensive income have to be included in this measurement category.
- (6) These equity instruments were classified as “Available for sale” under IAS 39 as at December 31, 2017. They were recognized at fair value and changes in fair value were recognized in the Consolidated Statements of Comprehensive Income. As at January 1, 2018, these equity instruments were “Classified as at fair value through profit or loss” as, under IFRS 9, all investments in equity instruments other than those designated as at fair value through other comprehensive income have to be included in this measurement category.
- (7) These equity instruments were classified as “Available for sale” under IAS 39 as at December 31, 2017. They were recognized at fair value and changes in fair value were recognized in the Consolidated Statements of Comprehensive Income. As at January 1, 2018, these equity instruments, which consist of an investment in a private company that will be held on a long-term basis, were irrevocably “Designated as at fair value through other comprehensive income”. Gains and losses on these instruments will therefore never be reclassified subsequently to the Consolidated Statements of Income.

NOTE 2 – BASIS OF PRESENTATION AND SIGNIFICANT ACCOUNTING POLICIES (*continued*)

The following table reconciles the carrying amounts of financial instruments recognized under IAS 39 as at December 31, 2017 to the carrying amounts under IFRS 9 as at January 1, 2018.

FUTURE ACCOUNTING CHANGES

Accounting standards issued by the IASB, but not yet effective as at December 31, 2017, are described in Note 2, “Basis of presentation and significant accounting policies”, to the Annual Consolidated Financial Statements. The IASB has since issued the following amendments:

Conceptual Framework for Financial Reporting

In March 2018, the IASB issued the “Conceptual Framework for Financial Reporting”, which replaces the current version of the conceptual framework. The “Conceptual Framework for Financial Reporting” includes new concepts, updates the definitions and recognition criteria for assets and liabilities and clarifies some key concepts. The Federation is currently assessing the impact of adopting this new framework, which will be effective for annual periods beginning on or after January 1, 2020.

NOTE 3 – CARRYING AMOUNT OF FINANCIAL INSTRUMENTS

CLASSIFICATION AND CARRYING AMOUNT OF FINANCIAL INSTRUMENTS

The following tables present the carrying amount of all financial assets and liabilities according to their classification in the classes defined in the financial instrument standards.

	At fair value through profit or loss		At fair value through other comprehensive income		Amortized cost ⁽⁴⁾	Total
	Classified as at fair value through profit or loss	Designated as at fair value through profit or loss	Classified as at fair value through other comprehensive income ⁽⁴⁾	Designated as at fair value through other comprehensive income		
As at March 31, 2018						
Financial assets⁽¹⁾						
Cash and deposits with financial institutions	\$ -	\$ 175	\$ 1,006	\$ -	\$ 607	\$ 1,788
Securities	19,649	16,355	10,883	43	1,423	48,353
Securities borrowed or purchased under reverse repurchase agreements	-	-	-	-	10,942	10,942
Loans ⁽²⁾	-	-	-	-	57,426	57,426
Other financial assets						
Clients' liability under acceptances	-	-	-	-	43	43
Premiums receivable	-	-	-	-	2,005	2,005
Derivative financial instruments ⁽³⁾	4,067	-	-	-	-	4,067
Amounts receivable from clients, brokers and financial institutions	-	-	-	-	4,817	4,817
Other	-	-	-	-	1,127	1,127
Total financial assets	\$ 23,716	\$ 16,530	\$ 11,889	\$ 43	\$ 78,390	\$ 130,568
Financial liabilities						
Deposits	\$ -	\$ -	\$ -	\$ -	\$ 53,806	\$ 53,806
Other financial liabilities						
Acceptances	-	-	-	-	43	43
Commitments related to securities sold short	8,789	-	-	-	-	8,789
Commitments related to securities lent or sold under repurchase agreements	-	-	-	-	11,841	11,841
Derivative financial instruments ⁽³⁾	3,372	-	-	-	-	3,372
Amounts payable to clients, brokers and financial institutions	-	-	-	-	7,296	7,296
Other	412	-	-	-	2,292	2,704
Subordinated notes	-	-	-	-	1,383	1,383
Total financial liabilities	\$ 12,573	\$ -	\$ -	\$ -	\$ 76,661	\$ 89,234

⁽¹⁾ An amount of \$2,903 million corresponds to financial assets designated for the overlay approach.

⁽²⁾ For more information, see Note 5, "Loans and allowance for credit losses".

⁽³⁾ Include derivative financial instruments designated as hedging instruments amounting to \$550 million in assets and \$301 million in liabilities.

⁽⁴⁾ As at March 31, 2018, the allowance for credit losses on securities at "Amortized cost" totalled \$1 million, and the allowance for credit losses on securities "Classified as at fair value through other comprehensive income" totalled \$2 million. Detailed information on the allowance for credit losses on loans is presented in Note 5, "Loans and allowance for credit losses".

