- seek capital protection;
- wish to diversify your portfolio;
- have an investment horizon of 5 years or longer;
- don't plan to withdraw your investment prior to maturity;

## HOW DOES THIS SOLUTION DIFFER FROM CONVENTIONAL TERM SAVINGS?

With the exception of the guaranteed return, this guaranteed investment differs from conventional term savings in that it does not provide a pre-determined return.

**Return on the investment is based on the appreciation of the benchmark securities and can only be known at maturity.**

## HOW ARE RETURNS CALCULATED?

Up to the issue date, your investment generates interest at 1.30% per year.

Between the issue date and the maturity date, the return is based on variations in the benchmark prices, up to a maximum of 41.50%.

To reduce the effect of a potential market pullback, we factor in the average of the monthly price readings during the last three months of the term.

At maturity, if the portfolio cumulative return	the rate of interest will
is less than 16.50%	be 16.50%
ranges between 16.50% and 41.50%	match the actual cumulative return
is more than 41.50%	be 41.50%

This investment is not eligible for dividends paid on the benchmark securities.

For full details on how return is calculated, please see the Investment Agreement.

**Variable return is based on changes in the prices of the benchmark securities and could be nil at maturity. However, this investment pays a guaranteed return and your capital is guaranteed at maturity.**
