- seek capital protection;
- wish to diversify your portfolio;
- have an investment horizon of 5 years or longer;
- don't plan to withdraw your investment prior to maturity;

HOW DOES THIS SOLUTION DIFFER FROM CONVENTIONAL TERM SAVINGS?

This guaranteed investment differs from conventional term savings in that it does not provide a pre-determined return.

Return on the investment is based on the appreciation of the benchmark securities and can only be known at maturity. Return could be nil at maturity.

HOW ARE RETURNS CALCULATED?

Up to the issue date, your investment generates interest at 0.85% per year. Between the issue date and the maturity date, the return is based on variations in the benchmark prices, up to a maximum of 50.00%. To reduce the effect of a potential market pullback, we factor in the average of the monthly price readings during the last three months of the term. This investment is not eligible for dividends paid on the benchmark securities.

For full details on how return is calculated, please see the Investment Agreement.

Variable return is based on changes in the prices of the benchmark securities and could be nil at maturity. Your capital is guaranteed at maturity.

HOW CAN I KEEP TRACK OF MY INVESTMENT'S PERFORMANCE?

CAN I REDEEM MY INVESTMENT BEFORE THE MATURITY DATE?

The Investment Agreement does not provide the option of converting or redeeming this investment before maturity.