During the three-month period ended March, 31, 2018, no financial instruments have been reclassified.

NOTE 3 – CARRYING AMOUNT OF FINANCIAL INSTRUMENTS (continued)

CLASSIFICATION AND CARRYING AMOUNT OF FINANCIAL INSTRUMENTS (continued)

As at December 31, 2017	At fair value through profit or loss		Available for sale ⁽¹⁾	Loans and receivables, and financial liabilities at amortized cost	Total
	Held for trading	Designated as at fair value through profit or loss			
Financial assets					
Cash and deposits with financial institutions	\$ 23	\$ 298	\$ 639	\$ 771	\$ 1,731
Securities	13,312	18,342	15,250	-	46,904
Securities borrowed or purchased under reverse repurchase agreements	-	-	-	9,377	9,377
Loans ⁽²⁾	-	-	-	58,684	58,684
Other financial assets					
Clients' liability under acceptances	-	-	-	31	31
Premiums receivable	-	-	-	2,098	2,098
Derivative financial instruments ⁽³⁾	3,772	-	-	-	3,772
Amounts receivable from clients, brokers and financial institutions	-	-	-	1,563	1,563
Other	-	-	-	1,013	1,013
Total financial assets	\$ 17,107	\$ 18,640	\$ 15,889	\$ 73,537	\$ 125,173
Financial liabilities					
Deposits	\$ -	\$ -	\$ -	\$ 52,149	\$ 52,149
Other financial liabilities					
Acceptances	-	-	-	31	31
Commitments related to securities sold short	9,112	-	-	-	9,112
Commitments related to securities lent or sold under repurchase agreements	-	-	-	10,062	10,062
Derivative financial instruments ⁽³⁾	3,677	-	-	-	3,677
Amounts payable to clients, brokers and financial institutions	-	-	-	4,247	4,247
Other	452	-	-	2,638	3,090
Subordinated notes	-	-	-	1,388	1,388
Total financial liabilities	\$ 13,241	\$ -	\$ -	\$ 70,515	\$ 83,756

⁽¹⁾ During the year ended December 31, 2017, the Federation concluded that there was no objective evidence of material impairment.

⁽²⁾ For more information, see Note 5, "Loans and allowance for credit losses".

⁽³⁾ Include derivative financial instruments designated as hedging instruments amounting to \$275 million in assets and \$351 million in liabilities.

NOTE 4 – FAIR VALUE OF FINANCIAL INSTRUMENTS

DETERMINATION OF THE FAIR VALUE OF FINANCIAL INSTRUMENTS

There is little subjectivity in the determination of the fair value of financial instruments, especially securities and commitments related to securities sold short, obtained from quoted prices on active markets. This fair value is based on the quoted price within the bid-ask spread that is most representative of fair value in the circumstances.

If there are no quoted prices on active markets, fair value is determined using models that maximize the use of observable inputs and minimize the use of unobservable inputs. In such cases, fair value estimates are established using valuation techniques such as cash flow discounting, comparisons with similar financial instruments, option pricing models and other valuation techniques commonly used by market participants, if these techniques have been demonstrated to provide reliable estimates. Valuation techniques rely on assumptions concerning the amount and timing of estimated future cash flows and discount rates that are mainly based on observable data, such as interest rate yield curves, exchange rates, credit curves and volatility factors. When one or several material inputs are not observable on the market, fair value is determined mainly based on internal inputs and estimates that take into account the characteristics specific to the financial instrument and any factor relevant to the measurement. For complex financial instruments, significant judgment is made in determining the valuation technique to be used and in selecting inputs and adjustments associated with this technique. Due to the need to use estimates and make judgments when applying many valuation techniques, fair value estimates for identical or similar assets may differ between entities. Fair value reflects market conditions on a given date and may not be representative of future fair values. It should not be considered as being realizable in the event of immediate settlement of these instruments.

For more information on the valuation techniques used to determine the fair value of the main financial instruments, refer to Note 2, “Basis of presentation and significant accounting policies”, to the Annual Consolidated Financial Statements.

Financial instruments whose fair value equals carrying amount

The carrying amount of certain financial instruments that mature in the next 12-months is a reasonable approximation of their fair value. These financial instruments include the following items: “Cash and deposits with financial institutions”; “Securities borrowed or purchased under reverse repurchase agreements”; “Clients’ liability under acceptances”; “Premiums receivable”; “Amounts receivable from clients, brokers and financial institutions”; some items included in “Other assets – Other”; “Acceptances”; “Commitments related to securities lent or sold under repurchase agreements”; “Amounts payable to clients, brokers and financial institutions”; and some items included in “Other liabilities – Other”.

FAIR VALUE OF FINANCIAL INSTRUMENTS

The following table presents financial instruments whose carrying amount does not equal fair value.

	As at March 31, 2018		As at December 31, 2017	
	Carrying amount	Fair value	Carrying amount	Fair value
Financial assets				
Securities at amortized cost	\$ 1,423	\$ 1,423	N/A	N/A
Loans	57,426	57,708	\$ 58,684	\$ 58,951
Financial liabilities				
Deposits	53,806	53,767	52,149	50,182
Subordinated notes	1,383	1,471	1,388	1,488

FAIR VALUE HIERARCHY

The fair value measurement of financial instruments is determined using the following three-level fair value hierarchy:

- Level 1 – Measurement based on quoted prices (unadjusted) in active markets for identical assets or liabilities.
- Level 2 – Valuation techniques based primarily on observable market data.
- Level 3 – Valuation techniques not based primarily on observable market data.

Transfers between levels

Transfers between hierarchy levels for instruments measured at fair value are made at the reporting date.

NOTE 4 – FAIR VALUE OF FINANCIAL INSTRUMENTS *(continued)*

HIERARCHY OF FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE

The following tables present the hierarchy for financial instruments measured at fair value in the Consolidated Balance Sheets.

As at March 31, 2018	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets at fair value through profit or loss				
Cash and deposits with financial institutions	\$ 19	\$ 156	\$ -	\$ 175
Securities				
Debt securities issued or guaranteed by				
Canadian governmental entities	7,677	1,154	-	8,831
Provincial governmental entities and municipal corporations in Canada	16,603	1,218	-	17,821
School or public corporations in Canada	14	90	-	104
Foreign public administrations	313	-	-	313
Other securities				
Financial institutions	30	887	57	974
Other issuers	-	2,489	830	3,319
Equity securities	3,419	669	554	4,642
	28,075	6,663	1,441	36,179
Derivative financial instruments				
Interest rate contracts	-	1,685	-	1,685
Foreign exchange contracts	-	903	-	903
Other contracts	-	1,479	-	1,479
	-	4,067	-	4,067
Total financial assets at fair value through profit or loss	28,075	10,730	1,441	40,246
Financial assets at fair value through other comprehensive income				
Cash and deposits with financial institutions	8	998	-	1,006
Securities				
Debt securities issued or guaranteed by				
Canadian governmental entities	1,739	642	-	2,381
Provincial governmental entities and municipal corporations in Canada	4,796	909	-	5,705
Other securities				
Financial institutions	-	2,084	-	2,084
Other issuers	-	621	92	713
Equity securities	-	43	-	43
Total financial assets at fair value through other comprehensive income	6,543	5,297	92	11,932
Financial instruments of segregated funds	5,899	7,364	67	13,330
Total financial assets	\$ 40,517	\$ 23,391	\$ 1,600	\$ 65,508
Financial liabilities				
Financial liabilities at fair value through profit or loss				
Other liabilities				
Commitments related to securities sold short	\$ 8,685	\$ 104	\$ -	\$ 8,789
Other	-	-	412	412
	8,685	104	412	9,201
Derivative financial instruments				
Interest rate contracts	-	1,740	-	1,740
Foreign exchange contracts	-	231	-	231
Other contracts	-	1,401	-	1,401
	-	3,372	-	3,372
Total financial liabilities	\$ 8,685	\$ 3,476	\$ 412	\$ 12,573

NOTE 4 –FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

HIERARCHY OF FINANCIAL INSTRUMENTS MEASURED AT FAIR VALUE (continued)

As at December 31, 2017	Level 1	Level 2	Level 3	Total
Financial assets				
Financial assets at fair value through profit or loss				
Cash and deposits with financial institutions	\$ 8	\$ 313	\$ -	\$ 321
Securities at fair value through profit or loss				
Debt securities issued or guaranteed by				
Canadian governmental entities	7,620	1,247	-	8,867
Provincial governmental entities and municipal corporations in Canada	15,232	1,176	-	16,408

Equity securities	1,236	236	236	1,708
	24,451	6,363	1,161	31,975
Derivative financial instruments				
Interest rate contracts	-	1,624	-	1,624
Foreign exchange contracts	-	390	-	390
Other contracts	-	1,758	-	1,758
	-	3,772	-	3,772
Total financial assets at fair value through profit or loss	24,451	10,135	1,161	35,747
Available-for-sale financial assets				
Cash and deposits with financial institutions	36	603	-	639
Available-for-sale securities				
Debt securities issued or guaranteed by				
Canadian governmental entities	1,821	573	-	2,394
Provincial governmental entities and municipal corporations in Canada	4,610	1,205	-	5,815
Foreign public administrations	7	28	-	35
Other securities				
Financial institutions	-	2,878	-	2,878
Other issuers	5	751	95	851
Equity securities	2,367	631	279	3,277
Total available-for-sale financial assets	8,846	6,669	374	15,889
Financial instruments of segregated funds	5,859	7,456	60	13,375
Total financial assets	\$ 39,156	\$ 24,260	\$ 1,595	\$ 65,011
Financial liabilities				
Financial liabilities held for trading				
Other liabilities				
Commitments related to securities sold short	\$ 8,951	\$ 161	\$ -	\$ 9,112
Other	-	-	452	452
	8,951	161	452	9,564
Derivative financial instruments				
Interest rate contracts	-	1,619	-	1,619
Foreign exchange contracts	-	365	-	365
Other contracts	-	1,693	-	1,693
	-	3,677	-	3,677
Total financial liabilities	\$ 8,951	\$ 3,838	\$ 452	\$ 13,241

During the three-month period ended March 31, 2018 and the year ended December 31, 2017, no material transfers attributable to changes in the observability of market data were made between hierarchy levels for instruments measured at fair value.

NOTE 4 – FAIR VALUE OF FINANCIAL INSTRUMENTS *(continued)*

FAIR VALUE OF FINANCIAL INSTRUMENTS CATEGORIZED WITHIN LEVEL 3

Valuation process for financial instruments categorized within Level 3

The Federation has implemented various key controls and procedures to ensure that financial instruments categorized within Level 3 are appropriately and reliably measured. The financial governance framework provides for independent monitoring and segregation of duties in that respect. During the three-month period ended March 31, 2018, no significant changes were made to the key controls and procedures as well as the valuation techniques for financial instruments categorized within Level 3. For more information on the valuation process for financial instruments categorized within Level 3, refer to Note 4, "Fair value of financial instruments", to the Annual Consolidated Financial Statements.

Sensitivity of financial instruments categorized within Level 3

The Federation performs sensitivity analyses to measure the fair value of financial instruments categorized within Level 3. Changing unobservable inputs to one or more reasonably possible alternative assumptions does not significantly change the fair value of financial instruments categorized within Level 3.

Valuation techniques and inputs used to measure the fair value of financial instruments categorized within Level 3

During the three-month period ended March 31, 2018, no changes were made to valuation techniques. Some changes were made to input value ranges used to determine fair value, but they did not result in material changes to the fair value of financial instruments categorized within Level 3.

NOTE 4 – FAIR VALUE OF FINANCIAL INSTRUMENTS (continued)

FAIR VALUE OF FINANCIAL INSTRUMENTS CATEGORIZED WITHIN LEVEL 3 (continued)

Changes in fair value of financial instruments categorized within Level 3

The following tables present the changes in fair value of financial instruments categorized within Level 3 of the hierarchy, namely financial instruments whose fair value is determined using valuation techniques not based mainly on observable market data.

	Balance as at December 31, 2017	Impact of changes in accounting policies (Note 2)	Balance as at January 1, 2018	Realized gains / losses recognized in profit or loss ⁽¹⁾	Unrealized gains / losses recognized in profit or loss ⁽²⁾	Unrealized gains / losses recognized in other comprehensive income ⁽³⁾	Transfers of instruments into (out of) Level 3	Purchases / Issuances	Sales / Settlements	Balance at end of period

⁽³⁾ Unrealized gains or losses on available-for-sale financial assets are recognized under "Net unrealized gains on available-for-sale securities" in the Consolidated Statements of Comprehensive Income.

NOTE 5 – LOANS AND ALLOWANCE FOR CREDIT LOSSES

The information presented in the following tables has been prepared in accordance with IFRS 9 as at March 31, 2018 and in accordance with IAS 39 as at December 31, 2017. For more information, see Note 2, "Basis of presentation and significant accounting policies".

LOANS, OFF-BALANCE SHEET ITEMS AND ALLOWANCE FOR CREDIT LOSSES

The following table presents the carrying amount of loans, the exposure amount for off-balance sheet items for which the Federation estimates a loss allowance for expected credit losses and the balance of their respective allowance according to the stage in which they are classified.

	Non-credit impaired				Credit-impaired		Total	
	Stage 1		Stage 2		Stage 3			
	Gross carrying amount and exposure	Allowance for credit losses	Gross carrying amount and exposure	Allowance for credit losses	Gross carrying amount and exposure	Allowance for credit losses	Gross carrying amount and exposure	Allowance for credit losses
As at March 31, 2018								
Loans								
Residential mortgages	\$ 4,274	\$ 4	\$ 71	\$ 1	\$ 11	\$ 4	\$ 4,356	\$ 9
Consumer, credit card and other personal loans	14,754	83	3,003	301	188	97	17,945	481
Business and government	34,923	7	703	8	10	6	35,636	21
	\$ 53,951	\$ 94	\$ 3,777	\$ 310	\$ 209	\$ 107	\$ 57,937	\$ 511
Off-balance sheet items	\$ 95,487	\$ 19	\$ 3,807	\$ 17	\$ 20	\$ -	\$ 99,314	\$ 36

ALLOWANCE FOR CREDIT LOSSES

The following table presents the changes in the balance of the allowance for credit losses on loans.

	Non-credit impaired		Credit-impaired		Allowance for credit losses
	Stage 1	Stage 2	Stage 3		
As at January 1, 2018	\$ 88	\$ 299	\$ 106		\$ 493
Transfers to ⁽¹⁾ :					
Stage 1	66	(62)	(4)		-
Stage 2	(11)	19	(8)		-
Stage 3	-	(9)	9		-
Net remeasurement due to transfers ⁽²⁾	(34)	17	31		14
New originations ⁽³⁾	8	4	-		12
Change in outstanding amounts (excluding new originations) ⁽⁴⁾	(8)	(11)	(26)		(45)
Changes in model inputs ⁽⁵⁾	(15)	53	(1)		37
As at March 31, 2018	\$ 94	\$ 310	\$ 107		\$ 511

⁽¹⁾ Represents transfers between stages before the remeasurement of expected credit losses.

⁽²⁾ Represents the remeasurement of the loss allowance for expected credit losses resulting from transfers between stages.

⁽³⁾ Represents the increase in the allowance for new exposures during the period, excluding off-balance sheet items for which there was a change in the original date following a modification of terms.

⁽⁴⁾ Represents changes in the allowance attributable to changes in exposures other than new exposures, including drawdowns and repayments.

⁽⁵⁾ Represents the change in the allowance resulting from changes in credit risk parameters and other model inputs.

NOTE 5 – LOANS AND ALLOWANCE FOR CREDIT LOSSES (continued)

ALLOWANCES FOR CREDIT LOSSES (continued)

The following table presents the changes in the balance of the allowance for credit losses on off-balance sheet items.

	Non-credit impaired		Credit-impaired		Allowance for credit losses
	Stage 1	Stage 2	Stage 3		
As at January 1, 2018	\$ 19	\$ 15	\$ -	\$ -	\$ 34
Transfers to ⁽¹⁾ :					
Stage 1	4	(4)	-	-	-
Stage 2	(2)	2	-	-	-
Stage 3	-	-	-	-	-
Net remeasurement due to transfers ⁽²⁾	(2)	2	-	-	-
New exposures ⁽³⁾	1	-	-	-	1
Change in exposures (excluding new exposures) ⁽⁴⁾	-	1	-	-	1
Changes in model inputs ⁽⁵⁾	(1)	1	-	-	-
As at March 31, 2018⁽⁶⁾	\$ 19	\$ 17	\$ -	\$ -	\$ 36

⁽¹⁾ Represents transfers between stages before the remeasurement of expected credit losses.

⁽²⁾ Represents the remeasurement of the loss allowance for expected credit losses resulting from transfers between stages.

⁽³⁾ Represents the increase in the allowance for new exposures during the period, excluding off-balance sheet items for which there was a change in the original date following a modification of terms.

⁽⁴⁾ Represents changes in the allowance attributable to changes in exposures other than new exposures, including drawdowns and repayments.

⁽⁵⁾ Represents the change in the allowance resulting from changes in credit risk parameters and other model inputs.

⁽⁶⁾ The allowance for credit losses on off-balance sheet items is presented under "Other liabilities – Other" in the Consolidated Balance Sheets.

KEY DATA AND ASSUMPTIONS

Determining the loss allowance for expected credit losses is based on a set of assumptions and methodologies specific to credit risk and changes in economic conditions. Significant judgment must therefore be exercised to determine the loss allowance for expected credit losses. The main items affecting its measurement as at March 31, 2018 are the following:

- Changes in the borrowers' credit risk rating (or probability of default).
- Incorporation of forward-looking information.
- Estimated life of revolving exposures.

Changes in the borrowers' credit risk rating or probability of default

The borrowers' credit risk rating is the foundation of the credit risk assessment model. The rating of a borrower is directly related to the estimated PD of such borrower. Many variables are taken into consideration in credit risk assessment models. For more information about these models, see section 4.2, "Risk management", of the 2017 Annual Management's Discussion and Analysis. Changes in the borrowers' credit risk have an impact on determining significant increases in credit risk (as this is mainly based on the change in the borrower's PD) and measuring the loss allowance for expected credit losses.

Changes in the borrowers' credit risk rating may increase or decrease the loss allowance for expected credit losses. Generally, a deterioration in a borrower's credit risk rating gives rise to an increase in the loss allowance for expected credit losses, while an improvement in a borrower's credit risk rating results in a decrease in the loss allowance for expected credit losses.

Incorporation of forward-looking information

The Federation uses three different scenarios to determine the loss allowances for expected credit losses, namely a base scenario, an upside scenario and a downside scenario. Projections for each scenario are provided for a four-year horizon. The macroeconomic variables projected under each scenario and the related probability of occurrence have a significant impact on determining significant increases in credit risk and measuring the loss allowance for expected credit losses. The main variables used are gross domestic product, unemployment rate, the Consumer Price Index, housing prices and the corporate financing spread. The macroeconomic variable projection and the determination of the probabilities of occurrence are reviewed quarterly.

The incorporation of forward-looking information may increase or decrease the loss allowance for expected credit losses. Generally, an improvement in the outlook will give rise to a decrease in the loss allowance for expected credit losses, while a deterioration in the outlook will result in an increase in the loss allowance for expected credit losses.

NOTE 5 – LOANS AND ALLOWANCE FOR CREDIT LOSSES (continued)

KEY DATA AND ASSUMPTIONS (continued)

Estimated life of revolving exposures

To determine the life of revolving exposures, the Federation determines the period over which there is exposure to credit risk but for which expected credit losses would not be mitigated by normal credit risk management actions, which considers the following:

- the period over which the Federation was exposed to credit risk on similar financial instruments;
- the length of time for related defaults to occur on similar financial instruments following a significant increase in credit risk;
- the credit risk management action that it expects to take once the credit risk on the financial instruments has increased.

The determination of the estimated life of revolving exposures has a significant impact on estimating the loss allowance for expected credit losses, mainly for revolving exposures in Stage 2 of the impairment model. Generally, an increase in the estimated life of revolving exposures gives rise to an increase in expected credit losses.

Comparative figures presented in the following tables have been prepared in accordance with IAS 39.

LOANS, CREDIT-IMPAIRED LOANS⁽¹⁾ AND ALLOWANCE FOR CREDIT LOSSES

The following table presents the credit quality of loans.

As at December 31, 2017 ⁽¹⁾	Gross loans neither past due nor credit-impaired	Gross loans past due but not credit-impaired	Gross credit-impaired loans	Individual allowances	Collective allowance ⁽²⁾	Net loans
Residential mortgages	\$ 4,260	\$ 55	\$ 8	\$ 5	\$ 2	\$ 4,316
Consumer, credit card and other personal loans	16,764	711	72	-	136	17,411
Business and government	36,986	22	4	4	51	36,957
	\$ 58,010	\$ 788	\$ 84	\$ 9	\$ 189	\$ 58,684

⁽¹⁾ Following the adoption of IFRS 9 as at January 1, 2018, all loans included in Stage 3 of the impairment model are considered credit-impaired. Under IAS 39, the criteria applied to determine whether a loan is credit-impaired were different.

⁽²⁾ Includes the collective allowance on impaired loans of \$23 million.

GROSS LOANS PAST DUE BUT NOT CREDIT-IMPAIRED

The following table presents the aging of gross loans that are past due but not credit-impaired.

As at December 31, 2017	1 to 29 days	30 to 59 days	60 to 89 days	90 days or more	Total
Residential mortgages	\$ 43	\$ 4	\$ -	\$ 8	\$ 55
Consumer, credit card and other personal loans	559	104	48	-	711
Business and government	21	1	-	-	22
	\$ 623	\$ 109	\$ 48	\$ 8	\$ 788

ALLOWANCE FOR CREDIT LOSSES

The following table presents the changes in the allowance for credit losses.

For the three-month periods ended March 31, 2017	Residential mortgages	Consumer, credit card and other personal loans	Business and government	Total
Balance at beginning of period	\$ 3	\$ 148	\$ 87	\$ 238
Provision for credit losses	-	76	(3)	73
Write-offs and recoveries	-	(70)	-	(70)
Balance at end of period	\$ 3	\$ 154	\$ 84	\$ 241
Composed of:				
Allowance for credit losses	\$ 3	\$ 140	\$ 53	\$ 196
Allowance on off-balance sheet items ⁽¹⁾	-	14	31	45

⁽¹⁾ The allowance on off-balance sheet items is presented under "Other liabilities – Other".

NOTE 6 – INTERESTS IN OTHER ENTITIES

COVERED BONDS

Under its covered bond program, the Federation issues debt securities guaranteed by a pool of mortgage loans. A structured entity is in place to guarantee principal and interest payments owing to the holders of the covered bonds issued by the Federation. This entity is controlled by the Federation, and therefore included in its Consolidated Financial Statements. The Federation granted financing to the entity in order to facilitate the acquisition of these assets. The financing granted by the Federation may reach a maximum amount equal to the outstanding loans held by the structured entity for the purpose of guaranteeing the covered bonds issues. Under the terms and conditions of each of the issuance agreements, the Federation has limited access to the assets that are legally owned by the entity. These assets do not meet the recognition criteria neither for the structured entity nor for the Federation, and are therefore not recognized in their respective balance sheets. The covered bonds, amounting to \$4,750 million as at March 31, 2018 (\$4,517 million as at December 31, 2017), are presented under "Deposits – Business and government" in the Consolidated Balance Sheets.

NOTE 7 – DEPOSITS

Deposits consist of demand deposits (payable on demand), notice deposits (payable upon notice) and term deposits (payable on a fixed date). Demand deposits are interest-bearing or non-interest-bearing deposits, primarily accounts with chequing privileges, for which the Federation does not have the right to require notice prior to withdrawal. Notice deposits are interest-bearing deposits, primarily savings accounts, for which the Federation has the legal right to require notice prior to withdrawal. Term deposits are interest-bearing deposits, primarily fixed-term deposit accounts, guaranteed investment certificates or other similar instruments, with a term that generally varies from 1 day to 10 years and mature on a predetermined date.

The following table presents the breakdown of deposits.

	As at March 31, 2018				As at December 31, 2017			
	Payable on demand	Payable upon notice	Payable on a fixed date	Total	Payable on demand	Payable upon notice	Payable on a fixed date	Total
Individuals	\$ 2,798	\$ 55	\$ 1,099	\$ 3,952	\$ 3,154	\$ 50	\$ 1,149	\$ 4,353
Business and government	3,771	-	38,674	42,445	3,452	-	37,511	40,963
Deposit-taking institutions	3,546	-	3,863	7,409	2,757	-	4,076	6,833
	\$ 10,115	\$ 55	\$ 43,636	\$ 53,806	\$ 9,363	\$ 50	\$ 42,736	\$ 52,149

NOTE 8 – DISPOSAL GROUP HELD TO BE TRANSFERRED

On December 12, 2017, the Federation and a partnership comprised of five provincial credit union centrals (the Centrals) and The CUMIS Group announced that they had entered into an agreement to merge the businesses of their subsidiaries Credential Financial Inc., Qtrade Canada Inc. and Northwest & Ethical Investments. This transaction will result in the creation of Aviso Wealth, a wealth management company, in which the Federation and the partnership formed by the Centrals and The CUMIS Group will each hold a 50% interest. The interest in Aviso Wealth will be an interest in a joint venture for the Federation and will be accounted for using the equity method. On April 1, 2018, the Federation completed this transaction.

The Qtrade Canada Inc. subsidiary and the interest in the Northwest & Ethical Investments associate are classified as disposal group held to be transferred, as their carrying amount will not be recovered through continuing use. A disposal group held to be transferred is measured at the lower of its carrying amount and fair value less costs to sell.

The assets and liabilities of the disposal group held to be transferred presented separately in the Consolidated Balance Sheet are as follows:

	As at March 31, 2018
Assets	
Cash and deposits with financial institutions	\$ 14
Securities at fair value through profit or loss	82
Amounts receivable from clients, brokers and financial institutions	630
Property, plant and equipment	3
Goodwill	32
Intangible assets	64
Deferred tax assets	1
Other assets	96
Total assets of the disposal group held to be transferred	\$ 922
Liabilities	
Deferred tax liabilities	\$ 14
Amounts payable to clients, brokers and financial institutions	682
Other liabilities	22
Total liabilities of the disposal group held to be transferred	\$ 718

The operations of this subsidiary and interest in an associate are presented in the Wealth Management and Life and Health Insurance segment.

During the three-month period ended March 31, 2018, the Federation exercised its option to buy out Qtrade Canada Inc.'s non-controlling interests for \$62 million in order to hold a 100% interest in this subsidiary at the transaction's closing date.

NOTE 9 – CAPITAL STOCK

ISSUANCE OF CAPITAL SHARES

During the three-month period ended March 31, 2018, the Federation issued 6,761,126 F capital shares for a cash consideration of \$68 million.

NOTE 10 – ACCUMULATED OTHER COMPREHENSIVE INCOME

The following table presents the main components of “Accumulated other comprehensive income” (net of taxes).

	As at March 31, 2018		As at December 31, 2017	
	Group's share	Non-controlling interests' share	Group's share	Non-controlling interests' share
Items that will be reclassified subsequently to the Consolidated Statements of Income				
Net unrealized gains on available-for-sale securities	N/A	N/A	\$ 446	\$ 21
Net unrealized gains (losses) on debt securities classified as at fair value through other comprehensive income ⁽¹⁾	\$ 12	\$ (1)	N/A	N/A
Net unrealized gains related to the overlay approach adjustment for insurance operations financial assets	250	14	N/A	N/A
Net gains on derivative financial instruments designated as cash flow hedges	7	-	11	-
Net unrealized exchange gains on the translation of a net investment in a foreign operation, net of hedging transactions	1	-	1	-
Accumulated other comprehensive income	\$ 270	\$ 13	\$ 458	\$ 21

⁽¹⁾ Including a loss allowance for credit losses of \$2 million on securities classified at fair value through other comprehensive income.

NOTE 11 – CAPITAL MANAGEMENT

Capital management is a function covering all Desjardins Group operations, including those of the Federation. Accordingly, the description of the Federation's capital management and the manner in which it meets its capital management objectives are derived from the orientation followed for all Desjardins Group operations. The goal of capital management at Desjardins Group is to ensure that a sufficient level of high-quality capital is maintained for the following reasons: to have flexibility for its development, to maintain favourable credit ratings and to maintain the confidence of depositors and financial markets.

Since January 1, 2017, the Federation's capital ratios are calculated according to the guideline on adequacy of capital base standards applicable to financial services cooperatives (the guideline) issued by the AMF.

The minimum Tier 1A capital ratio that the Federation must maintain is 8.0%. In addition, the Tier 1 capital ratio and total capital ratio must be above 9.5% and 11.5%, respectively. For the leverage ratio, the minimum requirement is 3.0%.

As mentioned in Note 9, "Capital stock", the Federation issued F capital shares in 2018 for gross proceeds of \$68 million.

As at March 31, 2018, the Federation was in compliance with the AMF's capital ratio and leverage ratio regulatory requirements.

The following table presents the Federation's regulatory capital balances, risk-weighted assets and capital ratios.

(in millions of dollars and as a percentage)	As at March 31, 2018	As at December 31, 2017
Capital		
Tier 1A capital	\$ 9,124	\$ 9,162
Tier 1 capital	9,124	9,162
Total capital	9,124	9,162
Risk-weighted assets for capital ratio calculation purposes⁽¹⁾		
For Tier 1A capital	54,950	52,364
For Tier 1 capital	54,981	52,409
For total capital	55,012	52,445
Risk-weighted assets for total capital calculation purposes⁽¹⁾		
Credit risk	44,310	42,336
Market risk	2,432	1,965
Operational risk	8,270	8,143
Total risk-weighted assets	\$ 55,012	\$ 52,444
Ratios and leverage ratio exposure		
Tier 1A capital	16.6%	17.5%
Tier 1 capital	16.6	17.5
Total capital	16.6	17.5
Leverage	7.4	7.9
Leverage ratio exposure	\$ 123,275	\$ 115,915

⁽¹⁾ Takes into account the requirements of the CVA charge that have been phased in since January 1, 2014 to calculate the Tier 1A, Tier 1 and total capital ratios, which are 80%, 83% and 86%, respectively. They will reach 100% for each category by 2019.

NOTE 12 – NET INTEREST INCOME AND NET INVESTMENT INCOME

The information presented in the following tables has been prepared in accordance with IFRS 9 for the three-month period ended March 31, 2018 and in accordance with IAS 39 for the three-month period ended March 31, 2017. For more information, see Note 2, "Basis of presentation and significant accounting policies".

NET INTEREST INCOME

The following table presents the net interest income allocation according to the classification of financial assets and liabilities:

For the three-month period ended March 31	2018
Interest income on financial assets	
At amortized cost	\$ 591
At fair value through other comprehensive income	44
At fair value through profit or loss	7
	642
Interest expense on financial liabilities at amortized cost	274
	\$ 368

NET INVESTMENT INCOME

The following table presents the investment income and loss allocation according to the classification of financial assets and liabilities

For the three-month period ended March 31	2018		
	Interest income and expense	Fair value gains (losses) and other	Total
Net investment income on financial assets and liabilities			
Classified as at fair value through profit or loss	\$ 17	\$ (8)	\$ 9
Designated as at fair value through profit or loss	120	(139)	(19)
Classified as at fair value through other comprehensive income	32	(3)	29
At amortized cost and other	37	70	107
	\$ 206	\$ (80)	\$ 126

Comparative figures presented in the following tables have been prepared in accordance with IAS 39.

FINANCIAL INSTRUMENTS HELD FOR TRADING

The following table presents the impact of income from financial instruments held for trading on the Consolidated Statements of Income.

For the three-month period ended March 31	2017
Income	
Net interest income	\$ 11
Net investment income	(2)
	\$ 9

FINANCIAL INSTRUMENTS DESIGNATED AS AT FAIR VALUE THROUGH PROFIT OR LOSS

The following table presents the impact of income from financial instruments designated as at fair value through profit or loss on the Consolidated Statements of Income.

For the three-month period ended March 31	2017
Income	
Net interest income	\$ 2
Net investment income	297
	\$ 299

For the three-month period ended March 31, 2017, net income on available-for-sale securities of \$76 million was included in profit or loss under "Net investment income" in the Consolidated Statement of Income.

NOTE 13 – SEGMENTED INFORMATION

RESULTS BY BUSINESS SEGMENT

The following tables provide a summary of the Federation's financial results by business segment.

	Personal and Business Services		Wealth Management and Life and Health Insurance		Property and Casualty Insurance		Treasury and Other Support to Desjardins Group Entities		Consolidated	
For the three-month periods ended March 31	2018	2017	2018	2017	2018	2017	2018	2017	2018	2017
